THURSDAY, June 15—P. M.

The stock market to-day may fairly be regarded as a Lake Shore market, since the transactions in this stock reached a larger proportion of the whole business than probably on any previous day, being 57 per cent of the entire transactions; and the cliques in it are entitled to great credit for their display of pluck and enterprise in daring to so boldly mark the price up from the opening at 54⅝@54½ to 55⅝. Of course the very strength of the market for this stock induced a large covering by the late bears, and it is believed that the cliques sold considerable quantities of stock above 65; but this does not detract from the credit to which they are entitled, because except for their bold buying at 54½@55 the buyers above that price would probably have been sellers at 54 and under. The recent movement in Lake Shore may be set down as the boldest speculation of the year, because it is an indisputable fact that if the Company can earn expenses at present rates, then at those prevailing last January—which were then 50 per cent below the average two years ago—it could have then earned at least 20 per cent dividends on the stock of $50,000,000, even admitting all that is claimed in the talk about its local business. It may be proper to say that a very large proportion of what is called local or way business on this road, and which enters into the annual reports as such, is done for both passengers and freights at as low rates per mile as is the "through" business (between Buffalo and Chicago), for the very good reason that its principal "local" points are subject to as strong a competition as are its terminal points. The idea which is industriously circulated, to the effect that the present railway war is the result of a pure and simple stock-jobbing operation, shows gross ignorance of the real business situation. The simple fact is that New-York Central was perfectly willing to allow Baltimore and Philadelphia to enjoy a lower rate than New-York until the opening of inland navigation made it impossible for it to longer control rates, and then the Central reduced rates on East-bound freights by railroad to prices lower than ever before, still leaving the rates on West-bound freights favorable to the Southern cities. That the latter rates to-day are as low from New-York as from Baltimore and Philadelphia is due to the action of the Erie Railway and not to the New-York Central. Michigan Central, which publishes its gross earnings, and shows a large increase in the same over 1875, because of its closer and more intimate connection with the New-York Central through the Canada Southern, makes a gain of only ¼ per cent over the closing sale of yesterday, although at one time it sold up to 48½. The transactions in the remainder of the list were so unimportant as scarcely to call for comment further than to say that it was sympathetically strong. The exceptions to this rule were Ohio and Mississippi, which was weak, declining to 15⅜, but rallying to 16⅛, and New-Jersey Central, which sold from 82⅛ to 80⅞, on a report that at a meeting of the directors held on Monday last it was decided to pass the usual quarterly dividend for the current quarter. If this report be true, the secret has been well kept for four days, and has afforded the insiders a good opportunity to market their stock. Western Union and Pacific Mail, which came next to Lake Shore in amount of transactions, were simply steady within a range of ½ per cent. Prominent operators in the new management of Pacific Mail have been giving out in a friendly and confidential way for the past few days "points" on which to buy, but the bait does not seem to have been swallowed very ravenously. The market closed apparently firm at a reaction from the highest points of the day. The sales for the day amounted to about 93,000 shares, and the advances at the close over yesterday's final sales ranged from ⅛ to ¾ per cent, viz.: Atlantic and Pacific Telegraph and Erie, each ⅛; St. Joseph Preferred, Illinois Central, Michigan Central, and Western Union, each ¼; C., C., C. and I., Del., Lackawana and Western, Missouri Pacific, and North-West Preferred, each ½; Rock Island ⅝, and Lake Shore ¾ per cent. Ohio and Mississippi declined ⅛, and N. J. Central 1 per cent.

All the prominent shares are dull in San Francisco and some of them decidedly lower. The decline in the Bonanza shares, especially of Consolidated Virginia, continues to occasion remark and, in some instances, anxiety. We know of no cause for the downward turn in this stock unless it be the fact that repairs now going on both at the mill and in the mine will materially reduce the month's yield.

The following table of prices of the prominent gold and silver mining shares, as received by telegraph from San Francisco, is furnished by William Ward, Drexel Building:

Mon.	June 12	June 13.	June 14.	June 15.	*Changes.*

* Ex dividend, $2 per share.

The weekly meeting of the managers of the Bank of England was held to-day, but no change was made in the minimum rate of discount, which still stands at 2 per cent, this being ¾ higher than the out-door rate for three months' bills. During the week the bank made a gain in bullion of £847,000, and to-day the further sum of £141,000. The proportion of reserve to liabilities, which was last week 50¾ per cent, is now 51⅞. This was the fortnightly settling day on the London Stock Exchange, and, so far as appears, passed without discomfort to operators. The British Consols were steady, and United States securities firm, the sixty-sevens selling at 108, ex interest. Erie was steady at 12¾ for Common and 18½ for Preferred, New-York Central dropping to 96. The foreign news had no effect on the gold market, and the home news was without influence. Yet the market was strong and sales were at 112¾@112⅝, limited in amount. On gold loans the borrowing rates were 2, 2½ and 3 per cent, but in the afternoon holders paid 2 per cent to have balances carried. The foreign exchange market was dull but firm at quotations. The selling rates were on the basis of $4 87½@$4 88 for 60 days' bills, and $4 89½@$4 90 to the £. The Assistant Treasurer paid out $36,000 in coin interest and $20,000 in redemption of called bonds. The day's operations at the Gold Exchange Bank covered: Gold cleared, $20,378,000; gold balances, $1,453,000; currency balances, $1,641,104. The principal gold quotations were:

10 00	112¾	113	112⅞	1 00	112¾	2 30	112⅝
10 00	112¾	1230	112⅞	130	112⅞	300	112⅝
10 00	112¾	1230	112¾	200	112⅝		

The closing quotations of foreign exchange were:

	60 days.	3 days.

The supply of capital offering for use is simply enormous and constantly increasing, for money is coming here from the interior cities, and in a fortnight the interest obligations of the Government as well as many States and corporations will be due, which will swell the existing plethora largely. Funds almost go begging, and borrowers can dictate their own terms. As low as 1½ has been accepted on United States bonds, evidencing the fact that bonds are more profitable than demand loans. To the Stock Exchange the rates are 2@2½. Mercantile paper sells freely, though the discrimination by buyers is strict, and moves slowly in proportion as the grade is below choice. Bill brokers report rates as follows:

CURRENCY PAPER.	Sixty days.	Four months.

Time loans are done at the usual low charges. The following are the rates of exchange on New-York at the undermentioned cities to-day: Savannah, ¼ premium; Charleston, selling, 1-16@⅛ premium; bank, ¼ premium; New-Orleans, commercial, ¼; bank, ⅜; St. Louis, 75 premium; Cincinnati steady, par, and Chicago par. The United States Treasurer to-day received $1,200,000 National bank notes for redemption. The Customs receipts at Washington to-day were $370,000. The Internal Revenue receipts footed up $380,000. The following is the Clearing-house statement to-day: Currency exchanges, $55,959,232; currency balances, $2,785,069; gold exchanges, $8,231,189; gold balances, $906,148.

There was continued strength in United States bonds. Coupon 5-20s of 1867 advanced to 123¼, coupon 5-20s of 1865, old, to 116⅛, and ditto, new, to 120¾, registered 6s of 1881 selling at 120¼, and registered 10-40s at 118⅛. The firmness of gold here, and the strength of United States bonds abroad, contributed to the present high local prices. We annex closing street prices:

	Bid.	Asked.		Bid.	Asked.
