BALLOONS ABOVE CLOUDS USED TO MARK AN AIRPLANE COURSE

(By Associated Press)

LONDON, March 3.—Balloons are used as buoys above the clouds to mark the course of the long distance airplane mail service from Marquise, near Boulogne, France, to Cologne, Germany, says an announcement of the royal air force which is operating this service. Each balloon is marked with signs to indicate to the airplane pilots to shape their course anew when the weather below the clouds are very low. The balloons also mark the landing grounds for the airplanes. Observers in the balloons are required to report the condition of weather above the cloud layer, the speed and direction of wind and to pass this information to the nearest wireless station for transmission to the airplane pilots.

A chain of wireless stations has been established along the routes for the transmission of weather reports and, if the pilot of an airplane is compelled to make a forced landing he is required to report this location by wireless to the airplane, to the nearest wireless station, so that a motor truck can be despatched to recover the mails and render assistance to the airplane.

As it is the intention of the royal air force to maintain a night mail service on this route, a chain of lighthouses also has been established and later, it is announced the balloons will be fitted for carrying signal lights and remaining aloft at night as a further guide to the pilots.

Should a pilot loose his way in the clouds, arrangements have been made whereby he will be able to get in communication with a wireless station from which he can receive directions how to proceed to the nearest landing ground. This wireless guidance is expected to be useful in bad weather or in night flying.

Emergency landings have been located along the route in addition to the regular terminals and the airplanes carry pigeons to be used as messengers in case of accident.

This through service from Marquise to Cologne presents difficulties because of the range of hills 2000 feet high between the flat country of northern France and the valley of the Rhine. This stretch of hilly country has few places suitable for landing and pilots flying above it frequently encounter clouds and bad weather.

The royal air force has for some time been carrying mail regularly between Marquise and Valenciennes and Namur, Belgium; and between Valenciennes and Spa, the headquarters of the armistice commission.

MILLIONS OF CASES SALMON PACKED

(By Associated Press)

CORDOVA, Alaska, Feb. 22.—(By Mail)—Alaska's canneries in 1918 packed more salmon than has ever been packed in the history of the industry. The total pack was 6,067,569 cases, as against 5,927,726 for the year 1917.

The world's total salmon pack last year is given as 10,166,127 cases, so that it will be seen that Alaska packed two-thirds of the salmon of the world. Southeastern Alaska, by district, leads the rest of the territory, having packed 3,385,749 cases. Central Alaska packed 1,494,278 cases and western Alaska packed 1,887,501 cases.

POOR FUR HARVEST

(By Associated Press)

DAWSON, Y. T., March 19.—(By Wireless and Mail)—Mounted northwest police, returning from the Arctic say that Fort MacPherson reports the poorest fur harvest ever known.

ALASKA ON THE EVE OF A MINING REVIVAL

(By Associated Press)

SEWARD, Alaska, Feb. 20.—(By Mail)—In Alaska to make a survey of various resources for Secretary of the Interior Lane, W. A. Ryan is quoted in the Seward Gateway as saying that Alaska is on the eve of a revival of mining that soon will result in production surpassing its best previous records.

Numerous discoveries of more or less apparent value have been made in well-known Alaskan mining regions this winter, according to Ryan. In the Fairbanks district a discovery has been reported in the Saloba country. New discoveries, he says, have been reported from Eve and Moose creeks, tributary to the Nenana river, and from the vicinity of Tanlee or Hasanna creek. A consequent movement of prospectors into the hills in the Bonnifield district indicates the gradual spread of knowledge concerning mineral discoveries adjacent to the government railroad.

In the past, Mr. Ryan pointed out, most of the north's rich gold finds have been made near waterways, men not venturing far from avenues of communication. This, of course, was never advanced as an argument that paying minerals were not to be found elsewhere, so that the opening of the government railroad is considered likely to bring out new bonanzas. The Broad Pass country is cited as one isolated region which known to be rich in various minerals, will be easily accessible to prospecting and development after the railroad has pierced it. Other newer and rich fields, similarly located before, will likewise be opened. Alaska, in fact, Mr. Ryan asserts, stands in the position of being able to unlock a great treasure chest to the eyes of the world. In the far northern districts around the Yukon hundreds of thousands of square miles of low grade alluvial deposits will be worked by dredging and hydraulicking, and a dozen or more quartz propositions will become productive, Mr. Ryan declares, because high transportation costs will have been removed.

It Takes Nerve.

It takes a lot of nerve to stand behind a counter and charge a man two dollars for a necktie out of the same stock you were selling off for twenty-five cents four years ago, and explain to him that the advance in price is due to the scarcity of material.—Baltimore Sun.

History's Limitations.

History tries to portray occurrences just as they actually took place; but, when most successful, it can only portray them as they were perceived.—May Sarton.

NOTICE OF DIVIDEND.

At a meeting of the board of directors of the Tonopah Mining Company of Nevada, held March 24th, 1919, a dividend of fifteen per cent was declared, payable April 21st, 1919, to stockholders of record at three o'clock afternoon March 31st. Transfer books will close March 31st and open April 8th, 1919.

(Signed) C. A. HIGBEE, Secretary.

Philadelphia, Pa., March 24, 1919.

[illegible] with law and an order of the Board of Directors made on the [illegible] day of February, 1919, so much thereof of each parcel of stock as may be necessary will be sold at public auction at the office of the company, Room 243 Ruse Building, San Francisco, California, on Tuesday, the 15th day of April, 1919, at the hour of ten o'clock p. m. of said day to pay said delinquent assessment thereon together with costs of advertising and expenses of sale.

CHARLES D. OLNEY, Secretary.

Office: Room 243 Ruse Building, San Francisco, California.

Willard STORAGE BATTERY SERVICE STATION

Copyright renewed, 1919

Give it a Chance

There are only two places in your whole car that need water.

One is the radiator.

The other is the *battery*.

If you forget your radiator you'll hear from it right away.

If you forget your battery, it keeps on working for a while, but it is damaged just as surely as your engine would be if you let the radiator go dry.

Give your battery a chance to make good by having us add distilled water every week or so, and test each cell with the Hydrometer to make sure that you are keeping up the charge.

We test, repair and recharge storage batteries, and always carry a full supply of battery parts, new batteries and rental batteries.

IMPORTANT NOTICE

To Secretaries of Corporations Doing Business in Nevada But Incorporated in Other States

NOT TOO LATE TO SAVE $100 PER MONTH

SECTION 1.—All foreign corporations doing business in the State of Nevada shall, not later than the month of March in each year, beginning in the year 1914, publish a statement of their last year's business in some newspaper published in the State of Nevada. If published in a daily newspaper, such statement shall be published for a period of one week, or if published in a semi-weekly or tri-weekly newspaper, for a period of two weeks, or if published in a weekly newspaper for a period of four weeks.

SECTION 2—The secretary of the company publishing the statement shall file a copy with the assessor of each county of the State of Nevada, in which said company is doing business.

SECTION 4—Any district attorney in the state is competent to sue to recover the penalty, or the attorney general. The first county suing through its district attorney shall secure the penalty, and if no suit is brought for the penalty by any district attorney the State shall have the right to recover through its attorney-general.

THE TONOPAH DAILY BONANZA WILL MAKE PUBLICATION REQUIRED BY LAW, WHICH INCLUDES THE FILING OF A SWORN AFFIDAVIT OF PUBLICATION WITH THE ASSESSOR OF EACH OF THE COUNTIES OF THE STATE, WITHIN WHICH THE COMPANY IS DOING BUSINESS; AN AFFIDAVIT OF PUBLICATION WILL ALSO BE FURNISHED SECRETARIES.
