# FARMER'S DEPARTMENT.

## The Young Farmers

Are a class we sympathize with and feel an interest in, also; and, in the "Valley Farmer" we find some advice to them which is too full of valuable common sense not to copy for their benefit:—

"Honorable and useful is the place the young farmer is to occupy in the coming years. It is important, then, that he should begin well. Much depends upon a good beginning.

"In securing land, stock, fruit, seed, location, implements, and whatever is wanted to make a new farmer, it is important that the best of everything be had.—A good tree occupies no more room than a poor one; it requires no more nourishment from the soil, no more attention. A good animal is generally easier and cheaper kept than a poor one. A good acre of ground is by far the most profitable. Good hay, good wheat, good breeds of stock, are more easily raised, and more profitable than bad. As the whole, we repeat that it is altogether best that every young farmer should start right; hence, we propose to say a little here upon *the selection of his farm.*

"1st. Make it a point, if possible, to locate your farm in some favorable place, as regards markets, roads, respectable society, schools, and opportunities to keep up with the improvements of the age. It is hard to be successful, out of the reach of the world. It is hard to get along well, and cultivate well, both a farm and a family, far away from a mill, a store, a blacksmith-shop, a post-office, a school, a church, or the associations, privileges and excitements of good society. The price of all articles of farm product, depends much upon the nearness to market, and the facilities for transportation. Let these things be duly considered, in selecting a locality for a farm.

"2d. Seek good land; not land adapted especially to the growth of a particular article, unless that be your especial object, but a soil that will be good for all farming purposes. Poor land pays but poorly for labor upon it. It is actually easier to cultivate an acre of good land well, than of poor, and the profit is often double or treble. It is often that young farmers think they must have a large farm, whether it is good or not. This is a mistake. If your means are limited, buy less land. Be sure it is good. By-and by, you can buy more of the same sort. You generally see good, intelligent farmers on good land.—See to it that the soil is good, with water, timber, rock, etc., in convenient and usable relation to it. Be careful that it is not too flat. Good draining is important. It is one of the greatest *desiderata* of good farming. Hence perfectly flat land is objectionable. Neither should it be too hilly, for then its life will be washed out of it.

"3d. It is important that the farm should have upon it a good building site—high, and dry, and healthy, in convenient relations to the whole farm and the road; a site well adapted to all the purpose of a farmer's home.

"4th. It should have, if possible, a favorable spot for a garden and an orchard, contiguous to the building site. These are the main things to be considered, in selecting land for a new farm. We deem it important that the young farmer should give good attention to them, and unite them all as far as possible, in his farm."

## Why is Clover a Benefit to Land?

Because it derives a vast amount of carbon from the air, which the clover supplies to the soil. A dry stalk of clover consists almost entirely of carbon. If a crop of clover is turned under and decays, a large quantity of carbon is distributed in the soil. Even if the crop is not turned under, a large amount is deposited in the land through the roots of the plant.

Carbon forms the basis of charcoal, and by agricultural writers is frequently used synonimously with that word. It is an excellent absorbent, and for this reason is valuable in soils for the purpose of retaining manures and all fertilizing matters.—In Europe and in many places in this country where the soil is poor and manures costly, carbon (or charcoal) is frequently scattered over heaps of manure or other substances emitting offensive odors, and the gasses thus escaping will be absorbent by the charcoal. It is also an excellent absorbent of moisture, and is therefore very valuable in soils. It also renders the soil warmer, and in fine, is one of our most valuable manures. It is not our purpose here to speak of all its excellent qualities but we wish merely to say that in no way can it be so easily and cheaply combined with the soil as by raising clover. Farmers who have tried and seen its effects upon their soil, consider it one of the best ways of keeping their land in a fertile state, by raising it as an alternate crop.

SYRIAN WHEAT.—A gentleman from Alabama received from the Patent Office some spring wheat, from the Holy Land, which he showed last spring. It came to maturity in eleven weeks, producing a large, full head, with a berry in every respect equal to the original. This wheat is reputed to ripen in Syria in sixty days from sowing. It will thus be seen that our climate hastened its period of maturity eleven days.

CATAWISSA, WILLIAMSPORT & ERIE RAIL ROAD.

*Direct Railroad connection between Niagara Falls and Philadelphia. Shortest, Quickest and Cheapest Route from Wheeling and New York to Philadelphia Harrisburg, Pittsburg Baltimore, Washington city, and the South.*

PASSENGER TRAINS leave Elmira daily (except Sundays,) at 7 A. M. passing Williamsport at 10 15 A. M. connecting with Reading Rail Road at Port Clinton, and reaching Philadelphia at 7 30 P. M.

