New York Office, 549 Broadway N. Y. **THE RACET CO., Inc.**

MONTHLY CROP REPORT

The wheat harvest of Kentucky is over. The weather was very warm, and in most places dry, and the crop was put in the shock in fine condition.

Threshing has commenced, and the prospect for a better crop than last year is very flattering. The yield promises to be as good, and the grain much superior. There are some counties reporting heavy damages from black rust. Correspondents from the counties of Bourbon and Montgomery report whole fields destroyed by black rust. But this report is not general. Most of the correspondents write that when the wheat was badly down from the effects of the snow, that it was generally badly rusted. Some complaint of straw falling, which is generally the work of the fly, and manifested about the time the wheat is ready to be harvested.

The Government report for June makes an improvement of nearly two points in winter wheat, being 83.2 against 81.4 on May 1st.

It gives the percentages in the principal winter wheat growing States as follows: Ohio 96; Michigan 89; Indiana 93; Illinois 84; Missouri 82; Kansas 57; California 60. It gives the acreage for the whole country at 95.3 per cent. Making in round numbers 33,000,000 acres.

The average condition of wheat in Kentucky on July 1st, as per reports of correspondents to this office, is 95 per cent.

RYE.

Rye is less susceptible to injury from cold than either wheat or barley, and was, consequently, less injured by the freeze; but being more forward, and the head more matured, was more injured by the snow than wheat. In some places, it was so badly down that it was impossible to reach it with the harvester. The condition on July 1st, was 88 per cent.

BARLEY.

I have been asked by farmers what I thought would likely be the price of barley. As supply and demand usually regulates the prices of nearly all things, it will not be as large as last year. From the Goverment report, on June 1, barley was 82.2 against 88.3, same date last year, and 92.1 in 1892. California, which produces more barley than any other State, has the very low percentage of 58. The crop in Kentucky was very badly damaged by the snow. The per cent. is placed at 82.

SPRING PASTURES.

Spring pastures in some counties look like they usually do in September in many places. Were they to catch afire, they would burn all over. First, the freeze, followed by the cold weather, then the snow, and afterward the drought, has retarded the growth, so that in many places there is very little pasture. The rains have not been general, some correspondents reporting no rain of any consequence since the snow. The average condition July 1st was 76 per cent.

OATS.

Have headed out very low; but condition rather more favorable than last report. The average condition July 1st was 72 per cent.

CLOVER.

The impaired condition of clover is not confined to our State. There is a reduction of nearly five points in the average condition of all the States, as compared last year. There has been very little clover cut for hay, and consequently, very little seed will be saved this fall. The average condition on July 1st was 71 per cent.

TIMOTHY.

Timothy is being cut; the crop is very indifferent, nearly every field filled with cheat and white top. Many fields not worth cutting. The crop will be unusually short. The condition July 1st is 68 per cent.

CORN.

Every thing looks promising at this date for a good corn crop. The farmer has certainly done his part. First, the ground was well prepared before planting, and next, the crop has been well cultivated; the color of the stalk is dark, and the growth looks vigorous. It has not, as yet, suffered for the want of rain, but in many places it is beginning to want it. The condition of the crop July 1st was 92 per cent.

TOBACCO.

It is a very difficult matter at this stage of the tobacco crop, to get a correct report, as correspondents differ so wide. They differ as to average and as to the condition of the plant. The season has been fine for setting in some counties, plenty of rain, while in other counties the ground was not sufficiently wet, and the hot weather has killed the plants. The acreage and condition of the plant on July 1st, as reported by the correspondents to this office: acreage 80 per cent., condition 83 per cent.

FRUIT.

To read the reports of correspondents to this office is sufficient to show how disastrous the season has been for all kinds of fruit. And then, after reading reports of the other States there is not very much encouragement that we will be able to eat very much fruit this year. The condition of the fruit crop in the eight States which produce the commercial peach crop of the country, namely: New Jersey, Delaware, Maryland, Virginia, Georgia, Ohio, Michigan, and California is a small fraction over 40 per cent.

The condition of apples is somewhat better than peaches, some few States reporting good crops. I will not undertake to give a per cent. of the crop in our State.

STOCK.

