THE GENERAL MARKET REPORT.

New-York, March 22, 1895.

COTTON—The cotton market was active and lower. The opening was under a rush of selling orders, with prices 9 to 10 points lower. The stampede of selling was owing to Liverpool advices. Later prices advanced to about the final of last night, and during the day trade was active, fluctuations quick, but with apparently an excess of selling orders in the market. The close was at about the lowest prices of the day, steady in tone and at 11 to 12 points net decline. Sales were 231,300 bales. The disappointment over the Liverpool news was keen. It had been hoped that Liverpool would maintain the recent advance, and the active demand for spot cotton on the part of English spinners would keep up. Disappointed in both, there was a great deal of forced realizing, and, although several efforts were apparently made to advance prices during the day, each time there came out a lot of long cotton, partly for Wall Street account. The publication of the interview with Mr. John Inman, who is credited with being the head of the bull clique in the market, failed to have any influence. Professional speculators classed the interview as the bid for a market to sell on, and were not to be caught napping, but closed out quite large holdings of long stuff. Commission houses claimed that the Inman brokers have increased rather than decreased their line of holdings, in addition to the large quantity said to be held below 5½c. Mr. Inman's point is that the last large crop was produced under phenomenal conditions, and neither the profits, the weather, the purchases of fertilizer for any other factor on the crop is likely to bring about the raising of another large crop this year. He thinks English spinners are depleted in stocks, although the Continental supplies are large. The liberal sales of cotton in the future market here, the quick response in New-Orleans and the weakness of Liverpool, as stated, which closed at 3½@4 points net decline, tended to prevent the buying by outside parties in the afternoon. The port receipts were in excess of the early estimates, amounting for the day to 28,299 bales, making for the week 118,537 bales. The exports from all ports to-day were 24,213 bales to Great Britain, 214 bales to France and 5,794 bales to the Continent. The total exports for the week were 122,770 bales, including 53,436 bales to Great Britain, 16,622 bales to France and 52,712 to the Continent. The stock at the American ports is 920,050 bales. Liverpool sales of spot cotton for the week were 111,000 bales, including 92,000 bales American, making the business for the week unusually active. The stock of cotton at the ports last year was 793,520 bales. Interior receipts for the week were 52,040 bales, against 59,736 bales last week and 18,344 bales last year. Interior receipts for the week were 81,672 bales, against 107,223 bales last week and 44,824 bales last year. Interior stocks for week, 336,628 bales, against 345,384 bales last week and 276,210 bales last year.

COFFEE—The local market was in a condition of almost complete stagnation the greater portion of the day. European cables were colorless and hesitation was displayed in consequence. This feeling continued the entire day, and the result was very small transactions. Havre sold 29,000 bags. March closed steady at 9c net, April, 94.25 francs; May, 94.50 francs; June, 94.75 francs. Hamburg quiet. March, 78.25 pfgs; April, 77.25 pfgs; May and June, 77 pfgs. Rio cables, firm, with 7-7 grade quoted at 16,000 reis. Exchange quoted 9¾. The market for Rio continues firm and nominally steady at 16¾@16¾c for flat bean, No 7, 15¾c for No 8. There was a little better demand to-day, and a sale was reported of 7,500 bags Rio, spot and to arrive, on private terms. 300 bags Santos, peaberry, private terms. Private advices to coffee there was a fair trade, and prices show a firm undertone. The transactions were 2,500 bags Maracaibo, private terms; 500 bags Central America, and 100 bags Jamaica, private terms.

DRUGS—The weaker tendency of the Smyrna and Constantinople markets for opium, caused by the favorable outlook for the next crop, the indications point to the heaviest yield upon record, has brought business in the article here to a complete stand. Holders are quoting $2 15 for single packages, though it is said in the trade that bids of $2 12½ would be favorably entertained if submitted. The last sterling price was 8s, with intimations of 7s 10d. The jobbing quotations remain $2 17½@$2 20, with powdered held at $2 65@$2 75. There is no change to report in the position of quinine. A fair number of orders are being received daily, and the same are executed upon the basis of 23¾@24¾c for foreign in large bulk, regular terms. Essential oils of all kinds continue dull, with quotations nominally unchanged. Golden Seal root is reported firmer from the country, with sales at the equivalent of about 1c higher than done in this market. The above price is asked here for store goods. Blood root is in very limited supply and held at nominally 5c. The cost to lay down from the interior is said to be 6c. Senega root is quiet but steady at 25c for Manitoba and 26@30c for Minnesota. Mandrake is doing better, with 3½@4c asked. The stock of bayberry bark is about exhausted. In the South holders are quoting 7c f o b.