Returning, leave Philadelphia from corner of Broad and Vine streets, at 7 30, A. M. reaching Williamsport, at 5 15 P. M., and arriving at Elmira at 9, P. M.

PASSENGER TRAINS WILL LEAVE

PORT CLINTON FOR HARRISBURG,

Direct, via Dauphin and Susquehanna Rail Road on the arrival of the Mail Train at 4 45 P. M. reaching Harrisburg at 8 P. M.

Returning leave Harrisburg at 7 15 A. M. connecting at Port Clinton with Catawissa train bound west forming the most direct route to Harrisburg, Pittsburg, Baltimore and the South, connecting these points with all Northwestern Pennsylvania and Western New York.

Connecting at Elmira with trains on New York and Erie Rail Road; also, with the Elmira, Canandagua, Rochester, Buffalo and Niagara Falls.

Connecting directly with the Great Western Railroad at Suspension bridge for Detroit, Chicago, St. Louis, &c., thus making the shortest, and the speed route from Philadelphia to those points.

A FREIGHT TRAIN.

Will leave Williamsport DAILY, at 6 30 A. M. for Philadelphia.

Freight train to and from Philadelphia without transhipment, from Reading Rail Road Freight Depot, corner of Broad and Cherry streets.

TRAINS RAIS DANVILLE AS FOLLOWS

Gen'l Sup't

January 3d, 1857—tf

AYER'S PILLS

A NEW and singularly successful remedy for the cure of all Billious diseases—Costiveness, Indigestion, Jaundice, Dropsy, Rheumatism, Fevers, Gout, Humors, Nervousness, Irritability, Inflammations, Headache, Pains in the Breast, Side, Back, and Limbs, Female Complaints, &c. &c. Indeed, very few are the diseases in which a Purgative Medicine is not more or less required, and much sickness and suffering might be prevented, if a harmless but effectual Cathartic were more freely used. No person can feel well while a costive habit of body prevails; besides, it soon generates serious and often fatal diseases, which might have been avoided by the timely and judicious use of a good purgative. This is alike true of Colds, Feverish symptoms, and Bilious derangements. They all tend to become or produce the deep seated and formidable distempers which load the churches all over the land. Hence a reliable family physic is of the first importance to the public health, and this Pill has been perfected with consummate skill to meet that demand. An extensive trial of its virtues by Physicians, Professors, and Patients, has shown results surpassing any thing hitherto known of any medicine. Cures have been effected beyond belief, were they not substantiated by persons of such exalted position and character as to forbid the suspicion of untruth.

Among the many eminent gentlemen who have testified in favor of these Pills, we may mention:

Prof. J. M. LOCKE, Analytical Chemist, of Cincinnati, whose high professional character is endorsed by

JOHN MCLEAN, Judge of the Supreme Court of the United States.

THOS. CORWIN, Secretary of the Treasury.
Hon. J. M. WHITNEY, Governor of Indiana.
N. LONGWORTH, great wine grower of the West.
Also, DR. J. R. CHILTON, Practical Chemist, of New York City, endorsed by
HON. W. L. MARCY, Secretary of State.
WM. B. ASTOR, the richest man in America.
S. LELAND & Co., Propr's of the Metropolitan Hotel, and many others.

Did space permit, we could give many hundred certificates, from all parts where the Pills have been used, but evidence even more convincing than the experience of eminent public men is found in their effects upon trial.

These Pills, the result of long investigation and study, are offered to the public as the best and most complete which the present state of medical science can afford. They are compounded not of the drugs themselves, but of the medicinal virtues only of Vegetable remedies, extracted by chemical process in a state of purity, and combined together in such a manner as to insure the best results. This system of composition for medicines has been found in the Cherry Pectoral and Pills both, to produce a more efficient remedy than had hitherto been obtained by any process. The reason is perfectly obvious. While by the old mode of composition, every medicine is burdened with more or less of acrimonious and injurious qualities, by this each individual virtue only that is desired for the curative effect is present. All the inert and obnoxious qualities of each substance employed are left behind, the curative virtues only being retained. Hence it is self-evident the effects should prove, as they have proved, more purely remedial, and the Pills a surer, more powerful antidote to disease than any other medicine known to the world.

