...ROUS CAVILS AND HOUS...
...rather remote upon which ... is based. It is asserted ... authority that Rye, Barley, or ...a meal, made into a mash, and ...to ferment and pass into the ...state, when mixed with cut hay, ..., or other dry vegetable food, exhib... the most marked fattening effects. A ...y consistent and observing friend of ...ers remarked the other day, that he could ...with barley meal alone, properly fermented and soured, make hogs as fat in six weeks, as they could, or ought to be, and that he preferred such process to cooking the food, or any other method.

It is a familiar fact to all feeders of swine, that sour and coagulated milk is worth one quarter more for those animals, than fresh and sweet milk; but how its action in that state is to be accounted for, and its operations on the animal economy of the stomach, is not very apparent. It is known by the experiments of Dr. Beaumont, that milk and all substances capable of coagulation, are almost instantly changed on mixing with the gastric juice, and the rejection of milk by the infant, immediately after sucking, also shows that fact.

Now, whether the souring of the food relieves the action of the digestive process, or whether the *acetic*, malic, or other acids are required by the stomach to effect secretion or stimulation, is simple conjecture. With the human subject, pickles are a favorite condiment with rich and highly concentrated food, and many delicate stomachs can endure the use of large quantities of these most indigestible and unnutritious substances, without experiencing any deleterious effects. It is generally held, that those persons who consume much acid food and use pickles freely, are apt to be thin and spare, contrary to the doctrine of souring food. We once knew a young lady so fleshy and full of "blood and blue veins," that her skin was almost to the tension of bursting, who reduced herself to very respectable wasp-like dimensions, merely by the free use of vinegar.

Of the good effects of the souring process, when used for fattening animals, we have the most abundant proofs in our own experience, and although the *modus operandi* is not so clear to our perceptions, it is, we opine, sufficient for us to know that such is the fact, at least from its assertion by good authority, to induce our readers to try its effects and its economy.

DESTRUCTION OF THE CURCULIO.—The September number of Hovey's Magazine of Horticulture, contains a paper read by Mr. Updike, before the Pittsburgh Horticultural Society, at a recent meeting, on the subject. He says he has tried it four years, with perfect success.

He takes one peck of dry, well-slacked lime, and one pound of flour of sulphur, mixes thoroughly, and dusts it over the entire tree, early in the morning, when the dew is heavy. This should be repeated five or six times, or until every part of the tree is well-coated, with a two gallon tin canister, punched with quarter-inch holes, and handle of proper length.

A tree may be well dusted in two minutes. The best time, he says, to begin using the preparation, is so soon as the bloom begins to fall.

Some of the lime will, of course, fall to the ground, around the tree.

Some trees in Mr. Updike's ground, too near the house, to allow the application of this compound, and of course had none applied to them, were so infested with curculios, that they did not produce a single plum, while from those to which it was applied, he gathered large crops; from one of them as many as eight pecks. Remember this next spring.

DITCHING.—A correspondent of the *Ohio Cultivator*, makes the following statement:—"You will recollect the account I gave you in 1850, of ditching, and the amount of land reclaimed by the operation; also, the amount produced by my little farm, at that time. The following statement will show the further benefits of ditching, and otherwise improving our lands. My ditches have cost me $750, and by that expenditure, I have reclaimed *thirty acres* of land, which produces the largest and best crops of any land I have. Before ditching, it was worse than useless, the miasma arising from the stagnant water engendering disease, and keeping the neighborhood unhealthy. Now, the soil is firm and dry, and easily worked. There are thousands upon thousands of acres of land, in this section of the state, in swamps, which might be made available, and increase, materially, not only the value of farms, but the wealth of the state. Cannot our farmers hit upon some connected, continuous system of drainage, and by that means convert the hideous swamps into rich land. I would like to hear from from others, their experience in draining."

The Plymouth Advertiser

IS PUBLISHED
EVERY SATURDAY MORNING,
At Plymouth, Ohio.
ROBINSON & LOCKE,
EDITORS AND PUBLISHERS.

TERMS.
ONE DOLLAR AND FIFTY CENTS PER YEAR.

That a town of the size of Plymouth, possessing the business advantages it does, and the extensive trade it already has, and surrounded as it is by an intelligent and reading community, should have been so long without a newspaper, is a matter of no little astonishment to us. True, an attempt was once made, but the failure certainly was not brought about from want of encouragement on the part of the people. We shall make another attempt, feeling perfectly confident that a *good* paper can and will be sustained, especially as we are determined not only to make it *useful*, but actually *necessary*, resting assured that by sparing no efforts to make our sheet a vehicle of local, as well as foreign interest, people will patronize it. *Nil desperandum* is our motto; if we cannot *command* success, we shall do our best to *deserve* it.

