FARMER'S DEPARTMENT.

Head-work in Farming.

It is suprising how much muscular labor is wasted every year, which might be saved, or better directed. This is true in all kinds of business, and not the least in farming. For instance: how many farmers toil on, year after year, with scanty or imperfect implements of husbandry.—The modern improvements, which save much labor, and do the work cheaper and better, they will have nothing to do with. Improved varieties of seed, they hold to be, almost without exception, humbugs.—Draining and subsoil plowing are ranked in the same catalogue; they are labor lost; but manuring cold, wet lands, and plowing them late in summer a few inches deep, and gathering scanty crops—*this* is *not* labor lost! Rotation of crops and manuring lands with reference to the grains or roots to be grown on them, they consider something like book-farming—a very dangerous thing!

We never could see why farmers should not think for themselves, and be able to give a satisfactory reason for every process they undertake. We never could see why farmers should not endeavor to improve in all farming operations, to learn the very best way of doing everything, and then do it so. It is told a certain backwoods farmer, who had not yet found time to clear his stumps from his fields, that his boys complained bitterly of their troubles in plowing and harrowing—the old fashioned "drag" especially troubled them by frequent overturnings while plunging among the stumps to be right side up at every few rods. "Boys," said the enraged farmer one day, "take that harrow over to the blacksmith and tell him to make all the teeth twice their present length, and sharp at both ends, and we'll see what that'll do;" The thing was done: the teeth now pointed both ways, like those of a revolving rake. "Gee up, Bill; now go along."—"But, father it has upset again, as bad as before." "Never mind, boy; go right ahead; it will work well either side up." See, now, what comes from a little thinking! And sure enough, it did work, and the field was harrowed in spite of all the Stumps. We might have selected a more dignified example of the use of head-work, but this homely story will answar our purpose.

In the matter of rotation of crops, there is need of forethought and management.—Some farmers neglect to manure largely, because of its expensiveness, they would like to underdrain more extensively, and to subsoil plow their lands, if these things did not cost more time, labor and money, than they think they can spare. But it costs no more to follow a good system of rotation of crops than it does to carry on a farm without any such plan. Yet such a system may bring the farmer three fold greater and better crops. Nor in devising such a plan has he got to depend entirely on his experience or sagacity. Books and agricultural jounnals are at hand, containing the result of other men's experience, and all he has to do is to adopt such information to the wants of his own case. A very little head work of this sort would pay well. It would pay in clean cultivation. Chess, red-root, quack grass, Canada thistles, butter-cups, daises and what not, would hide their heads; and grubs, wire worms and all manner of insects, would rapidly diminish if not wholly disappear. It would pay in the increased and prolonged fertility of the land, and in more bountiful crops.

Potato Meal.

At a meeting of the Farmers' Club of this city, on the 12th inst., M. B. Southwick, of Canada West, exhibited a preparation of potatoes dried by heated air after being boiled, which simply takes away all moisture from the pulp, leaving it in grains of the size of course gunpowder. He says it can be prepared for a cost of twelve cents a bushel, and reduced in bulk four fifths. This product can be kept as easily as flour, and may be prepared ready for eating in five minutes. The process of cooking was exhibited to the Club over a spirit-lamp, and the product tasted much like ordinary mashed potatoes. To prepare it for eating it is mixed with three times its bulk of water, and stirred until it is of the consistency of mashed potatoes. It is then set into an oven for a few minutes, when it is ready for the table. Fifteen bushels of potatoes make one barrel of this flour, which is stated to keep for years without injury in a dry place:

This is something worthy the attention of our agriculturists. There was a tolerable good crop of potatoes in many places last year, and their price in the *fall* was moderate; but it soon rose to a very high figure, because the rot commenced among them after being stored away. Hundreds of thousands of bushels, we believe, were thus lost. Here is a method of saving potatoes from destruction by winter rot, and at the same time providing a most pleasing, healthful, and nourishing vegetable food, which should not be neglected by those who can, and who should, take advantage of it.

MAKE LABOR PAY WELL.—This should be the leading object with the farmer and can only be accomplished by husbanding the sources of fertility on the farm,

National Hotel.

