GENERAL MARKET REPORT.

New-York, July 27, 1893.

COTTON—The cotton market at New-York opened mere active and firmer, advancing 3 points, with local shorts fairly active buyers, but outside speculation still very slack, owing to the prevailing distrust regarding money matters. There was something of a better feeling, however, contributed by the favorable turn shown early in the day by the stock market. The improvement in cotton this morning was due chiefly to the fact that the cables were better than had been expected, showing sales of 12,000 bales of spot cotton at Liverpool, and a decline of only about a point in the future list. Subsequently the advance in cotton was lost in consequence of rumors of rains in Texas. The Texas papers report rains in that State and as a matter of fact there have been not many reports of actual damage by the drouth and a good deal of surprise is expressed on "Change that the official map has not shown more moisture for the rest of that State. Outside of Texas the crop accounts are generally favorable; there have been rains to help the plant along, and although the plant is small, the crop is reported to be fruiting nicely. Henry Hentz mentions the circumstance that at about this time two years ago crop estimates were cropping as low as 7,000,000 bales, but good weather followed and the crop reached nearly 9,000,000 bales, the point being that the remainder of the season is to decide the size of the crop this year rather than the conditions that have heretofore prevailed. Manchester advices are generally favorable. Reports from New-England to-day are rather more encouraging. In the afternoon there has a sharp advance of 8 points from the lowest. The market closed firm. Transferable orders issued at 7.90. Total sales, 102,100 bales.

COFFEE—The coffee market at New-York opened fairly active and decidedly firmer, owing to the much stronger cables which indicated an advance of 1 fr. at Havre, ¼d p pfg. at Hamburg and 3d at London. Shorts were for a time quite active buyers, but the coffee market in the street failed to follow and half the advance was lost under selling by local longs after there had been an advance of 20 points. The coffee market at New-York is dull and featureless with little or no outside speculative interest. Sales, 17,500 bags. Option quotations follow:

City at 80@82½c in bags.

GRAIN—WHEAT—The wheat market at New-York opened slightly better owing to the slight rally in stocks and reports of a million dollars gold imports. Local traders became quite busy, covering their short stuff and quite a little wheat got up their short stuff and quite a little wheat was bought on the theory that the market was likely to advance permanently. Everybody seems looking for such a turn to come sooner or later. To-day the wheat was rather to the thought; the improvement was temporary and followed by a period of hesitation, after which there was a sharp decline. Cables were easier and reported foreign market, with some disposition by the foreigners to sell in a speculative way; at the same time there has been an absence of cash orders on foreign account at this week's advance; the bears claim that the foreigners are over their buying scare of last week and are now in a position to wait for the outcome of the American panic, having their own receipts from their new crop, whether large or small, to tide them over the near future. Still later the market for wheat broke sharply on rumors of more failures; the price declined rapidly 1½c from to 73¾c for September, and at Chicago from 69¾@69⅞c for this figure there was a temporary halt, but it seemed to be just a resting point, for presently prices were again driven downward, September reaching 71 13-16c, the low figure yet reached. There seemed to be quite a little long wheat pressing on the market all the afternoon, and there was also quite a little ceiling by receiving houses and c i f houses. Part of the pressure here was credited to selling for Western account, owing to the large receipts of new wheat and fears of financial trouble at Chicago. Toward the close prices pulled somewhat on the export sales, which were 260,000 bush, including the export business in cash wheat were 340,000 bush, including the export business and 40,000 bush for milling. There were also about 125,000 bush of c i f wheat, partly Toledo and partly Detroit, mainly on private terms. Details of the sales were as follows: No 2 red, 2½c under September store; closed 72¾c, 2¼c under elevator best loads, 1¾c under September f o b afloat; No 2 September f o b store, and 1½@2c under f o b afloat and 2 red, 24,000 bush, 2c under September f o b afloat and on private terms; No 2 hard winter, 24,000 bush, 1c under September delivered and 14,000 bush, 8c under December to arrive; No 1 Northern spring, 50,000 bush, 2¼c under September delivered, and on private terms, and 82,000 bush, 69⅞c delivered; ungraded, 100,000 bush, 1@2¼c under September delivered.

