NEW PUBLICATIONS.

CYCLOPEDIA OF BIBLICAL, THEOLOGICAL, AND ECCLESIASTICAL LITERATURE. Prepared by the Rev. JOHN M'CLINTOCK, D. D., and JAMES STRONG, S. T. D. Vol. VIII. PET—RE. 8vo, pp. 1000.

The present volume of this work includes a very considerable amount of matter in addition to that contemplated in the original plan, in order to avoid any retrenchment in the number of articles, or in the mode of their treatment. In the preparation of the leading titles, a thoroughness of method and copiousness of detail have been preserved, which are rarely found in books of popular reference, and which furnish the reader with the substance of many voluminous works that would require the use of a large library for their profitable consultation. The editor intends to complete the work in two more volumes and within the space of two years. He has aimed at accuracy and utility of information rather than at novelty of matter or originality of style. At the same time, it is evident that an intelligent use has been made of the fruits of the latest research and study, especially in the geography and antiquities of the Holy Land, in Sacred Literature, and in the exploration of comparatively unknown regions of the earth. The treatment of the subjects is remarkable for exactness, lucidity, and compactness rather than for uniform condensation and concisenes, as a part of the contributors in their love of discussion, rather than of exposition, have fallen into occasional prolixity. The most valuable articles in the volume, are perhaps those which relate to the history of the Church, the most important religious denominations, and the illustration of the Holy Scriptures. In the philosophical titles there is sometimes a want of breadth and of rigid analysis, although the articles on Plato, Platonism, and Pantheism, by Professor Holmes, of the University of Virginia, are able and important papers on the history of philosophy. An inadvertence in one of the biographical sketches represents the Rev. Enoch Pond as having died in 1877, whereas the venerable and distinguished professor is still living at an advanced age in Bangor, Me. The celebrated Dr. Priestley is described as "one of the most noted of the English Deists of the eighteenth century," an apparent misnomer for a writer who is afterward spoken of as "feeling our copes of a resurrection on the truth of the Christian Revelation," and as "believing in a Revelation because it necessitates a Resurrection, and in the Resurrection because he found it declared in the Revelation." It is made stated in one place that Dr. Priestley "barely denied the Christian doctrine of revelation," and in another that he "accepted without question the authenticity of the Gospels," and "the authority of the Apostles,"—a creed which can hardly be ascribed to the so-called English Deists. The biographical and geographical portions of the work, in general, are of great value, and furnish a mine of information of unfailing interest to the mass of readers, as well as to clergymen and theological students. In the elaborate execution, its sound scholarship, the richness of its learning, and the appropriateness of its style, this volume, like those which have preceded it, will be found an honor to American literature, and will prove of essential service to American culture.

DARWINISM AND OTHER ESSAYS. By JOHN FISKE. 12mo, pp. xvi, 362. Macmillan & Co.