HELMBOLD'S GENUINE PREPARATION
OF
HIGHLY CONCENTRATED COMPOUND FLUID EXTRACT BUCHU.
For Diseases of the Bladder, Kidneys, Gravel, Dropsy, Weakness, Obstructions, Secret Diseases, Female Complaints, and all Diseases of the Sexual Organs.
Arising from Excesses and Imprudencies in life, and removing all Improper Discharges from the bladder, Kidneys, or Sexual Organs, whether existing in
MALE OR FEMALE.
From whatever cause they may have originated, and no matter of how long standing, giving health and vigor to the frame, and blooms to the pallid cheek.
JOY TO THE AFFLICTED!!
It cures Nervous and Debilitated Sufferers, and removes all the symptoms, among which will be found Indisposition to Exertion, Loss of Power, Loss of Memory, Difficulty of Breathing, General Weakness, Horror of Disease, Weak Nerves, Trembling, Dreadful Horror of Death, Night Sweats, Cold Feet, Wakefulness, Dimness of Vision, Languor, Universal Lassitude of the Muscular System, Often Enormous Appetite, with Dyspeptic Symptoms, Hot Hands, Flushing of the Body, Dryness of the Skin, Pallid Countenance and Eruptions on the Face, Pain in the Back, Heaviness of the Eyelids, Frequently Black Spots flying before the Eyes, with Temporary Suffusion and Loss of Sight; want of Attention, Great Mobility, Restlessness, with Horror of Society. Nothing is more desirable to such Patients than solitude, and nothing they more dread for fear of themselves. Indeed, in many cases, no excessiveness, no speculation, but a Hurried transition from one question to another.
These symptoms, if allowed to go on—which this medicine invariably removes—soon follows Loss of Power Fatuity, and Epileptic Fits—in one of which the patient may expire. Who can say that these excesses are not frequently followed by these direful diseases—Insanity and Consumption? The records of the Insane Asylums, and the melancholy deaths by Consumption, bear ample witness to the truth of these assertions. In Lunatic Asylums the most melancholy exhibition appears. The general impression is, originally sedate and quite destitute—neither mirth or grief ever visits it. Should a sound of the former, which is rarely articulate,
"With woeful measures wan despair
Low sullen sounds his grief begin to swell."
Debility is most to be dreaded, because it brought thousands upon thousands to untimely graves, thus blasting the ambition of many noble youths. It can be cared by the use of this
INFALLIBLE REMEDY.
If you are suffering in this way, or if the above distressing ailments, the Fluid Extract Buchu will cure you. Try it and be convinced of its efficacy.
Beware of Quack Nostrums and Quack Doctors, who falsely boast of abilities and references. Citizens know and avoid them, and save long suffering money, and exposure, by sending or calling for a bottle of this popular and specific remedy.
It allays all pain and inflammation, is perfectly pleasant in its taste and odor, but immediate in its action.
HELMBOLD'S EXTRACT BUCHU
Is prepared directly according to the rules of *Pharmacy and Chemistry.*
With the greatest accuracy and chemical knowledge and care devoted to its combination, the Professor drew so Valuable Works on the practice of physic, and most of the late Standard Works of Medicine.
☞ PRICE ONE DOLLAR PER BOTTLE.
One hundred dollars will be paid to any physician who can prove that the Medicine ever injured a Patient; and the testimony of thousands can be produced to prove that it does great good. Cases of from one week to thirteen years' standing have been effected—the cases of volumes, testimony in possession of the proprietor, vouching its virtues and encrative powers, is immense, embracing names well known to Science and Fame.
100,000 bottles have been sold and not a single instance of a failure has been reported!
Persons addressed by letter, can address an Alderman of the city of Philadelphia, B. T. Helmbold, Chemist, who being duly sworn does say, that his preparation contains no Narcotic, Mercury or injurious Drug, but are purely vegetable.
H. T. HELMBOLD, Sole Manufacturer.
Sworn and subscribed before me this 23d day of November 1854. WM. F. HIBBARD, Alderman.
Price $1 per bottle, or six for $5, delivered to any address, accompanied by reliable and respectable certificates from Professors of Medical Colleges, Clergymen, and others.
Prepared and sold by H. T. HELMBOLD,
Practical and Analytical Chemist,
No 52 South TENTH St., below Chestnut, Assembly Buildings, Philadelphia.
☞ *To be had of J. R. MOYER, Bloomsburg, and of all Druggists and Dealers throughout the United States, Canadas and British Provinces.*
BEWARE OF COUNTERFEITS.
ASK FOR HELMBOLD'S—TAKE NO OTHER.
CURES GUARANTEED.

