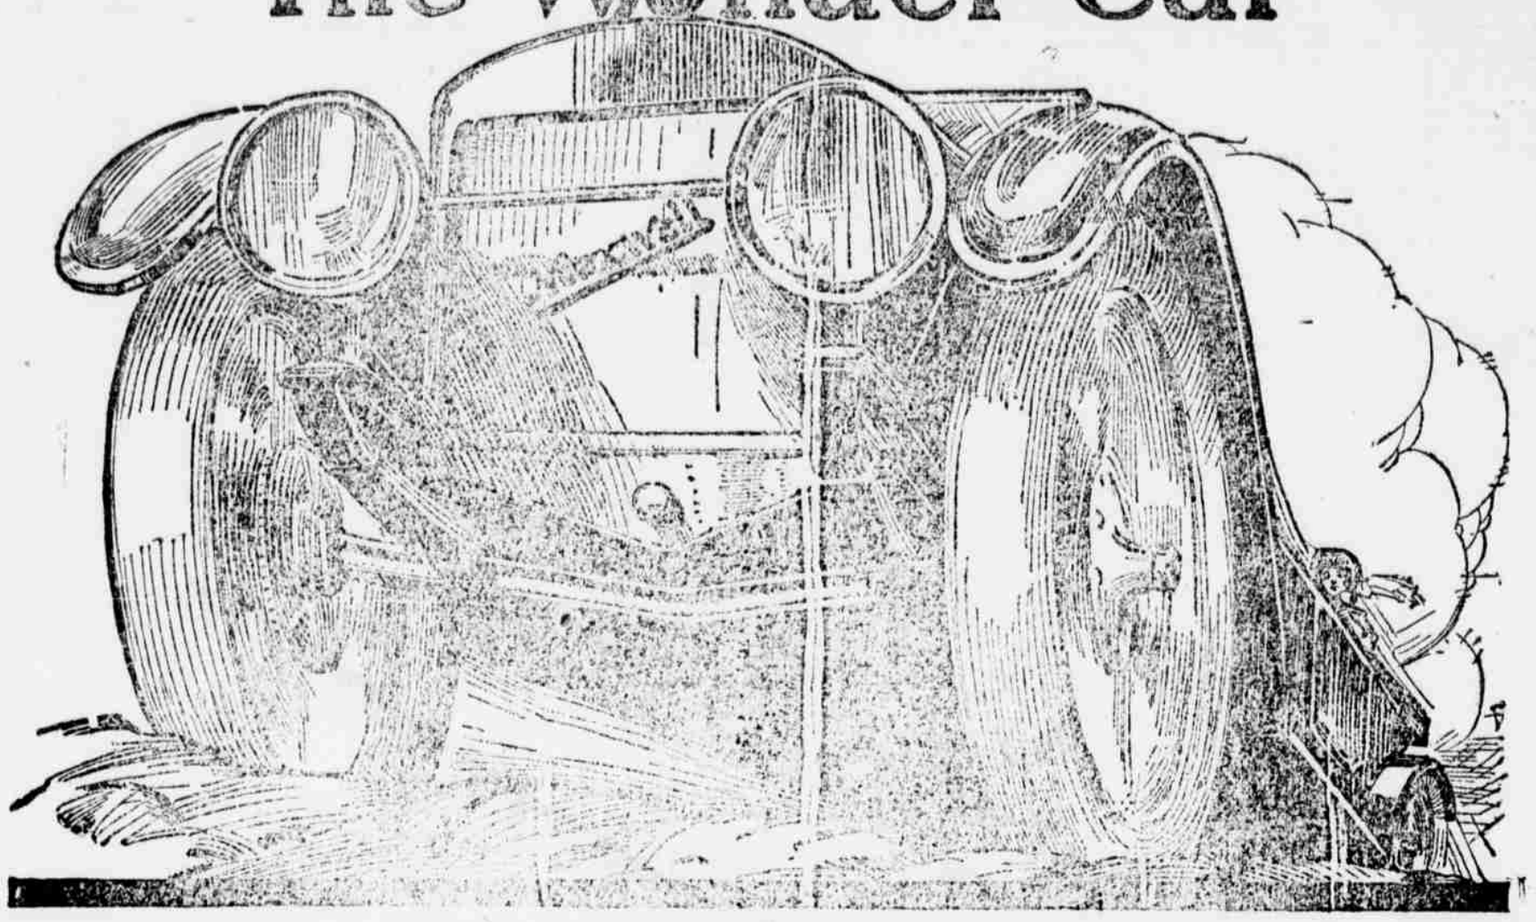
Maxwell

"The Wonder Car"



Only a Blindfolded man would buy an automobile today without looking the Maxwell over

There's no excuse today for any man who is "jollied" into buying a car before he looks over the 1915 Maxwell.

We give you the *two vital things* in this Maxwell Car and then the 17 new features that have made the 1915 Maxwell the most talked-about car ever produced.

Here are the two vital things that any sane man wants when he buys an automobile

In the first place

—a handsome, real automobile that he can be proud to ride in.

In the second place

—a powerful, fast, economical automobile that will take him anywhere and bring him back.

We give you these two vital things, and then just about every other detail of refinement, comfort and endurance that you can think of.

Take power and hill climbing ability, for example—when you buy a 1915 Maxwell you buy an exact duplicate of the stock Maxwell cars in which "Wild Bill" Turner and "Billy" Carlson broke two World's Records in two of the toughest, roughest mountain hill-climbs ever made—**Mt. Hamilton and Mt. Wilson.**

Take speed and endurance, for example—when you buy a Maxwell **you buy a car made** by the same designers—**the same chief engineer—from the same Maxwell Laboratory, heat-treated, tested steel, that was used in the Maxwell Racers in which Barney Oldfield and "Billy" Carlson both broke the 300-mile non-stop race records in Corona and San Diego.**

Read This List of Expensive Features. The 1915 Maxwell Has These Features And Many Others.

Attractive Streamline Body

Pure streamline body; graceful crown fenders, with all rivets concealed. All the grace, style and "snap" that you will find in any of the highest priced cars.

A High-Tension Magneto

Nearly all the high priced cars have high tension magnetos. A high tension magneto gives positive ignition. The Simms magneto, with which the Maxwell is equipped, is recognized as one of the best magnetos made.

