Oilcake, lb	433,500	Cheese, lb	122,900
Spirits turp, gals	2,470	Butter, lb	34,150
Rosin, bbls	1,648	Pitch, bbls	60

COUNTRY PRODUCE MARKET.

For week ending Tuesday, September 17, 1895.

BEANS AND PEAS—Receipts for week: Beans, 330 bbls; peas, 1,238 bbls. Exports: Beans, 353 bbls; peas, 1,583 bbls. About a car of new State pea beans arrived and met a slow jobbing trade, with late sales mainly at $1 60; we hear of offers to sell round lots to come in at less money. It is now a question whether farmers will be inclined to part with their new beans for awhile at present prices, and we may not be burdened with stock for some time to come. Frosts have done some damage to the late beans. The presence of well old goods has continued strong enough to keep values on the downward turn, and there is still some uncertainty as to the immediate future of the market. As yet the demand has not improved very much, but there has always been a decided improvement early in October, and stocks are now working down to a point that ought not to cause serious trouble. This afternoon the feeling seemed to be just a shade steadier on choice old marrow at $1 60; buyers can supply their wants at that, but holders are disinclined to make further concessions. Medium are selling when wanted at $1 55@$1 60, and peas at about $1 50@$1 55. A sale of yellow eye is reported at $2 10. The absence of important export orders is the weakest feature of the situation on red kidney; $1 45 is named to shippers at the close, hoping to find an outlet. Foreign beans have so little demand that values are entirely nominal. Green peas quiet and weak, especially Scotch. We quote: Beans, domestic, marrow, 1894, choice, per bush, $1 60; do pea, 1895, $1 60; do, 1894, $1 50@$1 55; do medium, $1 50; do fair to good, $2 10; do red kidney, $1 45@$1 60; do Lima, California, $3 20@$3 25; do foreign, marrow, $1 45@$1 50; do foreign pea, $1 35@$1 45; do foreign medium, $1 30@$1 40; green peas, bbls, 97½c; do bags, 90c; do Scotch, $1½@90c.

BUTTER—Receipts for week, 33,414 pkgs. Exports, 8,472 tubs. There has been a slow, but gradual improvement in the consumptive demand, and the wants of the trade have absorbed the receipts so closely that sellers have been able to secure an advance of about 1c on top grades of fresh table butter. Extra creamery is now selling at 21c, and the market is rather firm at that. Operators seem inclined to move cautiously, believing that the higher rates quoted recently will keep a fair proportion of the current make coming this way. Besides we have a large stock of held goods to draw on, and many of these must be worked off in the place of fresh. The butter this week is showing the effects of late hot weather, and this reduces the quantity available for highest class trade. Grades just under fancy are moving better, and 18@19½c has been established in price. Seconds and thirds continue to drag at irregular prices. A little of the best June creamery is selling from freezers at 19@20c. State dairy fresh tubs arrive slowly and have but a small place in the trade unless strictly fancy, when they sell at about 19c. No interest in the few firkins offering. Choice imitation creamery rather firmer, but not quotably higher. Exporters have continued to take a moderate quantity of factory, and with more trading on home account the market has rather gone steady. We quote: Creamery: State and Pennsylvania, extras, 20@21c; do Western, extras, 21c; do firsts, 18@19½c; do thirds to seconds, 13@16½c; State dairy, half tubs, fancy, 19c; do Welsh tubs, fancy, 18½c; do firsts, 16@17½c; do thirds to seconds, 12@15c; imitation creamery, firsts, 14@15c; do seconds, 11@12c; Western dairy, 9@14c; factory, June, firkins, 11½@12½c; do June tubs, 11@12c; do current make, firkins, 10@11½c; do tubs, 8@11c.

CHEESE—Receipts for week, 29,881 boxes; exports, 8,046 boxes. Following our last weekly report trade continued so dull that receivers were forced to name still lower prices, and the market went out very heavy at 7½c for fancy large colored, and about 6¾c for same grade of white. So far this week arrivals have been very light, the general quality of the stock is better, and with slightly more export demand, the position is a little stronger. To-day's trading was on the basis of 7¾c for gilt-edge August colored, but as the day wore on it became easier to sell than to buy at that. More was offered for some of the favorite parcels, but without business except in a special way to home trade. There seemed to be a pretty general feeling that we had seen the worst, and that the fall make would meet a better demand. Fancy white has advanced to 7c, at which only a little business was done. Undergrades remain quiet. Part skims in light supply, but very dull and almost nominal. Small size full cream selling better at the close, and feeling slightly firmer on fancy quality. Liverpool cable, colored, 37s 6d; white, 37s. We quote: State, full cream, large, colored, fancy, 7¾c; do, white, fancy, 7c; do, good to choice, 6¼@6¾c; do, common to fair, 5½@6c; do, small size, fancy, 8¼@8½c; do, good to choice, 7¼@8c; do, common to fair, 6@7c; part skims, choice, 3¼@3½c; do, common to fair, 2@2½c; do, small, 3½c; do, large, white, 4@5½c; do, colored, 2@3c.

EGGS—Receipts for week, 40,715 cases. There has been a gradual decrease in receipts, and fine fresh-gathered eggs have gradually become more and more scarce. The extreme heat prevailing up to last Friday made it difficult to sustain the advance to 16c, and the bulk of sales was at 15½c for average prime Western, but cooler weather at the close of the week steadied the market, and this week strictly fancy goods have been established at 16@16½c. The receipts are, however, showing bad effects of the recent hot weather, and there are only a few of the fanciest marks worth the outside quotation. Medium grades are dull, but there is a good demand for all kinds of cheap eggs, increased somewhat by the approaching Jewish holidays, and for these parties lend in sellers' favor. We quote: State, per doz, Western, best, 16@17c; do fair to good, 15@15½c; do defective, case count, 16½c; do fair to good, 15@15½c; do defective, case count, 21@12c; culls, per 30-doz case, $1 50@$3 50.

FRUITS—FRESH—High-grade red apples, suitable for shipping or table use, have been in demand moderate and firm, but there is an abundance of green fruit and of medium and lower grades of all kinds for the trade. The demand is light and the tone of prices easy. Bartlett pears are now mostly from ice houses and of very irregular quality. The butter this week is showing the effects of late hot weather, and this reduces the quantity available for highest class trade. Grades just under fancy are moving better, and 18@19½c has been established in price. Seconds and thirds continue to drag at irregular prices.
