AGRICULTURE.

The farmer's Note Book.

Besides observing the details of farm work, the pupil should observe every phenomenon that occurs within the field of his observation. Creation, both animate and inanimate, lies before him, and, being necessarily much out of doors. observation becomes a subject of interest to him rather than otherwise. It is at all times useful to observe facts and become familiarized with those more immediately connected with his profession; and the relation I have so largely traced as existing between agriculture and the sciences may show the immense extent of the field of observation in which the student may occupy himself. Nor let him suppose that any fact is too trivial for observation, as the minutest may form a connecting link between greater ones, which may exhibit no relationship to one another, but through the minute one. In course of time, observation will enable him to discriminate between phenomena that influence one another, and that stand in isolation; and the discrimination will only be learned in time for every fact will appear to him at first alike valuable and valueless.

It should be kept in remembrance that it is no easy matter to observe phenomena with accuracy. There is a tide in their existence, as in the affairs of men, which, when taken at the proper time, may lead to sound conviction; but if not, to erroneous deduction. How many systems of belief have arisen from improper observation confirm not preconceived notions, the phenomenon is neglected or perverted; but the agricultural student should have no prejudiced notions, and regard every occurrence with calmness, and a determination to arrive at the truth. It is only in such a state of mind he can hope to make the results of actual observation in the field subservient to acquiring a practical knowledge of agriculture.

The facts to which he should first direct his attention, are the effects of the weather for the time on the operations of the fields and their products, and on the condition of the live stock. He should notice every remarkable occurrence of heat or cold, rain or drought, unpleasant or agreeable feeling in the air; the effects following any peculiar state of the clouds or other meteors in the air—astorms, aurora-borealis, haloes, and the like; the particular effect of rain or drought, heat or cold, in retarding or materially altering the labors of the field, and the length of time and quantity of rain required to produce such an effect, on the health or growth of plants, and the comfort and condition of animals.

He should mark the time each kind of crop is committed to the ground—how long it takes to appear above it, when it comes into ear, and the period of harvest; also try to ascertain the quantity of every kind of crop on the ground before it is cut down, and observe whether the event corroborates previous judgment; estimate the weight of cattle by the eye at different periods of their growth, and check the trials by measurements; the handling of beasts for this purpose will convey much information regarding their progressive state of improvement; attend to sheep when slaughtered, weigh the carcass, and endeavor to discover the sources of error committed in estimating their weights.

He should keep a register of each field of the farm; note the quantity of labor it has received, the quantity of manure applied, the kind of crop sown, with the circumstances attending these operations—whether done quickly and in good style, or interruptedly, from the hindrance of weather or other circumstances. He should ascertain in each field the number of ridges required to make an acre, and whether the ridges be of equal length or not. By this he will the more easily ascertain how much dung the field receives per acre, the time taken to perform the work on ridges of different length, and the comparative value of the crop produced on an acre in different parts of the field. The subdivision of the field into acres will enable a comparison to be made of the relative value of the crops produced on varieties of soil in the same field, under the same treatment.

The easiest way of preserving facts is in the tabular form, which admits of every one being put down under its proper head. A table not only exhibits all the facts at a glance, but records every one with the least trouble in writing. The advantage of writing them down is to impress them more strongly on the memory. The tables should consist of ruled columns, in a book of sufficient size of leaf to contain columns for every subject.

There should be a plan of the farm, with every field having its figure, dimensions name, and direction of the ridges, with the number of ridges required to made an acre marked upon it.

To render the whole system of recording facts complete, a summary of the weather, together with the produce and value of the crop and stock, should be made every year to the end of autumn,—the end of the agricultural year. In all these ways a mass of useful facts would be recorded within the narrow compass of a single book; comparisons could be made between the results of different seasons; and deductions drawn which could not be ascertained by any other means.—*Farmer's Guide.*

VARIETY.

A man of small stature proposed to name his child John Smith. A wit remarked that unless the child promised to be bigger than its father, it had better be called *Demi-John.*

There are two kinds of philosophers, those who overrate and those who underrate man.