Left Side Drive—Central Control

Left side steer with gear shifting levers in center of driving compartment—center control—has been accepted by leading makers of expensive automobiles as the safest and most comfortable for the driver; that is why the Maxwell has it. The Maxwell is so easy to drive and control that a child can handle it.

Three-Speed Sliding Gear Transmission

All high priced cars have a sliding gear transmission. It is costly to make, but it is the best. If the motor has the power, sliding gears will pull the car out of any mud or sand. The Maxwell has a thoroughbred sliding gear transmission a feature Maxwell customers do not consider any other type to be worthy of the Maxwell car.

Double-Shell Radiator with Shock Absorbing Device

The Maxwell radiator is of handsome design, gracefully curved, and it is built to be trouble proof. It is the expensive double shell type and has ample cooling capacity. The radiator is mounted in the frame by means of a quick absorbing device on each side, which relieves the radiator of all shocks and distortions of the frame, caused by roughness of the road. This shock absorbing device also eliminates the possibility of radiator leaks.

The Roomy Full 5-Passenger Body Adjustable Front Seat

The 1915 Maxwell has a full grown 5-passenger body. The front seat is adjustable and can move 3 inches forward or backward. This makes the car really comfortable for the driver. No cramped legs for tall people or uncomfortable reaching for short people. Most drivers' seats are made to fit anyone—to fit no one.

Low "Up-keep" Carburetor

The carburetor used on the Maxwell was especially designed for it after long and severe tests under every conceivable condition. Roadway tours conducted by hundreds of dealers and owners in different sections of the country have proved its efficiency, its quick response to throttle and its extremely low consumption of gasoline. It has been termed the "low up-keep" carburetor.