The prices of cattle and hogs have kept up well. Mules and horses not so good. In the language of one of my correspondents: "The general condition of man an beast all over the State is good, for which we should ever be thankful."

NICHOLAS MCDOWELL
Commission of Agriculture.
July 10, 1894.

That Tired Feeling

is a dangerous condition directly due to depleted or impure blood. It should not be allowed to continue, as in its debility the system is especially liable to serious attacks of illness. Hood's Sarsaparilla is the remedy for such a condition, and also for that weakness which prevails at the change of the season, climate or life.

HOOD'S PILLS are purely vegetable, carefully prepared from the best ingredients.

A MOTHER'S STORY.

Happiness Comes After Years of Suffering.

The Terrible Experience of a Well Known Official's Wife—A Story That Appeals to Every Mother in the Land.

From the Chattanooga, Tenn., Press.

No county official in East Tennessee is better known and more highly esteemed than Mr. J. C. Wilson, Circuit Court Clerk of Rhea County, at Dayton, the home of Mr. Wilson. He enjoys the confidence and respect of all classes, and in the business community his word is as good as his bond. Just now Mr. Wilson is receiving heartiest congratulations from his numerous friends because of the restoration to robust health of his estimable wife, who has for years been a helpless invalid. Mrs. Wilson's high standing in society, and her many lovable traits of character have won her a host of friends, and her wonderful recovery has attracted wide spread attention.

As the *Press* was the medium of bringing to the invalid lady's attention the remedy that has effected her remarkable cure, a reporter was sent to Dayton to interview Mrs. Wilson, in order that the general public might have the benefit of the sufferer's experience and be made aware of the treatment that wrought such a marvelous change in her condition. The reporter was welcomed at the Wilson home, and the enthusiastic lady with becoming reluctance gave the history of her affliction and the manner in which she was relieved:

"Yes," said Mrs. Wilson, "I was for 8 years an invalid with one of the most distressing afflictions woman can suffer. For 8 years I mopped around, dragging myself with difficulty and pain out of bed. My limb ones went untrained and were grossly neglected, while I looked listlessly and helplessly at the cheerless prospect before me and them. I suffered the most intense pains in the small of my back, and these seemed even greater in the region of the stomach, extending down to the groins. I suffered agony sleeping or awake. Despair is no word for the feeling caused by that dreadful sensation of weakness and helplessness I constantly experienced.

"I was treated for my troubles by several local physicians, but they were able to give me only temporary relief by the use of sedatives and narcotics. I had almost given up all hope of ever securing permanent relief when I saw an account in the Press of a cure which Dr. Williams' Pink Pills had effected. I decided to try them, as I knew the lady who had been cured and had great confidence in her statement. I began to take the pills in October, 1893, and in two months I was doing light housework and attending to the children without any bad effects or weakness, such as I formerly experienced. Hitherto, as I had been unable to retain any food, but now my appetite grew stronger, and with it came back that elasticity and hearty tone of the stomach. Dr. Williams' Pink Pills cured me, and I assure you the cure has brought a great change in our home. I can now rejoice in my husband's success, for I feel that I have something to live for. Who has a better right to feel this than a mother? One thing more. I have recommended these pills to others, and many of the women of Dayton have taken them with good results, and it is my greatest pleasure to recommend to every suffering woman a remedy that has done so much for me."

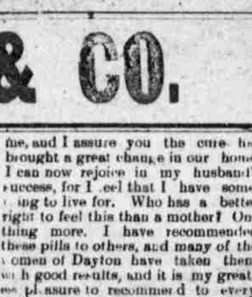
An analysis proves that Dr. Williams' Pink Pills for Pale People contains in a condensed form all the elements necessary to give new life and richness to the blood and restore shattered nerves. They are an unfailing specific for such diseases as locomotor ataxia, partial paralysis, St. Vitus' dance, sciatica, neuralgia, rheumatism, nervous headache, the after effects of la grippe, palpitation of the heart, pale and yellow complexion, that tired feeling resulting from vitiated blood, such as scrofula, chronic erysipelas, etc. They are also a specific for troubles peculiar to females, such as suppression, irregularities, and all forms of weakness. In men they effect a radical cure in all cases arising from mental worry, overwork, or excesses of whatever nature.

