WHAT WAS DONE IN STOCKS.

Monday, October 30—p. m.

The Stock Exchange markets to-day were generally lower on realizations. But, to obtain a true perspective of the reaction, it may be well to consider the basis from which the stock speculation has advanced. A glance at the prices ruling in the panic period last summer will show that only those stocks which have suffered from specially adverse conditions have failed to make most important improvements. Handsome profits have been placed within reach of those investors who had the courage to buy at the lowest point of the depression, and the rise has even made more than whole the margin on many purchases made before the severity of the panic was fully felt. Stocks like American Sugar, Chicago and Northwestern, Rock Island, Lackawanna, Lake Shore, Manhattan, New-York Central, Western Union and New-York and New-England, are now above the quotations prevailing in June. From the lowest figures of the year—made in July or August—there has been an advance in the market, ranging generally from 15 to 25 per cent, and in some instances extending to 40@40 points. The rise has foreshadowed the final victory for sound money in Congress, and, with Wall Street's usual impetuous practice, has moved faster than the recovery in trade and industry. The following table compares the prices of leading stocks prior to the acute crisis, the lowest quotations touched in the panic, and the final prices of to-day:

To-day's market opened strong and active under the impetus given by Saturday's brief but buoyant speculation. The magnificent bank statement, the predictions of renewed gold imports, and the expectation of a final vote on silver repeal in the Senate to-day brought buying orders in freely. The first disappointment was met in heavy sales for foreign account. Some observers doubt that the London public is responsible for the orders credited to that source, and ascribe the sales to liquidation by American holders who sought foreign facilities for protecting their holdings last summer. In a sense, this distinction is immaterial if the present selling represent realizations and involve payment of debts abroad. The operations were reflected in higher rates for European exchange, which now show no profits in gold importations, singular as this may seem in view of the announcement that at least $1,500,000 English gold will be afloat for this country before the close of the week. The transactions in shares like Louisville and Nashville, Erie and Union Pacific were moderate, but the losses were generally more than 1 per cent. St. Paul, however, was largely dealt in, being easily the leader of the speculation, and the price fell from 68¾ to 66⅝@66⅞, and Atchison was active at a decline from 22¾ to 21¾. The foreign selling was followed by large home sales to secure profits, Chicago, Burlington and Quincy falling from 87½ to 85@85⅝, Rock Island from 72½ to 70¼@71, and New-York and New-England from 35¾ to 33¾@33½. The decline in the Gould stocks reached nearly 3 per cent in Missouri Pacific, while Western Union broke from 93¾ to 91¼@91¾. The industrial shares received inside support for half of the day, but closed 1@2 per cent below their best prices.

It should hardly be considered that the decision of the Union Pacific receivers to pay no interest due November 1, or the refusal of the Erie receivers to commit themselves as to their policy in dealing with December interest, was an adverse factor. Holders who sacrifice good liens on defaults that may be only temporary may subsequently regret their haste. The position of local speculators, too, may change readily should Europe, after the absolute passage of silver repeal, renew investments in American securities. The volume of business in to-day's stock market shrank from the large record of early last week. A rally interrupted the afternoon course of prices when rumors of extensive gold imports became current, but the late trading was at about lowest prices, with the realizing movement again under way.

THE DAY IN THE BOND MARKET.

There were no sales of Government bonds at the Stock Exchange. The market was steady, with final quotations unchanged as follows:

	Bid.	Asked.		Bid.	Asked.
U. S. 4s, 1891, continued at 2 per cent reg	97	....	U.S. cur'cy 6s, 1895	108	....
U.S. 4s, 1907 reg	111	112	U.S. cur'cy 6s, 1896	109	....
U.S. 4s, 1907 coup	111	112	U.S. cur'cy 6s, 1897	109	....
Dist of Col 3-65, 1891	111½	112	U.S. cur'cy 6s, 1898	111	....

Transactions in State bonds included Virginia funded 2—3 per cents at 62½, seller twenty days, and Alabama Class B bonds at 104, and currency 4s at 90. The only sale of city bank stocks was American Exchange (75) at 150.

The general bond market continued fairly active, the total transactions exceeding $1,000,000 par value. But the recent upward course was interrupted by realizations, and some important declines were recorded. Erie seconds consols were a conspicuous feature, with heavy sales, sellers sixty days, from 70½ to 66⅝@66½. Transactions "regular way" resulted in a fall to 66½@67, a net loss of 5¼ per cent. Doubt as to the policy to be pursued respecting the payment of December interest influenced the selling movement. The decision of the Union Pacific receivers to withhold November interest caused a break of 5 per cent to 89 in Kansas Pacific consols. Atchison seconds, class A, fell 1¾ per cent to 41¼. Reading issues were moderately pressed for sale, declining ¾@1 per cent. Texas Pacific seconds were active, but yielded from 21½ to 20¾. Chesapeake and Ohio general 4½s dropped 1 per cent to 74½. Virginia Midland generals rose 3⅝ per cent to 89¼. Chicago and East Illinois general 5s are up 1 per cent at 99, and the same gain was made by Kansas and Texas seconds at 45. There were other substantial advances, but the market closed unsettled and at receding prices. Reference is made to our full report of bond sales.
