HARPERS' LATIN DICTIONARY.

A NEW LATIN DICTIONARY, FOUNDED ON THE TRANSLATION OF FREUND'S LATIN-GERMAN LEXICON, edited by E. A. ANDREWS, LL. D. Revised, enlarged, and in great part rewritten, by CHARLTON T. Lewis, Ph. D. and CHARLES SHORT, LL. D., Professor of Latin in Columbia College, N. Y. 4to, pp. 2,019. Harper & Brothers. Oxford: Clarendon Press.

It is now more than a quarter of a century since the original work, on which this magnificent contribution to Latin lexicography is based, was introduced into the classical schools of Germany, and, in the translation of Professor Andrews, into those of the United States and of England. The first volume of Professor Freund's great dictionary was issued in the year 1834 and the last in 1845, while the edition prepared by Professor E. H. Andrews dates from 1850. The experience of a long space of time has put the practical value of the work to a thorough test, and the result is the universal opinion among the intelligent students of the Latin language that for clearness, precision, copiousness, and accuracy, it is surpassed by no Latin dictionary in any tongue. It has, indeed, found rivals among the books which form the apparatus for classical study in the higher seminaries of learning; but most of them have derived their materials from the resources presented in that work, and are, in fact, essentially reprints or abridgements of its affluent contents, with only unimportant changes in method or form. The prominent classical scholars now upon the stage in this country will recall the influence of the well-thumbed manual with a grateful sense of obligation, while those who preserve but a faint remembrance of their Horace and Livy have not forgotten the timely aid they have received at many a critical juncture from the welcome light of its "friendly" pages.

Meantime since the early introduction of the work into the American schools and colleges, the science of lexicography has advanced with rapid strides. New meanings and shades of meaning have been revealed in a multitude of words by the progress of philological learning. The Latin grammar has been made the subject of a more profound analysis, and a fresh light has been thrown upon its intricate niceties. The study of Roman archæology has accumulated a fresh treasure of novel information with regard to the history of the nation, the domestic and social life of the people, and the prevailing intellectual habits and beliefs, of which the knowledge is indispensable to the student of the present day.

In order to meet so legitimate and so urgent a demand, the edition of the Lexicon now offered to the public has been prepared under the supervision of eminent classical scholars, and with the thoroughness, completeness, and conscentious patience required by the importance and the difficulty of the work. Several years ago, the Dictionary was submitted to the original author, Professor Wilhelm Freund, by whom it was diligently revised, a few of the articles were rewritten, and a list of about two thousand valuable additions supplied from his suggestions. The matter thus furnished was then placed in the hands of Dr. Henry Drisler, the distinguished classical professor in Columbia College, who soon found that a more complete reconstruction of the work was desirable than was consistent with his professional engagements. The materials were afterward committed to the present editors, with the view of combining them with all other available sources in the preparation of a Latin Lexicon which should meet the demands of the times. The results of their assiduous labors for several years are now given to the public in this admirable volume. The greater portion of the work has fallen to the share of Mr. Charlton Lewis, who has prepared the last 1,800 pages, while the whole of the words under the letter A are from the hand of Professor Short, each editor being exclusively responsible for his respective portion.

Among the peculiar features which distinguish the present work may be noted the comparative breadth of its scope and the comprehensiveness of its details. The list of Latin authors to whose works it affords a key contains more than thirty names not referred to in Freund or Andrews, many of which have never been used before in the preparation of a general lexicon of the language. While it gives no undue prominence to the ecclesiastical writers, or to the historians of the "Brazen Age," but finds its standards of Latin composition in the purely classical writers, noting all deviations from their usage as exceptional cases, it forms a more complete guide to the entire literature than any previous work. In regard to the Latin orthography, the present Dictionary, moreover, claims the attention of students as the only work which embodies the results of recent investigations by philologists like Ritschel, Corssen, Brambach, and others, and which are accepted as authorities in the latest and best editions of the Latin classics, as Batter and Kayser's Cicero, Munro's Lucretius, Ribbeck's Virgil, and so forth. While the correct classical spelling of most words has now been ascertained, and adopted in nearly all text-books used in Germany, and in those of the highest class recently published in the United States and in England, yet, for the sake of convenient reference, all forms in present use are given in the vocabulary, and a list is prefixed of the words differently spelled in different manuscripts and editions. Thus the student accustomed to the incorrect forms, *arena, belua, coecus, commus, dama, epistola, fortus, herus, litus, millia, nuncio, ocium, pellex, quum, religio, succus, teter, urgueo, Virgilius*, will have no difficulty in finding the word he wants, and, at the same time, is constantly reminded of the proper spelling: *harena, belua, caecus, comminus, damma, epistula, fetus, erus, litus, milia, nuntio, otium, pellex, cum, religio, succus, taeter, urgeo, Vergilius*. The present state of the science of etymology is more completely represented in this work than in any previous Dictionary. Even the great Latin-German Lexicons of Freund, Klotz, and Georges are, in this respect, of no value, as the etymology which they contain is merely traditional, and often the result of fanciful conjecture. The Latin-English Lexicons are more satisfactory, but none of them before the present have had the benefit of the important works in which recent German scholarship has brought together the conclusions of more than half a century of discovery in comparative philology. The present editors have adopted Curtius and Corssen as their principal standards, and without giving place to long discussions on disputed questions, have condensed into the smallest compass the results of the inquiry, as agreed upon by the most learned recent investigators.