In this volume Mr. Fiske has collected several of the papers which have contributed to his eminent rank among the philosophical writers of this country. They include his essays on "Darwinism Verified," "Mr. Mivart on Darwinism," "Dr. Bateman on Darwinism," "Dr. Büchner on Darwinism," and other miscellaneous articles which have appeared from time to time in the periodicals of the day. Mr. Fiske is widely known as a vigorous advocate of the theory of Darwin with regard to the origin of species, although he does not accept all the conclusions put forth by some of its prominent defenders. He maintains that within the twenty years that have elapsed since the announcement of the theory it has won a complete and overwhelming victory, in spite of the opposition with which it was received at the beginning. The eminent naturalists who still decline to adopt it are few in number, and governed in the main by theological and metaphysical objections rather than by facts within the domain of science. The sway of natural selection in biology is hardly less complete than that of gravitation in astronomy. No scientific discoverer, in the opinion of the author, has within his own lifetime obtained so magnificent a triumph as Mr. Darwin. The theological objection which has been urged against Mr. Darwin, as it was urged against Newton by Leibnitz and others, Mr. Fiske contends is a fallacy. The law of gravitation was attacked on the ground that it substituted the action of physical forces for the direct action of the Deity. But the arguments for the existence and direct action of the Deity are in no wise disturbed by the establishment of any such scientific theorem. The religious question is left just where it was before. The hypothesis of Newton does not set aside the direct action of Deity as the cause of the planetary movements, but presents a happy formula for expressing the mode or order of the action. In like manner, the theory of Darwin may explain the existence of highly complicated organisms as the result of an aggregate of minute circumstances, but it does not prevent the consistent theist from maintaining that the entire series is an immediate manifestation of the creative action of God. The attempt of Dr. Büchner to vindicate the materialistic explanation of the universe is pronounced by Mr. Fiske to be an utter failure. Dr. Büchner, he affirms, shares with the theologian the error of supposing that the action of Deity cannot be manifested in a regular series of phenomena, but only in sporadic miraculous surprises. When he has explained the development of mankind from some lower form of life, he thinks he has demolished the belief in the divine existence, whereas he has only overthrown a crude and barbarous conception of the divine action. No matter, says Mr. Fiske, how far the scientific interpretation of Nature may be carried, it can only reveal to us the fact that the workings of the Ultimate Existence of which Nature is the phenomenal expression are different from what they were supposed to be by the unsophisticated thinkers of former times. To treat of the universe of phenomena without the hypothesis God is nonsense, and to treat of matter without reference to the mind in whose cognizance alone it can have any existence is also nonsense. Mr. Fiske's papers on the late Chauncey Wright will be read with interest as a philosophical analysis of one of the most remarkable American thinkers of the present age, and a personal reminiscence of his private character.

ROMAN DAYS, FROM THE SWEDISH OF VIKTOR RYDBERG. By ALFRED COSTING CLARK. 12mo, pp. 362. G. P. Putnam's Sons.

The author of this admirable contribution to classical history and artistic criticism has thus far been comparatively little known in English literature. According to the brief biographical sketch prefixed to the translation, by Dr. H. A. W. Lindelöw, Viktor Rydberg is one of the most prominent living Swedish writers, remarkable for the union of romantic sentiment with charming realistic pictures of Nature. He is now about fifty years of age, and an editor of the "Gothenburg Gazette," one of the most powerful newspapers in Sweden, to which he has contributed largely on political, social, and religious questions, besides publishing in it some of his popular novels before they appeared in a separate form. His first important work, "The Last Athenian," was greeted with general enthusiasm, and at once established his reputation as a thinker and a writer of the highest rank. Every new book from his pen has met with an eager and cordial reception at the hands of his countrymen. Rydberg is described as combining the best qualities of literary genius and artistic excellence. His productions are marked by a lively imagination, an acute critical judgment, and a profound sense of the beautiful and the true in every form of life. He has devoted much attention to the peculiar and delicate idioms of his native language, and writes in a diction of singular elegance and force. Hence the rare attractions of his style to Swedish readers, and also the difficulty of transferring the beauty of his creations into a foreign tongue. In 1873 Rydberg made a journey to Italy where he remained till the summer of the following year. The fruit of that visit is now offered to the American public in the present translation of "Roman Days," containing a series of studies on the Roman emperors, suggested by their busts and statues in the Italian galleries, with critical notices of the Aphrodite of Melos and the Antinous, essays on the Roman traditions of Peter and Paul, and pencil sketches of some of the principal objects of interest in the Eternal City. The various contents of the volume are remarkable alike for their intrinsic soundness and solidity, and the beauty and grace of their expression. In discussing the character of the emperors, the author presents many original and profound suggestions, throwing a fresh light on the imperial reigns, and reproducing the spirit of classical antiquity in brilliant and glowing colors. He is a master of picturesque description, though he is never seduced by the enticements of fancy to the perversion of historical facts. His portraitures of Roman character and life are believed to be as accurate as they are vivid and attractive. Mr. Alfred Clark has shown no less judgment in his choice of a work for translation than skill in the manner of its execution. His cultivated literary taste is shown to advantage in his lucid and vigorous diction, while his power of expression is betrayed in the freedom of his style from foreign idioms, and the deftness with which he has glided over the inevitable difficulties of the original, without impairing its significance. Apart from the value of the work as a permanent addition to the classical library, it furnishes a singularly instructive guide for the visitor in modern Rome, and is quite worthy of a place by the side of Hawthorne's "Marble Faun" as a delightful illustration of the wonders of art in the Imperial Metropolis.

