A Thirsty Mule.

The Pioche (Nev.) Record, after recounting the journey of a contractor with a drove of mules from Belmont to Hiko, where no water was to be had for two days, thus describes the extraordinary effect of the scent of the water at Logan Springs on the animals: The whole body began to move forward at a good pace, increasing it as the smell of water grew stronger, until the whole herd was in a keen run. The spring was reached, but the water had to be dipped up in buckets, and it became necessary to knock down a number of mules with clubs in order to allow the men to get to the spring. One mule, crazed with thirst, got away with thirteen buckets of water, and had to be clubbed away in order to allow some other possessor of a pair of long ears a chance. He went out and took a roll, came back, and wanted more. The bucket held four gallons, and he would get away with one at a gulp.

THE WEEKLY SUN.

1776. NEW YORK. 1876.

Eighteen hundred and seventy-six is the Centennial year. It is also the year in which an Opposition House of Representatives, the first since the war, will be in power at Washington; and the year of the twenty-third election of a President of the United States. All of these events are sure to be of great interest and importance, especially the two latter; and all of them and everything connected with them will be fully and freshly reported and expounded in THE SUN.

The Opposition House of Representatives, taking up the line of inquiry opened years ago by THE SUN, will sternly and diligently investigate the corruptions and misdeeds of Grant's administration; and will, it is to be hoped, lay the foundation for a new and better period in our national history. Of all this THE SUN will contain complete and accurate accounts, furnishing its readers, with early and trustworthy information upon these absorbing topics.

The twenty-third Presidential election, with the preparations for it, will be memorable as deciding upon Grant's aspirations for a third term of power and plunder, and still more as deciding who shall be the candidate of the party of Reform, and as electing that candidate. Concerning all these subjects, those who read THE SUN will have the constant means of being thoroughly well informed.

The WEEKLY SUN, which has attained a circulation of over eighty thousand copies, already has its readers in every State and Territory, and we trust that the year 1876 will see their numbers doubled. It will continue to be a thorough newspaper. All the general news of the day will be found in it, condensed when unimportant, at full length when of moment; and always, we trust, treated in a clear, interesting and instructive manner.

It is our aim to make the WEEKLY SUN the best family newspaper in the world, and we shall continue to give in its columns a large amount of miscellaneous reading, such as stories, tales, poems, scientific intelligence and information, for which we are not able to make room in our daily edition. The agricultural department especially is one of its prominent features. The fashions are also regularly reported in its columns; and so are the markets of every kind.

The WEEKLY SUN, eight pages, with fifty-six broad columns, is only $1 20 a year, postage prepaid. At this price hardly repays the cost of the paper, no discount can be made from this rate to clubs, agents, Postmasters, or anyone.

The DAILY SUN, a large four-page newspaper of twenty-eight columns, gives all the news for two cents a copy.