As it is frequently expedient that my medicine should be taken under the counsel of an attending Physician, and as he could not properly judge of a remedy without knowing its composition, I have supplied the accurate Formulæ by which both my Pectoral and Pills are made to the whole body of Practitioners in the United States and British American Provinces. If, however, there should be any one who has not received them, they will be promptly forwarded by mail to his request.

Of all the Patent Medicines that are offered, how few would be taken if their composition was known! Their life consists in their mystery. I have no mysteries.

The composition of my preparations is laid open to all men, and all who are competent to judge on the subject freely acknowledge their convictions of their intrinsic merits. The Cherry Pectoral was pronounced by scientific men to be a wonderful medicine before its effects were known. Many eminent Physicians have declared the same thing of my Pills, and even more confidently, and are willing to certify that their anticipations were more than realized by their effects upon trial.

They operate by their powerful influence on the internal viscera to purify the blood and stimulate it into healthy action—remove the obstructions of the stomach, bowels, liver, and other organs of the body, restoring their irregular action to health, and by correcting, wherever they exist, such derangements as are the first origin of disease.

Being sugar-wrapped, they are pleasant to take, and being purely vegetable, no harm can arise from their use in any quantity.

For minute directions, see wrapper on the Box.

HELMBOLD'S GENUINE PREPARATION
OF
HIGHLY CONCENTRATED COMPOUND FLUID EXTRACT BUCHU.

*For Diseases of the Bladder, Kidneys, Gravel, Dropsy, Weakness, Obstructions, Secret Diseases, Female Complaints, and all Diseases of the Sexual Organs.*

Arising from Excesses and Imprudencies in life, and removing all Improper Discharges from the Bladder, Kidneys, or Seminal Organs, whether existing in

MALE OR FEMALE,

From whatever cause they may have originated, and no matter of how long standing, giving health and vigor to the frame, and bloom to the pallid cheek.

*JOY TO THE AFFLICTED!!!*

It cures Nervous and Debilitated sufferers, and removes all the symptoms, among which will be found Indisposition to Exertion, Loss of Power, Loss of Memory, Difficulty of Breathing, General Weakness, Horror of Disease, Weak Nerves, Trembling, Dreadful Horror of Death, Night Sweats, Cold Feet, Wakefulness, Dimness of Vision, Languor, Universal Lassitude of the Muscular System, Often Enormous Appetite, with Dyspeptic Symptoms, Hot Hands, Flushing of the Body, Dryness of the Skin, Pallid Countenance and Eruptions on the Face, Pain in the Back, Heaviness of the Eyelids, frequently Black Spots flying before the Eyes, with Temporary Suffusion and Loss of Sight; want of Attention, Great Mobility, Restlessness, with Horror of Society. Nothing is more distressing to such Patients than solitude, and nothing they more dread for fear of themselves; no repose of manner, no earnest wess, no speculation, but a Hurried Transition from one question to another.

These symptoms, if allowed to go on—which this medicine invariably removes—soon follows Loss of Power, Fatuity, and Epileptic Fits—in one of which the patient may expire. We do not say that these excesses are not frequently followed by those direful diseases—Insanity and Consumption! The records of the Insane Asylums, and the melancholy deaths by Consumption, bear ample witness to the truth of these assertions. In Lunatic Asylums the, most melancholy exhibition appears. The countenance is usually sodden and quite destitute—neither mirth or griefs ever visits it. Should a sound of the voice occur, it is rarely articulate.

"With woeful measures wan despair
Low sullen sounds his grief beguiled."

Debility is most terrible! and has brought thousands upon thousands to untimely graves, thus blasting the ambition of many noble youths. It can be cured by the use of this

*INFALLIBLE REMEDY.*

If you are suffering with any of the above distressing ailments, the Fluid Extract Buchu will cure you. Try it and be convinced of its efficacy.

Beware of Quack Nostrums and Quack Doctors, who falsely boast of abilities and references. Citizens know and avoid them and save your money and suffering from exposure, by sending or calling for a bottle of this popular and specific remedy.

It allays all pain and inflammation, is perfectly pleasant in its taste and odor, but immediate in its action.

HELMBOLD'S EXTRACT BUCHU

Is prepared directly according to the rules of *Pharmacy and Chemistry.*

With the greatest accuracy and chemical knowledge and care devoted in its combination. See Professor Dewees' Valuable Works on the practice of physic, and most of the late Standard Works of Medicine.

ONE HUNDRED DOLLARS.