Few people know themselves, because they find the study of themselves an employment but little calculated to satisfy their pride or their vanity.

Nobleman—one who is indebted to his ancestors for a name and an estate, and sometimes to himself for being unworthy of both.

Some pleasures, like the horizon, recede perpetually as we advance towards them; others, like butterflies, are crushed by being caught.

Let others act as they please; but do thou always act according to thy own judgment, and take heed of being self condemned.

A cloud upon the soul shrouds and darkens the earth more than a cloud in the firmament. The spectacle is in the spectator.

One act of beneficence, or act of real usefulness, is worth all the abstract sentiment in the world.

Ignorance is a blank sheet, on which we may write; but error is a scribbled one, on which we must first erase.

Large minds, like large pictures, are seen best at a distance; this is the reason, to say nothing of envious motives, why we generally undervalue our contemporaries, and overrate the ancients.

Good-breeding is a guard upon the tongue: the misfortune is, that we put it on and off with our fine clothes and visiting faces, and do not wear it where it is wanted—at home!

Every man's actions form a concentric influence upon others; and every deed, however trivial, has some weight in determining the future destiny of the world.

The sweetest flowers are those which shed their odors in quiet nooks and dingles; and the purest hearts are those whose deeds of love are done in solitude and secret.

With love, the heart becomes a fair and fertile garden, glowing with sunshine and warm hues, and exhaling sweet odors; but without, it is a bleak desert covered with ashes.

It is observed, that the most censorious are generally the least judicious; who, having nothing to recommend themselves, will be finding fault with others. No man envies the merit of another who has enough of his own.

The good fruits of human life are the produce of mingled smiles and tears; the fruits of the field require sunshine and rain. As without clouds there can be no rain, and without rain no fruitfulness; so, without sorrow there can be no tears and without tears the heart would soon be barren.

'I never saw such a wind in my life,' said a man in a storm, as he entered a hotel.

'See a wind!' observed another; 'what did it look like?'

'Like!' said the traveller, 'like to have blown my hat off.'

A few days ago, a 'Bowery b'hoy,' the very personification of *Mose* was addressed in an omnibus by an acquaintance who referred to Jenny's merits, and said that she was, beyond doubt, the greatest singer in the world.

'I don't know about that,' replied Mose. 'Who is her equal?' asked the friend.

'Why! why! Tayloe, of course! My! wouldn't she sing *the clothes off a line!*'

The enterprise of establishing a telegraph between Dover and Calais having proved so signally successful, the English are discussing the American idea of girdling the globe with a belt of magic wire. We have little doubt that it will ultimately be done.

PETER HUFFMAN & G. DEOBLER.

Upper Sandusky, June 16, 1850—15-4t.

SCROFULA

If thousands of Cures of Scrofula, Cancers, Syphilis and other impure diseases of the Blood—and if the very SMALL QUANTITY which was used of a Medicine to effect Cures of such Diseases, be any proof of the purifying medical power in the Medicine which has subdued and conquered such Diseases—then there is unquestionable evidence that—

BRANT'S INDIAN PURIFYING EXTRACT

is such a Medicine, in every respect; and there is abundant proof, in *great cures* effected, that ONE BOTTLE of it contains *more* purifying, healing virtue and *medical power* than there is contained in *Four Bottles* of any *sarsaparilla*, or any *other medicine* that has ever been offered for sale. There is undoubted proof in our pamphlets, that by the use of this great *Indian Purifier* they that were DYING yet LIVE—they that were LAME and CRIPPLED can now WALK—they that were SICK, SCROFULOUS, and otherwise diseased, have been HEALED and CURED.

Hundreds—Thousands—

who have used BRANT'S PURIFIER, after having used and tested ALL the *sarsaparillas* and other medicines recommended to cure blood diseases, have *decided* that—

Brant's is the Cheapest,

because *One Bottle* of it has *more* medical, curative matter in it and, in consequence, cures *more diseases* in much *less time*, than *one bottle* of any other medicine.

