TALLOW fairly active and firmer; sales of 200 hhds. City at 8 1-16@8¼c., and 42,000 lb out-of-town stock at 7⅞@8¼c.

WOOL—The market very quiet. New Spring California Wools are arriving quite freely, also Texas, chiefly the latter, which were some 900 bales, against 1,450 bales received the past three days. The advices from the West represent the new clips of fleece to be in good condition. At the public sale to-day by Messrs. John H. Draper & Co. only 290 bags were sold out of the lot advertised, 446 being on offer. Withdrawn, 200 bags sold were Texas and Mexican, these sold at 26@26½c. For Carpet Wool the market is quiet, stock light. New Spring California, although rather short in staple this season is in good condition, and is selling promptly as desirable stock for full goods now being manufactured. Texas met with ready sale at full prices. Prices in the country are not thoroughly established for fleeces. The sales embrace: 20 bales Fall California, 22½c.; 5,000 lb Extra Pulled, 47½c.; 15,000 lb Fall California, 23c.; 5,000 lb Unwashed Fleeces, private terms; 5,000 Western Fleeces, 52c.; 5,000 lb Extra Ohio, private terms; 12,000 lb Eastern Texas, 33c.; 13 bales Spring California, 32½c.; 7,000 lb Scoured Fall California, private terms; 1,000 lb Texas, private terms; 23,000 lb Scoured Lambs, 72c.; 50 bags Lambs, private terms; 1,000 lb Fleeces, private terms; 25,000 lb Super Pulled, 36c.; 20 bales Australian, 52½c.; 23 bales Fall clip California, private terms; 10,000 lb California Spring, 34c.; 5,000 lb Black, private terms; 5,000 lb Super Pulled, 42c.; 20,000 lb Mestiza, 75c. Domestic receipts for the past three days are principally California and Texas, some 1,450 bales.

N. Y. WHOLESALE PRICES OF COUNTRY PRODUCE

FOR THE WEEK ENDING JUNE 9, 1874.

[EXPRESSLY FOR THE N. Y. TRIBUNE by our own Reporter.]

General Directions.

Send only good articles. The freight and other expenses eat up poor goods. Put everything in good order. An attractive look secures examination, and often makes a sale where a dirty package or a slovenly appearance fails. Pack securely, so that the contents will not allow the contents to change about. Use plenty of clean dry oat straw with eggs. Mark plainly with pencil—legible and plain is best—and note contents on the box or bag, stating the amount, also. Send a letter at the same time stating what is sent, the route, time, &c. An invoice or list should also be inclosed in bbl. or box. Always state the number of packages. Secure for yourself a reputation for the goods, put in best shape, so that your mark is in demand.

BEANS AND PEAS.

Receipts of beans for the week, 1,393 bbls.; do. last week, 1,002 bbls.; same week last year, 345 bbls. Exports of beans, 750 bbls. Exports of peas, 4,043 bush. Receipts of beans continue liberal, and quotations for mediums are easier. This is hardly the season of the year for high prices to be sustained. Our markets are full of low-priced produce from the early crops, and old potatoes are again declining. Marrows have ruled firm under the strong export inquiry, but at the close sellers seem more anxious to realize. There is besides some anxiety as to how the stored stock of marrows will carry into warm weather. The crop of last season did not cure quite as hard as is desirable for that class of beans and an attack of sweat would be apt to prove damaging. The moderate call for either mediums or marrows is for prime grades. Common sorts are slow even at the inside figures. Pea beans unchanged. Kidneys are only nominal. Canadian peas are quiet at about old rates for bulk or bags. Green peas have advanced, and choice parcels are firmly held at $2 25. Southern S. B. peas scarce and higher. We quote:

BUTTER.

