THE SUN FOR 1879.

THE SUN will be printed every day during the year to come. Its purpose and method will be the same as in the past: To present all the news in a readable shape, and to tell the truth though the heavens fall.

THE SUN has been, is, and will continue to be independent of everybody and everything save the Truth and its own convictions of duty. That is the only policy which an honest newspaper need have. That is the policy which has won for this newspaper the confidence and friendship of a wider constituency than was ever enjoyed by any other American Journal.

THE SUN is the newspaper for the people, it is not for the rich man against the poor man, or for the poor man against the rich man, but it seeks to do equal justice to all interests in the community. It is not the organ of any person, class, sect or party. There need be no mystery about its loves and hates. It is for the honest man against the rogues every time. It is for the honest Democrat as against the dishonest Republican, and for the honest Republican as against the dishonest Democrat. It does not take its cue from the utterances of any politician or political organization. It gives its support unreservedly when men or measures are in agreement with the Constitution and with the principles upon which this Republic was founded for the people. Whenever the Constitution and constitutional principles are violated—as in the outrageous conspiracy of 1876, by which a man not elected was placed in the president's office, where he still remains—it speaks out for the right. That is THE SUN's idea of independence. In this respect there will be no change in its programme for 1879.

THE SUN has fairly earned the hearty hatred of rascals, frauds and humbugs of all sorts and names. It hopes to deserve that hatred not less in the year 1879; than in 1878, 1877, or any year gone by. THE SUN will continue to shine on the wicked with unmitigated brightness.

While the lessons of the past should be constantly kept before the people, THE SUN does not propose to make itself in 1879 a magazine of ancient history. It is printed for the men and women of to-day, whose concern is chiefly with the affairs of to-day. It has both the disposition and the ability to afford its readers the promptest, fullest, and most accurate intelligence of whatever in the wide world is worth attention. To this end the resources belonging to well-established prosperity will be liberally employed.

The present disjointed condition of parties in this country, and the uncertainty of the future, lend an extraordinary significance to the events of the coming year. The discussions of the press, the debates and acts of Congress, and the movements of the leaders in every section of the Republic will have a direct bearing on the Presidential election of 1880—an event which must be regarded with the most anxious interest by every patriotic American, whatever his political ideas or allegiance. To these elements of interest may be added the probability that the Democrats will control both houses of Congress, the increasing feebleness of the fraudulent Administration, and the spread and strengthening everywhere of a healthy abhorrence of fraud in any form. To present with accuracy and clearness the exact situation in each of its varying phases, and to expound, according to its well-known methods, the principles that should guide us through the labyrinth, will be an important part of THE SUN's work for 1879.

We have the means of making THE SUN as a political, a literary and a general newspaper, more entertaining and more useful than ever before; and we mean to apply them freely.

Our rates of subscription remain unchanged. For the DAILY SUN, a four page sheet of twenty-eight columns, the price by mail post-paid, is 55 cents a month, or $6.50 a year, including the Sunday paper, an eight page sheet of fifty-six columns, the price is 65 cents a month, or $7.70 a year, postage paid.

The Sunday edition of THE SUN is also furnished seperately at $1 20 a year, postage paid.

The price of the WEEKLY SUN, eight pages, fifty six columns, is $1 a year, postage paid. For clubs of ten sending $10 we will send an extra copy free. Address

A GRAND REMEDY.

Reuter's Life Syrup

is a double medicine, being both an alterative and a purgative in one; such a medicine has never before been made. Heretofore, persons suffering with any disease caused by foul blood or humors, have always been forced to take a purifier to neutralize the poison, and then to take a purgative to carry it out of the system, but with REUTER'S LIFE SYRUP no such thing is necessary; it does the work of both purifying and purging, moreover, it is by far the best stimulator and invigorator of the liver. It tones, strengthens and cleanses the stomach, and is the easiest, surest and safest purge. It is made from plants and herbs, and is so pleasant to the taste and smell that children and sensitive ladies take it as if it were a delicious beverage.

A WONDERFUL DISCOVERY!

CARBOLINE.

A DEODORIZED EXTRACT OF PETROLEUM.

The only Article that will Restore Hair on Bald Heads.

WHAT THE WORLD HAS BEEN WANTING FOR CENTURIES.