It must be at once evident to any one acquainted with the wants of the people here, that a paper is much needed. The statistics of our post-office will show that there are but few, if any towns of the same size in the State, to which more reading matter is sent, than to ours. But in this day of progression, people are not satisfied with importing their intelligence from abroad; they wish to have papers in their immediate neighborhood, which will keep them informed of what transpires in their own section of country. Until within a short time, and we regret it is still too lamen ably common, country newspapers were merely compendiums—and poor ones too, at that—of city journals, apparently thinking it worth their while to pay little or no attention to what occurred in their locality; and to this cause, probably, more than any other, may be ascribed the insignificant circulation and influence of the country press, generally, and the corresponding increase of country subscribers to city papers. In this matter we shall endeavor to introduce an improvement, making our paper as local in its character, as will comport with its general usefulness.

Our object will be to make the *Advertiser* suitable to all readers, consequently it will not espouse the cause of any party. We can do this quite conscientiously, as the purity and incorruptibility of the present political parties may very well be disputed. Time and experience have demonstrated that the *principal* difference, as well as the difference in *principle*, between them, is the "five loaves and two fishes," and the strife is, who shall get them. Were it not for spoils, the "dear people" would not be bored annually with *patriotic* appeals, from *disinterested* office-hunters, to come forward and save this "glorious Republic," before it is irredeemably ruined by *Whig-isms*, or *Locofoco misrule*. We are opposed to all demagoguism, and it is high time that every true lover of his country should shut down on those who practise it. But whilst we eschew party politics, so do we despise *neutrality*. We prefer to pursue a middle course, and therefore purpose that the *Advertiser* shall be an *independent* sheet. Having minds of our own, we are determined to speak them fearlessly and candidly, on all topics which may be of importance to our readers, without being trammeled by party ties, or awed by favor. This is an age of progress, and we shall allow ourselves the expansive platform of speaking on political subjects, just what we conscientiously believe to be right and proper.

To the Literary Department of the *Advertiser*, we shall pay particular attention. Its columns will be enriched weekly, with selections of prose and poetry from the best sources we may be able to command. To this feature of our paper, we commend the especial attention of our Lady readers, assuring them that nothing of the least immoral tendency shall ever be found in its pages.

For the Farmer, we shall devote a portion of our paper to the subject of Agriture, and such other subjects as may be of interest to him. The day is past when "book-farming" is sneered at; agriculture is becoming a subject of scientific investigation—farmers who wish to keep up with the progress of the day of those who are disposed to improve on what their fathers did—will be forced to inform themselves of everything which may pertain to their profession. Such we think, will derive material benefit from what we publish on the subject. We shall also give correct reports of the markets, in this and other places, and endeavor to make them as reliable as possible.

But while paying due attention to the above departments, we shall by no means neglect the general reader. With the aid of the Telegraph, and the speedy transmission of intelligence by railroad, we expect to furnish our readers with teh very latest current news of the day, and as there is, at present every appearance of stirring times in Europe, we will give such a compendium of foreign news, as will keep the readers of the *Advertiser* well posted up in everything of importance which may transpire across the Atlantic.

Plymouth, Oct. 25th, 1853.

Scene at a Tea Party.

WHY Mrs. S., this is very fine Tea. Mrs. W—I was just about mentioning it—altogether ahead of anything I've tasted. It beats any tea we have had in our house, says Mrs. P, where did you get it Mrs. S? At Cup and Croninger's. Well, if I don't sand over when I get home, and get a pound—what is the price? Mrs. S—Only 4s. Only 4s! La me! we paid 6s for tea not half as good. Exit the whole party, bound for
CULP & CRONINGER'S.

CLOTHING! CLOTHING

THE CHEAPEST and best place in town to buy Ready Made Clothing. If any one takes exceptions to this assertion, I will bring forward some of the proof, and first and foremost, our Cutting is done by one of the best Artists in Northern Ohio. Those who are acquainted with Mr. NARRENCE'S work, will attest that fact, and our work is done, not by apprentices, but by experienced workmen, and we save in cutting and Trimming, nearly all the expense of making. Therefore we can and will sell new-made Clothing, very nearly, if not quite, as cheap as the cloth and trimings can be bought. Cutting or making done on short notice, or we will make any garment to measure, as cheap as we sell them made up. We will sell

Coats from	$2,00	*to*	$14,00
Over Coats from	3,50	*to*	12.50
Vests, from	,37,	*to*	6,00
Pants, from	1,00	*to*	6,50

Will you call and examine for yourselves.
T. W. CROWELL.
Plymouth, Oct 22, 1853.

