SPECIALTIES AGAIN GIVEN PROMINENCE

New York, March 16. — Specialties were again more prominent than the active or seasoned issues at the outset of to-day's market operations. The minor Coppers, Alaska Gold, Central Leather and Motor Shares made general gains, while leaders were slightly lower or unchanged. Later Bethlehem Steel and Texas Company were added to the list of higher prices, the former advancing two points. Reading's uncertain course reflected current gossip connected with its future dividend prospects. Some very substantial recessions were recorded by American stocks in London, notably Canadian Pacific, Reading and Union Pacific.

DOLLIE E. REA,
Secretary.

LEGAL NOTICES

Operative on and after April 15, 1915.
G. W. M.

CANNERIES

Note: The word "FACTORY" as herein used shall mean any structure, building, shed or place used for, or in connection with the preparation, canning or packing of food stuffs.

PLACE:

(a) Factories preparing food products shall be located so as to be able to receive and distribute their products promptly without danger of damage or deterioration and shall not be located in the immediate vicinity of any other industry which may be objectionable because of noxious odors given off or because of the use of decomposed products.

(b) No factory shall be located in an insanitary place or in a place which cannot be made sanitary or maintained in a sanitary condition.

(c) No factory shall be located where the refuse from the plant cannot be disposed of in a sanitary manner, and where such refuse will of itself become a nuisance to the factory.

(d) No litter, waste, refuse, or decomposed products shall be allowed to accumulate in or around the buildings or yards. All liquid waste shall be conducted from the building by means of suitable drains. Gross by-products suitable for other usage, as pea vines or corn husks, may be stacked or placed in silos separate from the building but must be surrounded by a tight drain to intercept any oozing liquid. Other by-produts may be retained only if rendered unobjectionable. Raw tomato skins, cores, etc., shall not be permitted to be piled near the factory, nor to be distributed on the land within 500 yards of the factory unless thinly spread.

(e) All factories used for the manufacture of food products shall be clean, properly lighted and ventilated. The ceilings shall be of sufficient height to permit ample clearance for all work under any suspended shafting, hangers, piping, galleries, etc. Where natural light and ventilation are insufficient provision shall be made for augmenting the same by mechanical methods. The interiors for all working rooms shall be kept a light color by paint, whitewash or other suitable method.

(f) The floors shall be tight and pitched to accommodate the machinery —that is, to confine overflow and waste to the smallest area. Gutters shall be provided to carry all waste to sewers.

(g) Grating of sufficient height to insure free drainage shall be provided around cookers, washers and at other places where overflow is unavoidable.

(h) At least one seat shall be provided for every three females employed or permitted to work and all such seats shall, during working hours, be conveniently accessible to the workers for whose use they are intended.

OPERATION:

(a) Any person, firm or corporation now engaged, or intending to engage in the canning industry shall demonstrate to the satisfaction of the Department of Labor and Industry that the proposed factory and its preparation for operation conform to the regulations issued by the Industrial Board for the government of such business. If such conditions have been met the Commissioner shall authorize the operation of said factory by a certificate of permission good for one year only and revocable at any time for failure to obey said regulations.

WATER CLOSETS AND PRIVIES:

(a) Water closets and privies shall be ventilated to the outside and properly lighted and a separate hopper or seat shall be provided for each twenty-five persons using said water closet or privy. Where water closets are in factories they shall be provided with proper flushing apparatus and connected with a sewer. Privies will not be permitted in or in direct connection with a building.

(b) The entrance to every water closet or privy compartment shall be screened by a vestibule or by a stationary screen at least two (2) feet wider than the entrance door, extending to a height of at least six and one-half (6½) feet.

(c) water closets and privies, including the walls, floors, ceilings and fixtures shall be kept clean and where a privy is used sufficient slack lime or equivalent disinfectant shall be used each day to prevent odor.

(d) Every privy vault shall be built with watertight wall extending at least two feet below and one foot above the surface of surrounding ground, being so covered as to exclude flies.

(e) Every privy shall be ventilated by an unobstructed opening to the outer air, other than the door, which has an area of at least one hundred and forty-four (144) square inches. Every privy shall be provided with a door. Every window and ventilating opening of a privy shall be protected by screens to prevent the entrance of flies, and every door shall be provided with a self-closing device to keep it closed.

(f) Dry walks shall be provided from the plant to outside privies.

PROTECTION AND SAFETY:

(a) All power driven machinery shall have all exposed collars, set screws, shafts, couplings, clutches, keys, pulleys, gearing, belts, revolving and reciprocating parts or projections guarded as specified in Safety Standards, Volume I, No. 1 of the Industrial Board, covering the Transmission of Power.

(b) All platforms, balconies, and galleries six feet or more above floor level, floor openings, and hoistways, fly wheel and pulley pits, and all other openings in floors and platforms where the safety of persons below is involved, shall be guarded as specified in Safety Standards, Volume I, No. 2, of the Industrial Board, governing the erection, construction and maintenance of Standard Railings and Toe Boards.

(c) All lathes, planers, milling machines, boring mills, metal saws, keyseating machines, shapers, slotters, gear cutter, drill presses, etc., guarded as specified in Volume I, No. 4, of the Rules and Regulations of the Industrial Board of Machine Tools.

(d) All factories above the first story shall be provided with proper ways of egress, or means of escape from fire, sufficient for the use of all persons accommodated, assembled, or employed therein; and such ways of egress and means of escape shall be kept free from obstruction, in good repair, and ready for use, at all times; and all rooms above the second story in said factories shall be provided with more than one way of egress, or escape from fire, which shall be placed as near as practicable at opposite ends or side of the room, and leading to fire escapes on the outside of such factories or to stairways on the inside, where any of said factories is designated for the use of or occupancy of fifty or more persons, the external doors of the same shall open outward, and be so contructed or arranged as to afford, when open, an unobstructed external passageway of not less than five feet in the clear, and shall have landings, inside of the external doorways, of dimensions not less than four feet between the external doors and the adjoining stairways, said landings to be of a width not less than the stairway approached thereto.

SANITARY PROVISIONS:

(a) A sufficient supply of cool potable water shall be provided at all times. The use of common drink cups is prohibited.

(b) No wearing apparel not in actual use shall be permitted in workrooms either where food is prepared or placed in containers.

(c) No person suffering from a communicable disease shall be employed. Persons working in food factories shall be subject to medical inspection under the supervision of the Department of Labor and Industry.

(d) Outer clothing, including head covering used by food preparers shall be of washable material and shall be kept clean at all times
