White sheep give more wool than black sheep—there are more of them

REMINGTON stenographers do more of the world's work than other stenographers—there are more of them.

Nature only knows why there are more white sheep than black.

All the world knows why there are more Remington operators than others.

REMINGTON is the machine in which the most operators have confidence—and the machine which gives them the confidence to make good.

REMINGTON is the machine in which the majority of good business schools have confidence—the confidence to turn out competent, efficient operators—the thing on which the very life of those schools depends.

REMINGTON is the machine in which business men and business houses have confidence—because the big majority of good stenographers are Remington trained and "go to work the first day without breaking in."

12,500,000 Remington letters
mailed in the United States every business day in the year

Isn't that the answer to the question, "which machine?" for your office?

Originally, in the world Remington is a synonym for typewriter. Today, it is the voice of the business world.