EVANS & WATSON'S,
59 S. 4th st., Philadelphia.

TRUTH IS MIGHTY AND WILL PREVAIL!
Report of the Committee appointed to superintend the burning of the Iron safes, at Reading, February 27, 1857.
READING, March 4, 1857.
The undersigned, members of the committee, do respectfully report, that we saw the two safes, originally agreed upon by Parrels & Herring and Evans & Watson, placed side by side in a furnace, viz: The Salamander by the paymaster of the Philadelphia and Reading Railroad Company in his office at Reading, manufactured by Parrels & Herring and the Safe in use by H. A. Lantz, in his store, manufactured by Evans & Watson, and put in books and papers securely alike.
The fire was started at 2½ o'clock, A. M., and kept up until four cords of green hickory, two cords dry oak and half chestnut top wood were entirely consumed, the whole under the superintendence of the subscribers, members of the Committee. The Safes were then cooled off with water, at or which they were opened and the books and papers taken out by the Committee and sent to H. A. Lantz's store for public examination, and marked by the Committee.—The books and papers taken from the Safe, manufactured by Parrels & Herring were, in our judgment, damaged fully fifteen per cent, more than those taken from Evans & Watson's Safe.
We believe the above to have been a fair and impartial trial of the respective qualities of both Safes.
JACOB H. DYSERR,
DANIEL S. HUNTER.
Having been absent during the burning, we fully concide with the above statement of the condition of the papers and books taken out of the respective Safes.
G. A. NICOLLS,
H. L. MUHLENBERG,
JAS. MILHOLLAND.
March 28, 1857.

NEW AND USEFUL.
OLEUM LIQUOR.
A Substitute for Linseed Oil.
[PATENT APPLIED FOR.]
THE undersigned offer to the public their Oleum Liquor as an efficient substitute for Linseed Oil, as a thinner for all sorts of Paints ground in Oil, except Venetian Red.
When thinned with the Oleum the Paint will cover better, dry quicker and will be more durable, and when varnished, the paint will have and retain the most glossy appearance; and the elasticity of the thinner will enable the paint to yield to the varnish; and the cracking and peeling off, so common in ordinary varnished oil paints is entirely avoided.
For painting Tin Roofs its equal cannot be found.
The Oleum can be used by itself, or in common with Linseed Oil, Varnish, Japan or Turpentine at the option of the Painter.
It cost is about one-half of that of Linseed Oil, thus considerably reducing the expense of painting.
We confidently recommend it for all purposes mentioned and warrant it to give satisfaction. A liberal discount to the trade.
DIRECTIONS.—Then the paint with the Oleum Liquor and work it well, until it flows freely from the brush.
The brush must be free from all moisture and in-fact ought to be soaked well with the Oleum Liquor previous to painting.
Instead of placing the brushes in water over night, as painters generally do, they ought to be put in the Oleum Liquor, which will greatly facilitate the work.
The paint mixed with the Oleum Liquor will work better if it be allowed to stand from 12 to 24 hours previous to its being used, and then thinned to such a consistency as to work free and easy under the brush.
In the use of Japan, the paint will be rendered still firmer. Mix the Japan first with the paint and then thin it with the Oleum Liquor in the manner mentioned above.
☞ 100 pounds of Paint thinned with the Oleum Liquor, will cover a larger surface than 10 pounds thinned with oil.
The Oleum Liquor is not to be used with Venetian Red, nor with Paint containing any properties of oil.
BREINIG, SAYMAN & CO.
American Paint and Color Works,
Corner 24th and Green Sts., Philadelphia.
Office—N. E. corner Third and Wood sts., Philadelphia, Pa.
☞ We also manufacture Chrome Yellow, Chrome Green, Chinese and Prussian Blue, Vermilion, Scarlet Red in various shades and qualities, either dry or in oil, and warrant them to be equal to any other make, either here or abroad.

