BEANS AND PEAS.

Receipts for the week—Beans, 1,500 bbls; peas, 15,950 bush. Exports—Beans, 275 pkgs; peas, 1,586 bbls. Imports—4,458 bags beans. The relative cheapness of foreign beans has attracted the attention of most buyers, and the trade passing is very largely in imported goods, say at $1 70@$1 85 for medium and $1 90@$2 for pea, outside figures only for very choice quality in a jobbing way. Domestic receipts continue light, but the limited outlet keeps prices easy. Best marks of marrow sell at $2 40, $2 42 1-2 and $2 45 as to quality and have. Medium are so scarce that $2 20 is obtained for the Canadian, best State going at about $2 15. Pea drag at about $2 20. White kidney very dull. The few export orders in hand for red kidney are being filled at $2 90 f. o. b.; choice lots to dealers would hardly bring over $2 75@$2 80. Rather more confidence felt in black turtle soup. California lima steady, with lines selling at $2 20, and jobbing business at $2 25. Green peas quiet and unchanged.

BUTTER.

Receipts for the week, 23,293 pkgs. We have had a good week's trade, and the light arrivals have permitted a fair clearance from day to day of fresh table sorts, while a considerable reduction in the recent accumulations has occurred. The local consumption has shown a material improvement of late, and there have been repeated calls from out-of-town points, particularly from the interior of this State and the mining sections of Pennsylvania. Sellers took advantage of the stronger position and advanced prices fully 1c per lb. on the highest grades; medium and good qualities have strengthened a little in sympathy, but low grades remain dull and barely steady. Toward the close the general demand is scarcely as brisk as a few days ago, but supplies are well in hand and with no indication of material increase for a while, receivers hold all the advantage gained during the week. The grocery trade still takes all the fancy fresh Pennsylvania creamery; jobbers would pay 29c for a little, the very high delicate flavor of best marks giving it a place among highest class customers. Western receipts show considerable irregularity in quality, but there is a fair proportion of extras. Brands that are perfect in every respect command 28 1-2c in a wholesale way, only a few exceptional lots going 1-2c higher. Firsts have fair sale at 26@27c, but seconds and thirds are dragging. New State dairy finds increasing favor with many customers, and the moderate offerings are taken quickly at firm prices. Fancy half tubs sell at 27@27 1-2c, most of the first selections of Delawares going at the outside figures. Choice quality brings 26c, and for very common off colored lots 22@23c is accepted. Not much Welsh coming forward as yet. Upward of 500 pkgs of fine old dairy have been moved during the week at 24@25c, and the remaining lots are held with a good deal of confidence. Fresh Western packings are having moderate sale, choice imitation creamery reaching 23@24c, and standard marks of far-Western factory 22@22 1-2c. More cheap stock offering than of late and feeling unsettled.

CHEESE.

Receipts for week 6,797 boxes; exports, 7,264 boxes. Holders have found cause for complaint at the dullness of trade of late, and in some cases have tried to increase business by a modification of the line of values. But the results have not been very satisfactory, most buyers refusing to take stock beyond the necessities of the moment. Exporters have done some figuring and cabling in the hope of drawing orders, but have received very little encouragement from the English markets. One lot of 600 boxes, believed to be August colored, was taken by the London Co-operative Association, and odd lots of cheaper goods have gone abroad, largely as experimental shipments. Prices at the moment are somewhat uncertain, and while we feel obliged to retain outside quotations as covering a fair proportion of the jobbing business, lines can be bought at the inside figures, possibly for less. An effort to realize on important lots develops the fact that the price has to be cut deep to find a customer. Part skims neglected, especially winter made stock. Liverpool cable, 53s@56s.

EGGS.

