vertible bonds at 85. The total amount to be issued to complete the road to Thirtieth-st. is $660,000, one-half of which amount has already been taken by the stockholders and others interested in its completion. The amount of the capital stock is $500,000. With this and the sale of the balance of their bonds the road can be finished in a few months. It has now become a pressing necessity of residents of the upper part of the city to have some sure and expeditious mode of communication, and this road promises speed and safety, and cannot fail to be remunerative when done.

The Chicago Republican of Wednesday says:

There is no perceptible diminution in the demand for loans, and the money market remains active and stringent, with a fair prospect of continuing in the same condition for some time to come, every branch of trade seeming to want more or less accommodation, though, as is usual, grain operators are the largest borrowers. Our goods merchants still complain of difficulty experienced in making country collections, which would indicate that the interior is not very well supplied with funds, though it seems strange that there should be a scarcity of "filthy lucre" considering the very large amounts that have been sent thither since the commencement of the harvest season. Regular customers are be now accommodated by our bankers, and, in one or two instances, business accommodated by our bankers, and, in one or two instances, outside paper was taken, but generally the legitimate demands of our business community are fully equal to the supply. We quote the loan market active and firm at 10 per cent per annum. Eastern exchange was steady to-day at 50c. premium between banks, and 1-10 discount buying, and 1-10 premium selling over the counter. Buffalo bills were taken at ¼ off, and Oswego at 1 off.

The Philadelphia Ledger says of the coal trade:

The anthracite coal trade having been interfered with in the Schuylkill region by the election, does not feel up as largely for the week as for the two or three previous weeks. The Reading Road brought down for the week 1 2 423 tons, against 110,810 tons for the previous week, swelling the tonnage for the year to 2,980,696 tons, against 2,949,471 tons to the same time last year. The entire tonnage from all the anthracite regions for the week was 204,255 tons, and for the season 1,947,014 tons, against 10,232,163 to the same time last year. The demand for all sizes, except lump and steamboat, continues good, and prices are firm. Following the late advance in prices, wages throughout the Schuylkill region were advanced about 10 per cent, and there was no cessation in work. The advance was unanimously agreed upon, with the understanding that there is to be no further advance in wages until the close of the season. The dealers abroad can now enter the market and make sales. There is reason to believe that the trade will continue brisk until the close of the season for most sizes on the present basis of prices.

BANKING AND FINANCIAL.

FIRST MORTGAGE BONDS OF THE UNION PACIFIC RAILROAD COMPANY, to the amount of Eighteen Million Dollars, have already been sold, and they are now in constant demand for home investment and on foreign account. They pay six per cent in gold, and run for thirty years. At 102, they yield between eight and nine per cent to the investor, and as soon as the issue is sold, if not before, they will doubtless command a much higher rate. As a first mortgage on the longest line of railroad in this country, that is already earning more than its interest liabilities on its way business, and which cost nearly three times their amount, the security is undoubted. Subscriptions will be received at the Company's office, No. 20 Nassau-st., and by John J. Cisco & Son, No. 59 Wall-st., New-York, and by most of the leading bankers throughout the country, whereon new pamphlet, containing a full description of the road and its securities, can be obtained.

A CARD.

TO THE PUBLIC—For many months past the Commercial Editor of *The World* newspaper of this city has been in the habit, through the money columns of that paper, of making strong allusions to me and the railway company I represent, and fearing they might mislead and injure many of my friends, I feel compelled to make this public statement—that in all cases where he has referred to me his statements have been false. Many persons accuse me of aiding in the present money pressure on account of the articles above alluded to, which are false, and without the least foundation. I have never spoken to or had a word of conversation with the person that writes the articles above referred to. HENRY KEEP.

FAMILY MARKETS, OR LIVING EXPENSES IN NEW-YORK.

FRIDAY, Oct. 23, 1868.

Cooler weather changes the vegetable markets. Those articles affected by frost are passing away, and withering in price. Still a few Green Peas are offering at 75c. per half peck. Lima Beans are much higher. Sweet Potatoes are coming from Virginia more freely, and a bushel can be had from boats, foot of Vesey-st., for $1 50. A peach basket full in the market costs $1. A little calculation, or combination, purchasing of first hands, and then dividing, will materially cheapen most articles. A sheep can be had for 8@10c. ⅌ lb, and can be consumed, in the present cool weather, by one family. A hind-quarter of beef at 16@18c. ⅌ lb. will turn out many cheap steaks. Apples, Potatoes, &c., may with the best in by the barrel, the former at $4@$5, and the latter at $2 50@$3 50, according to variety. Eggs are scarce, and higher; Poultry abundant. Mutton was never more plenty; Pork in good supply, with a heavy stock of Beef. Game birds are numerous, and generally lower; Quail are no longer outlaws, but the price (50c. each) nearly shuts them out. Rough fowls are cheap at 18@20c. ⅌ lb. Many good Grapes are in market, selling at 10c. ⅌ lb, 50c. for a ⅌ lb box of Cotton Box. Some extra large Apples have sold at $1 ⅌ doz. Coal continues to advance, some dealers charging $15 for Red Ash Stove. They were fortunate who laid in at $6 50@$7.
