GENERAL MARKET REPORT.

New-York, July 10, 1893.

COTTON—The cotton market opened quiet but firm, and remained so throughout the morning session, as everybody was waiting for the crop report from Washington. Before this made its appearance there was a little advance in prices on covering, by local shorts on a rumor that the official report would be a bullish one. Most of the bears preferred to disregard this rumor. The Liverpool news as far as it had any effect was bearish, as it disappointed the trade in showing no advance in any part of the future list, while for some deliveries there was weakness detected. A factor in the early improvement was the absence of rain in Texas, where it is reported rain is needed. At 12 o'clock the Bureau report was announced; the market became very strong immediately, advancing to 8.03 for August—12 points over Saturday's closing figure for that option. The report showed the condition to be 82.7, against 85.6 in June and 86.3 last year. The market closed at the best point of the day—firm in tone. It is considered on "Change that the Bureau report correctly represents the condition of affairs in South Carolina, North Carolina, Georgia and Alabama, and that it underestimates the improvement which has taken place during the month in the Mississippi Valley, and that the improvement in Texas fairly represented the condition of affairs in that State on the first of July. The general impression seems to have been that the improvement in the Mississippi Valley was more than sufficient to overcome the decrease in the Atlantic Slope, and when the report showed the contrary to be the case it created considerable criticism. The following is a comparison of the Agricultural Bureau reports by States for the years 1891, 1892 and 1893:

	1893. June.	1893. July.	1892. July.	1891. July.
North Carolina	82	81	91	77
South Carolina	88	83	94	80
Georgia	87	89	88	85
Florida	98	96	86	91
Alabama	82	80	90	87
Mississippi	86	80	85	91
Louisiana	87	84	84	90
Texas	82	84	87	95
Arkansas	89	80	77	93
Tennessee	92	85	87	82
Total average	85.6	82.7	86.9	88.0

Hubbard, Price & Co. make the following statement: In 1888 and 1889 the July condition showed a similar decline from the condition existing on the first of June. Usually the crop during the month of June shows an advance in condition which ranges from 1 to 3 per cent. The decline this month, as stated, amounts to 2.9 per cent. In ordinary times this surprise would have a more decided effect on prices than it has now, but if the conditions are as stated by the Agricultural Department, it seems likely that spinners at home and abroad will realize the low price at which cotton is at present selling, and we may expect permanent support, especially from Manchester, as their trade has assumed a decidedly more favorable tone. Since the first of July the condition of the crop in Texas has attracted general attention, and with a view of ascertaining the present outlook for a crop in that State we have addressed many telegrams to different points, the answers to which will be found in a separate column. Judging from the context of these dispatches, the crop in that State will need rain within the next ten days or else we may look for a reduction in the earlier estimates of production.

FLOUR AND MEAL—The market for flour opened steadier in tone; buyers were willing to proceed at prices formerly asked during depression, but holders wanted more money, and thereby checked business, which, however, reached the respectable aggregate of 15,750 bbls, including, of winter wheat flours, 450 bbls patents at $5.50@$5.85, 3,500 bbls city mills at quotations, 2,900 bbls straights at $4.25@$4.40, 450 bbls clears at $3.15, 500 sacks extra No 1 at $2.50, 150 bbls extra No 1 at $2.00@$2.75, 400 sacks extra No 2 at $2.40@$2.50, 150 bbls superfine p t, and, of spring flours, 4,500 bbls patents at $4@$4.20, 600 bbls clears at $2.75, 1,650 bbls rye mix at $2.60@$2.70, 150 bbls extra No 2 at $2.25 and mix at $2.00@$2.70, 150 bbls extra No 2 at $2.25, 500 sacks fine at $1.75. The market for Southern flour was without change in price, ruled less active and closed quiet without change in price, with but sales in consequence. RYE FLOUR—The market for rye flour was steady and moderately active, with sales of 375 bbls at $3@$3.25.