HOLLAND BITTERS

BOERHAVE'S
Electro Chemical Aroma,
OR
GENUINE HOLLAND BITTERS,
From LOUIS A. D'ISRAELS, Chemist and Pharmaceutist of Amsterdam, the only Manufacturer.

A PURELY VEGETABLE COMPOUND, prepared on strictly scientific principles after the manner of the celebrated Holland Professor, Boerhave. Because of its great success in most of the European States, its introduction in the United States was intended more especially for those of our Father Land scattered here and there over the face of this mighty country. Meeting with great success among them, I now offer it to the American public, knowing that its truly medicinal virtues must be acknowledged.

Benefic al effects will be experienced from its use, for many diseases arising from disorders of the stomach, such as Indigestion, Dyspepsia, Headache, Loss of Appetite, Nervous Debility, Constipation of the Bowels, Cramps, Cholic, Cholera Morbus, etc.

It is particularly recommended to those persons whose constitutions may have been impaired by the continued use of ardent spirits, or other forms of dissipation. Generally instantaneous in effect, it finds its way directly to the seat of life, thrilling and quickening every nerve, raising up the drooping spirits, and in fact infusing new health and vigor into the system.

None genuine without my Signature.

Certificat of Mr. B. O. Woods, late Justice of the Peace in East Birmingham:

Mr. Benj. Page, Jr: *Dear Sir:*—I would say that have been afflicted with a disease of the stomach, palpitation of the heart and nervous headache, for nearly fifteen years; and I have spent sums hundreds of dollars, in order to effect a cure but to no purpose. After having used three bottles of your "Electro Chemical Aroma or Holland Bitters," I feel myself entirely restored. I can eat and sleep well, and attend to my business with pleasure, and would therefore recommend it to all those who are similarly afflicted

Pittsburgh, Aug. 31, 1853.

Mr. Benj. Page, Jr.: Dear Sir—My sincere thanks are due the friend recommending your Holland Bitters. Having suffered for some time with headache, loss of appetite, mental depression, and in fact, general disorder of the system, I now feel, after using but one bottle, conscious of returning health.
NICOLOUS SCHOSTER

Benj. Page Jr.- Dear Sir- I have been relieved of the most distressing pain of dyspepsia by the use of Boerhave's Holland Bitters, (purchased of you) after suffering for three years with headache, nausea and general debility, attending indigestion; I now feel perfectly restored. Yours respectfully,
JNO. RUTHERFORD,
No. 90 Wylie st., Pittsburgh.

Sold by the proprietor, BENJ. PAGE, Jr.

DR. TOWNSEND'S
COMPOUND EXTRACT OF
SARSAPARILLA.
Great Spring and Summer Medicine.
WONDER AND BLESSING OF THE AGE.

This Extract is put up in Quart Bottles; it is six times cheaper, pleasanter, and warranted superior to any sold. It cures disease without vomiting, purging, sickening or debilitating the Patient.

The great beauty and superiority of this Sarsaparilla over all other medicines is, while it eradicates disease, it invigorates the body. It is one of the very best
SPRING AND SUMMER MEDICINES
Ever known; it not only purifies the whole system and strengthens the person, but it creates new, pure and rich blood: a power possessed by no other medicine. And in this lies the grand secret of its wonderful success. It has performed within the last five years, more than 100,000 cures of severe cases of diseases; at least 15,000 were considered incurable. It has saved the lives of more than 5,000 children the two past seasons.

10,000 cases of General Debility and want of Nervous Energy.

Dr. Townsend's Sarsaparilla invigorates the whole system permanently. To those who have lost their muscular energy by the effects of medicine or indiscretion committed in youth, or the excessive indulgence of the passions, and brought on by a physical prostration of the nervous system, lassitude, want of ambition, fainting sensations, premature decay and decline, hastening towards that fatal disease, Consumption, can be entirely restored by this pleasant remedy. This Sarsaparilla is far superior to any
Invigorating Cordial.
As it renews and invigorates the system, gives activity to the limbs, and strength to the muscular system, in a most extraordinary degree.

Consumption Cured.
Cleanse and Strengthen. Consumption can be cured. Bronchitis, Consumption, Liver Complaint, Colds, Catarrh, Coughs, Asthma, Spitting of Blood, Soreness in the Chest, Hectic Flush, Night Sweats, Difficult or Profuse Expectoration, Pain in the Side, &c., have been and can be cured.