Dr. Williams' Pink Pills for Pale People are now manufactured by the Dr. Williams' Medicine Company, Schenectady, N. Y., and are sold in boxes (never in loose form by the dozen or hundred, and the public are cautioned against numerous imitations sold in this shape) at 50 cents a box, or six boxes for $2.50, and may be had of all druggists, or direct by mail from Dr. Williams' Medicine Company.

No One Ought to Make a Mistake If This Comes to Use.

Accidental poisoning cases are likely to decrease very materially if the ingenious poison bottle invented by a Jamaica Plains man catches the public fancy.

It is of blue glass, in order that the contents may better resist being affected by light, and it is molded into the shape of a skull with the cross bones underneath. The word "poison"



is placed in raised letters on the forehead, and at the base of the skull a space has been left for the red label that tells the nature of the drug. The hollow eye sockets, the jawbones and the teeth would tell its purpose to a blind man; and ghastly as it may seem to those who are blessed with sight, it is better to be frightened than to die. That, at least, is the philosophy of the inventor, and he is not a druggist or doctor, by the way, but a plain, everyday jobber in boots and shoes.

THE SULTAN'S TRIBUTE.

Decoration Presented to a Chicago Woman by Turkey's Ruler.

The decoration of the sultan of Turkey for Mrs. Charles Henrotin, of Chicago, was delivered at the office of Mr. Henrotin, the consul general of Belgium, in the Chicago Stock Exchange building the other day. The decoration is of the order of Chefakat, the second highest of Turkey, and Mrs. Henrotin is the first resident of the United States of either sex to receive it. The honor was conferred because of her services to Turkey as vice president of the woman's branch of the world's congress auxiliary of the Columbian exposition. "Chefakat" means, literally, "The Order of the Good." Inside the package was the card of M. Norighian Effendi, first secretary of the Imperial Ottoman legation at Washington, on which his compliments were written. Accompanying the package was an autograph letter in French of Mavrojeni Bey, envoy extraordinary and minister plenipotentiary of Turkey. He expressed his personal compliments and his official announcement of the decoration through the husband to the wife. The document of the sultan officially conferring the decoration is signed by himself and his minister of foreign affairs. In three lines that resemble three snakes and trail over an entire page larger than legal cap the official statement is rendered and must be read backward. The sultan and his minister sign their names in splashes of gold in signatures that resemble paddles. The decoration rests in a maroon velvet box on the cover of which is fastened the gold star and crescent of the Ottoman empire. It is primarily a star of wine-colored enamel with a heavy back of gold, the star points lined with gold. On top of the center of the star is a wheel of gold on which is inscribed the monogram of Turkey, surrounded by a green wreath. The spaces between the star points are filled in by enameled green and ruby wreaths backed by a design of rays of gold. The points of the rays are covered with diamonds. Above the star is a breastpin of gold enameled star and crescent, surmounted by a large bow of the Turkish colors of the order. This is Mrs. Henrotin's second recognition by a foreign sovereign, and an intimation has been conveyed her by a third foreign country that she will be decorated by it.

DECORATION OF THE CHEFAKAT.

Largest Library in the World.

The largest library in the world will be the new national library at Washington. Though it now contains only 740,000 bound volumes and 200,000 pamphlets it will hold when the library building is finished 4,000,000 volumes and the space devoted to books, it is estimated, will be ample for the growth of the library for 150 years.

REV. J. R. HAWTHORNE.

A GREAT PREACHER TELLS ABOUT A GREAT REMEDY.

"I am free from catarrh. I believe that I could get a certificate to this effect from any competent physician. I have used no medicine except King's Royal Germetuer. My health is better than it has been in thirty years. The effects of this remedy upon my wife have been even more signal and wonderful. She has been almost an invalid from nervous headache, neuralgia and rheumatism. In a period of thirty years she has scarcely had a day's exemption from pain. A more complete transformation I have never witnessed. Every symptom of disease has disappeared. She appears to be twenty years younger, and is as happy and playful as a healthy child. We have persuaded many of our friends to take the medicine and the testimony of all of them is that it is a great remedy.
