CHEESE.

Receipts for the week, boxes; do. last week, 52,820 do.; same week last year, 67,501 do.; exports past week, 56,522 boxes; do. last week, 44,638. Gold closes at 116¼. Liverpool cable quotations, 51@52s. London do., 53s. At Little Falls the market showed a decided improvement; sales of factory at 12@12¾c. for fine, and 11@12c. for dairies. At Utica the market was very strong, with a range of 12@13½c. for factory and a bid of factory at 14¼c. July cheese sold at 10c. Our market has advanced but is not yet in full sympathy with the high interior markets. The middle country advance has done little else than excite our trade, but it has made many holders of fine late-made stock very firm in their views. The home trade seems to have come into market all in a body, and for the past few days they have taken fancy lots at full prices. The strongest feeling is in last of August and September cheese. Many dealers seem to feel that the market has a sure upward course, and such a result would be very desirable after the unusual pause in our August markets. We quote:

FRUITS.

Receipts of peaches for the season, to date, 4,430 car-loads. Peaches will not more than outlast this week as a commercial item. White preserving varieties continue fine and very small. Smocks are hardly fine enough to meet the taste that has been spoiled by the former large receipts of fine fruit, and shippers are not over anxious to handle them at the close. Some good samples of "Pullens," from Delaware, have brought high prices; $1 50@$2 for good to prime, and a few extras sold as high as $3 per basket. Very good fruit is winding up small but of good quality. We still have small shipments from Newburgh. Plums are very scarce; copper and small blue are all that remain, and these are high. A few quinces have appeared, but they are not in stock. Grapes have gone largely into use, stimulated by the low figures, and future arrivals may do better. Bartlett pears are very scarce and show a large advance. Seckels never looked so well as they do this season. Flemish Beauty ripen very handsomely. Duchess begin to move. A car load and a half of California Duchess, Beurre d'Anjou, and White Doyenne have arrived. Receipts of late pears will be probably regular from the Pacific. Cranberries are coming daily, with some good enough to quote at $4@$5 ⅌ bbl., but fancy are not plenty. Prime apples are in demand and will do better when properly cared for out of the way. Crab apples are inquired for. Quotations:

HOPS.

Receipts for the week, 1,365 bales; same week last year, 1,188. We are now in a better condition to do business, and though prospects at present are not specially bright, there is a little more confidence expressed. Emmet Wells's circular of Sept. 24 says:

"The new crop is now secured. It is believed we have about one-third more hops than last year, or, say 120,000 to 130,000 bales. The quality, as is always the case with a large crop, is considerably mixed; that is to say, it is uneven. More than usual trouble has this season been experienced in procuring pickers; and, with a knowledge and belief that low prices will rule, growers have taken less pains than usual in picking and curing. Fifteen cents per pound is to-day the highest attainable cash price here for best new hops. A good fair hop will bring 12c. Anything of very ordinary quality is not in demand at present at any price. The week opened with rather a slow business, but toward the close showed more animation. Dealers here and in the country are offering to contract with brewers at 14@15c. for large or small quantity, goods deliverable at any time within the next 60 days. We haven't heard of any important transactions at these figures, and are inclined to think brewers are holding off in anticipation of still lower prices. The prices is now at about what it costs to produce the article, and unless it impromptu on the part of brewers to try to crowd the price lower, as it will only be the means of driving farmers out of the business and bringing about another season of extravagant prices. Exporters are still holding off, and as advices from abroad continue favorable for large crops, there is little or no hope for an export demand.

MEATS.

Veal calves have kept pretty steady. Lambs about as before. New-Jersey pork is high, owing to the scarcity of city hogs; New-Jersey light quoted at 12@12¼c.; extra heavy to heavy, 11¼@11¾c. We quote: New-Jersey and Bucks County milk calves, 9@9½c. ⅌ lb.; State do., 8½@9c.; buttermilk calves, 6@6c.; grassers, $6@$8 ⅌ head. Lambs quoted at 7@7½c. for ordinary sizes. MILK.

The daily average receipts at the various points of distribution were as follows: By Erie Railway, 135 cans cream, 3,825 do. milk; Harlem Railroad, 2,430 do.; New-Haven Railroad, 1,000 do.; Hudson River Railroad, 775 do.; Midland Railroad, 1,075 do.; miscellaneous near-by routes, 2,400 do. At the Harlem Railroad platform the daily average prices were as follows: Sept. 21, $1 25; Sept. 22, $1 50; Sept. 23, $1 25; Sept. 24, $1 50; Sept. 25, $1 50; Sept. 26, $1 50; Sept. 27, $1 50; average, $1 46½ per can of 40 quarts; average last week, $1 71½; same week last year, $3 25. The week has been an extremely dull one; prices again greatly below this date last year. Nearly every day a large quantity has been left unsold.

POULTRY AND GAME.

The supply of New-Jersey comes forward very liberally, and city killers are refusing to use the poor grades of Western that arrive. Western chickens do not pay for shipment, 14c. is the best price now quoted. Old turkeys are dull, and young ones must be of good size to bring full quotations. Ducks and geese unchanged. THE DRY GOODS TRADE.

TUESDAY, Sept. 28, 1875.

DOMESTIC GOODS.—Business with the commission houses was slow in the early part of the week, but became more active toward the close, when there was an improved undertone in the market, owing to the great number of buyers, and the cool weather gave an impulse to the demand for Fall goods. The demoralization of the market consequent on the action of the Chicago jobbers in quoting prints below agents' prices, continued for a day or two, when on the receipt of more favorable news from the West the orders for prints that had been canceled by them were renewed. The operations of the Western jobbers have lately been light, but the orders from the South have been considerable, and near-by jobbers have commenced their purchases. Through the ordinary channels a liberal amount of goods was distributed in parcels comparatively small. The most important event of the week was the great print sale by H. B. Claflin & Co., on 60 days net, or 1 per cent off 30 days, or 2 per cent off 10 days. The sales were very successful, between 4,000 and 5,000 cases having been disposed of the first day, Thursday.

The jobbing trade has, on the whole, opened well. Buyers continued extremly cautious, and purchases were made only in amounts necessary for early trade requirements, though some houses by means of price concessions distributed considerable quantities of assorted merchandise. Retailers from near-by sections appeared in the market in greater force than they have done this season, and a few days' cold weather will give greater activity to trade.

COTTON GOODS.—Seasonable fabrics have had a moderate movement from first hands, and certain leading corporations disposed of large quantities of brown and bleached cottons on private terms. Jobbing sales reached a large aggregate amount at irregular rates, while agents' prices were nominally unchanged.

BROWN SHEETINGS AND SHIRTINGS of all weights were in steady demand from first hands, and three and four yard makes had large distribution. Such brands as Lawrence LL, Massachusetts BB, Tremont CC, &c., are sold up to receipts. Jobbing sales were large, but prices unprofitable. The following reductions were made: Pequot sheetings 7-4, 22½c.; 8-4, 25c.; 9-4, 27½c.; 10-4, 32½c.; Androscoggin 9-4, 26½c.; do. 10-4, 30c.

BLEACHED SHEETINGS AND SHIRTINGS ruled quiet in agents' hands, but some lately reduced and medium qualities were in fair demand. The jobbing trade was fairly active, but quotations were lower. Reductions made were: Pequot 5-4, 16c.; do. 6-4, 22½c.; do. 7-4, 25c.; do. 8-4, 27½c.; do. 9-4, 32½c.; do. 10-4, 37½c.; Williamsville 4-4, 12½c.; Androscoggin, 9-4, 30c.; 10-4, 35c.

COTTON FLANNELS were active in agents' and jobbers' hands, some low grades being closely sold up to production.

CHEVIOTS, of the best qualities, are closely sold up, but the lower grades are not strong.

COLORED COTTONS ruled slow. Small lots of tickings and hickory stripes were taken, but dyed ducks, denims, and apron checks were dull. Ticks were weak, and the following reductions were made including Amoskeag ACA, which agents now hold at 22½c.: do., 36-inch, 37½c.; do., A, 19c.; do., B, 16c.; do., C, 14½c.; do., D, 13½; do., awning, 19c., and Pearl River, 20c.

CORSET JEANS AND SATTEENS were less active in both agents' and jobbers' hands, but prices were well sustained.

ROLLED JACONETS were slow, and several makes were sold by jobbers at 5¾c., less 5 per cent by the package. Masonville were reduced to 6c.

CAMBRICS AND SILESIAS were moderately active at unchanged prices.

PRINT CLOTHS were quiet, and extra standard 64s were nominally quoted at 5⅛@5¼c.

PRINTS—Plaids and dark madder fancies were in good request, several styles being sold ahead. Allen's print works stopped their machines on Saturday. Desirable novelties are being rapidly produced by the different works, which are well received by the trade. The jobbing trade has been satisfactory, and was benefited rather than otherwise by Claflin's great drive, which stimulated the demand for really choice new prints. Peabody solids were reduced to 7½c. by Messrs. Denny, Peor & Co.