If, then, *ONE Bottle* of BRANT'S PURIFIER will cure *FOUR TIMES* more disease than *one bottle of sarsaparilla*—"BRANT'S PURIFIER" would be *as cheap at four dollars* a bottle, *as sarsaparilla at one dollar.* But BRANT'S PURIFIER is sold for only ONE DOLLAR a bottle; and as a bottle of it *has* cured, and is *capable* of curing, *Four Times* as much disease as *one bottle* of *sarsaparilla*, therefore, sarsaparilla, in consequence of its *less* power and *less* medical efficacy, should be sold at *no more* than *Twenty-Five Cents* per bottle, to be as *cheap* as the PURIFIER at *One Dollar.*

One Dollar's Worth!

How much CANCER—how much SYPHILIS—how much SCROFULA—will *One Dollar's worth* of *Brant's PURIFIER* cure? Read the following statement, which is a specimen of its power.

CANCEROUS SCROFULA!

This is the case of a *Dying man* who yet lives. He *was cured* of a worse case of Scrofula, by only *Twelve Bottles* of Brant's Purifier, than ever was cured by the use of *Twelve Gallons* of the *best sarsaparilla* that was ever made. Sarsaparilla has not *enough of medical power* to effect the cure of such a *resolutely hopeless* case.

Mr. J. B. HASKIN, of Rome, Oneida Co., N. Y., had *Scrofula four years*—was confined to his bed the *last year*—he was so much diseased and debilitated as to be unable to raise his hand to his head. He had the *best* medical advice—and used *all* of the *best sarsaparillas* to no good effect—*got worse* and *worse* and was considered to be in a *Dying State*, and could not live *twenty four hours* longer, when he commenced using BRANT'S PURIFIER. His *neck was eaten nearly off*, from *ear to ear*—a *hole was eaten* through his *windpipe* under his chin, so that he breathed through the hole—his *ear* was so eaten around that it could be lifted up out of its place, it only holding by a *small piece*—the use of *one arm was destroyed* by two Ulcers—an *Ulcer* under the arm, as large as a man's *hand*, had nearly *eaten* through his side *into his body*. Thus he was afflicted with *Twenty* such *putrid acrid, offensive Ulcers*, on various parts of his person. For further and full particulars *see our Pamphlets.*

Doct. THOMAS WILLIAMS, one of the most skilful physicians of Rome, was called to see Haskin the day before he commenced using *Brant's Purifier*. Doct. W. examined him, and then told him that *all the medicines* in the *world could not cure him*—that his case was

Worse than Hopeless!

Now hear Mr. HASKIN'S statement of cure. He said: Mr. [illegible] received one bottle of *BRANT'S PURIFYING EXTRACT*—THAT BOTTLE enabled me *to get off my bed*—the second bottle enabled me to *get out of the house*—the third enabled me to *walk two miles*, and which I had finished using *Nine Bottles*, I walked out of *Twenty Miles* [illegible] and *three bottles* more effected a perfect [illegible] *good health*

FOURTEEN WITNESSES!

The above facts are certified to by DOCTOR T. WILLIAMS, Mr. G. R. WOOD, of *West Rome Hotel*, Messrs. ROBERT & LEONARD, Druggists, and ELEVEN other respectable witnesses from Rome.

CANCERS CURED.

Mr. O. B. KINNEY, merchant, *Clinton, Oneida county, N. Y.*, informed us that a cancer-doctor in said county was effecting wonderful cures of CANCERS upon the strength of "BRANT'S PURIFYING EXTRACT." A cancer doctor in Greene county, N. Y., is using the same Purifier. Mr. A. B. SETTLE, *Greene, Chenango County, Middle county, N. Y.*, has informed us of an important *cure of a Cancer* of long standing, which was effected on a *certain part* of their place. If, therefore, this PURIFIER *cures Cancer*, by its purifying, healing power, what nature disease of the blood can it not cure? *Seven years' experience and triumph says there are none but what it will cure.*

FEVER-SORE CURED.