The greatest discovery of our day, so far as a large portion of humanity is concerned, is CARBOLINE, an article prepared from Petroleum, and which effects a complete and radical cure in case of baldness, or where the hair, owing to diseases of the scalp, has become thin and tends to fall out. It is also a speedy restorative, and, while its use secures a luxuriant growth of hair, it also brings back the natural color, and gives the most complete satisfaction in the using. The falling out of the hair, the accumulations of dandruff, and the premature change in color, are all evidences of a diseased condition of the scalp and the glands which nourish the hair. To arrest those causes the article used must possess medical as well as chemical virtues, and the change must begin *under* the scalp to be of permanent and lasting benefit. Such an article is CARBOLINE, and like many other wonderful discoveries it is found to consist of elements almost in their natural state. Petroleum oil is the article which is made to work such extraordinary results; but it is after it has been chemically treated and completely deodorized that it is in proper condition for the toilet. It was in Central Russia that the effect of petroleum upon the hair was first observed, a Government officer having noticed that a partially bald-headed servant of his, when trimming the lamps, had a habit of wiping his oil-besmeared hands in his scanty locks, and the result was in a few months a much finer head of black, glossy hair than he ever had before. The oil was tried on horses and cattle that had lost their hair from the cattle plague, and the results were as rapid as they were marvelous. The manes and even the tails of horses, which had fallen out, were completely restored in a few weeks. These experiments were heralded to the world, but the knowledge was practically useless to the prematurely bald and gray, as no one in civilized society could tolerate the use of refined petroleum as a dressing for the hair. But the skill of one of our own chemists has overcome the difficulty, and, by a process known only to himself, he has, after very elaborate and costly experiments, succeeded in deodorizing petroleum, which renders it susceptible of being handled as daintily as the famous *eau de cologne*. The experiments made with the deodorized liquid on the human hair were attended with the most astonishing results. A few applications where the hair was thin and falling gave remarkable tone and vigor to the scalp and hair. Every particle of dandruff disappears on the first or second dressing, and the liquid, so searching in its nature, seems to penetrate to the roots at once and set up a radical change from the start. It is well known that the most beautiful colors are made from petroleum, and by some mysterious operation of nature the use of this article gradually imparts a beautiful light-brown color to the hair, which, by continued use, deepens to a black. The color remains permanent for an indefinite length of time, and the change is so gradual that the most intimate friends can scarcely detect its progress. In a word, it is the most wonderful discovery of the age, and well calculated to make the prematurely bald and gray rejoice.

We advise our readers to give it a trial, feeling satisfied that one application will convince them of its wonderful effects.—*Pittsburg Commercial of October 22, 1877.*

The article is telling its own story in the hands of thousands who are using it with most gratifying and encouraging results!

MR. GUSTAVUS F. HALL, of the Oates Opera Troupe writes: "After six weeks' use am convinced, as are also my comrades, that your CARBOLINE has and is producing a wonderful growth of hair where it had none for years."

N. MCCLARRAN, Sixth Avenue Pharmacy, Pittsburg, Pa., says: "The good effects from the use of CARBOLINE are brought to my notice every day to such an extent as to justify me in recommending it to my most intimate friends."

CARBOLINE Gives the utmost satisfaction as a Hair Renewer.
CARBOLINE Has a magical effect on gray hairs.

per cent., while the gold and silver base only amounted to from 1 to 2 per cent. of all the money business of the United States. These contractions were called panics, and the sudden downfall of the bankers' paper money in the seven different epochs caused the immediate loss of the whole volume of paper money and credits of the broken banks, in the hands of the people.

It all disappeared at once, varying in amount at different panics from $200 000,000 to $2 000,000,000, covering the people periodically with ruin and misery.

The attempt of the coin basis despotism to force the people to specie payments, by gradually contracting the greenback money from 1866 to 1878, slowly strangled trade, commerce, agriculture and manufactures, and lengthened out the agony of financial ruin by the gradual destruction of the national paper money. Crash after crash has come already, bankruptcies after bankruptcies, as the national paper money was destroyed or locked up in the treasuries and banks to resume specie payments. The legal tender greenback is the basis of the national banks note, and coin is the proposed basis for both. There is not coin enough in the world to carry on the business of New York. There is no bank in this country that ever did or can now stand a run for coin. The State banks have failed seven times in forty-nine years, whenever coin was demanded for their paper. The new steam-power has made a new trade so vast that a coin basis cannot carry it on bankers' paper money paper money; the money power has taken control of the press, of the fountains of public intelligence, of the telegraphs, of the railroads, of the politicians, of orators, of the managers of elections and the office-holders—State, city, county and Federal. It is everywhere, fighting with ten million tongues through the circulation of 8,400 newspapers. By these and many other agencies it has enslaved the people here and in Europe. We are leading a forlorn hope to fight it, but liberty or slavery hang in the balance, awaiting your decision.

We must all be free, under an independent system of national absolute money in greenbacks, or all slaves under the coin basis despotism of bankers. Those who are not for us are against us. Choose which you will serve, your country or mammon.

The 200 000 aristocratic bankers and bondholders in this country fabricate arguments to continue their coin basis, despotism and your slavery. They say there is danger of greenbacks flooding the country and becoming worthless.

This is false. We do not propose to issue, in all, more than is necessary to buy up the United States bonds; not exceeding two thousand million dollars, or $50 per capita. In 1864, when we had a paper circulation of about $600,000 000, or $20 per capita, it was worth only 87 cents on the dollar, while in 1866, with a circulation of $1,989,000,000, or $50 per capita, it was worth 75 cents on the dollar; why did the inflation in two years of $33 to $1 double the coin value of the greenback? We have now the capacity for twice the amount of trade we had in 1864, if the money lever was enlarged

You all remember the happy days of 1865-6 7 and 8, when the full circulation of paper money, based on the national credit and the people's wealth set all the wheels of industry in motion. You see now the dismal days of beggary, bankruptcy and ruin, brought upon us by the despotism of the bankers' despotism on a coin basis. Specie resumption is a success in forcing our people into bankruptcy, and the coin and bank operators into ecstacies.