BOOTS AND SADDLES. A HISTORY OF THE FIRST VOLUNTEER CAVALRY OF THE WAR, KNOWN AS THE FIRST NEW-YORK (LINCOLN) CAVALRY. By JAMES H. STEVENSON, Captain and Brevet Major. 12mo, pp. 388. Harrisburg, Penn.: Patriot Publishing Company.

The materials for this volume have been derived from the personal diary of the writer, which was carefully written up every night during his term of service with the regiment, and from letters written from the field to his family at home. Hence his narrative has a freshness and vivacity not always found in the accounts of military campaigns, written in an easy familiar style, and abounding in personal anecdotes and incidents, which possess a good deal of interest to readers in general, and especially to the author's old companions in arms. His regiment did excellent service during the war, in Maryland, the Shenandoah Valley, and other prominent localities, and well deserves the lively record which is here presented by one of its most active officers.

Sentinels of the brain, often unsuspected; its influence in producing loss of virility; absurdity of medical treatment. Circumcision; its true meaning—was it a religious or a hygienic rite? Wisdom of the Jewish law. Varicocele—what it is and what are its effects on health? New operation for its cure. Neuralgia and Nervous Diseases—What are them? People who are bored and nerve-wrecked; what is the cure? The Early Decay of American women. Is it proper to check the increase of family? Treatment of Stricture by Internal Incision; a new instrument for immediate cure. Three lectures. Loss of Vitality in Young Married People; an unsuspected cause. Influence of Tobacco on the Nerves of Organic Life. Fifty-four pages, octavo, elegantly printed. 25 cents. The whole work now in hand of the author only (seventy, well bound in six large volumes of 500 pages each. The best one examples of celebrated articles on Tobacco.—"We advise the formation of vigilance committees."—"Tribune Library."

OPINIONS OF THE PRESS.

"Every line from the pen of Dr. Dixon is of value to the whole human family." "If how worse could be placed in the hands of every young man at the expense of the Government, they would be a boon to the rising generation."—Horace Greeley.

"Dr. Dixon takes his stand with the conservative men of the age. He is universally known as a surgeon of great practical ability, his journal is unique, nothing in the literature of the day; in analytic power he has no equal, and he seems ordained by one mission—the good of the people."—N. Y. Daily Times.

"Dr. Dixon is an earnest and thorough practitioner of science; he is a man of the greatest capacity to teach; every word is weighty with meaning."—N. Y. Com. Advertiser.

"Dr. Dixon has added an experience of thirty years to his capacity for creating this work; as a practical surgeon, as a scientist and medical writer, for the thousands who owe their honor to the head and heart of the author."—N. Y. Evening Post.

"The author is a learned and deservedly celebrated scientist and thorough devotee to the rational principles of medicine and has ingenuity under trying circumstances, stamped with more than ordinary intellect."—Boston Medical and Surgical Journal.

"We take to ourselves the credit of originating this serious journal; and there is no question but "Dixon's Journal" is the best of its kind in America. Dr. Dixon is a surgeon in the highest sense of the term."—London Lancet.

"If his works could be published at the expense of the Government and given to every young man in the country, they would be a boon to the rising generation; the cost in the lumber would outweigh a hundred times the imports enormous, but the money expended in the war will prevent them from premature death, if essentially passed in their hands."—Horace Greeley.
