THE GREAT MARQUIS.

MONTROSE. By Mowbray Morris. 16mo, pp. 229. Macmillan & Co.

Mr. Morris has written a miniature biography of Montrose, which sets forth the principal events in that picturesque and impressive career clearly and well. The life of James Graham is one that must always be interesting, and not the less so that for nearly two centuries it was the theme of hot controversy. During the greater part of that period the view of the great Marquis's character which most prevailed was, as is now fully recognized, a gross and libellous caricature. His relations with the Covenant, in the first place, and with Charles the 1st and IId, afforded an apparent foundation for many of the misrepresentations which obtained currency, and it is not surprising that the fierce passions which moved the Covenanters and the Parliament should have swayed men's minds in such a way as to result in a denial of justice to one whose strenuousness and potency both terrified and enraged his enemies. Now that the hurly-burly is done, and Covenanters, Stuarts and Parliament men have long passed away, it is easy enough to perceive that the man who for a brief moment held Scotland in the hollow of his hand; who overthrew the armies of the Covenant in a series of battles; whose military genius might have saved almost any other King than Charles; was not the ferocious monster he was represented by those who failed to cope with him on the field, and who showed their own cowardly and inhuman malignity when at last he fell into their power.

As regards his connection with the Covenant, the theory set forth by Mr. Morris, following the "Memoirs of Montrose," is perfectly plausible and reasonable. Montrose was probably piqued by the cold reception accorded him by Charles on his first visit to court; a reception for which he was indebted to the slanders of Hamilton, who had the King's ear. Then, again, Charles was unquestionably in the wrong in his efforts to control religious worship in Scotland; and, in fact, he was compelled to recede from an untenable position after a long struggle. Montrose went with the Covenant so long as its demands were just; but he was a man of great intelligence, and he saw presently that his colleagues were pressing beyond all legitimate demands. The proof of this lay in the fact that, after the second "Bishops' War," when the King had conceded every point of the original Covenant, they refused to be satisfied, refused to dissolve their organization, but, on the contrary, pressed for new recruits, and in the eyes of men not blinded by partisanship were plainly drifting into overt treason. Now, Montrose was at no time in sympathy with the Covenanting fanaticism represented by that Scotch Church which, not content with resisting Episcopacy, was at this time seeking to establish the supremacy of Church over State. In common with the Scotch nobles generally, he had no mind to substitute the tyranny of ministers or committees for the tyranny of bishops. He believed in the secularity of the State, in short.

When, therefore, he perceived that the Covenant was being abused and directed to ends which were disloyal, Montrose, who was a stanch monarchist and a loyal subject, refused to go any further with the faction he had been acting with. He had, moreover, ground for suspecting that Argyll was in a conspiracy to break the power and discredit the sovereignty of the King, with a view to advance his own selfish ambitions, and Montrose was not the man to prefer MacCalium More to Charles Stuart as liege lord. In the circumstances, and with the view he held, he was fully justified in withdrawing from the support of the Covenant and taking service under the King. Certainly there was in his change of base nothing dishonorable. His charge against the Covenanters that they had passed from lawful protest to flat treason was true; and of course, its truth envenomed it in the eyes of all whom it impeached. The charge of service was a fatal one for Montrose himself, but the fatality sprang from the character of the two faithless and feeble princes whom he served. Both of them betrayed him, but Charles the Second most infamously. Loyalty to those men, indeed, nearly always meant ruin to their stanchest followers.

Nothing, however, could conceal the brilliant generalship of Montrose, when once he commanded an army of his own, and his campaign in the Highlands is studded with a series of engagements—Tippermuir, Aberdeen, Inverlochy, Auldearn, Alford, Kilsyth—in which he not only defeated but crushed the forces of the Covenant, and carried consternation through the land. Whatever captaun had to employ Highlanders as troops, however, was heavily handicapped, for they would not fight without prospect of plunder; when they secured plunder they instantly withdrew to their mountains to place it in security, regardless of the military situation; and they thought much more of avenging themselves upon the clans with which they were at feud than of opposing a common enemy. They were also ruthless in their mode of warfare, and Montrose, when compelled to yield to their desire to raid Argyll's territory, was unable to hinder the pitiless massacre of men, women and children belonging to the hated Clan Campbell. When a body of Irish was brought over to fight for the King, the Covenanters denounced the expedient as infamous, because the Irish were supposed to be fierce savages. But these same Covenanters, later on, disgraced themselves by a massacre of several hundred of helpless women and children—the wives and little ones of the Irish, to whom these men affected a superiority in civilization. The truth is that there was dreadful inhumanity on both sides, and that, though the prevailing laws of war at the time were lax, and suffering was thought little of, the deeds done in the Highlands exceeded in ferocity the worst excesses of German and Continental campaigning.

Montrose was really in advance of his time as regards humanity. Whenever possible, he refused to permit the sack of places taken by him. At Inverlochy he was impotent to restrain the passions of the Highlanders. Yet he was held up to execration by the Covenanters as the most cruel and pitiless wretch living; and this by men who justified the massacre at Philiphaugh, where their own friends were the destroyers. The exertions and successes of Montrose were, of course, barren and futile. It was not possible to help Charles, and soon the end came for him, and the Marquis went into exile in France. Charles the First had paralyzed all his efforts, but it was reserved for Charles the Second to deliver him into the hands of his enemies and to an ignominious death. It was indeed the character of Montrose to dare everything for whatever policy or cause he attached himself to, and his own verses—cited so often and known so well even to-day—illustrate this dominant trait in him with singular felicity:

"As Alexander I will reign,
And I will reign alone;
My thoughts did evermore disdain
A rival on my throne.
He either fears his fate too much,
Or his deserts are small,
That dares not put it to the touch,
To gain or lose it all."

These verses he lived up to. He did "put it to the touch," and he did "lose it all." Whatever we may think of his character, it is impossible to read his noble address to the Scottish Parliament just before his condemnation, or his speech upon the scaffold, without feeling that he was a great man. His death, deliberately surrounded with every symbol and accessory of shame and degradation, was so dignified and elevated by his majestic bearing, that the very elements of their revenge reacted upon his enemies, and made them shrink and cower before their victim. Mr. Morris has told the story with force and feeling, and his account of a strange and sad episode in history will be found full of interest.