CORN—The corn market at New-York opened up in little better shape, but soon gave way to a weaker feeling, following wheat, and being influenced by reports of rains and cool weather in the West. Still later corn developed pronounced weakness, September selling down to 47⅝c, a decline of ½c. The late weakness in wheat influenced the market perceptibly and the fractional rally from the 1 o'clock break was lost and the final close was quiet at the decline. The weakness in corn was sympathetic with the decline in wheat, added to which there was selling on the cool weather and trading at the West. Cash corn was very quiet. There seemed to be a pause after yesterday's trade. Sales were 40,000 bush, including 32,000 bush for export. No 2 corn quoted August price, elevator, August closed at 47⅝c; No 2 corn, 24,000 bush, 48@48⅛c delivered; No 2 corn, 16,000 bush, 1c over August f o b afloat. OATS—The market for oats improved slightly at the opening, and traded weak with wheat and corn, declining ⅛c in this market, while at Chicago there was a break in September oats of 2c. Trade in oats was quiet all day, with final prices at about the lowest. The market here followed the drop in corn and wheat, without speculation small. Cash oats were quiet on the spot, but sales were made of 126,000 bush No 2 white for export, September holding, on private terms. Sales were 138,000 bush, as follows: No 2 oats, 12,000 bush, 37⅝@37⅞c elevator and 38@38⅛c delivered; No 3 oats, nominal 36½c; No 2 white, carried, 38c; and 120,000 bush, September delivery, private terms; No 3 white, carlots, 37c; track white, 20,000 bush, 38@42c; track mixed, 8,000 bush, 37@38c.

RYE—Market nominal at 55@57c for boatloads. MALT—Market nominal at unchanged prices. Western, 60@63c; two-rowed State, 65@75c; six-rowed, 75@80c.

The shipments of wheat from Eastern European, Australian and South American ports for the last week were 2,640,000 bush, of which 1,040,000 bush were to the United Kingdom and 1,600,000 bush to the Continent. The shipments during the week previous were 2,664,000 bush. The stocks of grain in private elevators at Chicago are reported at 1,449,000 bush wheat, 178,000 bush corn, 253,000 bush oats, 22,000 bush rye, and 76,000 bush barley. "The Cincinnati Price Current" says that the corn conditions are irregular, but most of the area is well maintained in condition and making seasonable progress, but much of the crop is in urgent need of rain. Winter wheat threshing returns show an average up to previous calculations. Spring wheat conditions are surrounded with somewhat more of uncertainty than heretofore. The week's packing of hogs has been 190,000, against 170,000 last year. The Russian crop reports are still very favorable, judging from the latest official returns; no estimates of the crop are yet given, and it would be unwise to attempt any until threshing has made some progress. Meanwhile, stocks of old wheat in the ports are not very extensive; the total in all the ports, North and South, on July 1, being about 8,000,000 bush. The exports recently have been rather liberal, but the great proportion continues to be sent to the Mediterranean. The exports of wheat from American, Canadian, Russian and Indian ports for Europe for the 49 weeks ending July 15, were 267,375,000 bush, against 290,120,000 bush for the corresponding time last year, and 217,080,000 bush two years ago. Since January 1 the exports from the above mentioned ports, inclusive of Australian and Argentine, have amounted to 106,300,000 bush, against 141,600,000 last year. The average weekly exports of wheat since January 1 have been 5,960,000 bush.

METALS—IRON—The local market for pig iron remains very dull. The same conditions are reported for the iron markets of Philadelphia, Louisville and Pittsburg. Very few sales have been made recently and not much is expected of the iron market until Congress shall have given some indication as to what it proposes to do. The latest quotations from Pittsburg are as follows: Muck bars have been offered at $22 Pittsburg without takers.

Dun, Jones & Co. report: Reports from all sections of the country are to the effect that there is stagnation in almost every department of the business. Restriction is heavy, nevertheless the supply exceeds the demand. Forced sales occasionally crop out and less prices might be more frequent if buyers were able to obtain more favorable terms of payment. One bright factor of the week was the contract with a Chicago implement manufacturer for 28,000 tons of steel bars for delivery through the year. Contracts for West Virginia coke have been made at $1 per ton, a reduction of 30 cents as compared with the ruling price of the spring. The ore situation is virtually unchanged. Restriction in pig iron continues. Four Pittsburg furnaces will go out of blast this week. There is some talk of an auction sale of a large part of pig. There is no immediate chance for a settlement of the wage scale. Men have declined to make concessions in the finishing scale. The basis is much above the market. Steel rail shipments for six months were little less than 600,000 tons, and the mills have not got orders for more than 150,000 tons, for which they can count on payments. The outlook for the fall for this branch of the industry is exceedingly blue. COPPER—The market for copper closes weak at 10⅛c for spot and 10c for future deliveries. SPELTER—The market for spelter closes dull at New-York at nominally 3.90. TIN—The market for tin closes firmer. Sales, 20 tons August, at 19.05. LEAD—The market for lead closes weaker at 3.30 for spot. The following quotations were called to the Metal Exchange: Glasgow, July 27—Scotch warrants, 42s. Middlesboro, July 27—No 3 foundry, 35s 6d. OCEAN FREIGHTS—Business in ocean freights is small. The supply of tonnage is moderate, but sufficient for the present requirements for prompt loading, and for next month room is plenty and rates nominal. Room to Liverpool is for the moment rather scarce and 3d would be paid for grain to that port. With this exception the tendency of rates favors the shipper. Full cargo grain steamers are in small demand and 3s remains the rate from the Atlantic ports to Cork for orders. Petroleum freights are fairly active and firm and a good business would be in progress if handy vessels were available. Rates to South American and West Indian ports are firm. In the way of coastwise business freights are dull, with a tendency toward lower rates. Engagements: To Antwerp, two loads grain at 3½c to St. Petersburg, via Hull, 2,000 bales cotton, at 3-16d. COUNTRY PRODUCE MARKETS.

