WEDNESDAY, Sept. 5—P. M.

The stock market to-day developed a curious mixture of incongruities. The evident bent of the speculation was toward lower figures, and prices generally quickly yielded after every spurt of activity. But the continued support given to the line of stocks which late yesterday afternoon were made the special favorites exerted a balsamic influence upon the whole market. Louisville and Nashville stock to-day was the favorite with the "bulls," and its price, after some unimportant fluctuations, rose from 47¾ to 50⅜@50⅛. The inference that the advance in this stock has anything to do with a settlement of Williams's suit against the Western Union Company is positively denied by persons in positions to know whereof they speak; they say no compromise of that suit has been offered or has been suspected. The inference, however, had some effect upon Western Union stock, which advanced from 79⅞ to to 80 and closed at 79½. St. Paul and Northwestern stocks were specially strong upon the report of the earnings of the respective companies for the last week in August, but those reports make more favorable comparisons with the week of 1882, when the business was small, than they do with the week of 1881. The Northern Pacific system's stocks, in the early dealings, were tremulous at greater or less declines, but in the afternoon picked up something more than the early losses. Reading was specially weak, and declined from 52 to 50½@50⅞, and all the other coal stocks exhibited indications of fatigue. The trunk lines, including Erie, were rather weak, but under the influence of the last upward spurt in Louisville and Nashville their final prices show small or no changes from last evening. The market, such as there was among the traders, closed feverish and unsettled.

Government bonds were quiet at unchanged quotations as follows:

In State bonds Louisiana consols were 1 per cent higher at 67¼. North Carolina consol 4s sold at 76, Virginia 6 consols at 40½. Of city bank stocks Broadway sold at 275 and Chatham at 145.

There probably never was a default in the payment of a railroad company's interest upon its bonds that stirred up such a universal feeling of indignation as has the failure of the Ohio Central Railroad Company to pay the September coupons on its first mortgage river division bonds. In fact, it seldom has happened that a company has defaulted upon its first mortgages, and the management of the Ohio Central Railroad Company in doing so last Saturday has attracted special attention. Since the default, two articles have been published, evidently at the instance of some at least of this company's directors, excusing the default upon the ground of the company's large capitalization. The capitalization of the company, including income, bonds and stocks, unquestionably is large. But it is submitted that if the amount of outstanding income, bonds and stock was one hundred times greater than it is, it would have no effect upon the capacity of the company to earn and pay the interest upon its first mortgages. We heretofore have seen the same writers, in puffing some particular security, argue its value from the fact that behind it and under it there was such an enormous amount of other issues. But with Ohio Central, the same writers argue, it cannot pay interest on its first liability because its second liability and its proprietaryship (stock) are represented by such large figures. Ignoring all securities below the first mortgage bonds, the annual interest charge on the Ohio Central Railroad Company's 364 miles of road is only $477,000. To that is to be added $90,000 for interest on $1,500,000 Ohio Central Coal Company's first mortgages, and $228,000 for annual interest and instalments upon Car Trust bonds, making a total charge of $795,000. The first mortgage debt is made up as follows: Main line, $3,000,000; Toledo Terminal, $600; Mineral division, $300, and River division (issued) $4,050,000. The authorized issue of the River division bonds is $7,000,000; of that sum $2,500,000 is reserved to retire Ohio Central Coal Company's first mortgage for $1,500,000 and income bonds for $1,000,000, and $150,000 to retire $300,000 Mineral division firsts—bond for bond—and $300,000 incomes at 50 per cent. So the maximum issue of the River division bonds on the extension of 150 miles to Charleston, East Virginia, and upon the bridge over the Ohio River is $4,050,000. The company's total issue of first mortgage bonds, exclusive of the Coal Company's, and secured by mortgages upon the railways and the bridge over the Ohio River, is only $7,950,000, or at the rate of $21,700 per mile. The cost of the bridge, which should be completed this month, is over $1,000,000. If the first mortgage bondholders, because of the default, shall obtain the property for the face value of these bonds, they will get a cheap property.

The railroad bond market to-day was dull and slow. Generally there was little change in figures. Erie second consols were off ¼ at 94¾. Missouri, Kansas and Texas first consols were ¼ higher at 105¼, and general mortgages rose 1¼ to 80. Canada Southern firsts were unusually active but steady at about 94¾. East Tennessee, Virginia and Savannah 5s sold at 71½@72¼, and Virginia Midland incomes were up ¼ at 58¾. New-York, Chicago and St. Louis firsts declined ¼ to 99¾ and West Shore and Buffalo 5s were firm at 73½. Pennsylvania 4½s were active at 95¼@95. Wabash general 6s were up 1 per cent at 67. Denver and Rio Grande consols declined 1 per cent to 80, and firsts Western extension were off 2 at 62. Texas and Pacific incomes were steady at about 54½, but firsts Rio Grande division rose ¾ to 78½. Northern Pacific firsts held their own at 103⅞ and Oregon and Transcontinental rose 2 to 92. Fort Worth and Denver firsts were up 1½ at 70½.

The Sub-Treasury to-day lost on balance $121,997, made up by a currency loss of $255,262, less a coin gain of $133,265. The day's transactions covered: Receipts, $1,107,120; payments, $1,229,117; currency balance, $6,459,492; coin balance, $120,906,482. Money at the Stock Exchange for call loans ruled easy at 3@2 per cent. Among the domestic exchanges on New-York the rate at Boston was a little firmer at 15@12 cents discount and weaker at Chicago at 10 cents discount.

The Clearing-house statement to-day was as follows: Exchanges, $116,940,868; balances, $4,025,750.

The United States Treasury at Washington to-day received $187,000 National bank notes for redemption. The customs receipts were $1,077,289, and the internal revenue receipts $261,526.

The foreign exchanges are dull, but the rates are firm for business as follows: Bankers' bills, 84 81¾ and $4 85¼ for long and short sterling respectively; 5.25⅜ and 5.22 for francs; 94 and 94¾ for reichmarks; 39⅝ and 39⅞ for guilders.

In London consols were easier at ⅛ decline to 100 1-16 for money and to 100⅜ for account. United States bonds were unchanged; 4s at 122⅝, and 4½s at 115¼. American railways, were irregular; St. Paul, following yesterday's home market rose ¼ to 108¼, but prices generally were lower. The Bank of England gained £100,000 bullion on balance. At Paris, French 3 per cents declined to 79.52½, and recovered to 79.60, and sight exchange on London declined to 25.33½ francs to the £.
