TRIM $10,000 MORE FROM STATE'S DEBT

An additional ten thousand was trimmed from North Dakota"s bonded indebtedness at a joint meeting of the state auditing board and the state board of university and school lands yesterday. On motion of State Treasurer John Steen, $10,000, being the complete balance outstanding of the state university refunding bonds, was retired from the interest and sinking fund.

The complete bonded indebtedness of North Dakota is now $462,000, or approximately sixty cents per capita. Four years ago the state's bonded debt was $937,300. AGREEMENT IS REACHED WITH DEFACTO HEADS

Activities of Villa in Northern Mexico Have Delayed Deliberations

TERMS WERE PROPOSED BY THE PRESIDENT

Bandit Chief Still Pounding Away for Possession of Chihuahua

MAING PROGRESS.

El Paso, Nov. 25.—All noon reports showed that Villa's attack upon Chihuahua City is progressing.

Atlantic City, Nov. 25.—Representatives of the de facto government and the United States came to an agreement today relative to the handling of border matters.

The plan as finally determined follows closely that outlined by President Wilson some time ago.

Its Terms.

The agreement provides:

First—The American troops now in Chihuahua, commanded by General John J. Pershing, shall be withdrawn within 40 days from the approval of the protocol by the respective governments, provided that within that time the conditions in that part of Mexico have not become such as to endanger the American border. In such event the time shall be extended.

Second—The Mexican army shall patrol the Mexican side of the border and the American army the American side, but this shall not preclude co-operation between the two forces to preserve peace upon the border.

Left to Commanding Officers.

Third—It shall be left to the commanding officers of the armies on the border of both armies to enter into such arrangements for co-operation in operations against bandits whenever it is possible.

The right of American government to send troops across the border in pursuit of bandits was not incorporated in the protocol, but was made the subject of a supplemental memorandum.

Opposed Violation of Country.

The Mexicans had contended earnestly against signing any agreement in which they appeared to sanction what they termed the violation of their national territory. It was the agreement of the Americans finally to content themselves with stating the attitude of the United States in a separate memorandum that induced the Mexicans to sign the agreement.

Villa and Carranza stood in the way of an earlier agreement being reached between the United States and the heads of the Mexican de facto government.

Villistas are making a three-sided assault on Chihuahua City, according to a report reaching the United States department agents. Counsel General Carcia stated the message telling of the beginning of the third day's battle had not yet reached him.

CRUCIAL STAGE.

El Paso, Texas, Nov. 25.—Reports reaching the United States government here indicate that the crucial stage in the momentous battle for the possession of Chihuahua City had been reached.

Before dawn, General Trevino, the Carranza commander, engaged the bandits, who are camped northeast and east o fthe city.

RAILROADS HARD PUSHED; NEED CARS

Estimated More Than Billion of Capital Needed Each Year for Ten Years

CHAIRMAN PROUTY SEES END OF STATE CONTROL

Mineapolis Millers Are Handicapped by Lack of Cars to Move Flour

Kansas City, Mo., Nov. 25.—Government ownership of railroads was discussed here by Charles A. Prouty, in charge of the interstate commerce commission valuation of railroad properties, and Carl R. Gray, president of the Western Maryland railroad.

"We have in this country a railroad problem, because we are trying to discharge governmental functions with private capital," declared Mrs. Prouty. "The railroad problem isn't any nearer settled than it was when the act to regulate commerce became a law back in 1887."

"In the railroad situation we are confronted by four outstanding conditions," Mr. Gray said.

"These are: The practical stoppage of railroad construction, the embargoes on traffic, the car shortage and the unpopularity of railroad investment.

"We all are aware that the situation is to be canvassed before the Newlands commission. We're going to advocate the practical abolition of the state in the making of a railroad rate and we'll ask for national incorporation of railroads. Next we're interested in the labor situation. The greatest step this country ever has taken toward government ownership was the passage of the Adamson eight-hour bill.

NEED CAPITAL.

Washington, Nov. 25.—Alfred P. Thom, counsel for the railroad's executive committee, declares that the railroads will need $1,250,000,000 additional capital annually for the next ten or twelve years to increase their facilities to handle the country's expanding commerce.

Hovey of the Washburn-Crosby Milling Co. today predicted that flour mills in this, the country's greatest milling center, may be forced to close down indefinitely. Mills are now running only part time, because of the car shortage. It is admitted that closing the mills would increase the flour shortage and boost flour prices.

Dickinson, Nov. 25.—While going to her home Monday evening, Miss Mary Blank of this city was knocked down and slightly bruised by Frank Rausch, who jumped from behind a building and struck her.
