

IT IS TIME

to look up that Insurance Policy. When it expires and burns—too late.

Two kinds of Insurance (Companies and Agents)—Good and Bad.

Our companies have stood the storm and stress of scores of years—of many disastrous fires, and are ABSOLUTELY GOOD.

I have been writing GOOD insurance for over twenty five years; give it my personal attention, and see that you get your money when loss occurs. Believe me—this counts for much.

Look up your insurance and drop me a card to call and renew it. Got to keep busy you know, to stay in Jackson. Can't stand loafing, after a quarter century of "hustling" here among you!

Sioux City Tribune, 21st: Where is the madame, called intoxication, committed? Where the "jag" is committed, or where it is slept off? This is a point of law raised in police court this morning which may require a hearing before the Interstate Commerce commission. Jim Wright charged with intoxication, raised the point that he got his "jag" in River Sioux City, and came over the river afterwards. He contends that he was therefore the offense, if one had been committed, was committed in Nebraska. Judge H. F. Sims held that while that is true of larceny, murder and other crimes, the act of getting drunk is not instantaneous, but is a continuing performance from the time one begins to see two banders, wherefore there should be but one, until the cold gray dawn of the morning after, and in spite of Wright's protests, he was fined \$15 or five days. He threatens to carry the case to a higher court.
Homer Star: John Critz was in Sioux City Monday and purchased a five-passenger auto. The infant child of F. E. Fogels of this place died in his mother's arms in Sioux City last Wednesday while they were on their way to consult a physician. It was buried in Sioux City. The Star printed 4000 labels for them this week. Mrs. George Cain and Dottie accompanied Miss Zella Green to teaching, to start her home in Sioux City Friday evening. Mrs. Cain also visited the former teacher, Miss Talbot, who was recently operated on for appendicitis. George Ashford returned last Friday from Chicago with his son "Billy" McLaughlin where the latter underwent an operation to straighten his leg. It is getting along nicely and it is only a matter of a few weeks until he will be running around again.
Sioux City Journal, 22nd: A gang of men will start to work Monday to repair the track of the Sioux City, Crystal Lake and Home railroad commonly known as the Foye line. It is the intention of the owners to put the roadbed in good condition and to repair the cars and other equipment. E. P. Howell, president and general manager of the line, stated yesterday that he was looking to the transfer of the road and pending and that it was the intention of the present owners to hold the line on the fact that it is a money making proposition. Mr. Howell stated he believed the road could be put on its feet and that he was not anxious to dispose of it at this time. This line will be used as a part of the projected interurban line from Omaha to Sioux City, he stated. The intention of the Foye line owners, said Mr. Howell, is eventually to secure a franchise through South Sioux City, and to extend the line to Sioux City. The improvements which will be started Monday will be a step in that direction, he asserted. Mr. Howell expressed the belief that there would be little difficulty in securing the South Sioux City franchise when residents there were convinced that the owners of the road were going to improve the line and give good service.
Sioux City Tribune, 20th: The capricious conduct of the Missouri river is responsible for a big lawsuit that was up for a time in federal court here today. The case involves the ownership of a large tract of land in Dakota county Nebraska. The plaintiff is

the S. B. Land company of Sioux City and the defendants are John and Thomas Gribble, Jacob and William Rummel, John Betts, Horace Burton, Albert Roost and Edward Tunncliffe, all of Dakota county. The defendants had filed a demurrer to the amended petition claiming that admitting what was charged in that document to be true, the facts did not constitute a cause of action in that it did not set up a valid title. Complaint was also made that the boundaries of the land claimed were not fully set out. The court overruled the demurrer, and the case will be tried later on the facts as presented by both sides. Between the years 1858 and 1878 the Missouri encroached on the Dakota side until it had transferred a lot of farm land in Union county, Dakota, to that owned by the defendants. Under the law of accretions, they declare, this addition to their broad acres became their property. During the next six years, according to the plaintiff's petition the river changed again slowly, and transferred back to the Dakota side the land that had previously been taken away. At this time the S. B. Land company purchased it. Not content, however, with the new channel it had cut out, the river later went on a rampage, and when it was all over the land was safely back on the Nebraska side again. The plaintiff claims that as this last transfer was by evulsion that is, by sudden plucking out of the land from South Dakota and placing it in Nebraska, title still remains in it. The defendants say that this change, like the previous ones, was gradual. If as claimed by plaintiff the land goes to it if as asserted by defendants, the land belongs to them.

168 Days "On Time"

A strong factor in the making of a commonwealth is reliable mail service. It will interest western people to know something about the regularity of Burlington trains between Chicago and the west.

Chicago-Omaha Fast Mail No 7: The original fast mail train west of Chicago. The last date in 1911 this train reached the Missouri river late was March 16th (six minutes late). Since that date, to and including August 31st (the latest date given for comparison)—a period comprising 168 consecutive days, this train has arrived "on time" and has been operated 82,922 miles—more than three times the distance around the world.

Chicago-Omaha Fast Mail No. 15: An exclusive mail and express train scheduled at 45 miles per hour, arrived at Missouri river 31 days in August "on time". This train has arrived "on time" every day from May 10th to August 31, inclusive—a period of 109 consecutive days.

Chicago-Nebraska Limited No. 5: Arrived at Missouri river "on time" during August, 28 days out of 31; total number of minutes late, 25; average loss eight tenths of a minute per day.

Chicago-Denver Express No 3: Arrived at the Missouri river "on time" during August, 25 days out of 31; total number of minutes late, 25; average loss eight-tenths of a minute per day.

Such precision in operating fast trains is possible only with ample power, perfect mechanism and roadbed, and a highly developed organization.