One hundred dollars will be paid to any physician who can prove that the Medicine ever injured a Patient; and the testimony of thousands can be produced to prove that it does not. Cases of from one week to thirteen years' standing have been effected.—The mass of volunteer testimony in possession of the proprietor, vouching its virtues and curative powers, is immense, embracing names well known to Science and Fame.

100,000 bottles have been sold and not a single instance of a failure has been reported!

Personally appeared before me, an Alderman of the city of Philadelphia, H. T. Helmbold, Chemist, who being duly sworn does say, that his preparation contains no Narcotic, Mercury or injurious Drug, but are purely vegetable.

H. T. HELMBOLD, Sole Manufacturer.

Sworn and subscribed before me this 23d day of November 1854. WM. P. HIBBARD, Alderman.

*Price $1 per bottle, or six for $5, delivered to any address,* accompanied by reliable and responsible certificates from Professors of Medical Colleges, Clergymen, and others.

Prepared and sold by H. T. HELMBOLD,
Practical and Analytical Chemist,
No. 52 South TENTH St., below Chestnut, Assembly Buildings, Philadelphia.

☞ *To be had of J. R. MOYER, Bloomsburg, and of all Druggists and Dealers throughout the United States, Canadas and British Provinces.*

BEWARE OF COUNTERFEITS.

SALAMANDER FIRE AND THIEF PROOF SAFES.

THE LARGEST ASSORTMENT in the United States.—Warranted to be equal to any now made, and will be sold on as good terms, as can be obtained from any other house in the country. 31

EVANS & WATSON'S,
26 S. 4th st., Philadelphia.

TRUTH IS MIGHTY AND WILL PREVAIL!

*Report of the Committee, appointed to superintend the Burning of the Iron safes, at Reading, February 27, 1857.*

READING, March 4, 1857.

Respectfully report that we saw the two safes, originally agreed upon by Parrels & Herring and Evans & Watson, placed side by side in a furnace, viz: The Safe in use by the paymaster of the Philadelphia and Reading Railroad Company, in his office at Reading, manufactured by Parrels & Herring and the Safe in use by H. A. Lantz, in his store manufactured by Evans & Watson, and put in books and papers precisely alike.

The fire was started at 8½ o'clock, A. M., and kept up until four cords of green hickory, two cords dry oak and half chestnut top wood were entirely consumed, the whole under the superintendence of the subscribers, members of the Committee. The Safes were then cooled off with water, after which they were opened and the books and papers taken out by the Committee and sent to H. A. Lantz's store for public examination, and marked by the Committee.—The books and papers taken from the Safe, manufactured by Parrel & Herrings were, in our judgment, damaged fully fifteen per cent, more than those taken from Evans & Watson's Safe.

We believe the above to have been a fair and impartial trial of the respective qualities of both Safes.

JACOB H. DYSHER,
DANIEL S. HUNTER.

Having been absent during the burning, we fully coincide with the above statement of the condition of the papers and books taken out of the respective Safes.

NEW AND USEFUL.
OLEUM LIQUOR.
*A Substitute for Linseed Oil.*
[PATENT APPLIED FOR.]

THE undersigned offer to the public their Oleum Liquor as an efficient substitute for Linseed Oil, as a thinner for all sorts of Paints ground in Oil, except Venetian Red.

When thinned with the Oleum the Paint will cover better, dry quicker and will be more durable, and when varnished, the paint will have and retain the most glossy appearance; and the elasticity of the thinner will enable the paint to yield to the varnish, and the cracking and peeling off, so common in ordinary varnished paint, is entirely avoided.

For printing Tin Roofs its equal cannot be found.

Its cost is about one-half of that of Linseed Oil, thus considerably reducing the expense of painting.

We faithfully recommend it for all purposes in dicated and warrant it to give satisfaction. A liberal discount to the trade.

DIRECTIONS.—Thin the paint with the Oleum Liquor and work it well, until it flows freely from the brush.

The brush must be free from all moisture and invariably ought to be soaked well with the Oleum Liquor, previous to painting.

Instead of placing the brushes in water over night, as painters generally do, they ought to be put in the Oleum Liquor, which will greatly facilitate the work.

The paint mixed with the Oleum Liquor will work better if it be allowed to stand from 12 to 24 hours previous to its being used, and then thinned to such a consistency as to work free and easy under the brush.

By the use of Japan, the paint will be rendered still firmer. Mix the Japan first with the paint and then thin it with the Oleum Liquor in the manner mentioned above.

