## GENERAL MARKET REPORT.

New-York, November 17, 1893.

COTTON—The cotton market opened steady in tone, with prices from 3 points lower to 1 point higher. The cables showed a loss of 1-16d in the price of spot cotton, and finally a net decline of 3@4-64d in the price of futures. New-Orleans receipts for to-morrow estimated at 14,000 to 15,000 bales, against 7,365 bales last year. The total sales reached 217,000 bales, and prices, as compared with last evening's close, were finally from unchanged to 2 points higher. The advices from the New-England spinners continue to indicate extreme discouragement, and very little disposition to start in and overcome the loss in their takings is seen this year as compared with former years. The fact that the market closed firm to-night for the first time for several days past is expected to make a favorable impression upon the Liverpool cotton market, considering the better conditions said to be prevalent in Manchester.

COFFEE—The market for coffee opened weak in tone with prices from 15 to 20 points lower. The sales on the first call reached 2,000 bags, but at 2 o'clock they had reached 32,500 bags, including November, at 15.95@16.00; December, at 16.55@16.60; January, at 16.30; March, at 16.00 and May at 15.60@15.65. The weakness was due primarily to disappointing cables, which indicated a decline of ¼ pfg at Hamburg; an advance of ⅛f at Havre and a decline of 3d in some quotations from London. The Rio market showed no change with No 7 quiet 15@500; exchange, 10%, two days' receipts 15,000 bags; stock, 112,000 bags. The Santos market quoted 17@400; two days' receipts, 9,000 bags, and stock, 197,000 bags. The market for spot coffee at New-York is dull and heavy at a further decline, No 7 being now quoted at 18 cents. As the day advanced there were free offerings and an active market on prices from Brazil giving reports of lower markets there. On this news longs sold and shorts covered. The market for contracts closed steady, 84 points or 25 points lower. Total sales were 32,250 bags as follows:

FLOUR AND MEAL—There was a little more inquiry for high grades of winter wheat flour to-day in anticipation of an advance in rail rates, which is expected to go into effect at the close of navigation. The advance in freights will make a difference of upward of 10 cents per bbl in some cases. Spring wheat flour is held by the mills at about the present prices, but some lots here keep coming out all the time, enough so to make a weak undertone and fill the trade. FOREIGN DRIED FRUIT—There has been somewhat more activity during the last week in dried fruit, jobbers and buyers showing more disposition to stock up for the holidays. Valencia raisin are quoted at 6½@6¾c for layer, and 5½@5½c, off-stalk. California fruit is offered liberally, and is being taken freely as the low prices. New-London, layer, are quoted at $1 50@$1 65, and bags at 4½@4¾c. Currants at 2¾@3c for barrel lots. Prunes at 6½@8½c for French and Getts for California. Dates are rather slow of sale at 3½@4c. Figs at 11@16c for Smyrna. Nuts are generally quiet. The last reports show twelve vessels en route for this port with quite liberal supplies of raisins and currants.

FOREIGN GREEN FRUIT—It is about the same old story in lemons. Desirable grades are rather scarce and firm. Good goods are held firmly, but poor are dull. Quotations at $1 75@$4 50. Oranges, Jamaica, repacked, $4 75@$5 25. Bananas at 80c@$1 12 for first run, and 60@80c for seconds. Grapes at $5@$6 50 for fancy Almeria grapes. Cocoanuts are firm at $28@$40. There are now en route 37,000 boxes of lemons (Messina) and about 60,000 bbls of grapes.

