FINANCE AND COMMERCE

THE CLOSING QUOTATIONS OF MONEY.

Offerings and Sales at the Richmond Tobacco Exchange—Internal Revenue Collections—Foreign Advances.

NEW YORK, Nov. 13.—The Evening Post's London financial cablegram says: The stock markets were quiet but firm to-day. Americans were good, but the close was a fraction under the best. The broker who is a bull on Americans, and whose financial difficulties were referred to in yesterday's cable, failed to-day. Money is distinctly easier. This is partly due to the release of £250,000 in Japanese money from the Bank of England. There is a distinct increase in the amount of American bills offered.

The bear element was to-day wholly engaged in buying stocks to cover short contracts over Sunday, the general firmness in the tone of the market admonishing them to protect themselves. Thus relieved, prices moved quite uniformly upward. There was no great animation to the trading, but some of the buying was called of a substantial sort. The coalers continued to display strength on reports of a pending agreement to restrict the output, and on the more favorable weather. New Jersey Central and Delaware and Hudson each rise 2 points at one time, but both reacted, the latter losing all of its gain. The grangers also showed gains, Rock Island being especially strong. The buying of these stocks was partly in anticipation of a favorable decision by the Supreme Court on Monday in the Nebraska freight rate case. The day's gains in this group of stocks are near a point. Sugar made farther progress towards recovery, and rose at one time 2¾ above last night's close, its net gain being 1⅝. This stock again absorbed about one-third of the day's total transactions, with sales of over 39,000 shares. Rock Island was the only other stock on the list to show sales of over 10,000 shares.

The bank statement created little impression, as it indicated no substantial change in the money market. No withstanding sharp reaction on Monday and again on Thursday, the level of prices for stocks is substantially higher than it was a week ago, and net gains are over two points in a large number of the leading railroad shares. The industrial shares, notably Consolidated Gas and Sugar, have not done so well, and the former is 5⅛ points lower. Sugar shows a net decline of 1⅛, which is a recovery of 3⅝ from the lowest of the week. The recoveries shown in the general list are more noteworthy, in view of the activity and weakness of Sugar. The coalers were quite conspicuous features, breaking heavily on Monday on reports of overproduction and price-cutting, and the continued mild weather. On Wednesday came the decision of the appellate division of the New York Supreme Court affirming the decision of a lower court that the Attorney-General's position was insufficient to warrant an order for the presidents of the coal companies to appear before a referee for a hearing under the anti-trust law of the State. The impression prevailed in Wall street throughout Wednesday that the court's decision had been that the anti-trust law was unconstitutional, thus overthrowing the law as a whole. This law was directed not only against the coal companies, but also against the great industrial aggregations of capital and the stocks of all these corporate institutions moving strongly upward in price on the decision.

Dealers in railroad securities regarded the decision on the long and short haul of great importance, as it tends to enforce the rights of the railways to fix their own rates, as it restricts the authority of the Interstate Commerce Commission. It is also looked to stimulate the advocacy by that body of a railroad pooling bill, which railroad owners and managers are inclined to regard as a panacea for their financial ills.

These two judicial decisions were coupled with reliable information from Washington that the President and members of the Cabinet regarded Spain's reply to United States Minister Woodford's note friendly, and that confidence was felt that there would be no occasion for a rupture with Spain over the Cuban question. The strong and aggressive tone imparted to the speculation by these factors gave hope of sustained upward movement of prices had begun, but Thursday reaction, due to a better comprehension of the scope of the Albany decision on the anti-trust, dashed these hopes. The heavy decrease in November of last year led to some apprehension of similar results this year. But traffic returns for the first week in November relieved apprehension on this score. Fifty roads report an increase of 22.5 per cent. in earnings, but with one more business day this year than last. This is in part due to the coming forward of the cotton delayed by yellow-fever quarantine, and to an increased grain movement induced by higher prices for wheat and to the heavy movement of soft coal. The increases in earnings of the bituminous coal roads for the first week in November ran from 50 to 100 per cent. and over. Confidence is felt in the outlook in the money market, which continues steady. The payments to the Government by the Union Pacific Reorganization Committee, which already amounted to $7,364,425, have created no ripple in the money market, owing to the arrangements for depositing the payments in national banks, which deposits give the bonds in corresponding amounts at Washington as security. The same measures it is felt will prove equally efficient in preventing any flurry at the time of the payments of the remaining amounts due.

