Market Stronger.

NEW YORK, Dec. 4.—It is the salient characteristic today's stronger and broad stock market was largely a duplicate of the preceding session. The substantially higher range of many issues resulted from further involuntary covering of short contracts.

Disregarding the increasingly acute controversies in the coal strike and the Mexican situation, traders seemed to derive much stimulation from the easier trend of exchanges, the latter tone of the bond market, the other and temporary relaxation of the tension in foreign exchange.

Call money was liberally supplied at unchanged rates, per usual, that quotation being maintained throughout on augmented offerings from interior banks. Time loans were strengthened over the week's end and were made at slight concessions from recent rates.

Favorable trade conditions facilitated the operations of specialists in various stocks, especially motors and their accessories. In these groups extreme gains of 3 to 13 points were realized by General Motors, Texas company, Mexican Petroleum, Mid-Continent Petroleum, Retail Stores, United States Tire, Tobacco issues and corn products, some producing in 1,150,000 shares.

Sales amounted to 1,150,000 shares.

The general bond list moved forward with Liberty and 4 issues leaders but eased slightly at the close. Total sales (par value) aggregated $24,250,000.

CURETON TO WASHINGTON.

Texas Attorney General Departs to Represent State At Hearing.

AUSTIN, Texas, Dec. 4.—Attorney General C. M. Cureton left here today for Washington to represent the state in the Texas-Oklahoma boundary dispute. Mr. Cureton says he will arrest any efforts taken on the part of Oklahoma to gain possession of land in dispute, pending settlement of the case, which is now in the United States supreme court.

An Arkansas inventor has patented an electric headlight to be mounted on a horse's bridle, furnished with current from dry batteries attached to the harness.

SHE FEELS SHE IS SAFE

When Buying A Charter Oak.

Why? Because she knows what she is buying. Her mother and her mother's mother used the CHARTER OAK.

Where substitution "doesn't go"

there is no necessity or room for argument with anyone who comes into a store and makes the Statement that a Charter Oak Stove or Range is wanted. It is, in such a case, only a question of size, style and price. Something claimed to be "just as good" cannot be sold to a person who has once used a Charter Oak.

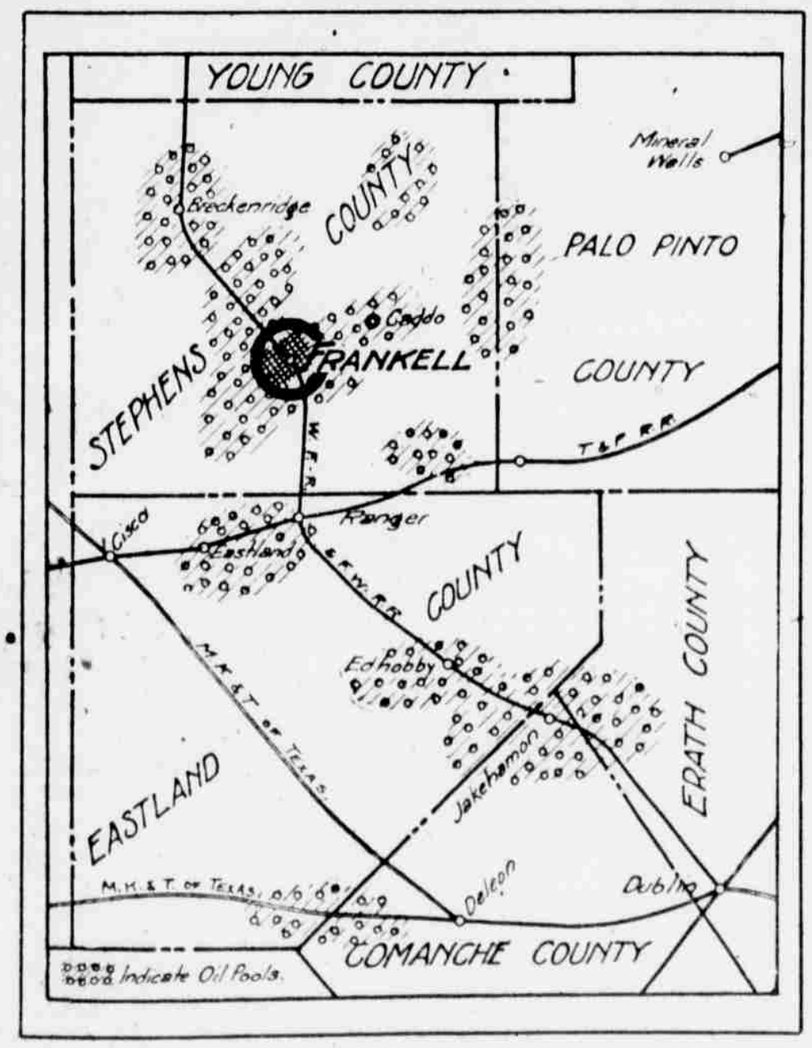
FRANKELL



A New Railroad Town in the Most Productive Oil Field in Stephens County

WILL BE OPENED DECEMBER 8TH.

Frankell is in the Caddo Oil Pool. From the townsite one can count a thousand oil wells and locations. The biggest oil well in the county came in last week just two miles north of Frankell. The town of Frankell is on the line of the Wichita Falls, Ranger & Fort Worth Railroad, that is under construction through the Texas oil fields from Dublin to Wichita Falls. Trains will be operating into Frankell within a few weeks. It will be the only railroad point in the Stephens county oil fields and will be the chief center of oil fields supplies and other oil fields activity. Ten thousand people are waiting for the opening of the town to make it their home and business headquarters.

Frankell was laid out to serve supply houses and the other industries that require facilities for carload shipments. Its service trackage facilities and team tracks will meet the needs of a situation that calls for special treatment owing to the peculiarities of the oil fields traffic.

The people of America have never before seen such an opportunity to profit through the building of a great oil fields city as that presented by Frankell, the pet project of men whose dreams come true, and is the center of an activity that has called forth millions of dollars for development and is yielding other millions of profits.

There is no better investment in the world than real estate. The best real estate investment is in good towns. The best towns in Texas are in the oil fields. Stephens County is the most promising oil field in Texas. It is oil territory in its every part. Frankell is the one Railroad Town in the Stephens County oil fields. It is on the one railroad in Texas that was designed to serve the oil fields—the line that is being built from Wichita Falls to Dublin by Jake L. Hamon and Frank Kell, men whose success in building railroads and towns is unequalled in the Southwest, whose names have never been connected with failing ventures.

Frankell is twelve miles north of Ranger. It is fifteen miles north and east of Eastland. It is about eighteen miles northeast of Cisco. It can be reached from either place by conveyance. No lots will be sold in advance of December 8 and no lots will be reserved from sale. Plats of Frankell will be available on the townsite. Purchasers may pay thirty per cent of the purchase price on the day of sale and the remainder in seven equal monthly installments.

A Word from Mr. Hamon—

"This town is located in the center of the Caddo Oil Fields.

"I can stand on the townsite and count 1,000 drilling wells.

"It will be the center of the supply houses for Stephens County. A town where refineries should and will be built.

"This, in my opinion, will be the best town I have ever platted and sold.

"I believe that every investor will make money and that there will be 10,000 people on the townsite of Frankell making money faster than any other like number on the American continent within ninety days.

"No lots will be sold through the mails. We have no advertising matter. The purchaser in order to make an investment in this splendid town will have to be on the townsite and make his selection and purchase. This, however, will not prevent persons making purchase of lots by agents or attorneys representing their principals.

"I invite my friends to make investments here and assure them that in my opinion they will reap a splendid return."

Jake L. Hamon