GRAIN—WHEAT—The wheat market made a new record on the down side again to-day, the price getting below any previous record for May or December. The opening was with a little weaker feeling on the Russian crop figures, which were unexpectedly favorable. The outturn of the wheat crop was officially reported as 78,000,000 bush more than last year, and rye 128,000,000 bush more than last year, making respectively 325,000,000 bush and 711,000,000 bush. These figures are extraordinarily heavy and explain the recent liberality of Russian exports. The figures of wheat may possibly include the Caucasuses, which is figured at approximately 75,000,000 bush for the average. The large increase in the Russian crop of wheat may offset the American decrease, and the large crop of rye will enable Russian shippers to sell wheat more freely than would otherwise be the case, as the demand for Russian rye is small comparatively this year. On some cove ing by local traders and on reports that private cables showed a little better tone the market hardened a little toward middlay. The Northwestern receipts were only 656 cars, against 1,001 last year, but there was no support brought in by the news, and shortly after middlay, on renewed liquidation, the new records were made. As the day wore on stop orders began to appear, and at each eighth decline more long wheat came on the market with steadily increasing weakness, which seemed to be a sure case of liquidation, first longs trying to get out at the best price possible. The close was weak at the lowest price on record, and at a net decline of ½c from last night. Cash wheat was moderately active and weak, at be decline from yesterday. The buying seemed not to be on fresh orders, but on the buying of some old orders still in the market. Sales were 188,000 bush, including 144,000 bush for export, as follows: No 2 red, ⅛c under December in store, December closed 66c, ⅛c over December, f o b, afloat, and December price, f o b afloat, and December price, delivered; No 2 red, 24,000 bush, December price, f o b, afloat; No 1 Northern spring, 16,000 bush, 2½c over December to arrive; No 2 North-2½c over December to arrive; No 2 Northern spring, 8,000 bush, 67½c, elevator; ungraded, 96,000 bush, 63½c and private terms delivered. CORN—The market for corn opened quiet and about steady at last night's figures. There was a little improvement in price during the morning on some covering and on reports that Western receiving-houses were not pressing corn as freely on the market as was the case yesterday. Later, however, in sympathy with the weakness in wheat, a decidely weaker feeling prevailed, and the early improvement was lost. The weakness in the wheat market extended to corn during the latter part of the day. There was fresh selling, and as prices declined, a good deal of liquidation was seen resulting in a sharp decline in prices, although the close was only ⅛@⅛c below the closing last night. Cash corn was more active and weaker. There seemed to be some fair export orders at the lower prices, and as a result out of total transactions of 160,000 bush, exporters bought 128,000. Details of cash sales follow: No 2 corn, 5,000 bush, 47⅞c, elevator; No 2 corn, 136,000 bush, 47⅞@48c, over December as to time, including 56,000 bush, 48@48⅛c, delivered end of November; No 2 white, 16,000 bush, 47⅞c f o b afloat early December; yellow, 3,500 bush, 47c elevator. OATS—The market was quiet but steady, early developing some improvement in tone later in the day, but with the afternoon weakness in wheat and corn, new selling orders came in, which prices reacted again. Oats were no exception to the weakness which prevailed in corn and wheat during the latter part of the day. At the West there was active selling and a sharp decline, and here prices were lower with little offerings. Cash oats were dull and closed weak. Sales of 71,000 bush as follows: No 2 oats, 10,000 bush, 34¾@34⅞c elevator and 35½c delivered. METALS—IRON—The Philadelphia iron market, except for 162 iron, which is in better demand, has been very dull, with prices tending down. Consumption is very light, being nearly at the lowest point of the year, and the trade is not very confident of any increase during the balance of the season. In pig from the decrease in the output has had an improving effect. Steel bills are quiet, and orders could be placed at $19 75@$19 00 delivered. Competition is stronger than ever, and prices continue weak. Old material is in better demand. In tin plates there is a decidedly better business doing for future delivery, and in some cases purchases have been made both here and in England, running as far ahead as next July. OCEAN FREIGHTS—The slight changes in the market for ocean freights are in a favorable direction. There seems to be more inquiry for room, and as the space is pretty generally preengaged on through business from the South and West, local shippers meet with some embarrassment in securing accommodations for grain and other bulky tonnage. An advance of 1d in the rate for grain to Antwerp. Engagements 3 loads grain to Glasgow at 2½d, 4 loads grain to Hull at 4d, 2 loads grain to London at 3½d, 3,500 bbls lard to London, 22s 6d; 300 tierces lard to Liverpool, 17s 6d; 200 bbls lubricating oil to Liverpool, 3s 9d; 500 boxes bacon to Liverpool, 22s 6d; 1,500 sacks flour to Gibraltar, 15s. OILS—The market for cottonseed oil is in a very bad condition, prices tending downward. It is difficult to quote anything like active prices, and our figures should be considered entirely nominal. A sale of 200 bbls of prime crude was made at 30c, but some were asking 31c at the close, and we therefore quote 29@30c. Lard oil was nominal but unchanged. The cottonseed shippers of Georgia had a conference yesterday and presented plans which refer to a combination on the part of middlemen against both the farmers and the mills. Seed shippers have been buying on a calculation that advances in price would be made by the mills later in the season. Seeds in the Southwest have, however, been uniformly tested, producing a second grade of oil and the price has declined. For the crop of 1893 mills have been very cautious about buying, while farmers are not disposed to sell at the low prices. We quote: Prime crude, bbls, 28@30c; prime crude, loose, 25@27c; off crude, bbls, 24@26c; butter oil, 33@40c; summer yellow, prime, 37@38c; summer yellow, off-grade, 32@35c. Lard oil was quiet at 70@78c.
