OILS ARE DOMINANT IN STOCK TRADING

Petroleum Shares Scored High Marks—Sinclair is Still Leaping Forward on Exchange.

NEW YORK, May 8.—Petroleum shares dominated today's trading to a greater extent than at any time in the history of the stock exchange, their movements assuming extravagant proportions and causing consequent misgivings in conservative circles.

Almost as a whole, however, the market was strong, shippings receiving further bullish attention with a score of peace industrials, mostly at substantial gains while a revival of interest was noted in all classes of rails.

In several noteworthy instances, such as Texas company, Atlantic Gulf, American Woolen and Sinclair Oil, absolute high records were established. Among secondary rails today's quotation constituted maximum quotations for five to 15 years.

Texas company was again the star performer, adding 20 3-8 points to yesterday's 16-point gain at 269 7-8; Atlantic Gulf rose 11 1-2; American Woolen 7 1-4, and Texas & Pacific 7 1-4.

Barrett company, Cuban American Sugar, Mexican Petroleum, Associated Oil, Pan American Petroleum, General Motors, Industrial Alcohol, Marines and American International embraces the other strong issues at extreme gains of 2 to 9 points, but United States Steel retained barely a point of its 2 1-4 point rise to 101, its top price since the elimination of the extra dividend.

Marine and traction bonds were strong with French municipals the general list, including liberty issues, manifesting only moderate firmness on small dealings. Old United States 2s rose 1-2 per cent on call.

EXHIBITION OF WAR CURIO AT WASHINGTON

Century's Record of Fighting Inventions to be Shown to the Public.

WASHINGTON, May 10.—Strange devices used in the war, and how American ingenuity is turning some of them to peace-time uses will be a part of an educational exposition of the interior department that will be held in Washington for two weeks beginning May 19. The exposition, however, will not be confined to these exhibits, but it is planned to include a display of the department's ramifications into the life, safety and progress of the country resulting from the haphazard addition of bureaus from time to time. The various exhibits will make the exposition of national scope.

How a number of the bureaus of the non-military department did their bit in the war will be shown by the displays revealing the development of a machine to detect the presence of the enemy and spoil his plans, the recovery of hidden mineral treasures needed to forge war engines, and the improvement of super-poisons. Along with these achievements, the exposition will disclose inventions of private American citizens, some of which were regarded of such importance that the issuance of patents was withheld under the ban of secrecy until the signing of the armistice.

Interesting Devices

The patent office, a bureau of the department, also will exhibit historical models of epoch-making American inventions, and from its cobwebbed recesses as secret as the grave will resurrect certain foibles or fancies of famous men. Abraham Lincoln, for instance, designed a contrivance to facilitate the passage of vessels over shallow water, and his invention will be shown at the exposition.

During the war the bureau of mines, another wing of the department, devoted almost its entire attention to war problems. The geophone, a listening device invented by the French to detect enemy tunneling and turned over to America for further development, will be a part of the bureau's display. This device is to be used in locating entombed miners, and a further development in the making is a proposed international code of rappings to enabled entombed men to talk through solid earth. The gas masks, the making of shrapnel shells, and the methods of American oil drillers, which kept a continuous stream of liquid fuel flowing into the war zone, will be shown by working models.

Development Work

The geological survey already is using the airplane in making topographic maps, and this new method will be illustrated at the exposition. Models also will show undeveloped regions investigated by geologists, topographers and engineers, and the same regions after they have completed their work and shown the natural resources and the possible development of the territory.

How America has shown its gratitude to its war heroes and their dependents will be demonstrated in the pension bureau display. In line with Secretary Lane's farms-for-soldiers plan, the bureau will show that the country in the past has always advocated such rewards, this bureau having adjudicated claims for lands and issued land warrants to soldiers for more than 68,000,000 acres. Lincoln, Grant, Sherman, Sheridan and Farragut were granted land for service through the bureau, and the applications signed by them will be on exhibition. Important historical papers signed by Washington, Jefferson, Hancock, Franklin and by Lafayette and Rochambeau also will be on display.

A Geyser In Action

The general land office of the department conducts the largest realty concern in the world, and its notable history, including the picturesque part of opening townsites and Indian reservations, disposal of millions of acres of land and accounting of millions of dollars, will be depicted. The nation's play-grounds of national parks, under the jurisdiction of the department, will not be overlooked, an exhibit being a working model of a Yellowstone geyser in action, with another showing the rugged character of the proposed Roosevelt national park.

The government railroad that is being built in Alaska will by model show something of the progress being made in the penetration of that pioneer country by the Alaskan engineering commission, as an advance agent of civilization and prosperity. Engineering achievements of the reclamation service will demonstrate how arid lands have been engineered into providing full dinner pails for more than a quarter of a million people. The department's efforts, by its bureau of education, to stamp out illiteracy will be shown by another exhibit.