The Rev. RICHARD DUNNING, Pastor of the Presbyterian church, Adams Basin, Monroe county, N. Y., wrote to us: "I have just received a letter from Mr. CYNEWY DUNNING, relative to the cure of his Fever-sore. You may depend on what it states, for he is a Christian man and an elder in the church. Some years since he had to have one of his legs *cut off*, to save his life, in consequence of a Fever-sore. The other leg became now affected, and about to be amputated, I recommended BRANT'S MEDICINE. Read the result. He says: '*I have used only THREE BOTTLES of BRANT'S MEDICINE. I placed ALL HOPE, from your recommendation, in that Medicine*, and I can now say that, with the blessing of God, *it has effected a cure of my leg!*'" See Pamphlets for full particulars.

LIVER-COMPLAINT!

Dr. NATHAN HUBBARD, of *Stamford, Conn.*, one of the oldest and most respectable physicians, was attacked with *Liver-Complaint* many years, and was *perfectly cured by using* BRANT'S PURIFYING EXTRACT. We could name numbers of other cases, also cured.

FEMALE WEAKNESSES & COMPLAINTS.

No remedy offered to the public has ever been *half as certain and effectual in restoring* ALL the incidental *weaknesses* and *irregularities* of the sex, as BRANT'S PULMONARY BALSAM. It makes no difference whether the derangement be *suppression, excess*, or other *weakness*—it REGULATES ALL, by *strengthening the* SYSTEM, *equalizing the* CIRCULATION, *and soothing and allaying* NERVOUS IRRITABILITY. ☞ See pamphlets.

CHANGE OF LIFE,

from the *girl* to the *woman*, and the *woman at middle age*—the one case is *accelerated*, and the other *so gradually suppressed*, as to prevent any of the *fatal diseases* that frequently arise in consequence of such change.

Dyspepsia—Sour Stomach!

"ATTICA, Genesee Co., *February* 1, 1848.

"M. T. WALLACE & CO.—*Gentlemen:* I was, for more than a year, afflicted with a disease of the stomach. I could not eat any fat or greasy substance without causing great pain, sickness, and vomiting, and was continually afflicted with a sour stomach. I, as an experiment, tried one bottle of BRANT'S MEDICINE, which, to my utter disappointment, *eased and relieved the usual pain after eating.* I therefore used a second bottle, which has completely cured the disease. I am now well and hearty, and can eat almost anything without being pained, or the stomach becoming sour.

"Yours respectfully, T. S. WILCOX."

Mr. Wilcox is a respectable merchant of Attica.

NURSING SORE MOUTH, LEUCORRHŒA, &c.

"BYRON, GENESEE CO., N. Y., *Oct.* 19, 1847.

"Messrs. M. T. WALLACE & CO.: Some time last winter my wife became so debilitated from the effects of *Leucorrhœa* and *Nursing Sore Mouth*, that she could not lift her child or perform any household labor. Her medical treatment was varied according to the advice and prescriptions of the most eminent physicians, until *our skill* was exhausted in useless efforts. She became *literally* a skeleton, that at the time she commenced taking *Brant's Medicine* she weighed no more than eighty-five pounds; but by the time she had taken *four bottles*, she became perfectly well. The cure is so perfect, that she is now enabled to do all necessary household work, and gained thirty pounds of flesh in four weeks.

"Yours truly, C. B. GALENTINE."

The reader will observe that Mr. GALENTINE says "*our* SKILL." He, we are informed by Z. S. TERRY, Esq., of the same place, has studied medicine.

MERCURIAL DISEASES.

BRANT'S PURIFYING EXTRACT is a *perfect and thorough eradicator of all the effects of* MERCURY, or any of the various preparations of CALOMEL or MERCURY, *from the system*; and it restores the *blood, muscles*, and *all the parts diseased*, to their original, HEALTHY STATE.

GENERAL DEBILITY OF THE SYSTEM!

