company's stock probably has no foundation in fact. Taking the market as a whole it was feverish.

Government bonds were dull, with the final bids for the 3s and 4½s each ⅛ higher. Annexed are the closing quotations:

State bonds were quiet, and the transactions included only small quantities of North Carolina special taxes. There were no transactions in city bank stocks.

The general bond market presented few features of interest; dealings, except in a few of the speculative kinds, were small. Missouri, Kansas and Texas seconds were about steady and the general mortgage 6s, after 84, were unchanged at 83¾. St. Louis and Iron Mountain new 5s declined 1½ per cent, Texas and Pacific incomes were ¼ lower and firsts of Rio Grande division were ⅛ higher, Wabash general mortgages were steady at 83¼. Atlantic and Pacific incomes were ¼ off. Erie Second Consols were up ½. Chesapeake and Ohio currency debts were ¼ lower. Ohio Central incomes were active and rose 5 per cent, and later reacted 2½ per cent. New-York, West Shore and Buffalo 5's were barely steady at 78½@78¾, and New-York, Chicago and St. Louis firsts were dull. Richmond and Danville debentures advanced 1 per cent. East Tennessee, Virginia and Georgia consols were ⅛ higher, and the incomes ranged from 38½@39 and closed unchanged. Mutual Union Telegraph sinking funds were weak at ¾ per cent decline.

The business at the Sub-Treasury for the week ended to-night includes receipts of $4,807,818 and payments of $7,127,418. The result is a loss to the general balance of $2,319,400, which leaves it at $128,515,748, against $130,835,148 a week ago. After deducting from the receipts and payments items which were simply transfers, the Sub-Treasury's true loss to the Street is only $1,828,400, and that amount includes $150,000 receipts of gold coin for silver certificates, payable by other Sub-Treasuries. To-day's transactions covered: Receipts, $871,207; payments, $1,917,274; currency balance, $6,758,014; coin balance, $121,757,634. Money ruled steady to-day at 5½@6 per cent and the closing rate was 6 per cent. The domestic exchanges do not indicate any important flow of currency to this centre, and the East again is drawing upon us. So a more active money market after to-morrow, unless there is a collapse in the stock speculation, is not an unlikely event.

The Clearing-House statement to-day is as follows: Exchanges, $129,788,363; balances, $4,450,406.

The United States Treasury at Washington today received $314,000 National bank notes for redemption. The customs receipts were $399,381, and the internal revenue receipts $333,603.

The foreign exchanges were dull and fully steady, although it is expected that some lots of exchange will come upon the market from the negotiation of the Baltimore and Ohio's new loan for £2,400,000 (not $2,500,000) in London. We quote rates for business unchanged, as follows: Bankers' bills, $4 83⅜ and $4 85¾ for long and short sterling respectively; 5.20¼ and 5.17¾ for francs; 94⅝ and 95¼ for reichmarks; 40⅛ and 40⅜ for guilders.

The London Stock Exchange market was steady for British consols at unchanged quotations: 102 9-16 for money and 102¾ for account. United States, 3½s were ¼ lower, and the 4½s were ⅛ lower; the 4s were unchanged. The quotations for American railways generally were ¼ @ ⅜ higher; Atlantic and Great Western issues were weak. The Bank of England lost £25,000 bullion on balance. At Paris, French 3 per cents were easier at 79.75 francs.

The St. Paul, Minneapolis and Manitoba Railroad Company offers to its stockholders the privilege of subscribing, to the amount of 50 per cent of the par value of the stock held, to its consolidated 6 per cent gold fifty-year bonds at 10 per cent of the par value of the same. The transfers will close for the above purpose and for the payment of the usual quarterly dividend of 2 per cent on April 20, and will reopen on May 5.

MINES AND MINING.

FRIDAY, April 13—P. M.

[BY TELEGRAPH TO THE TRIBUNE.]

DEADWOOD, Dak., April 13.—The Sitting Bull silver mill continues in successful operation, turning out about 900 ounces every twenty-four hours. A large force is at work upon the addition, which will be completed in about two weeks, and which will treble the present milling capacity of 18 tons a day. Nearly all of the machinery has arrived. The dump now contains eighteen months' supply of milling ore, while a large reserve is in sight in the mine.

A strike is reported in the Richmond, lying east of the Sitting Bull, but of what magnitude has not been made public. Opinion prevails, however, that the ledge, if there be one, is the Sitting Bull caught on the dip.

The Golden Summit frequently sends up handsome specimens of ore, and handsomer retorts; yet much confidence is not placed in the mine as a steady producer.

A small force continues at work on the Bengal Tiger, but results are withheld from the public.

The Champion is negotiating with an English company, with fair chances of effecting a sale. The mine is a good, small property, but the mill is absolutely worthless.

Interest is reviving in the carbonate district where the Iron Hill Company is vigorously at work. Small bodies of good ore have been found, but nothing in place; still the company is sanguine of opening a good mine at greater depth. The recent upward turn in the stock is scarcely warranted by present developments.

The Contention Consolidated Mining Company has declared its regular monthly dividend (No. 15) of 25 cents per share, payable April 28, at the office of the Farmers' Loan and Trust Company, on all stock registered in New-York. Transfer books close April 18.

Bullion valued at $31,000 was received in this city yesterday from the mines.