GINGHAMS continued active. Agents hold orders for future delivery of Lancaster, Renfrew, Bates, Amoskeag, Plunkett, Mohawk, Gloucester, Glasgow, &c. Messrs. Walter Brown & Son, No. 77 Franklin st., are now agents for the Gloucester, Mohawk, and Wamee ginghams.

DRESS GOODS were largely distributed on account of previous orders, and were in fair demand in woven and printed makes. Prices are unchanged, and Pacific, Manchester, Washington, and Carleton fabrics are sold up to receipts.

SHAWLS were quiet in first hands, but both woolen and Ottoman makes were liberally sold by jobbers.

SKIRTS—Felt skirts were sold to an important aggregate amount, the near-by trade taking a large share. Balmoral skirts were also in good demand, but relatively less active.

HOSIERY, though slow in the beginning of the week, became more active at its close, when shirts and drawers and fancy hosiery, moved more freely. Wool hose and half hose were dull. Heavy cotton hosiery half hose were in moderate request. Cardigan jackets were in good demand, but unbias scarfs, and other knit woolens were inactive.

CLOTHS are quiet, and sales are chiefly confined to small amounts of favorite makes of black and fashionable colors.

OVERCOATINGS—Fancy and plain faced beavers were sold in assorted lots to a fair amount. The demand for plain fabrics has been stimulated by the late seasonable weather, and prices have been generally firm.

REPELLANTS moved freely. Choice fancy styles have been sold to a fair aggregate by agents at current prices. Plain black and a few exceptional colors have been offered in some cases at reduced rates. Jobbers have had a satisfactory trade.

LADIES' CLOAKINGS ruled free. Agents have made liberal sales of both plain and fancy, and all-wool Scotch plaids for ladies' suits were taken to a fair aggregate.

CASSIMERES—The demand for new and tasteful styles has been sufficient to maintain prices and prevent accumulations. There was considerable inquiry for job lots of old patterns at greatly reduced rates.

DOESKINS were inactive, though agents effected moderate sales of new favorite makes.

WORSTED COATINGS have met with ready sales. The better qualities maintain prices, though inferior makes are rather weak. Samples of several well-known makes of spring weight worsted are shown by agents.

SATINETS were rather slow, though plain and printed were in moderate demand.

KENTUCKY JEANS—Particular makes of fine grades had fair sales, and some agents had a moderate trade in low and medium qualities, though on the whole the distribution was not quite up to expectations.

PLANNELS—Different grades of plain scarlet and white had moderate sales. Shaker flannels and Dowetts, various colors of twilled flannels, and fancy and shirting styles were in good demand.

BLANKETS were in increased request. Both agents' and jobbers' sales were liberal.

CARPETS, both ingrains and ingrain, were in steady request, and prices were well sustained. Old styles continued to be sold at rates less than corresponding new patterns.

FOREIGN DRY GOODS—Both staple and fancy imported goo is have had a moderate movement from first hands. Aggregate sales from jobbers' hands were liberal.

Dress goods had a large distribution from first hands, and the balance of colored worsteds imported by White, Brown & Co. Among other lines of Empress cloths and merinos from Messrs. Passavant & Co. was closed out at auction by Townsend, Moulant & Co. Black and colored cashmeres and merinos, black drap d'ete, and pure mohairs, and British and Continental fancy plaid tartans were in good demand. Green of dress fabrics were well sustained. Black silk velvets were considerably neglected, and colors, especially dark cloth shades, moved in moderate quantities. Black and colored velvet and black turquoise and crapes were in steady demand. Ribbons are slow, but sash and bonnet ribbons in desirable styles are firmly held in agents' hands. Linen goods ruled quiet, housekeeping makes being in moderate request, while shirting linens, handkerchiefs, &c., were slow. White goods, except embroideries, quilts, and curtain nets, were quiet. There was a better demand for real laces, and large lines of yak, guipure, Valenciennes, thread and point laces, barbes, &c., were sold at auction by Wilmerding, Roguet & Co., and brought good prices. Vail barges are in good demand. Cotton velvets and velveteens were in moderate request at former prices. Men's wear woolen goods were unimproved, and all faced goods were sluggish. Cloths, doeskins, &c., were dull, but cloth jobbers took small parcels of heavy worsted coatings at low figures.
