# State Educational Department Announce Adopted Textbooks

Teachers and School Officials in Receipt of Official List and Prices.

## OLD BOOKS ARE EXCHANGED

Publishers Held Responsible for Distribution Through the Entire State.

Special to The World.

OKLAHOMA CITY, Aug. 20.—The state department of education is distributing to teachers and school officers an official circular containing a list of textbooks adopted for the Oklahoma schools with prices for same. Following is extract from the accompanying statement by R. H. Wilson, state superintendent of public instruction.

This pamphlet contains a list of the text books, charts, maps, globes, registers, records and apparatus adopted or approved by the state textbook commission for basic or supplementary use in the public schools of Oklahoma for a period of five years, beginning August 1, 1919. The retail price, with the exchange price which continues in effect for one year from date the contract becomes effective is indicated. A 50 per cent exchange is allowed for all old books now in use for corresponding grades. The publishers are held responsible for the distribution of their respective books throughout the state. Any failure on their part to make proper distribution of exchange should be reported promptly to the state superintendent of public instruction. It is the duty of the superintendents and teachers to assist pupils and patrons in making exchanges and to advise the local text book dealer of the number and kind of books which will be needed from time to time.

*Seeks Tax Relief to Help Build Homes*

Senator Calder

Senator Calder of New York has asked the senate to support the federal loan banking system plan and relieve taxation on mortgage income, thus assisting the people to obtain money on reasonable terms to build homes. Senator Calder also hopes to reduce the cost of construction by making the financial part easier in this way.

## OLD SOLDIER TESTIFIES TO WONDERFUL MERITS OF NO. 40 IN CATARRH, STOMACH TROUBLE AND CONSTIPATION

National Home, Wis., May 12, '19. "When I commenced taking Number 40 For the Blood, I was suffering with chronic constipation of a good many years standing, which finally developed into stomach trouble which got so bad I was unable to eat anything that did not cause great suffering. I tried a good many doctors as well as everything I could hear of that was recommended for my complaint. I was also troubled with catarrh of long standing and I had dropsical swellings in my feet and ankles which the doctors said was caused by a weak heart. I had about given up hope of being much better when I saw an ad of your No. 40 in a country paper and concluded to try it. I felt so much better after taking one bottle that I sent direct to you for three more bottles. I have taken about two and a half bottles and while not feeling entirely well, I feel by continuing the use of 40, I will get to feel as well as I could reasonably expect for a man of my age, 75 years. I hardly know how to estimate the value of the benefit I have already received from the use of No. 40, and cheerfully recommend it to any one suffering as I was." Morris Law. Witness to signature, Nelson H. Pease. 40 is a combination of the best alteratives selected from the best prescriptions received and compounded by J. C. Mendenhall, Evansville, Ind., 40 years a druggist. Sold by Steinberg Bros.—Adv.

## AIR PILOTS GOOD FOR ONLY EIGHT HOURS DUTY

LONDON, Aug. 20.—"Eight hours is about the limit of time over which the average pilot could stand the strain with any regularity."

This is the opinion of Capt. Sir John Alcock, conqueror of the Atlantic in the first non-stop flight.

"This, if nothing else, will probably limit the endurance of commercial airplanes to non-stop journeys of from 500 to 1,000 miles.

"A servo-motor to operate the controls such as is fitted to some of the large flying boats, might do something to relieve the strain, but even then the mere mechanical effort would be very great.

"Although I managed to win through I would not care to try to fly the Atlantic again."

**Denies Dry Aim.**

LONDON, Aug. 20.—William E. Johnson, organizer of the American Anti-Saloon league, who returned to England today from Sweden, where he attended the northern temperance conference, declared it was not the league's purpose to carry on propaganda in England with the purpose of bringing about prohibition.

## RAN LIGHTNING DOWN A SIDETRACK—SAVED TRAIN

PACIFIC, Mo., Aug. 20.—Dudley ("Bud") Light, a St. Louis & San Francisco brakeman, is the sponsor for this story.

"Bud," during an electrical storm the other day, was standing at a switch. He saw a bolt of lightning strike and start up the main line towards him. There were some cars on the main line. "Bud" threw the switch and sent the lightning up the switch, missing the cars.

*Entirely New Way to Banish Superfluous Hair*

(Really Removes Roots and All)

Why should any woman continue to wear an ugly, humiliating growth of hair on her face, now that it is known this can be completely and quickly removed, roots and all, by the new phelactine process? The process is not to be compared at all with the depilatory, electrical or shaving methods. Phelactine is non-odorous, non-irritating, non-poisonous—in harmless, it could be eaten without any bad effect. Best of all, the hairs come out entire, even the roots, before one's very eyes! The skin is left as smooth and hair-free as a child's.

Anyone who purchases a stick of phelactine from the druggist and follows the simple directions is bound to be pleased and delighted.—Adv.

# To Insure the High Quality of Transportation to which Packard Owners are Accustomed

IT is a fixed Packard principle that price is incident to quality.

Price advances in Packard cars are never made for any other reason than to maintain the highest standards.

It used to be the fashion among manufacturers to think that quality was a matter of materials—to think that it could be maintained solely by purchasing high grade steel and lumber and fittings.

The Packard people have always held that the spirit of the artisan is equally important and are confident that the advantage the Packard owner gets in the performance of his car is largely a matter of the quality of workmanship and the spirit of the workman.

A Packard price advance is interesting to the present Packard owner because it draws attention to the cash value of his investment in transportation.

We know of no motor car which brings today such a high percentage of its purchase price on the used car market.

Men whose first fine cars were *used* Packards will tell you that there is little gamble in such a purchase—less than in many an ordinary car fresh from the hands of its manufacturer.

To men about to purchase Packards, a price advance merely emphasizes the small percentage the first cost of their Packard is to the value of the transportation delivered.

When they buy a Packard they are buying the highest grade of motor car transportation.

They are buying the nerve rest which comes from traveling in the utmost comfort.

They are buying the true saving which comes from having speedy, reliable transportation at their call for business or pleasure.

And they are buying fifty thousand, a hundred thousand miles of such transportation, more if they wish, without the necessity for another initial investment.

Always with the highest possible used-car value to be cashed in at any time.

Because the miles are built in the Packard ready for the new man to use when the first owner gives it up.

Packard representatives are always glad to talk about the true value of motor transportation whether you are ready to purchase or not. You will find a call at Packard headquarters interesting and profitable.
