BRITISH TRADE REPORTS.

LIVERPOOL, April 27.—The circular of the Liverpool Cotton Brokers' Association in its weekly review of the cotton trade says: The cotton market was active on Friday and Saturday, and a large business was done at advanced rates, but the demand on Monday fell off and has since continued limited with declining prices. American was in active request on Friday and Saturday and advanced ½d.; it has been dull and irregular since, and closes generally ½d. below last Thursday's quotations. For Sea Island there has been more general inquiry, but prices are without change. Futures opened in good demand, with a limited supply offering, and prices advanced 1½d. to 3½d.; but since Monday the market has been flat, and there has been a considerable desire to sell, amounting at times almost to pressure. The decline from the best points of the week is 9½d. for nearer and 11½d. for more distant positions.

A leading grain circular says: The declaration of war by Russia has caused much excitement in the wheat trade, and prices have daily advanced at all the markets of the kingdom, the average improvement from the beginning of the week to yesterday being 4@5s. per quarter. The leading European markets have advanced quite as much. This market to-day was well attended, and a large business was done in wheat at an advance of 1s. per central on the currencies of Tuesday. Flour was 5s. per sack, and 2s. 6d. to 3s. per barrel dearer. Maize was in active demand, and an advance was quoted at 3s. per quarter.

HOPS—Mr. Emmett Wells reviews the week as follows: There are no new features to report. The receipts are light, and shipments to London only about 400 bales for the week. Prices remain quotably unchanged. Brewers continue to buy sparingly. Stocks here are considerably reduced, but, as is generally known that there are plenty of hops left in the country brewers and dealers do not worry. Our London letter this week is little more encouraging for shippers, but it is believed that nothing short of an absolute failure of the coming crop, either in England or Germany, will rid us of our surplus, or help us on our new crop. Receipts for the week, 603 bales; total since Sept. 1, 1876, 70,107 bales; total for same period in 1875, 70,315 bales; export clearances for the week, 4,5 bales; total since Sept. 1, 1876, 36,17 bales; total for same period in 1875, 39,413 bales. State, 10@17c; Eastern, 10@13c.; Wisconsin, 8@12c; Yearlings, 6@10c.; Olds, all growths, 4@6c.; Californians, 12@17c.; Oregon, 12@17c.