Spitting Blood.
New York, April 28, 1847.
DR. TOWNSEND.—I verily believe your Sarsaparilla has been the means, through Providence, of saving my life. I have for several years had a bad Cough. It became worse and worse. At last I raised large quantities of blood, had night sweats, and was greatly debilitated and reduced, and did not expect to live. I have only used your Sarsaparilla a short time, and there has a wonderful change been wrought in me. I am now able to walk all over the city. I raise no blood and my cough has left me. You can well imagine that I am thankful for these results. Your obedient servant,
WM. RUSSELL, 65 Catharine st.

Female Medicine.
Dr. Townsend's Sarsaparilla is a sovereign and speedy cure for incipient Consumption, Barreness, Prolapsus Uteri or Falling of the Womb, Costiveness, Piles, Leucorrhœa, or Whites, obstructed or difficult Menstruation, Incontinence of Urine, or involuntary discharge thereof, and for the general prostration of the system—no matter whether the result of inherent cause or causes produced by irregularity, illness or accident. Nothing can be more surprising than its invigorating effects on the human frame. Persons of all weakness and lassitude, from taking it at once become robust and full of energy under its influence. It immediately counteracts the nervelessness of the female frame, which is the great cause of Barrenness. It will not be expected of us, in the case of so delicate a nature, to exhibit certificates of cures performed but we can assure the afflicted, that hundreds of cases have been reported to us. Thousands of cases where families have been without children, after using a few bottles of this valuable medicine, have been blessed with fine, healthy offspring

To Mothers and Married Ladies.
This Extract of Sarsaparilla has been expressly prepared in reference to female complaints. No female who has reason to suppose she is approaching that critical period, "*The Turn of life,*" should neglect to take it, as it is a certain preventive for any of the numerous and horrible diseases to which females are subject at this time of life. This period *may be delayed for several years by using this medicine.* Nor is it less valuable for those who are approaching womanhood, as it is calculated to assist nature by quickening the blood and invigorating the system. Indeed, this medicine is invaluable for all the delicate diseases to which Women are subject.

It renews the whole system, renews permanently the natural energies, by removing the impurities of the body, not so far stimulating as to produce subsequent relaxation, which is the case of most medicines taken for female weakness and disease. By using a few bottles of this medicine, many severe and painful surgical operations may be prevented.

Great blessing to Mothers & Children.
It is the safest and most efficient medicine for purifying the system, and relieving the sufferings attendant upon child-birth ever discovered. It strengthens both the mother and child, prevents pain and disease, increases and enriches the food, those who have used it think it is indispensable. It is highly useful both before and after confinement, as it prevents diseases attendant upon childbirth—in Costiveness, Piles Cramps, Swelling of the Feet, Despondency, Heartburn, Vomiting, Pain in the Back and Loins, False Pains, Hemorrhage, and in regulating the secretions and equalizing the circulation it has no equal. The great beauty of this medicine is, it is always safe, and the most delicate use it most successfully, very few cases require any other medicine, in some a little Castor Oil, or Magnesia, is useful. Exercise in the open air, and light food with this medicine, will always ensure a safe and easy confinement.

Beauty and Health.
Cosmetics, Chalk, and a variety of preparations generally in use, when applied to the face, very soon spoil it of its beauty. They close the pores of the skin and check the circulation, which, when nature is not thwarted by disease or powder, or the skin defamed by the alkalies used in soaps, beautifies its own production in the "human face Divine," as well as in the garden of rich and delicately tinted and variegated flowers. A free, active and healthy circulation of the fluids or the coursing of the pure, rich blood to the extremities, is that which paints the countenance in the most exquisite beauty. It is that which imparts the indescribable shades and flashes of loveliness that all admire, but none can describe. This beauty is the offspring of *nature*—not of *powder or soap.* If there is not a free and healthy circulation, there is no beauty. If the lady is fair as driven snow, if she paint, and use cosmetics, and the blood is thick, cold and impure, she is not beautiful. If she be brown or yellow, and there is pure and active blood, it gives a rich bloom to the cheeks, and a brilliancy to their eyes that is fascinating.

This is why the southern, and especially the Spanish ladies, are so much admired. Ladies in the north who take but little exercise or are confined in close rooms, or have spoiled their complexion by the application of deleterious mixtures, if they wish to regain elasticity of step, buoyant spirits, sparkling eyes and beautiful complexions they should use Dr. Townsend's Sarsaparilla. Thousands who have tried it are more than satisfied, are delighted. Ladies of every station crowd our office daily.

Notice to the Ladies.
Those that imitate Dr. Townsend's Sarsaparilla, have invariably called their stuff a *great Remedy for Females*, &c., &c., and have copied our bills and circulars which relates to the complaints of women, word for word—other men who put up medicine, have, since the great success of
