NEW PUBLICATIONS.

PROFESSOR SHACKFORD'S ESSAYS.

SOCIAL AND LITERARY PAPERS. By Charles Chauncy Shackford, Emeritus Professor in Cornell University. 12mo, pp. 290. Boston: Roberts Brothers.

This volume contains fifteen essays by the late Professor Shackford, of Cornell. His death occurred while the book was still in press, "the proofs of less than one hundred pages having passed under his scrutiny." The work of editorial supervision was then committed to Mr. A. W. Stevens, of the University Press, and he appears to have performed his task with equal care and judgment. The papers cover a wide range of subjects, but a certain unity of thought and tendency may be perceived in most of them. The titles are as follows: "Aeschylus on Some Modern Social Problems"; "A Satirist in the Second Century"; "A Sceptic in the Eighteenth Century"; "Nemesis in Greek Tragedy"; "The Pope in the 'Ring and the Book'"; "Browning's 'In a Balcony'"; "The Greek Comedy of Manners"; "Plato's Republic"; "Aristotle's Politics"; "Social Progress"; "Social Plans and Problems"; "Social Tendencies"; "The Nation as an Organism in Shakespeare"; "The Common Reason in Social Reforms"; "History as Development."

The essays on classical subjects have been given an entirely modern interest by the author's demonstration of the coincidence of ancient and modern theories, principles, and problems. The opening paper, "Aeschylus on Some Modern Social Problems," deals principally with the esoteric meaning of the "Prometheus." In Professor Shackford's view the punishment of the Titan symbolizes the suffering which attends always the breaking away from tradition and convention, and the endeavor to lead the world forward to its higher planes of civilization and thought. Prometheus had offended the spirit that resents progress. It is in fact the law of martyrdom that is illustrated in the drama, and "this law of martyrdom is seen in the very constitution of the natural world. Each successive step of ascending life is gained by the rendering up of life in that which precedes; growth comes out of decay, life out of death. The earth is fertile because innumerable forms have lived and died. The solidest rock is crumbled into finest impalpable powder; the hardest mineral renders up its form, and, equally with the tenderest mass disintegrating at the touch, it becomes dissolved into dust; plants springing from these inhale the atmosphere and rains of heaven and ministering juices of the soil, and then give themselves up in turn to animals and man. Each higher form lives by the martyrdom of some lower, and death is everywhere the price of life. Is it any different in the moral and social sphere? Is not the present civilization of the world—its knowledge, art, comfort, well-being—the result of innumerable sorrows and deaths?"

This extract may afford some idea of the essayist's line of thought; but the best part of his argument is that in which he points out the misconception of Aeschylus into which previous critics have fallen; as for instance, in supposing that the poet meant to hold up Prometheus as an example of rash audacity to be shunned; whereas he really launches his condemnation against that view of the supreme (the Greek Zeus) which represented him as a "power that has seated itself by mere force on the throne, and who hates the human race, so that he is willing to see it perish, that its place may be supplied by creatures of his own." Prometheus was a non-conformist, and for this he was punished. But not righteously; and not righteously because the Zeus of Aeschylus was not the Supreme Being, but only "a divine order in the making." Prometheus was a rebel, but a rebel against wrong and tyranny. "The Greek God was in the process of evolution, as well as the Greek world and the Greek man."

Another principle to be found in Aeschylus is that of heredity, thought commonly to be so modern; and moreover, the view which he presents is fully in accord with the newest theories on the subject. He teaches that tendencies both to virtue and to vice are inherited. He sets aside the old Greek notion of the jealousy of the gods as an explanation of human misfortune and suffering. This essay is indeed full of interest and freshness of ideas, and did space permit we should like to follow it more fully. But there are no papers in Professor Shackford's book which are undeserving of notice. That on "Nemesis in Greek Tragedy" is another specially suggestive. The essay on Lucian is equally satisfactory, though in another direction. The articles on "Plato's Republic" and "Aristotle's Politics" have the rare merits of brief and lucid exposition. The last six essays have to do with the problems connected with social progress, and they are characterized by a singularly sane and liberal spirit. The author is all for ordered liberty. There is fustian, no demagogism, in his considerations. His democracy is genuine and deep-rooted, but he never sympathizes in the least with that irrational, narrow view which condemns the accumulation of capital. In several of these ways, in fact, he sets himself to expose the fallacy of the Socialists, and his arguments are vigorous and pertinent in every case.

Of Socialist schemers he shrewdly observes: "Here comes out plainly the radical defect of all such panaceas. They profess to furnish, once for all, the catholicon, or universal remedy, for all the ills that social flesh is heir to. All wants are to be supplied, all sufferings removed, all afflictions healed, by some external arrangements which money and modern improvements can furnish. These will form a man's character, perfect his morals, purify his motives, and make him disinterested, manly and loving! That he shall form his own character is, of course, absurd. Even Lamennais, whose deep spiritual sympathies were stirred, and whose interest was that of a man in the sufferings of his fellow-men, says that 'from the holy maxims of equality, liberty and fraternity being immovably established the organization of society will emanate.' But embody, if you will, these maxims in an external form, and how long will it last unless there is the internal spirit pervading its every part? To gather brothers by blood under one roof has never yet proved a catholicon for an unbrotherly temper." The records of too many experiments exist to confirm the truth of these remarks, though unfortunately the majority of men refuse to learn the lessons of the past.

All these social essays are thoughtful, clearly stated, and timely in the best sense. They deserve to be read widely, and scholars no less than economists will find the contents of Professor Shackford's book both useful and interesting.

New Publications.

Eighteenth Edition, post paid, for 25c., or stamps.
THE HUMAN HAIR; Why it Falls Off; Turns Grey, and the Remedy. By Prof. HARLEY PARKER. A. M. LONG & CO., 1,013 Arch-st., Phila., Pa. "Every one should read this little book."—Athenaeum.