In the collection, classification, and definition of the words in the Latin language, the editors have evinced no less critical sagacity, than intelligent industry. No one man, nor one hundred men, of course, would be adequate to the accomplishment of such a task for an entire literature. Many generations of laborious and patient scholars have contributed to the work since the first gigantic effort was made by Stephens to produce a Latin Thesaurus. Modern lexicographers can only be required to make a judicious use of the mass of information collected by their predecessors, and to enlarge and correct it by contributions of their own. Forcellini, beginning in the early part of the eighteenth century, devoted forty years to the compilation of his great lexicon, but since his day, no scholar has been bold enough to attempt a general work of the kind from materials gathered by himself alone. The Latin Dictionary of today must take from Forcellini whatever is still of value in his work, while it must also bear traces of the hand of the devoted laborers who have followed him in the same field, adding, correcting, improving, as there has been opportunity in the successive years. The editors of this Dictionary have evidently made free use of the labors of their predecessors, appropriating what was of most value in the results of their investigations; but, in addition, however, they have incorporated with the book a large mass of new and important matter, which must have been collected by a diligent study of the original authors. There are hundreds of words, the treatment of which, in all previous dictionaries, has been unsatisfactory, and to which they have devoted an immense amount of research in order to supply the deficiency. Among the words which are thus treated from a new point of view, and with singularly fruitful results, may be noted many of the most important in the language, such as the prepositions *ab, ad, cum, contra, de*; the conjunctions *at, atque, quam, quia, ut*; the pronouns *sui, suus, uter, uterque*; the verbs *ago, capio, censeo, compono, do, solvo, spondeo, sum*; and the substantives *animus, bellum, calumnia, causa, columna, cura, homo, res, vestersius, saeculum*.

The mechanical execution of this work is no less creditable to American typography than its literary preparation is an honor to the philological study and classical learning of American scholarship. It is printed on a clear and beautiful type, which, in spite of its compactness, presents no trial to the eyes, and the paper is of so superior a quality that the portly volume of more than two thousand pages, and containing a greater amount of actual reading matter than any other hand-book of its class ever published, is less cumbrous than most others of a much larger size, and can be handled and consulted with perfect ease and convenience, without requiring the obdurate muscles of a manual laborer.

THE LAW OF MORTGAGES OF REAL PROPERTY. By LEONARD A. JONES. 2 Vols., 8vo, pp. 717 and 810. Houghton, Osgood, & Co.

That a second edition of this treatise should be called for so soon after the publication of the first speaks for its popularity, and the popularity of a text-book on legal topics speaks for its excellence. Although the interval between the two editions is less than a year and a half, the work has undergone thorough revision and improvement, especially by additions to the text and new citations of cases in the notes. The author states that he has added about one hundred and fifty pages of new matter, about eighteen hundred new citations, and references to more than a thousand new cases, bringing the law down as nearly as possible to the time of publication. Mr. Jones's work is undoubtedly the best and most complete on the law of mortgages extant. His aim has been to state not only the common law but the modifications which it has received through legislative enactments and judicial decisions, and in the important divisions of the subject to state the rules for each State where substantial differences obtain. In doing this, principles are stated with clearness and precision, and are frequently fortified by quotations from important decisions, and illustrated by the facts of the cases cited. The subject is logically developed by the discussion of the nature of a mortgage, its form and requisites, the parties to it and the subject of it, implied mortgages, the kinds of debts which may be secured, the incidents of a mortgage, the circumstances which render the instrument void, and the rights and liabilities of parties and third persons. The second volume treats mainly of payment, discharge, and redemption, and the manner and incidents of foreclosing the lien. Thus, excepting railway mortgages, which were recently the subject of an essay by the same author in a separate publication, the entire topic is comprehended within these two volumes. A special feature and excellence of the work is the number of the citations, of which it is a perfect storehouse. In general, several authorities are given upon the same point and from as many States as afford them. The subject is thus illustrated in different ways and the book made applicable to all the States. If the point is important and the authorities upon it numerous, they are grouped under their respective jurisdictions, and the examination of the rule upon the point in any one State is very materially facilitated. The typography and binding of the book and its mechanical execution generally are up to the best work which comes from the Riverside Press.

THE ULSTER GUARD AND THE WAR OF THE REBELLION. By THEODORE B. GATES. 8vo, pp. 619. New-York.