Irreversible Steering Gear

The greatest margin of safety has been provided in the steering gear of the 1915 Maxwell. The Maxwell irreversible steering mechanism is of the expensive worm-and-gear type and is superiority over every other type lies in its many adjustments. At no time is more than a fourth of the bearing surface of the gear which operates the worm in use. When needed, a new bearing surface may be had by adjusting the gear a quarter of a turn. In fact, the Maxwell steering gear has four times the adjustment of any other kind.

Heavy Car Comfort

What surprises most people is the smooth, buoyant riding qualities of the Maxwell. The spring suspension of the 1915 Maxwell is the same costly combination of long semi-elliptical front springs and the three-quarter elliptic rear springs that is used on most heavy weight, high priced cars. The Maxwell offers you every essential of the highest priced machines at a fifth of their cost.

One Size of Tire—Anti-Skids on Rear

The Maxwell car is one of the easiest cars in the world on tires. Maxwell owners carry but one spare tire and but one size of spare tubes. Economical 30 inch x 3½ inch tires are used all around. A famous make of anti-skid tires are supplied on rear wheels.

A Dependable Electric Starter

For $55 extra, you can have your Maxwell delivered equipped with the famous Simms-Huff electric starter. This starter is efficient, trouble proof and easily operated.

And the Maxwell is completely equipped from the clear vision, ventilating windshield at the front to the spare tire carrier at the rear.

The Maxwell Company's Guarantee of Service to Maxwell Owners

No other automobile is backed by a more reliable service than that guaranteed every Maxwell owner. More than 2,000 Maxwell dealers'—in every part of this country—are always ready to give expert advice, to make adjustments, and to supply new parts at reasonable prices.

This splendid Maxwell dealer service organization is perfected and completed by the chain of Maxwell owned and Maxwell operated Service Branches. Sixteen great Maxwell Service Stations are so located throughout the country that a Maxwell dealer can supply any part for an owner within a few hours if not in his stock. Maxwell Service is one of the great advantages enjoyed by Maxwell owners.

Order a Maxwell from us now, and when you want it delivered, we will give you your car—not an excuse on delivery day

It begins to look as though the biggest reputation to be made in the present war will be by Uncle Sam for keeping out of it.

Questions may arise as to whether warning in advance palliates a ship destruction or serves only to emphasize the premeditation.

"I do not repent for anything I have ever done," says Huerta. Here is a job for the newly discovered Black Billy Sunday. He is beyond the original Billy.

Mountain Camp is Summer School.

University of Missouri Students Camp Eight Weeks in Colorado to Study Geology.

Going to school in a mountain camp will be the experience of the eighteen students who will take the field course in geology giving during the Summer session of the University of Missouri at Columbia. Eight weeks will be passed by these students in the heart of the Rocky Mountains in Colorado. In previous years the camp has been in Wyoming.

The work of the students making the trip will consist in making a geological map and writing a report of the area studied. A part of the time will be devoted to the study of lead, zinc, gold and silver mines and other economic resources of the area, says W. A. Tarr, assistant professor of geology at the University.

Mr. and Mrs. Tarr will be in charge of the camp. Four women students will be in the party. Many of the students are graduate students, taking this course as a part fullfilment of the requirements for their master's degree. Students from five other schools besides the University of Missouri are enrolled in this course for the coming summer.

There is no reasonable excuse for any man to live in a town if he doesn't like it. If you have no word of commendation to say for your town, its institution or people, emigrate. You won't stop the town progress by going away. The church bells will have the same musical ring, the little dogs will play just as well and the pure air, bright sunshine and sparkling water will have the same health-giving properties. Speak a good word for your neigebor if you can; if you cannot, don't everlastingly enlarge on their faults. If you have become thoroughly disgruntied move away; go somewhere where things suit you. If you are given to writing anonymous letters, for the purpose of injuring people, stop it. Did you ever think how damnable mean some goody-good people are in this respect?—Ex.