GRAIN—WHEAT—The market for wheat opened lower and quiet in the hands of local traders, as everybody seemed disposed to wait for the Washington crop report, which will make its appearance tonight. Prices at the opening were a shade lower than the official close of Saturday, but lower than the curb rates. Advices from the West were weak, and the principal impulse of the trade seemed to be to even up accounts for a new start on receipt of the official report from Washington. The visible supply report showed a decrease of 697,000 bush of wheat, which was regarded as small, and became a bearish factor on the market. The lower price at which wheat is selling and the recent evidence of new interest on the part of exporters, however, give rather a firm undertone to the market. The market for wheat in the afternoon was lower, closing at the lowest point. Sales were 105,000 bush, including 80,000 bush for export, as follows: No 2 red, quoted 1c over July in store and elevator, 1c over July f o b afloat, and 3½c under September f o b afloat; July closed at 72⅞c and September at 76⅛c; No 1 Northern spring, 2,800 bush, 73¼c delivered; 8,000 bush do, 3½c under September delivered; ungraded, 95,000 bush, 70@73c.....CORN—The corn market has been fairly active, with prices lower on account of the generally favorable character of the weather and crop news now coming in from the West. The increase in the amount of corn on passage, 944,000 bush, also served to weaken the market, causing exporters to withdraw and leaving the market in the hands of local traders. In the afternoon the corn market was dull and heavy. Sales were 165,000 bush, including 120,000 bush for export, as follows: No 2 corn, 20,000 bush, 48⅝@48⅞c elevator; No 2 corn, 72,000 bush, 49¼@49⅝c delivered; No 2 corn, 73,000 bush, 51@51⅛c f o b afloat early August and private terms.....OATS—The market for oats ruled dull and heavy and quite featureless in the absence of speculative interest, but weaker in sympathy with the decline in corn. The market for oats ruled quiet in the afternoon, closing weak. Sales were 105,800 bush, as follows: No 2 oats, quoted 30¼@36½c elevator, and 37¼@37½c delivered; No 3 oats, 35½c; No 2 white, 10,000 bush, 38@38½c; No 3 white, carlots, 37@37½c; track white, 90,000 bush, 38½@45c; track mixed, 3,000 bush, 30@37½c.

The shipments of Indian wheat last week amounted to 360,000 bush, making the total of this season 7,360,000 bush, or 10,560,000 bush less than for the corresponding time last year. Amount of wheat on lakes, 2,607,000 bush; corn, 2,021,000 bush; oats, 411,000 bush. On canal—Wheat, 2,184,000 bush; corn, 232,000 bush; oats, 31,000 bush. Indian shipments for the last week were 360,000 bush, making 7,360,000 bush since April 1, against 18,000,000 bush last year; decrease, 10,560,000 bush. The condition of winter wheat last month was 75.1, rye 82.7 and barley 88.6. A year ago the condition of winter wheat was 82.0, spring wheat 90.9. The previous year the condition of winter wheat was 95.2, spring 92.6. The acreage of wheat last year was: Spring, 12,595,551 acres; winter, 25,060,056 acres; a total of 38,554,430 acres; corn, 70,020,055 acres, and oats, 27,063,885 acres. The production of winter wheat was 330,194,000 bush, and spring wheat 115,758,000 bush; a total of 519,959,000 bush. The production of corn was 1,628,464,000 bush, and oats 661,035,000 bush. The condition of grain will, as usual, be reported in per cents of 100, and a great deal of curiosity still exists as to what 100 means. The condition of corn on July 1 last year was 81.1. MALT—The market nominal at the changed prices. WESTERN—Unwarranted State, 48@57c; six-rowed, 75@80. SEEDS—Clover seed continues firm.

METALS—IRON—The local market for pig iron continues dull and destitute of feature, closing entirely nominal. The Pittsburg iron market shows no new feature; the mills, with one or two exceptions, are shut down, and confidence seems still going on between the manufacturers and Amalgamated Association. There is evidently a stagnation of business so far as new sales are concerned, nothing being done. We heard of one sale of Bessemer pig this week at $13 delivered buyers' mill Pittsburg, which was for 1,000 tons. This is an indication of how the market would be in case there was any buying going on, but we do not expect any business for several weeks. In fact most of the manufacturers agree that the very best thing for business generally is to close the mills for at least a month or six weeks and if this is done there may be some hope of good trade in the fall, provided the financial situation has a decided change for the better. Pittsburg quotations:

Philadelphia, dry-picked, per lb, 15@23c; do Western, dry-picked, 15@18c; do Western scalded, 13@17c; fowls, Western, dry-picked, prime, 11½c; do scalded, 11c; old cocks, 7@7½c; spring ducks, Long Island, per lb, 18@17c; do Western, 6@14c; geese, per lb, 7@8c; do white, per dozen, $2.50@$2.75; do small and dark, $1.50@$1.75.

POTATOES AND VEGETABLES—Receipts of Southern potatoes today were very heavy, amounting to over 34,000 bbls, but under a good demand prices held steady for fine, sound stock, though much of the supply was more or less out of order and had to go at low prices. Tomatoes easier. Cucumbers very plenty and cheap. Onions firm, string beans plenty from nearby points and prices lower. Other vegetables without material change. Potatoes, Rose, Southern, No 1, per bbl, $2.25@$2.75; do Chili, red, No 1, $2.25@$2.50; do seconds, $1.25@$1.50.
