## LITERARY NOTES.

Mr. Froude's new work is in the press of Charles Scribner's Sons, and will appear during the autumn. "The Divorce of Catherine of Aragon" is based on recently discovered records, and the relation is said to have acquired, in Froude's hands, the interest and vivacity of a novel. It is stated, moreover, that the new material confirms the historian's former view of the period.

Professor Max Muller's "Anthropological Religion" is nearly ready for publication.

Charles Eliot Norton says that the book on the "Moral and Religious Development of Thomas Carlyle," by the young German scholar, Dr. Ewald Flugel, is the most thorough, trustworthy and intelligent study that has been made of that development. Froude has also praised it. Miss Jessica Tyler, the daughter of Professor Moses Coit Tyler, has made an English version of the book, and this will soon appear.

A new Southern novel is announced by Charles L. Webster & Co. It is to be called "Adventures of a Fair Rebel," and is the work of Miss Matt Crim, a young Southern lady, whose clever work has lately been observed in the magazines.

A new book of travels by Edward Whymper is on the Scribner list. It describes his "Travels Among the Great Andes of the Equator," and as the work of an accomplished, daring and indefatigable mountain-climber, will be of uncommon interest and value. The region with which he deals is little known and is full of dangers for the traveller; and these dangers are described with thrilling force by the author. It has many illustrations and a supplementary appendix containing contributions from various scientific men on the collection of birds, insects, reptiles, fishes, etc., which Mr. Whymper brought from the Andes.

"The discovery of a new Greek author," says "The St. James's Gazette," may alarm the schoolboy; but the fragments of Herodas, just published by the British Museum, are by no means voluminous. Herodas is supposed to have written iambics at Alexandria, probably in the second century B. C. His line may be described as domestic comedy; and it is not impossible that critics may agree to define him as an Alexandrine Ibsen. There are surely faint premonitions of the master in a little poem called 'A Jealous Woman,' where an angry wife beats a husband who has been too attentive to another lady. These fragments are full of delightful problems for the scholar. A learned excursus will have to be written on the scene in which two women hold a long conversation about some mysterious article of female attire, the name of which is unknown to lexicographers. The museum has certainly been in luck."

One of "The London Academy's" reviewers waxes enthusiastic over Mr. Hopkinson Smith's lately published story. Here is his pleasant paragraph:

When I say that Colonel Carter of Cartersville is perfect, I refer to the man rather than to the book in which his portrait is drawn; but, as the man and the book are practically one, the epithet may serve for both. Mix together ninety parts of Colonel Newcome with five of Uncle Toby and five of Mr. Micawber, and make the compound into a Virginia gentleman of the ungool old times before the war, and you have the unworldly, unpractical, chivalrous, high-souled survival, George Fairfax Carter, who makes Mr. Hopkinson Smith's pages such altogether delicious reading. The finest humor and the finest pathos always display a tendency to melt into each other, and in Colonel Carter of Cartersville the fusion is complete. There is no exaggeration in saying that nothing better of its kind is to be found anywhere than the chapter in which the Colonel receives the grocer who has called for the settlement of his account, but whose visit is supposed to be one of friendly courtesy; and the grocer's subjugation is only one of a score of episodes every one of which might be singled out as a little masterpiece. It is a rare and delightful experience to find a creation of such unmistakable genius in a story of some 200 pages.

The Macmillans have made a proposal looking toward a decided change in publishing methods. This is to restrict the term "edition" to what is strictly a new edition printed from newly set type; and to call all editions printed from standing type "reprints."