Trading in low-priced railroad bonds has been active during the week, and prices have advanced from one to two points in many cases. Total sales, $8,860,000.

Total sales of stocks to-day were 122,990 shares, including Burlington, 5,865; Rock Island, 13,005; St. Paul, 7,655; People's Gas, 5,220; Sugar, 37,810.

MONEY AND EXCHANGE.—Money on call nominal at 1½@2 per cent.; prime mercantile paper, 3½@4½ per cent. Sterling exchange firm, with actual business in bankers' bills at 483½@485⅝ for demand, and at 482¾ for sixty days; posted rates, 483½@485½; commercial bills, 482@482½. Bar silver, 57⅞; Mexican dollars, 45⅛. State bonds dull; railroad bonds firm; Government bonds firm.

WEEKLY BANK STATEMENT.—The weekly bank statement shows the following changes:

Surplus reserve, increase	$ 583,625
Loans, increase	1,2 1,100
Specie, increase	680,300
Legal tender, increase	650,800
Deposits, increase	2,988,700
Circulation, decrease	17,500

The banks now hold $21,765,150 in excess of the requirements of the 25 per cent. rule.

The Financier says: The statement of the New York clearing-house banks for the week ending November 13th, viewed in its general result, is decidedly misleading. The loans, for instance, are reported $1,281,100 higher than the week previous, whereas the loans of sixty-four of the sixty-five banks in the Clearing-House Association have fallen off no less than $5,157,100, the decrease having been more than offset by the increase of $6,418,200 reported by one large bank, which occupies a prominent position with reference to the Union Pacific settlements now pending. Just what the heavy loan expansion indicates specifically is hard to determine, but that it is involved in these settlements in business settlements is doubtless true. The same bank has deposited with the Government something like nine millions of bonds to secure the Union Pacific deposits, which further bears out this assumption. Otherwise, the business of the banks has not been so good. Forty-two of the institutions, individually considered, have decreased their loans. The item of deposits is also of a misleading character, and with one bank eliminated, the loss for the week has been $3,424,200. Adding the increase of $6,413,900 reported by this bank, the gain becomes $2,988,700, as given in the clearing-house totals. Here, too, the Pacific payments are in evidence, but treating the statement in this manner—this is, considering the bank making the greatest changes, as apart from the rest, it is found that the total gain of $1,331,100 in cash made by the banks is to be credited entirely to the sixty-four institutions, as the bank reporting the heavy advance in loans and deposits has almost precisely the same reserve carried the week previous. As the increase in loans and deposits of this institution were identical, it follows that the sixty-four banks lost heavily in loans, decreased their cash $1,300,000 and their deposits $3,425,200. The statement thus treated does not balance, but that is all that can be made out of it. The actual facts are that the banks are gaining money, and as interior ... are overrepelled with cash.

CHICAGO MARKET.

CHICAGO, Nov. 13.—Wheat was slow throughout the day and very irregular. December closed where it did Friday, at 4¼c. over May, and at 94½c. December shorts showed some uneasiness, growing out, it is said, of the strictness of the inspection department. Corn was dull, and prices lost ⅛@⅜c. on the day. Oats showed a decline of ⅛c. The market closed at the lowest figure. Provisions were featureless, a shade lower than Friday.

NEW YORK DRY GOODS MARKET.

NEW YORK, Nov. 13.—The dry goods market closed without change in any direction from the dull conditions which have prevailed during the week. There is a dearth of store trading, and the mail orders throughout the entire week have been light. The weakening in cotton goods shows no abatement. Print cloths closed particularly weak, with little interest taken by buyers. In woollen and worsted goods the situation is unchanged, it being impossible to purchase any large amount of goods for 1898, since sellers will not exhibit styles on market prices as a rule. There is a slight amount of trading in light weights. In staple cottons the market shows no decided firmness. Print cloths close very dull at 2 5-16c.
