LIVE STOCK MISCELLANY.

It is estimated that the wool clip of Colorado for 1888 will reach fully 12,000,000 pounds.

Forty carcasses of dressed beef are carried in one car, against sixteen head of live cattle.

A great deal more dehorning has been done in the West in the last few months than ever before in the same time.

Within the neighborhood of one hundred thousand head of cattle will be put on the ranges in Montana this Spring

The highest price ever paid for thoroughbred horse in America was $40,000, by Leonard Jerome, for Kentucky, by Lexington.

Quite a stir is created by the spread of pleuro-pneumonia in North Dorset, England, and a large number of cattle have been slaughtered.

According to the latest statistics there are in France 13,275,021 cattle, 22,688,230 sheep, 1,420,112 goats, 5,774,924 pigs and 2,938,489 farm horses.

With a good season and the exercise of sound judgment, another year will see the live stock industry on a better basis than ever before.

The largest thoroughbred breeding establishment in America is the Belle Meade stock farm, Summer county, Tenn., which contains 4,000 acres.

The Kentucky bred horse Albatsford, formerly Mistake, is the only horse in the history of the world that has won races in England, France and America.

The richest stake ever won in America was the Peyton stake, run in Nashville in 1849, which was worth $41,000 net to the winner. Distance, four mile heats.

Professor Arnold states that it costs more to make milk from old cows than it does from young ones having the same milk capacity. As a rule the best effects do not last beyond the eighth year of the cows age.

Commissioner Coleman estimates that the introduction of one bull with pleuro-pneumonia into Missouri cost the people of that State $1,000,000. And the introduction into Kentucky cost the State $2,000,000. The outbreak at Chicago cost Illinois more than $7,000,000.

The Argentine Republic, South America, imported 25,668 improved sheep for breeding purposes in the first nine months of 1887, against 12,519 in the same part of 1886. This means stronger competition from that section in the near future.

The following from a South Australia letter in an English paper sounds huge: "We are having a fine season here, and I have already shorn 112,000 sheep, and sent away 600 bales of secured wool. We hope to shear 290,000. We have had a good lambing—we have 230,000 lambs."

The Citizen, of Tucson, Arizona, sighs for the cattlemen when it says that "some of our cattlemen, but two weeks since, were anxious to sell every availableshoof on the range for two cents, are kicking themselves at having nothing to sell at five cents, the present price. The trouble arises from a faulty oversight."

ASTONISHING SUCCESS.—It is the duty of every person who has used Boschees German Syrup to let its wonderful qualities be known to their friends in curing Consumption, severe Coughs, Croup, Asthma, Pneumonia, and in fact all throat and lung diseases. No person can use it without immediate relief. Three doses will relieve any case, and we consider it the duty of all druggists to recommend it to the poor, dying consumptive, at least to try one bottle, as 80,000 dozen bottles were sold last year and no one case where it failed was reported. Such a medecine as the German Syrup cannot be too widely known. Ask your druggist about it. Sample bottles to try, sold at 10 cents. Regular size, 75 cents. Sold by all Druggists and Dealers, in the United States and Canada.

The apple industry in this country is a greater one than many people suppose. The United States sends 1,000,000 barrels of apples every year to foreign nations.