Receipts for week, 1,181 bbls, 57,455 cases. The firm tone noted a week ago was replaced later in the week by more urgency to sell, under advices from the southwest indicating a material increase in collections and shipments, and by Friday the price of best Western had fallen to 18c. Lighter arrivals on Saturday gave an opportunity to clean stock up pretty closely, but this week opened with large arrivals and a further reduction to 17 1-2c for the best grades. To-day (Tuesday) receipts were very excessive, amounting to over 16,000 cases, and under the call on 'Change the price of best Western settled to 16 1-2c before any business could be done. At that buyers took hold with some confidence, and during the day there has been fairly active trading from store at quotations. About all the deliveries up to noon which were offered for sale have found buyers, but there is a considerable quantity of stock here which is held off the market, either to local owners or under shippers' orders, and if all these were offered it is probable that there would be a surplus beyond present outlet. Duck eggs have fallen, and close unsettled and irregular.

FRUITS AND BERRIES—FRESH.

Receipts of apples have been quite large and under a quiet trade and some tendency to accumulate stock prices have ruled easier, outside figures becoming extreme at the close. Cranberries in moderate demand and firm. Very fine to fancy grades of Florida oranges, heavy, bright and of fine texture, are in fair demand and firm. Lower grades are still pressed for sale at weak prices, but the stock of these is now reducing and the outlook is a little brighter. Florida strawberries are coming forward quite freely; a few prime large and well colored reach 35@40c per quart, and very fancy might go a shade higher, but a large part of the stock is too green or otherwise inferior, and moves slowly at 20@30c.

DRIED FRUIT.

Receipts for week, 7,229 pkgs; exports for the week, 3,322 pkgs. Holders of evaporated apples have made further concessions on most grades and have attracted more trade, two or three carloads of prime fruit going for export, and jobbers have taken some of the choice and fancy grades. Sundried apples quiet, but in light stock and held about steady. Some call for prime chops and cores and skins, but inferior bag lots are hard to move. Raspberries held firm, and good plums are fairly salable, but all other small fruits are dull and easy.

HOPS.

Receipts for the week, 1,877 bales; exports, 412 bales; imports, 170 bales. The increased activity in the country has not stimulated much buying on the local market, and the dullness that has prevailed has given prices a very easy tone. Possibly some of the business with brewers, especially on time sales, is at higher figures than we quoted, but it would be simply impossible to place choice lots of either State or Pacific Coast on the open market at over 22c. London is cabled quiet.

POULTRY AND GAME.

Following our last report, live poultry was in quite heavy supply and there was a lower and very dull market, fowls selling down to 10 1-2@11c, and chickens to 10@10 1-2c. Receipts have been lighter so far this week and prices have recovered somewhat, though trade is still moving along slowly.

The effort to stiffen the price of fresh killed fowl last week was based upon a general expectation of light supplies and the tone of Western advices was such as to give a general impression that some recovery in values could be established. Considerable stock was withdrawn from sale and best fresh goods were held up to 13c with some confidence. But trade was dull and did not improve at all; the week closed with considerable stock unsold and so far this week, under extremely dull business, the tone has ruled easier, 12@12 1-2c becoming the ruling range for prime Western fowls or mixed fowls and chickens. Turkeys are mostly coarse meated and poor and drag heavily. Philadelphia chickens quiet, unless extra choice. Capons slow. Squabs easier. Very little doing in frozen poultry; prices for turkeys are held about the same, but former quotations for chickens, fowls and ducks have been shaded slightly in instances.

Wild ducks quiet for average qualities, but good heavy birds have some call.

POTATOES AND VEGETABLES.

There have been further very large receipts of foreign potatoes, and the docks of nearly all the freight lines from Great Britain have been overloaded with stock, of which a very large part has been in poor order. The market has been somewhat demoralized under the excessive supplies, and grades below prime have been pressed for sale without much regard to price. Thousands of bags have had to go for about cost of freight and duty, and some for even less, the great bulk of sales have been in range of $1 20@$1 75 per sack, $2 having been received. Western, only one lot of unusually good quality. Toward the close the movement is more active, and receivers feel a little more hopeful for the future, but as yet supplies are too large to permit any recovery in prices. Domestic potatoes come forward only in small lots and sell very slowly, the rates asked being above a parity with equal grades of foreign. Bermuda potatoes in moderate supply, and a shade firmer. Sweet potatoes dull and weak. Onions quiet and less firm. Norfolk kale firm; spinach has been lower, but closes steady. Asparagus more plenty and lower. Florida green vegetables generally higher for choice grades.