Receipts for the week, 22,105 pkgs; do. last week, 17,340; do. same week last year, 21,605 do. There has been a fair demand during the week, and to-day there is a free sale for prime rolls butter. Some dealers call the market dull, but we hear the murmur only in sections of the city that are more or less oppressed by the rather heavy supplies. There is a somewhat steadier tone to prices, although the buyer has the benefit of current quotations. Fresh pails and fine State tubs, and for that matter first-class firkins, are quoted throughout the trade at 30c. State stock is perhaps a little easier than it would be were it not for the increased supply of Western. The latter runs poor; the best marks show the effect of suddenly melting hot weather. Since our last, State and Western have declined about alike, but the market closes weaker for best styles of Western than for under grades of State. There are a good many small State dairies that are not of ready-selling quality. Packages with white hay-made bottoms are hard to move above 25c. There is a good inquiry for shipping firkins, but they must be all yellow to bring the extreme. Western firkins do not yet suit, in quality, the ideas of shippers; very few full yellow are included in the receipts. Well made tubs are in demand; finest are about 1c. off since last week; poor may be quoted as low as 23c., but the general style is pretty even. We quote:

Orange Co. pails, prime	30@ —	State firkins	29@30
River pails, do	30@ —	State Welsh tubs, prime	28@29
Common pails	24@28	State Welsh tubs, other	25@27

CHEESE.

Receipts for the week, 42,153 boxes; do. last week 32,488 do.; same week last year, 49,649 do. Exports past week, 34,108 boxes; do. last week, 20,094 boxes; same week last year, 33,719 do. Gold closes at 110½. Liverpool Cable, 71s.; London Cable, 72s. There has been more or less weakness exhibited throughout the week; shippers have managed to obtain a shade of concession in nearly every large purchase compared with last week, and to-day there is a visible decline of fully ¼c. Dealers have kept stock moving, and by allowing the exporter to discriminate closely in quality the surplus is not of any special moment. Cheese is arriving in poor condition; for two or three days have ruled and heated many lines of factory to an extent that will leave no money ahead of country paid figures. Western cheese is not meeting its former favor with the home trade. Many of the Ohios are tough and otherwise off, and 14½c. is an extreme figure. At Little Falls on Monday business was brisk; sales about 5,000 at 14@14½c. for fair to fine factory; 12@14c. for dairies. At Utica the market was dull, with a range of 13⅝@14¾c.; most of the best brands, 14½c. Of the stock brought at the above interior figures very little will clear the buyer here if present quotations hold. We quote:

State fac., fancy	@15¼	State, poor to good	6 @12
State Factory, fine, full cream	14¾@15	Skims	5 @ 7
State Fac., fair	14 @14½	Ohio Factory, fine	14 @14½
State Fac., half skim'd.	6 @12	Ohio Factory, good	13 @13½
State Dairy, fine	12½@14	Ohio Factory, poor	6 @10

DRIED FRUITS.

Receipts for the week, none; do. last week, 456 packages; same week last year, 917. For the moment the apple market has lost its buoyancy, though there are dealers who feel assured that its revival may be safely promised. The main causes of the moderated tone is, right upon the opening of what promises to be a liberally supplied fresh fruit season. Germany has sent 244 bbls. of dried apples to be placed on this market, and further supplies of Californian are virtually in sight. Besides, there are rumors of Chicago sending some this way. Buyers consequently are not so anxious to operate, and the present outlook of the market is dull. Small fruits are fairly firm. Peeled peaches are almost nominal. Peanuts firm, with an upward tendency for very choice; receipts of peanuts past week, 2,000 bags. We quote:

EGGS.

Receipts for the week, 12,352 bbls.; do. last week, 11,764 do.; same week last year, 15,808. The market has ruled weak, and most dealers allow loss off, even at the low figures. There has been a session of very merchants with the intent of devising a plan for which receive may be protected against unjust counting out. The committee selected propose to institute a board of inspectors, so as to give egg a set of grades, similar to some other produce, and enforce the buyers to regulate their purchases according to rule. It looks as though it will be a difficult matter to adjust for an article that fluctuates so often and suddenly in quality as eggs do, particularly as, at the time when a regulation like the proposed one would do most service to sellers, buyers have a rather independent position. Still the committee think they can arrange the matter, and will report during the present week. Quot
