The week closes upon a quiet and easy money market, the more general rates on call being 3½@4 on pledge of the usual collateral, with some isolated transactions at higher rates. Late business was on the basis of 2½@3 per cent, to get the two days' interest to Monday. The rate on pledge of Government bonds was three all the way through. The market for commercial paper closed dull, and leading brokers report rates as follows:

The bank statement for the week ending last night reflected the outgo of greenbacks to the New-England states in preparation for April settlements, the deposits being decreased about half a million in excess of this run-down in legal tenders. The changes in the other averages were of no special importance or significance. As a result of the movement of the week, the banks now hold in lawful money, in excess of the 25 per cent required by law, $9,999,325, against $11,732,500 last week, a decrease of $1,733,175. The nominal variation in loans reflects the standstill in all business departments. The following table shows the condition of the New-York City banks this week and last:

Government bonds were quiet, the only sales to-day being of Coupon New 1865s at 118⅞, Coupon New Fives at 118½, and Currency Sixes at 126⅛, the latter issues selling a week ago at 126⅞. Considering the weakness of gold and the uncertainty of what Congress will authorize in regard to a future bond, prices have been maintained remarkably steady. The strongest of the list was Ten-forties. We annex closing street quotations:
