Interesting to Ladies.

Our lady readers can hardly fail to have their attention called this week to the latest combination of improvements in that most useful of all domestic implements, the "sewing machine."

As we understand it, a machine for family use should meet first of all these requirements: It should be simple in its mechanism; it should run easily; it should do a wide range of work; it should be as nearly noiseless as possible; it should be light, handsome, durable, and as cheap as is consistent with excellence throughout

These conditions the "Light-Running New Home" certainly meets. It has also several very important and useful attachments and "notions" of its own, which go far to make good its claims to popular favor.

The "New Home" specially recommends itself to purchasers on account of its superior mechanical construction, ease of Management and reasonable price. Over half a million have been sold in the last three years, all of which are giving universal satisfaction. This unrivalled machine is manufactured by the NEW HOME SEWING MACHINE CO., 30 Union Square, New York, who wish us to say that all who will send for their new illustrated catalogue and enclose their advertisement (printed on another page), will receive a set of fancy advertising novelties of value to those collecting cards, &c.

How the world has progressed within a century! George Washington, the first president of the United States, never saw a steamboat. John Adams, the second president, never saw a railroad. Andrew Jackson, the seventh president, knew nothing about the telegraph. Abraham Lincoln, sixteenth president, never dreamed of such a thing as the telephone.

Franklin B. Gowen issued a circular on Wednesday, in which he announces his intention of resigning the presidency of the Reading railroad at the expiration of his present term. He recommends Geo. De B. Keim, the vice president, as his successor. He takes this step because the company has now surmounted all the difficulties of the last four eventful years.

In heaven, we are told, there is more joy over one sinner that repenteth than over ninety-and nine who have never gone astray. It is just the other way here below. There is more joy over one righteous man who goes astray than over ninety-and nine thousand sinners who have kept at it all their lives.

There are over 80,000 widows in India, simply because girls are betrothed when they are three years old, and should their intended husband die they are doomed to perpetual widowhood and single blessedness.

Petitions for the pardon of Sergeant Mason have been pouring in upon President Arthur of late, but they have so far received no attention.

A noted physician says that nearly all women have smaller chests and trunks than they ought. Baggagemen don't think so.

A Lady in Cynthiany, Ky., has a picture of Abraham Lincoln woven in black and white silk, which was made in Lyons, France, at a cost of $800.

To know how to listen is a great art, it is to know how to gain instruction from every one.

The expense of the army of the United States last year were $13-382.164.

The public debt statement issued Nov. 1, shows a reduction of $10 304,798.

(Continued from last week.)

How Watch Cases are Made.

This process of manufacture was invented by James Boss, who started in business in 1854, and the methods and tools used in making these watch cases are covered by patents. *This is the only watch case made under this process.* For many years the introduction of these goods was slow, owing to popular prejudice against "plated" goods, but gradually the public learned that the *James Boss' Gold Watch Case* was not a *cheap gold-washed* or *electro-plated* article, but was made of *genuine gold plates* of *standard quality* and *thickness*. Conscientious adherence to the determination to make the *best* watch case ever put on the market, and the adoption of every improvement suggested, has made the *James Boss' Gold Watch Case* the STANDARD. TRADE MARK In this watch case the parts most subject to wear—the *bow, crown, hinges, thumb-catches*, etc., are made of SOLID GOLD.

Send 3 cent stamp to Keystone Watch Case Factories, Philadelphia, Pa., for handsome Illustrated Pamphlet showing how [illegible]

Shall We Let the Child Die?

A hard-hearted political economist, looking at a pale and puny child feebly gasping as it lies upon a pillow, says that the child might as well die. It is so weak and poor that its life will never be worth much anyhow. There are already a good many people in the world who are of not much account anyhow. And what's the use of adding to their number another weakling, who has but slender chance of ever amounting to anything?

Now ask that child's mother what she thinks about letting the child die. About this time the hard political economist had better get out of the way. *"Let my child die? Not No! As long as there is a remedy to be found that will save that child, the child shall not die! I'll spend my last dollar to save the child!"* Well, try a bottle of BROWN'S IRON BITTERS on that child. See the poor little fellow pick up strength. He revives. He will live. Hosts of other children have been brought almost from death to healthy life by Brown's Iron Bitters. Your druggist sells it. 8

In the Pilot House.

"Yes, sir; this kind of work obliges a man to keep sober as a judge. Of all men in the world, a careless pilot and half-cut engineer should not labor at me. For on their clearness of sight and coolness of head depends the safety of life and property."

Keeping his hand on the wheel as he said this, Mr. A. Brockman, of No. 236 Silver street, Chicago, added: "Of course, some of 'em drink; but the sober ones have the best positions and the best pay. Yes, the work and exposure sometimes tells on us; but for my part, I find PARKER'S TONIC to be all the invigorator I need. I've got a bottle aboard here now; never go on a trip without it. When I haven't any appetite, or am in any way out of sorts, it sets me up in no time. If drinking men would use the Tonic, it would help 'em to break off. (No, that isn't a light-house; it's a star, low down near the water.) As I was saying, the Tonic is now little bottled up. You see that flag-staff? Well, with a bottle of PARKER'S TONIC in the locker I can keep my eye as far from me as that, all the time. My wife has used it for three years for summer complaints and colic, and as an invigorant, when she's tired out from overwork. She says the Tonic is a daisy. Good-bye! Don't break your neck going below."

This preparation, which has been known as PARKER'S GINGER TONIC, will hereafter be advertised and sold simply under the name of PARKER'S TONIC. As unprincipled dealers are constantly deceiving their customers by substituting inferior articles under the name of ginger, and as ginger is really an unimportant ingredient, we drop the misleading word.

There is no change, however, in the preparation itself, and all bottles remaining in the hands of dealers, wrapped under the name of PARKER'S GINGER TONIC, contain the genuine medicine if the facsimile signature of Hiscox & Co. is at the bottom of the outside wrapper.
