LITERARY ITEMS.

The new series of *All the Year Round*, to be commenced on the 5th of December, will contain a course of "New Uncommercial Samples" by Charles Dickens, and a novel by Edmund Yates.

Archbishop Trench recently stole the title of Mr. Dana's "Household Book of Poetry" for a publication of his own, and somebody in London has now appropriated the name of the dead American journal *Vanity Fair* for a new weekly paper.

Dr. Lemercier's Popular Lectures recently delivered under the auspices of the Association for the Advancement of Science and Art," in this city, although not as numerously attended as were the celebrated lectures delivered by Prof. Agassiz, some two years since, have proved very instructive and been highly praised by scientific minds as well as the press in general. The Doctor was induced to visit the United States mainly from the advice of D. O. Macomber, esq., an American gentleman resident in Paris, who commenced a correspondence with Mr. Disturnell, the Secretary of the above Association, in April last. Mr. Lemercier is known in France as the favorite pupil of the celebrated Dr. Arnoux, the sole manufacturer of the "Clastic Models," which have obtained a world-wide fame. A collection of these models was exhibited at the last great Exposition in Paris, in 1867, and drew crowds around to hear the daily lectures of Dr. Lemercier. All the Americans who then heard him, and who examined his collection of objects, representing the animal and vegetable kingdoms, expressed a desire that he should visit the United States, and give the lecture-loving community a course of entertainments, in connection with his whole collection of "clastic models," which of itself forms one of the most interesting museums for the admirers of science as connected with anatomy and physiology. The lecturer is an exceedingly easy, plain, and forcible speaker, with no assumption of technical terms, at the same time is one of the best anatomists in France, and a thoroughbred physician. He often addresses an audience composed entirely of surgeons, physicians, and scientific ladies and gentlemen.
