servers. The balance of trade in favor of the whole United States for the nine months of this year, ended September 30, on the Custom House returns, which include the exports and imports of merchandise, specie and bullion, were only $44,230,725 against a balance of $156,016,604 for the same nine months of 1879. Estimates of $100,000,000 per annum paid for freight and passengers to foreign vessels, and of $60,000,000 per annum for interest and dividends accruing to foreign holders of American securities are not considered excessive. Nine months' proportion of these sums is $120,000,000. Deducting the Custom House balance from that sum there is left a balance of over $75,000,000 against the United States for the nine months ended September 30. In addition to this is the money expended in Europe by American tourists, which our English journals recently estimated to be $180,000,000 for this season. This estimate, however, may be considered as excessive, and probably $100,000,000 will be more nearly correct. The latter figures, however, make the balance against the United States $175,000,000. But notwithstanding this apparent balance against the country the foreign exchanges are weak, below the specie importing point, at $4 82½@$4 82¾ for short sight sterling. There is only one way to account for the seeming anomaly, and that is by the supposition that the foreign demand for American securities has been and still is sufficient to overcome the $175,000,000 balance of September 30, and any adverse balance that may have accrued since that date because of the further importation of $19,000,000 bullion from September 30 to November 6, and of about $2,500,000 bullion now on the way yet to arrive.

The stock market to-day was adversely affected by a "scare" about the future of the local money market, although the rates for call loans to-day were easier than they were yesterday. It is realized that the expanded condition of the New-York banks gives to a few speculators the complete control of the call loan market, and the street is less confident than it was a few days ago that it is not for the interest of those speculators to use that power to make money uncomfortably tight. The renewal of the Southwestern passenger war, which is more serious than was the war of a month ago, because it has extended East from St. Louis to Pittsburg and Cleveland, is regarded with suspicion as one portion of the machinery with which prices are to be broken for the purpose of buying stocks. Yet the decline to-day was made slowly and with no rush to sell out, and it is probable that the short interest was greatly augmented. A simple tight money market undoubtedly will disturb stocks that are held on call loans, but so many stocks have been taken up and paid for, and so much larger a proportion of the loans on stock is made on time than usually has been the case heretofore, that it is improbable that a mere temporary and local stringency in money will have as great an effect as it has had before. Nevertheless the disposition to prepare for the expected "twist" in money was general to-day, and buyers held off while sellers only pressed their stocks as the market would take them. The decline was general, but the coal stocks, grangers and Wabashes suffered the most. The market closed weak at about the lowest points of the day.

Government bonds were firm all around, but the dealings ($245,900) at the Boards were confined to the registered 4s. The bids for the 6s, 1881, 4½s and 4s were advanced ⅛ per cent. The bids for the 6s, 1880, also were advanced to 102⅞, probably in anticipation that the Treasury will to-morrow accept offers to sell at 103. If, however, the Treasury should adhere to its terms of 102¾, there will be some disappointment. That the bonds are not worth 102⅞ for a short investment, is shown by the fact that money can be loaned for the remainder of the year on Governments at 3@3½ per cent per annum, while the 6s of 1880, if purchased at 102⅞ and held to maturity, will return less than ⅞ per cent per annum on the money so invested. Annexed are the closing quotations:

The principal dealings in State bonds were in Tennessee 6s old at 47@48¼, and new and new series at 46. Virginia 6s deferred sold at 12, an advance of 2½ per cent from yesterday. Louisiana consols are quoted 49½@51, and North Carolina consolidated 4s 79@81.

Railroad bonds generally sympathized with the depression in the share market. Erie seconds fell ⅝ to 96¾, Rome, Watertown and Ogdensburg consols ½ to 74, and C., C. and I. C. first assented ½ to 95½. Missouri, Kansas and Texas first consols were strong at 111½, and seconds rose from 68¼ to 68½. Chesapeake and Ohio firsts series B also were firm at 72¼, and currency debts rose from 41¼ to 42¼@42. Metropolitan Elevated firsts were notable exceptions to the general depression and were in demand at 104⅝@104. Central Iowa debt certificates advanced 3 per cent to 88. Denver and Rio Grande issues were steady at concessions of ¼ per cent, but Texas and Pacific incomes declined to 72, and firsts of Rio Grande Division from 94⅞ to 93.

The Sub-Treasury to-day lost $285,928 on balance, made up by losses of $150,496 currency and $135,432 coin. This makes the net gain since last Friday $197,269. The European steamers arrived since yesterday brought $432,000 in English gold bars. A little money loaned to-day at 4 per cent, but the common rate was 3@3½ per cent, and the late rate 2½ per cent. Southern exchanges on New-York are unchanged, but the Western are a turn less unfavorable: St. Louis 75 cents discount, and Chicago 60@50 cents discount; Boston is 16⅔ cents discount. The United States Treasurer at Washington to-day received $120,000 in National bank notes for redemption. The customs receipts were $659,000, and the internal revenue receipts were $310,000. The following is the Clearing House statement to-day: Exchanges, $150,157,812; balances, $5,539,561. The transactions at the Sub-Treasury covered: Receipts, $965,579; payments, $1,251,507; currency balance, $4,420,062; coin balance, $71,235,494.

The foreign exchanges are about steady at yesterday's decline, the business in sterling being done at $4 80½@4 80¾ for long, and at $4 82½@$4 82¾ for short sight. Annexed are the nominal quotations:

Exporters have been liberal purchasers and have bought to the extent of their ability to procure freight accommodations. Brewers have also picked up a good many lots which has given more tone to the market and increased the firmness for desirable grades. Quotations:

POULTRY AND GAME.

There are fair receipts of Live Poultry, but the temporary short supply of Dressed Poultry has made a sharp demand from killers, and the market is firm and higher for both Fowls and Chickens. Turkeys are also doing better. Geese and Ducks unchanged. The warm weather on Friday and Saturday kept shippers from killing much Poultry, and the receipts thus far this week have been light. Nearly all kinds are in good demand and prices favor the seller. There is a full supply of all kinds of Game, most of which is more or less out of condition, owing to the warm, unfavorable weather at the time it was shipped. The demand appears to be light, and prices are lower for most kinds. There is more than a usual supply of Venison arriving, and the market is uncommonly dull and weak, especially for large, whole Deer. Quotations:
