to submit from day to day to a water'al decline; indeed, to effect sales in the present demoralized state of the market is no easy task, and we have to note much irregularity in the sales. The heaviness has been the most apparent in the low and medium grades, especially of Autumn-ground. The liberal arrivals since our last were not unexpected to us, a portion of it detained upon the Canal all Winter, and be ar, not being fresh ground, has in some instances been difficult to place, and this doubtless, has contributed much to the depression. A general decline in Wheat since Monday has also added to the heaviness. We have had a fair inquiry for the West Indies and the Southern States, but the receipts have been in excess of the sales, and we have added somewhat to our stock, but in view of the supplies in the hands of millers, and the stock of Western Flour held by farmers' hands, we think our stock is by below our probable wants up to next harvest; the large fully long of Choice Family extras. A good business has been done in No. 2 and Superfine at the decline. We notice, for the first time this year, some purchases for St. John, N. B., they having Bilberie received their supplies from Montreal via Portland; the business with Halifax has been fair during the season, though moderate for the week under review; a couple of new Flour from the mill of Sheafe & Hall of Augusta, Georgia, has been received during the past week—the quality good, superior to last year; the demand for Europe has been limited; the much lower prices correct have failed to stimulate the export demand, but at a further slight concession in fresh-ground shipping Extras we look for a more active trade; Choice Spring Wheat Extras have been sold at a concession of 25c. ⊕ bbl.; though such Extras the decline has been small, but the stock is now in low hands and prices are low as contrasted with Wheat; the exports of the week are only 10,275 bbls., against 23,350 bbls. the corresponding week last year; to-day the demand for Flour is slight, and the market is easier under the decline; Rye Flour is more active trade; Choice Spring Wheat Extras have been sold at a concession of 25c. ⊕ bbl.; though such Extras the decline has been small, but the stock is now in low hands and prices are low as contrasted with Wheat; the exports of the week are only 10,275 bbls., against 23,350 bbls. the corresponding week last year;
