BEANS AND PEAS—Receipts for week: Beans, 3,096 pkgs; peas, 9,076 bush. Exports: Beans, 888 pkgs; peas, 2,490 bush. Imports, 5,215 bags beans. Fresh arrivals of domestic beans have been considerably lighter, but the large accumulations of stock in store and on the docks coupled with continued dull trade have caused some pressure to sell and a lower and weak market. At the close fancy marks of marrow are generally held at $2 45, but that figure would probably be shaded on some choice lots. Best marks of Canadian medium have settled to $1 90, and some good State stock can be bought for less. Pea must be very choice to reach $1 80. Turtle soup in limited demand and tendency downward. Exporters can buy the best lots of red kidney at $2 50 f. o. b., and dealers have secured some marks 5@10c cheaper. California lima in fair jobbing demand. Buyers have taken the foreign marrow beans pretty well on the basis of $2 25@$2 30, and nice lines of medium have had moderate sale at $1 85@$1 90. Green peas have declined under very slow trade.

BUTTER.

Receipts for week, 31,957 pkgs. We have had an uncommonly dull trade in fresh table butter, and the increased receipts have caused steady accumulation of stock, which in turn has materially weakened the views of holders. For a day or two past it has been quite evident that only a decline in prices would widen the consumptive demand, and when the report was received this morning of a break to 25c at Elgin, sellers cut loose and forced goods into every available channel. The volume of business was not large, however, from the fact that buyers caught the drift of the market and operated in a careful, conservative manner. A few gilt-edge lots of creamery, particularly Elgin, were placed early in the day at 28c, but the price soon fell to 27½c, and some receivers cut to 27c in the effort to secure custom. The irregularity in the quality of the butter added to the weakness. Probably not one mark in ten is up to the usual standard. Some lots show frosty flavor, etc., and nearly all lack grain feed. Many of the contract goods have been rejected, and these are now offering at easy prices on the open market. Below extras values fall away rapidly and there is a good deal of uncertainty as to selling rates. Most of the State creamery is so far below fancy quality that it has to go to cheaper trade; best lots do not exceed 26c, while many sales are at 24@25c. Held creamery, both Western and State, is slow and weaker. Arrivals of State dairy have continued so moderate that prices have held up better than for other kinds. Firkins still bring 24c when fancy, but best lots of half tubs have fallen to 26c@26½c under the influence of the decline in fresh creamery. Fresh Welsh is jobbing at about 25c for the best. Imitation creamery must be choice to command 22@23c, and only a little of the finest fresh factory in tubs reaches 21c; most of the latter goods are seconds, and go at about 18c.

CHEESE.

Receipts for week, 29,761 boxes. Exports 3,077 boxes. There has been no improvement whatever in the foreign demand and both cable and mail advices do not give any hope of business so long as orders can be filled in Canada so much cheaper than here. Home trade has also been very slack; jobbers having some cheese on hand are inclined to dispose of these before making further important purchases. As a rule holders ask about late prices and are carrying stocks with some degree of confidence; but if there was any pressure to sell values would certainly weaken. Inside quotations or less would have to be accepted on lines at the present time. Among the latest sales of importance in the interior is the entire October make of the Cloverfield combination at 11c. Liverpool cable, 54s.

EGGS.

Receipts for the week, 1,396 bbls and 25,200 cases. The market gained additional strength following our last weekly report, but of late arrivals have shown a large increase and toward the close the feeling is tame and less firm. Occasional lots of very fancy fresh gathered are still placed up to 28@29c, but the latter figure is now very extreme, few lots selling above 26c, and for average firsts 24½c is the ruling price. Held fresh and limed eggs are in large supply, rather urgently offered, dull and barely steady.

FRUITS AND BERRIES—FRESH.

Apples have shown further upward tendency under moderate receipts and a very good demand; tone firm at the close, and a few special marks of extra fancy quality exceed quotations. Pears quiet. Table grapes dull and weaker, but a fair demand for wine grapes makes a firmer feeling on bulk stock. Cranberries of fine quality and in perfect condition are in good demand and firmer. Florida oranges in much larger supply, and tending in buyers's favor. Late receipts have contained many in poor order, and prices show wide range.

DRIED FRUITS.

Receipts for week, 37,215 pkgs; exports, 510 pkgs. There has been quite strong pressure from the interior to sell prime evaporated apples, and this has caused a weaker and unsettled market. In several sections makers have put up the usual export grade of fruit expecting some trade from that source, but the late sharp rise in prices practically closed that outlet, and packers are now seeking a market for their stock. Unfortunately there are few buyers at present for car lots, and forced sales can be made only at low figures. The jobbing trade is very light, and is being supplied with choice and fancy fruit at 10½@11½c. Sun-dried apples share in the weakness, and are quite dull. Not much doing in peaches. Raspberries steady, but quiet. Huckleberries firm. Good cherries would sell. Blackberries scarce and higher. California fruits slow.

HOPS.

Receipts for the week, 8,716 bales; exports, 5,771 bales. Imports, 74 bales. The influence of recent heavy shipments abroad is shown in a firmer and slightly higher market for choice quality hops both State and Pacific Coast, and a better feeling in all sorts. Shippers are still taking stock quite freely, confining their purchases, however, mostly to the interior where they claim to get better assortments of stock. Brewers' trade is steady but not large.

POULTRY.

Live fowls and chickens have shown wide fluctuations in values from day to day, but the close is barely steady, except for fine stock, which is relatively scarce. Turkeys coming forward freely, but good lots sell well. Ducks and geese have been stiffened a little during the week. Pigeons slow. A large increase in the receipts of Western dressed poultry has caused a decline in prices from the quotations given a week ago. At the close offerings are heavy, and consist largely of turkeys, fowls and ducks, for which prices close barely steady, as quoted. Chickens are not in excessive supply, and are fairly steady, with a few lots of exceptionally fine quality placed a shade above our top figures. More dry packed poultry now arriving; when in perfect order the dry stock meets fair demand at prices a trifle higher than quoted for ice-packed stock.