☞ 100 pounds of Paint thinned with the Oleum Liquor, will cover a larger surface than 15 pounds thinned with oil.

The Oleum Liquor is not to be used with Venitian Red, nor with Paint containing any proportion of it.

BREINIG, GATTMAN & BREINIG,
American Paint and Color Works,
Corner 24th and Green Sts., Philadelphia.

Office—N. E. corner Third and Wood sts., Philadelphia, Pa.

☞ We also manufacture Chrome Yellow, Chrome Green, Chinese and Prussian Blue, Vermilion and Scarlet Red in various shades and qualities, either Dry or in oil, and warrant them to be equal to any other make, either here or abroad.

June 6, 1857.

OLEUM LIQUOR.
CERTIFICATE.

WE, the undersigned House Painters, hereby certify that we have given the newly invented Oleum Liquor, manufactured by Breinig, Gattman & Breinig, of Philadelphia, an impartial trial, and have found it a sufficient substitute for Linseed Oil,—far superior to it in every respect, at cost of only about half as much, thus considerably reducing the expense of painting. We would therefore recommend the public to its general use, and after it has been tried its superiority over Linseed Oil will be attested to by all.

CHARLES QUIER,
AMOS UNGER,
WILLIAM WOLLE,
EDWARD DENHARD.

June 13, 1857.

I HEREBY certify that I have had House Painting prosecuted lately with the above named Oleum Liquor, and concur in all respects with the recommendation of the above named gentlemen and will here add, that in future I will have no painting operations performed without the admixture of the above named valuable liquor. Those who may desire to view its effects, will call at my residence, where they can convince themselves of all that is represented of the Oleum Liquor in regard to beauty and durability.

J. ISAAC BREINIG.

STEAM ENGINES AND BOILER.

THE subscribers now prepared, with new Machinery, to build stationary engines, from 5 to 100 horse power, upon the latest improved plans, and will build to order double and single portable engines from 10 to 40 horse power, Rigged upon carriages, with Boiler gearing & pumps all complete and ready for section. Also—cylinder flue and tubular boilers cast iron coal breakers patented in 1836, for threshing grain and cracking corn and now made on a large scale for cracking or crushing coal. Heavy mining pumps and fire engines rigged complete with double acting forcing pumps, all kinds of mill gearing and house casting made to order. Line shafting with any desired sizes of pulleys finished with hangers. Iron planing done, say 24 feet long; all kinds of iron turning heavy press and other screw turned with any desired pitch of thread.

The best Rough Iron threshing Machines, that ever come before the public, cast iron and wooden machines made to order. Lever power, chain or tread power made to order. Also takes orders for the following machinery: Harrison's latest patent grain mill, $1000 offered by the Patentee for its equal. It will grind in good fine meal 125 bushels in one hour. Also bolts and elevators all in order, also Boggle's Patent Blower, manufactured by G. D. Harris & Co., the most powerful Blower now in use with the least amount of power, one of which will be put in use at the Foundry for exhibition. All of the above works will be warranted to be what they are sold for.

Also—Take orders for Scott's Patent Blacksmith Striker, and rights to use them in the counties of Columbia, Montour, Northumberland, Lycoming, Sullivan and Clinton, one of which can be seen at my shop.

LEWIS R. MAUS.

Dr. J. S. Houghton's
GREAT CURE FOR DYSPEPSIA.

THE True Digestive Fluid, or Gastric Juice. Prepared from Rennet, or the fourth Stomach of the Ox, after directions of Baron Liebig, the great Physiological Chemist, by J. S. Houghton, M. D., Philadelphia, Pa.

DR. HOUGHTON'S PEPSIN

This is Nature's own Remedy for an unhealthy Stomach. No art of man can equal its curative powers. It contains no Alcohol, Bitters, Acids, or Nauseous Drugs. It is extremely agreeable to the taste, and may be taken by the most feeble patients who cannot eat a water cracker without acute distress. Beware of Drugged Imitations. Pepsin is not a Drug.

Call on the Agent, and get a Descriptive Circular gratis, giving a large amount of Scientific Evidence from Liebig's Animal Chemistry; Dr. Combe's Physiology Digestion; Dr Pereira on Food and Diet; Dr. John W. Draper, of New York University; Prof. Dunglison's Physiology; Prof. Silliman, of Yale College; Dr Carpenter's Physiology; &c., together with reports of Cures from all parts of the United States.
