NEW USE FOR BUTTER

Prevents Boiling Over.

Coffee frequently produces biliousness and all of the accompanying distress, such as loss of appetite, dyspepsia, bowel troubles, etc. A lady from Ill. says: "I had used coffee many years, and though I took great care in making it, felt its ill effects very seriously. It made me bilious and robbed me of my appetite for breakfast.

"I always had trouble with dyspepsia while I used it. I was told by physicians that I had catarrh of the stomach, and came to believe there was no help for me. Two years ago I quit the use of coffee and began to use Postum Food Coffee. At first I missed the stimulant, although the taste of the food coffee was delicious.

"In a few days I forgot all about my coffee in the satisfaction I derived from Postum, and soon found that my appetite returned, the bilious condition and dyspepsia disappeared, so that now I am proud to say that at the age of seventy-five years I enjoy my food as well as when young, and all my dyspeptic symptoms and stomach trouble have gone.

"These troubles had been with me for most of my life, and it is really remarkable that I am now so perfectly well. To say that I am grateful does not express it. Once in a while I find a person who does not like Postum, but I always find it is because it has not been properly prepared. There is but one way to make good Postum, and that is to make it exactly according to directions, allowing it to boil full fifteen minutes, not after it is placed on the stove, but after the real boiling begins. Use a small piece of butter, about the size of a pea, to prevent boiling over." Read "The Road to Wellville," in pkgs. "There's a Reason."