GAME.

Nearby partridges are in larger supply and moving slowly at easier prices. Western partridges are dull and weak, and pin-tail grouse drag heavily at lower prices, but the fine underdrawn grouse are steady. Quail a shade easier. Wild ducks of good quality are now meeting a moderate demand. Rabbits steady. Venison has been more plenty, and declining; late sales of short saddle mostly at 10@13c; cannot be legally sold after to-day.

Onions plenty and freely offered at former low quotations. Cauliflowers of fancy quality, a shade firmer. The Milk Exchange price is $1 57 a can.

GENERAL MARKET REPORT.

New-York, November 14, 1893.

COTTON—The cotton market opened with a fairly steady undertone, the prices in the first call, however, showing in some cases a loss of 1 to 2 points as compared with yesterday's closing figures, and immediately after the call the market further weakened a point or two, after which there was a sharp rally of half a dozen points, and finally a steady tone, with the net decline reduced to 1 point on some options, with the list in the main showing no changes as compared with yesterday's closing prices. The early weakness of the market was mainly due to disappointing cable accounts, the weakest feature of which was the small volume of business in spot cotton at Liverpool, the sales to-day in that market being confined to 8,000 bales, while the future list showed at the close of the Liverpool market an advance of 1-64d only. The weakness of the early market was increased by a well circulated rumor to the effect that Neill was on the point of publishing a circular indicating a crop of 8,250,000 bales. It was not till noon that this report was contradicted. The pressure of large receipts was another factor of the weakness, the movement pointing to a total of 285,000 bales for the week at the ports, against 259,455 bales the corresponding week last year. The total of to-day's receipts is considerably in excess of expectation. New-Orleans receipts for to-morrow are estimated at from 10,000 to 12,000 bales, against 5,155 bales last year. Memphis shows receipts of 9,048 bales, against 3,185 bales last year, and Houston receipts are placed at 20,000 bales, against 9,000 bales last year. At all interior points reporting daily the movement is much larger than predicted, and at present the interior movement for the week promises to be very nearly as large as last year. Price & Co. have reports to the effect that the cotton crop is all picked out, and that it has been marketed more rapidly than before. Such reports have served to check the decline in the market to-day in the presence of the unexpectedly heavy movement, but it is easy to see that the large movement is making the speculative holders of cotton uneasy.

Opening, range and close to-day and closing bids the previous night and last year follow:

	Open-ing.	High-est.	Low-est.	Closing to-day.	Last night.	Last year.

COFFEE—The coffee market opened at a decline, taking the bids as a basis, of 10 to 15 points, ruling quiet for the rest of the session and up to 2 p. m. being without any substantial recovery owing to the fact that supplies concerning the weak sides were the decline of the day. Prices of spot coffee on the street. No 7 Rio being quoted at 18½c. Up to 2 p. m. the contract sales had reached about 10,000 bags, December selling at 16.35@16.70c, January at 16.35c, March at 16.05@16.10c, and May at 15.70@15.75c. The weakness of the European markets was expected by private cables as due to dull markets for spot coffee. The Havre market, with sales of 15,000 bags, closed barely steady at a decline of 50@75 francs. The Hamburg market was off 50@75 pfg, closing barely steady, with sales of 12,000 bags. The London market showed a decline of 6d@1s, while the news from Brazil showed a firm market at Rio, but an easier price at Santos. At Rio No 7 was quoted at 17½ reis, with exchange at 19 9-16d. Receipts, 2,000 bags; stock, 67,000 bags. Good average Santos quoted 15 + 500; receipts, 11,000 bags, and stock, 175,000 bags. The market for contracts closed barely steady, but 5 to 10 points lower. Total sales were 11,000 bags, as follows:

BRAZIL COFFEE—The market for spot coffee was easier in sympathy with the lower market for contracts in Europe. Since Nov 7 no spot sales have been made. No important business was transacted in futures seem to think that the market will go still further their way. Mild coffee was steady, with Cordova quoted at 20@20½c. About 400 bags Maracaibo sold on private terms.

DRUGS—The market for opium has not shown any improvement, and it is still very dull, with prices quite nominal. Since Nov 7 no spot sales have been reported at $2 40, but jobbing lots are about 5c lower, the quotation being $2 42½@$2 45, while powdered is unchanged at $3 10@$3 25. Quinine is very firm, with about all of the available cash lots heretofore offering at 19½c taken up and most of the remainder is withdrawn from the market. Regular lots of foreign are held at about 19½c. Fine Italian oils are very firm and quiet, with sales of peppermint at $1 75@$1 80. Menthol is firmer, with sales of Japan at $2 70 and bulk held at $2 30@$2 50. Western holders are moving the price up, and there is very little left in the hand that quarter at present prices. Senna root is firm at 45c, and Texas bulk is quoted at 20@22c. Other articles are freely held, and indications point to a higher range of value. It is said that 50 bags sold at 2c, though the market closes at 2@2½c. The primary markets report a scarcity, with heavy sales made for American account. FISH—Mackerel—The market for mackerel is very quiet, and most of the fish that are left are above the market. Holders are asking from $12 50 to $14, while the best bids are not above $12, that being offered for 200 bbls, but it was refused and the fish were put in store. All other kinds of mackerel are very dull. Herring are fairly active for scaled. The supply is moderate and most of the arrivals are by steamer. The demand is fair and the market is steady. Medium scaled are quotable at 13½c and lengthwise at 14c. It is thought that herring at these prices are reasonably cheap.
