Taxes—Who Pay Them!

The Internal Revenue derived from direct taxation this year, will reach the enormous sum of over TWO HUNDRED AND NINETY MILLIONS OF DOLLARS!

Who foots the bill?

Manufacturers pay a certain per cent. tax upon all goods manufactured by them, which per cent. they add to the price of the goods, thus clearing themselves entirely—they do not foot the bill. Retailers buy the goods, with the per cent. added, and add thereto the taxes with which they are charged—so by the time the consumer gets hold of them, he has to pay the taxes of every individual through whose hands the goods pass.

The consumers pay the taxes.

Who are the principal consumers of the country?

Farmers and Laborers. THEY FOOT THE BILL!

This is the Revenue Tax. How is it with tax on personal property?

United States Bonds are exempt from National, State, County, Township and Municipal taxation.

Rich men invest their money, in these bonds, and while they draw 7-30 interest per annum on their money, they pay no taxes!

Who pays the interest on these Bond?

Men of moderate means—Farmers and Mechanics.

The withdrawal of the capital invested in Bonds from the Tax Duplicate throws an increased burden upon the remaining Personal Property and Real Estate

Who owns the greater part of Real Estate in the country?

Farmers! They pay the taxes which should fall upon the capitalists.

To collect the Revenue Tax there are employed a host of Assessors, Collectors and Commissioners, who receive large salaries for their services.

Their salaries are paid from the hard earnings of the Farmer and Mechanic.

Their labors could be performed by State and County officers at less than one third the expense, and thus greatly reduce the taxes

This oppressive system of taxation was originated and legalized by the Abolition party, who propose to make the man of moderate means bear its burdens, while the capitalists are exempt, thus creating an aristocracy based on wealth.

The Democratic party propose to make every man pay his proportion of the expenses of the Government, according to his means. They do not recognize the right or justice of creating privileged classes, to be supported upon the industry of the land. They are opposed to the present expensive machinery of collecting taxes, by which a large proportion is eaten up by office-holders.

If you are opposed to paying taxes for men better able to pay them than you are, if you are opposed to the present expensive and unjust system of taxation, make it known at the polls by voting against those who laid this heavy burden upon the working classes.

Apple Champagne.

The following simple and cheap process of making a fair imitation of champagne wine, directly from apples, will doubtless be read with interest by farmers and others who may have the necessary materials in abundance:

The juice is pressed directly from sound apples, without previous grinding, because the bruising of the fruit, in a short time, discolors the juice, and produces such other chemical change, by exposure to the atmosphere, as to prevent the practical working of the process, while the juice pressed from sound apples is nearly as limpid as water. The juice runs directly from the press into a filter, consisting of a suitable box about a foot deep by six inches square, filled with a mixture of pulverized charcoal, and clean sand, and fine gravel, about half and half. A thin layer of straw is put into the box before it is filled with the filtering material, and the bottom of the box is perforated with fine holes. The juice passes through this filter into bottles, which should be immediately corked to exclude the atmosphere, which gives it the appearance of the real champagne; and our informant, who has used the process, assures us that the wine, after remaining in the cellar a while, presents the action and flavor of the imported article, with the advantage of being a much more healthy beverage, while its cost does not exceed two cents a quart bottle, where apples are plenty. Imported champagne, of the commonest quality, cannot be bought in this market for less than two or three dollars a bottle, while its genuineness and purity are very questionable to say the least.

THE CAUSES OF RAILWAY DISASTERS.—A veteran railway engineer, of acknowledged skill, said, some six years since, to a young brother of the profession: "Within ten years you will hear of frequent and fatal accidents on our American railways. They will increase to an extent which will be absolutely appalling. The wood and iron on which the wheels of the trains run last but a certain time. At present they are mostly new, and the danger of which I speak does not exist; but they will continue to look sound to the eye until their texture has been changed by constant hammering of the heavily loaded wheels, and then they will suddenly give way. The first warning the companies will have of their unsoundness, with the exception of the length of time they have been in use, will be some accident to the trains that pass over them. But the time which has elapsed since they were laid will not be regarded. The desire for profit will induce the railway companies to leave them on the track as long as the superintendent finds no defect to the eye, and thus disaster and the discovery of their defective condition will occur at the same moment.

A Washington dispatch says that a farmer near Steubenville, Ohio has made application to the Freedmen's Bureau, at Washington, for one hundred blacks.

FARMS! FARMS!!
TWO SPLENDID FARMS
IN
MADISON TOWNSHIP,
(The Property of David T. Miller,)
Comprising two hundred and eighty-one acres, for sale. The home farm or where the old gentleman resides, is one of the finest farms in Montgomery county. The improvements consist of a large brick house; large bank barn and stabling for horses and cows; a fine spring of water almost at the door together with an excellent spring house
There is also on this farm a steam saw-mill in fine running order, with plenty of timber to keep it constantly at work. Connected with this is the best apparatus in the county for making Molasses from sugar cane.
The other farm lies adjoining—on it there is a large bank barn, large dressed stone dwelling house, and good out buildings.
The land of both farms is of the best quality, and is situated about eight miles west of Dayton and one mile from Wolfcreek pike in an old and thickly settled section of the county.
If sold soon the purchaser can put in fall crops. These farms will be sold cheap and immediate possession given.