The Ulster Guard to which this volume is devoted was the name of the 20th New-York State Militia, that saw not a little hard service during the whole period of the Civil War. Brevet Brigadier-General Gates, who succeeded to the command of the regiment on the death of Colonel George W. Pratt, has given an interesting narrative of its military experience from the battle of Bull Run to the surrender of the Confederate Army, including a large amount of critical comment on the conduct of several of the prominent Union officers, in which they often fall to appear in the most favorable light. The volume comprises a variety of political and historical notices, in which the author gives free scope to his personal impressions, and frequently with great piquancy of remark. In spite of its excessive diffuseness of detail, the work for the most part is highly readable, claiming a friendly reception from the public, especially the people of Ulster County, who were so deeply concerned in the events which it commemorates.

A GENTLE REMONSTRANCE ON THE SUBJECT OF RITUALISM. By the Rev. ALONZO J. D. BRADLEY, B. A. 12mo, pp. 203. Fr. Pustet.

In the form of a letter addressed to the Rev. Dr. F. C. Ewer, the recent lecturer of that ardent ritualistic divine on the subject of Ritualism are here subjected to a stringent examination. The author treats the question in a familiar and animated style, enlivens the discussion with frequent amusing anecdotes, and does not disdain the occasional use of pungent personalities. The little volume is readable, if not convincing, and at all events may serve as a remarkable specimen of vehement and often adroit religious controversy.

A Tribute to Bayard Taylor, by Isaac Edwards Clarke, consists of an essay and poem read before the "Literary Society" of Washington, D. C., soon after the death of Mr. Taylor. The essay which is intended as an introduction to the poem, presents a brief biographical sketch of Bayard Taylor, with an estimate of his genius and character, dwelling especially on the ripe development of his poetic gifts. In his Memorial Poem, Mr. Clarke describes the versatile career and manifold accomplishments of his friend with great felicity of illustration and justness of feeling. The scenes which he has selected from the life of the poet are singularly characteristic, and furnish a choice store of materials for his expressive portraiture.

The new edition of President Barnard's treatise on *The Metric System of Weights and Measures*, recently published in Boston, brings up the history of the movement from the point at which it was left in the original work to the present time, presenting the facts of interest relating to the subject, of a later date than 1871, in a supplementary essay. In its present form, the volume affords an exhaustive discussion of the subject, and will be accepted as of the highest authority by subsequent writers. The copious and accurate index which is now added to the work greatly facilitates the convenience of reference.

FRENCH ETCHINGS.

It may not be known generally by collectors of etchings that excellent facilities for securing desirable works of this class are afforded by the managers of *L'Art*, who furnish any of the etchings published in their journal that the purchaser may select. In this way the collector has an opportunity to choose what may suit his fancy out of a great number of capital works, without the necessity of subscribing to the review. During its existence of nearly five years, *L'Art* has issued some 800 etchings after prominent pictures in the public galleries and exhibitions of Europe. Some of these are charming landscapes, and among the portraits are characteristic ones of Sarah Bernhardt, M. Thiers, Victor Hugo, Dr. Dölinger and others. Etchings from some of Rubens's masterpieces have also been a notable feature of the periodical. In the current number is the "Orpheus and Eurydice," from Wats's great work. In addition to these full page plates, *L'Art* has begun the publication of important etchings on a larger scale as extra issues. The first of these is by Labauze after Hans Makart's "Entry of Charles V. into Antwerp," which took the medal of honor at the Paris Exposition, and was probably more talked about than any other painting in the collection. Another of similar size is nearly ready to be issued, called "le Modèle," etched by Champollion after Fortuny's celebrated Spanish picture. Any of these etchings can be ordered through Mr. J. W. Bouton, the well known dealer in fine art works, 706 Broadway.

YOUNG MRS. JARDINE. A Novel. By the author of "John Halifax, Gentleman." 10 cents.

For more than twenty years this author has been received with an unfaltering welcome into hundreds of thousands of American homes as a guest, bringing hearty and innocent entertainment. Next to "John Halifax, Gentleman," the novel by which her first popularity was won, "Young Mrs. Jardine" is her best love-story—representing the full ripeness of her wonderful genius.

MADGE DUNRAVEN. A Novel. By the author of "The Queen of Connaught." 10 cents.

Fascinating and entrancing. * * Good, healthy and amusing.—[Examiner, London.

☞ HARPER & BROTHERS will send any of the above works by mail, postage prepaid, to any part of the United States, on receipt of the price.

BLANID—DEIRDRE.

"The story of Blanid is mild, tender and pathetic. Dr. Joyce has remarkable powers of versification; his lines are full and free and musical; he has a great love for flowers and trees and all the beautiful things in the external world, but he loves them chiefly in sunshine; it is the sunshine stories that he sings. * * The fresh sweet atmosphere of both 'Deirdre' and 'Blanid' is healthy to breathe; the reader has always a sense of sunshine and breeze and deeds done in the daylight. * * * There is no question of Dr. Joyce's grace and skill. * * * of his true poetic gifts and spirit."—[Daily Advertiser.

"Blanid" is a handsome square 16mo, cloth, gilt top. Price, $1 50.

"Deirdré" is in the "No Name Series," black cloth, red lettered. Price, $1.