In the Oil Fields

CONTINUED FROM PRECEDING PAGE

General Adds to Its Organization

Following its usual policy of building an organization around the most efficient men obtainable, the General Refining company has added to its organization K. M. Lindemann, who for the past several years has been the Tulsa representative of the Kyoleum company. Mr. Lindemann enters upon his new duties immediately, and will be assistant to J. E. Hill, who is in direct charge of all purchases.

At Beggs.

The Solo Oil company is drilling at 1,190 feet in 14-15-11.

The same company is spudding in No. 1 Tiger in 11-14-11.

The Benna Oil company is spudding in No. 2 Isaac Deer in 11-14-11.

The Hallino Oil company No. 1 Henry Hill in 23-15-11 is drilling at 1,800 feet.

The same company No. 3 Joe Blunt in 11-14-11 is drilling at 1,100 feet. They are building a rig for No. 4 Blunt.

At Ruby

Adams & Bioner No. 5 Crosby in the northeast of 18-17-13 has the sand from 1,720 to 1,730 feet and is estimated at 20 barrels.

Southeast of Tulsa

The J. E. Crosbie No. 2 Hickory in the center of the northwest of the northwest of 16-19-13 is drilling at 500 feet.

At Nowata

The Carter Oil company No. 1 Toby Johnson in the southeast quarter of 11-26-16 is dry and plugged at 610 feet.

At Haskell

The Ames Oil company No. 1 Roe in the northeast of 2-16-18E is dry and abandoned at 1,450 feet.

At Kellyville.

The Amo Oil company well in 34-17-11 is drilling at 500 feet.

The use of soft coal will make laundry work heavier this winter, Red Cross Ball Blue will help to remove that grimy look. At all grocers. 5c.—Adv.

CORNS PEEL OFF PAINLESSLY

There's Only One Genuine Corn-Peeler—That's "Gets-It"

There's only one happy way to get rid of any corn or callus, and that's the painless-peel-off way. "Gets-It" is the only corn remedy in the world that does it that way—effectively, thoroughly. Why get down on the floor, tie yourself up into a knot, and have to fool with "package" plasters, greasy ointments that rub off, sticky tape, and digging knives, and scissors, when you can peel off your corn or callus in one complete piece, peacefully and surely, with magic, simple easy "Gets-It"? It takes 2 or 3 seconds to apply "Gets-It"; you use 2 or 3 drops, and that's all. "Gets-It" does the rest! Get rid of that corn-pain at once, so that you can work and play without corn torture. Be sure to use "Gets-It." It never fails.

"Gets-It" the guaranteed, money-back corn-remover, the only sure way, costs but a trifle at any drug store. M'f'd by E. Lawrence & Co., Chicago, Ill.

"2 drops of 'Gets-It'—Corn is doomed."

SAVE ON AUTO SUPPLIES

OUR POLICY—"SATISFACTION OR YOUR MONEY BACK"

RADIATOR CEMENT — This is carefully prepared for hydraulic radiators, also plugs, putty. Is of high grade and proven quality. 49¢

"TIMESCO" TIRES

Guaranteed for 4000 Miles

On the basis of quality, "TIMESCO" Tires are cheaper by far than any other standard make; which accounts for the great quantity we sell.

The "TIMESCO" NON-SKID Tread is so cleverly designed, that, while providing a broad even-wearing track surface, it strongly clings to the road with a vacuum-like grip; assuring safety on all roads.

30×3 12.90 | 32×3½ 19.70 | 31×4 25.80 | 32×4 26.25 | 33×4 27.40 | 34×4 28.10 | 35×4½ 39.50 | 30×3½ 16.80

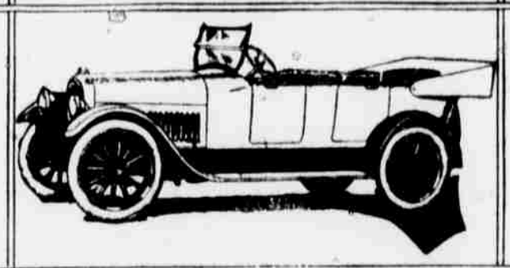
Studebaker



The LIGHT-SIX

In appearance the New Studebaker LIGHT-SIX is one of the handsomest cars on the market. Body lines are conservative and in good taste — fenders, radiators, tilting windshield, and the arrangement in detail of the seats all blend harmoniously and symmetrically.

Its light weight, low gasoline consumption and splendid quality make it one of the most economical cars to own and operate.

Save the Minutes

and the hours will take care of themselves

We can help you to achieve this time saving. We can show you how to save *nearly a minute* in the typing of *every letter* of average length.

We can show you how to multiply these saved minutes in every day's work. We can show you how to expand the saved minutes into hours, days and weeks.

Our latest improvement will do it. It is a correspondence machine with an automatic indenting mechanism and its name is the

Self-Starting Remington

The Self-Starter is a Remington feature exclusively. Nothing else like it. Adds nothing to the cost of the machine. A demonstration is yours for the asking.