Mr. A. HOLTSTANDER, merchant, *Oberlin, Lorrain Co., Ohio*, wrote, December 19, 1849, and after having stated how like a charm the PULMONARY BALSAM had effected the cure of his wife's consumptive cough, said: "I have personally used *BRANT'S PURIFYING EXTRACT*, for general debility of my system, and I have no hesitation in saying that it is the best medicine to *RESTORE and* INVIGORATE THE SYSTEM that I have ever used. In *every instance* where we have sold BRANT'S MEDICINES, *they have proved their efficacy, and given the* BEST SATISFACTION."

SALT RHEUM,

and all impure *chronic diseases of the* BLOOD, are always cured by *BRANT'S EXTRACT.*

For Sale by

Cross & Roberts, Upper Sandusky; J. E. Forker, Little Sandusky; H. Frost, McCutchenville; J. Bevington, Wyandot; D. Strow, Carey; J. B. Larwell and R. T. Johnson, Bucyrus; A. P. Lockwook, Marion; [illegible], Kenton.

Upper Sandusky, O.

March 29th, 1850.—3-1y.

ARCHIBALD ALLEN,

FASHIONABLE BARBER,

Upper Sandusky, Ohio.

Shop on Sandusky avenue nearly opposite Finck's hotel.

Leaving to others the business of shaving men's pockets, the subscriber will devote his undivided attention (and it will be his aim to arrive as near perfection as possible) to the business of shaving their faces, shampooning their heads, and cutting their hair after the latest and most approved fashions. Having had many years experience in the business, and being actuated by a desire to please he flatters himself that those who give him a call will go away perfectly satisfied.

Particular attention will be paid to cutting hair and shampooning.

He would respectfully say to his patrons whom he is in the habit of shaving regularly, that if they could make it convenient he would like to have them call and get shaved on Saturday evening instead of Sunday morning, or if on Sunday morning, as early as possible.

ARCHIBALD ALLEN.

Upper Sandusky, July 31, 1849.—32-tf.

BRANDRETH'S PILLS.

THE American people have had the experience of fourteen years to convince them of the efficacy and virtues of Brandreth's Pills.

This medicine has been used in every village town and city, of our widely extended country, and always with the greatest benefit. Many million boxes have been sold, and constantly increasing demand for them affords the most convincing proof of their usefulness.

Brandreth's Pills purifying the body as heavy rains cleanse large cities. The rain collects all accumulations of filth and rubbish, and carries it away by means of the sewers. In the same way the Pills collect and carry off every thing that may injure the healthful action of our varied functions.

They purify, and, by purification, strengthen. Acting immediately on the blood, they powerfully influence every atom of our organization, not only of the present living body, but also those materials held in the blood, so necessary to build up and repair the losses occassioned by the wear and tear of life. Men of eminence in the medical profession have held the opinion that cathartics, constantly administered, would produce inflammation of the mucous membrane of the bowels, then inflammation, then ulceration, and finally death. This may be the effects of some cathartics, but never of the matchless Brandreth Pills. In sickness, a persevering use of them must restore health. Every dose will benefit. Men whose systems have been terribly diseased have taken these Pills every day, for one, and even two years, before they have been perfectly restored and made whole. Brandreth's Pills act upon every part of the system.

They are composed wholly of medicinal herbs and do not contain any mineral or chemical substance, are perfectly harmless to the most tender age or weakest frame; and nevertheless sure to search out the cause of sickness and produce a CURE, what matter may be its character, when taken in time, and in quantities sufficient.

The Brandreth Pills are sold at 25 cents per box, by one agent in every town in the United States, and in almost every city throughout the world. Let all be careful where they buy, or they will obtain a counterfeit. But only of men whose character you know to be above so mean an action as to sell a false for the true Brandreth's Pills. Observe the six signatures of Dr. Brandreth on each box.

AGENTS.—D. & W. Ayres, Upper Sandusky; Joseph Thorb, Little Sandusky; W. H. Jones & Co., Careytown; H. Frost, McCutchenville; F. Bloom, Mexico; Henry Shooman, Crawfordville; Joseph Shilling, Burlington.