OLEUM LIQUOR.
CERTIFICATE.
WE, the undersigned House Painters, hereby certify that we have given the newly invented Oleum Liquor, manufactured by Breinig, Sayman & Breinig, in Philadelphia, an impartial trial, and have found it an efficient substitute for Linseed Oil, for superior to it, we think, in point of only about half as much time considerably reducing the expense of painting. We would therefore recommend the public to its general use, and after it has been tried its superiority over Linseed Oil will be attested to by all.
CHARLES QUIER,
AMOS UNGER,
WILLIAM WOLLE,
EDWARD DENHARD.
June 13, 1857.

I HEREBY certify that I have had House Painting prosecuted lately with the above named Oleum Liquor, and concur in all respects with the recommendation of the above named gentlemen and will here add, that in future I will have no painting executed or performed without the admixture of the above named valuable liquor. Those who may desire to view its effects, will call at my residence, where they can convince themselves of all that is represented of the Oleum Liquor in regard to beauty and durability.

STEAM ENGINES AND BOILER.
THE subscriber is now prepared, with new Machinery, to build stationary engines, from 5 to 100 horse power, upon the late improved plans, and will build to order double and single portable engines from 10 to 40 horse power, Rigged upon cut rouges, with Boiler gearing & pumps all complete and ready for action. Also—cylinder flue and tubular boilers cast iron coal breakers patented in 1856, for threshing grain and cracking corn and now made on a large scale for cracking or breaking coal. Heavy mining pumps and fire engines rigged complete with double acting forcing pumps, in kinds of mill gearing and house casting made to order. Line shafting with any desired sizes of pulleys finished with hangers. Iron planing done, say 24 feet long: a kinds of iron turning heavy press and other screw turned with any desired pitch of thread.
The best Rough Iron threshing Machines, that ever come before the public, cast iron and wooden machines made to order. Lever power, crain or tread power made to order. Also takes orders for the following machinery: Harrison's latest patent grain mill, $1000 offered by the Patentee for its equal. It will grind in good fine meal 35 bushels an one hour. Also bolts and elevators all in order, also Quiggle's Patent Blower, manufactured by G. D. Harris & Co., the most powerful Blower now in use with the least amount of power, one of which will be put in use at the Foundry for exhibition. A lot of the above works will be warranted to be what they are sold for.
Also—Take orders for Scott's Patent Blacksmith Striker, and rights to use them in the counties of Columbia, Montour, Northumberland, Lycoming, Sullivan and Clinton, one of which can be seen at my shop.
LEWIS H. MAUS.

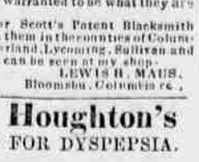
Dr. J. S. Houghton's
GREAT CURE FOR DYSPEPSIA.
THE True Digestive Fluid, or Gastric Juice, Prepared from Rennet, or the fourth Stomach of the Ox, after directions of Baron Liebig, the great Physiological Chemist, by J. S. Houghton, M. D., Philadelphia, Pa.



This is Nature's own Remedy for an unhealthy Stomach. No art of man can equal its curative powers.
It contains no Alcohol, Bitters, Acids, or Nauseous Drugs. It is extremely agreeable to the taste, and may be taken by the most feeble patients who cannot eat a water cracker without acute distress. Beware of Drugged Imitations. Pepsin is not a Drug.
Call on the Agent, and get a Descriptive Circular gratis, giving a large amount of Scientific Evidence from Liebig's Animal Chemistry; Dr. Combe's Physiology of Digestion; Dr Pereira on Food and Diet; Dr. John W Draper, of New York University; Prof. Dunglison's Physiology; Prof. Silliman, of Yale College;