FLOUR AND MEAL—Discouraged by the continued weakness in wheat, the market for flour was dull and weak to-day, with buyers 10 to 15 cents below the asking prices of the mills, winding up dull and heavy. Sales were 14,500 pkgs, as follows: 450 bbls winter patents, $3 10@$3 25; 1,000 bbls extra 2s, private terms; 2,200 bbls city patents, private terms; 5,175 bbls city clears, $3 35@$3 40; 700 bbls city extra, $2 50@$2 75; 3,500 bbls spring patents, $3 50@$3 65, part to arrive April and May, and 1,300 bbls clears, $2 45@$2 60.....RYE FLOUR—Market firm; sales, 200 bbls at $3@$3 20.....CORNMEAL—Market quiet; sales, 100 bbls. Quoted: Brandywine, $2 75; Sagamore, $2 75; Western and Southern, $2 60@$2 70.....BAG MEAL—Market quiet; fine white, $1 12@$1 15; fine yellow, $1 10; coarse, 99c@$1 02.....FEED—Market steady; 40-lb, 87½@92½c; 60-lb, 87½@92½c; 80-lb, 87½@92½c; 100-lb, 95c; hominy chop, 87½@90c; cottonseed meal, 85@90c; oil meal, $1 10@$1 12½; city feed, 95c@$1; sales, 365 tons city.

FOREIGN DRIED FRUITS—Jobbing trade shows very little improvement. There seems to be some gain in mail orders, but not enough to have give more than an ordinary appearance to trade. Prunes are fairly steady, and California are firmly held. Raisins are steady, but quiet. Currants continue firmly held on the advices from abroad. Persian dates are unsettled. Nuts are quiet. We quote: Valencia raisins, 3¼@4½c; Sultanas, 5@7½c; California, 3¼@5¼c; fard dates, 3½@4½c; currants, 3@3½c; Turkish prunes, 2¾@3¾c; California, 7@10½c; almonds, 8½@13½c; Brazil nuts, 3½@4½c; walnuts, 6@10½c; filberts, 6½@7½c; figs, 3½@12c.

FOREIGN GREEN FRUITS—The jobbing trade in lemons continues quite disappointing, and prices are also rather unsatisfactory. Oranges are dull for Sicily and very low. West India fruit is also in liberal supply and market easy. Cocoanuts are quiet, and grapes about steady. We quote: Lemons, $2@$3 75; oranges, $1 75@$5 50; grapes, $6 50@$12 50; bananas, 35c@$1 37½; cocoanuts, $23@$32.