New-York, July 27, 1893.

BEANS AND PEAS—Choice domestic marrow are beginning to run a little short, and prices are firmer, higher and firm; some holders are asking $2 60. Medium quiet, and best marks are easily bought at $2. Pea dull at $1 95. Red kidney unsettled, with indications pointing toward lower prices. Prime grades of foreign beans have sold on close, and there is a steady holding of lower qualities. Scarcely anything doing in green peas. Peas, marrow, $2 35@$2 37½; do medium, $2; do pea, $1 95; do white kidney, $2 37½; do red kidney, $2 80@$2 95; do black turtle soup, $2 90@$3; do yellow eye, $2 25; do pea, $1 65@$1 70; do foreign, medium, $1 40@$1 65; do pea, $1 65@$1 75; green peas, bbl, $1 65; do bags, $1 60; foreign green peas, $1 60.

BUTTER—Another quiet day's trade, but no further change of a quotable character. Cooler weather and lighter receipts found it to satisfy the feeling a little, but sellers found it impossible to clean up all the stock, perfect quality creamery, either Western or State, was offered freely at 20c, and buyers paid that price to the extent of their needs. None of the jobbers seemed inclined to anticipate future wants, and speculative trading was a factor of no importance. The quality of receipts is still very irregular, but there is a much larger proportion of firsts and seconds and these are disposing. Imitation creamery and Western factory are dull and unsettled. The absence of export demand at present checks the buying on home account. Creamery, State, tubs, 20c; do State, pails, 19½@20c; do Western, extras, 20c; do firsts, 18½@19c; do seconds, 17½@18c; do thirds, 16@17c; State dairy, half-firkin tubs and pails, extra, 19½@20c; do firsts, 18@18½c; do seconds, 17½@18c; State dairy, Welsh tubs, extras, 19@19½c; do firsts, 18@18½c; do seconds, 17@17½c; dairy tubs, thirds, 16½c; Western imitation creamery, firsts, 17@18c; do seconds, 16½c; do thirds, 16c; Western dairy, firsts, 17@18c; do seconds, 16½c; do thirds, 15½@16c; Western factory, firkins, extras, 17½c; do seconds to firsts, 16@17c; do thirds, 15@15½c; do seconds, 16c; do thirds, 15@15½c.

CHEESE—There was a change for the better in large sized full cream cheese. Exporters had more orders, the weather was cool, offerings moderate, and buying became so brisk that the price of fancy cheese was advanced to 9c. At that figure the stock was taken up closely, colored selling especially well. Lower grades of full cream were sought for at full relative prices, and the desirable lots of part skims went out in pretty good shape. Small size full cream, such as are used mainly for home trade, are in oversupply, dull and weak. Liverpool cable 45s 6d@46s 6d. State factory, full cream, large size, colored fancy, 9c; do white fancy, 8⅞@8¾c; do choice, 8⅝c; do fair to good, 7½@8⅛c; do small size, choice, 8⅝@8¾c; do fair to good, 8@8⅛c; part skims, Chenango and neighboring counties, choice, 5½@5¾c; do good to prime, 3@4½c; do common to fair, 1@2½c; full skims, 1@2c.

EGGS—The market shows no change from the unsatisfactory position recently reported. Receipts keep up, and are of the same generally defective quality heretofore noted. Dealers would pay a premium for very fancy stock, free from hot weather defects, such as would pass inspection as new laid firsts, but there are practically none of this quality to be found. For the goods generally arriving 18c is top price for Western, more seriously defective goods going at lower and irregular prices, and the supply is far in excess of the demand. State and Pennsylvania, new-laid, per dozen, 19@17c; Western, new-laid, fancy, 18c; Western fresh collections average best, 14@15c; Western, fair to good, 12@14c; seconds and inferior, per case, $1 50@$2 50.

FRUITS—FRESH—Apples are plenty and in buyers' favor. There large fruit has a light demand, but most of the receipts are of ordinary and inferior quality, and such are greatly neglected, even at low prices. Good pears steady, but common kinds and qualities are very dull. Fancy varieties of peaches from Georgia and North Carolina are bringing higher prices, but the ordinary kinds arriving from nearer by move slowly at easier figures. Southern grapes arrive in excess unusually fine. Currants dull and steady. Blackberries in dem