GRAIN—WHEAT—The wheat market was very steady during the early part of the day, breaking rapidly at midday, partially recovering in the early afternoon. It reacted again, but fell off a little above the lowest. The market early sold off a trifle from the final of last night on the cable news, which brought in a ready response to the final here of yesterday. There was some buying by traders and a little recovery, but there was no support on the rally, and toward midday the market broke sharply on the selling of some lots of long wheat, and the reports of private cables showed a very weak market on some of the Continental bourses. The reports of large export business at the decline produced a quick rally. The export buying of the last few days has been of a very interesting feature, and on Wednesday, Thursday and to-day the sales have aggregated about 680,000 bushels, notwithstanding the statements that European markets were weak and were indifferent to the course of American prices. Receipts West were large to-day, and the primary movement shows the movement of a great deal of wheat from farmers' hands. Ex-Assistant Statistician Snow, in "The Orange Judd Farmer," practically charges that the Government arbitrarily changed the reports on the amount of wheat in farmers' hands, without regard to the law or statistical experience. He says that the Government figures and his own were received from practically the same class of correspondence, and that while on corn they agreed almost to a fraction, there was no reason for the difference in wheat. Interior receipts of wheat at spring wheat markets to-day were 229,017 bush (including Chicago, 20,076 bush, nearly all winter), against 104,000 last year, winter, 41,053 bush; seaboard receipts, 64,734 bush; total, 375,804 bush. Exports, 34,163 bush. Trade in the last hours of the session was rather light, the market hardening a little on the reports of export business, leaving off quiet at ¼@⅜c net decline for the day. There was quite a little talk about big export business West, and rumors were current of about 20 loads from Chicago. The export business here amounted to 298,000 bush, including 80,000 bush No 2 red at ⅜@⅝c over May f o b store. May closed at 59⅝c, 16,000 bush at 1⅜c over May f o b afloat; 88,000 bush No 1 hard Manitoba, at 9½@9⅝c over May f o b afloat; 8,000 bush No 1 Northern New-York spring at 5⅝c over May in store, and 16,000 bush choice red at 61c and private terms, delivered.....CORN—The market for corn was moderately active and weak. The opening was fairly steady, and during the morning the offerings were quite easily disposed of, but after midday there came in quite a wave of selling orders, and prices declined rather easily, closing dull and only about steady at ⅛@¼c net decline. There was talk of larger receipts at the West, and some of the recent buyers had corn for sale during the day. The cash demand has rather petered out, and the support afforded by this almost entirely disappeared. To-day spot corn was very dull. Sales were 7,000 bush ungraded corn at 59⅝c delivered, and 5,000 bush steamer corn at 51½c delivered.....OATS—In oats there was a small trade, with the undertone of the market weaker, partly due to the decline in other grains, and partly due to the weakening in prices West. The interior movement of oats is well maintained, and the demand for cash has been running on very narrow lines for some time past. New-York stocks are good, and at the current rate of demand will last for a long time. The close was unchanged to ⅛c decline. Cash oats were dull and lower. Sales were 47,000 bush, as follows: 28,000 bush No 2 oats, 33½c elevator and 34½c delivered; 3,000 bush No 2 white, 36½c; 15,000 bush track white, 37@40½c.....BARLEY—Market quiet. Quoted: No 2 Milwaukee, 65c; upgraded Western, 63@66c.....MALT—Market quiet. Quoted: Western, 70@74c.....SEEDS—Market quiet. Quoted: Clover, $8 50@$10 50; timothy, $3 10@$3 25.

SUGAR—The London market was quoted steady to-day at the previous advance on cane sugar, while beet sugar was dull and lower, both March and April being off 1½d. Locally the market on spot goods is very firm. Offerings of raw sugar on a rather moderate scale and quite readily absorbed. The reaction abroad, however, tended to check the interest somewhat to-day. Importers' stocks of sugar are 19,370 tons, against 5,101 tons last year. At the close centrifugal was quoted at 3c; muscovado, 80 test, 2 11-16c; and molasses sugar, 2 7-16c for 89 test. COUNTRY PRODUCE MARKET.

New-York, March 22, 1895.

BEANS AND PEAS—More than a carload of Canadian medium sold to-day at $2 15, and the position seems to be stronger than at any time during the week. Advices from the interior were higher and very firm. No important sales of pea as yet above $2 15, but there is a disposition to hold the best goods at $2 20. Marrow had a few jobbing sales at $2 90, red kidney quiet but firmly held. A carload of foreign pea sold at $2, and holders are now inclined to hold for $2 05. BUTTER—It was a good market for nearly all grades of butter. Jobbers wanted more fancy fresh creamery than they could find, and the price was advanced to 29½c firm with firsts selling well at 18@19c. New State dairy half tubs were wanted at 18c for fancy selections, but lower grades were quiet, and most of the fresh Welsh is of irregular quality and sells slowly. Old dairy dull. Best grades of imitation creamery firm and fairly selling slightly firmer. Further considerable sales of low grades, including a lot of Wisconsin dairy at 8c, and grades, including a lot of factory at 7½@8c. CHEESE—Market holds firm on fine and fancy full cream, both large and small sizes, and a moderate quantity of stock is moving, but for the lower grades, and especially part skims that show too much flavor for home trade, the situation is discouraging. The trade is now small, and it would sustained prices if there was more business to be done. A slight increase in supply to weaken the market, but a few lots of fowls are due, which have not been received, but they arrived it is doubtful that a place could have been found for them at quotations. French poults steady for fowls and bound for turkeys. We quote: Fresh killed: Turkeys, hens, 12@13c; toms, 11@12c; chickens, 15@17c; fowls, 12@13c; ducks, 14@16c; geese, 09@10c.
