# WEEKLY EPITAPH.

TOMBSTONE, ARIZONA, OCTOBER 7, 1882.

## FACTS FOR THE CURIOUS.

AT Cape Island, N. J., the sea has gained on the shore fully a mile since 1776. The tides on the eastern shore of the State are observably growing higher.

DURING the reign of Napoleon I. a book of birds for children was suppressed because it contained the phrase: "The cock is rather the tyrant than the chieftain of the farm-yard."

EVERY shell fired by an army during siege operations costs, with the powder with which the mortar is charged, the sum of eight dollars—enough to support a poor family for a fortnight.

THE lead used in sounding from a vessel usually weighs about fourteen pounds, but in deep-sea soundings a weight of not less than 150 pounds is frequently employed. Wire has been largely used for a line, as it makes less friction in sinking through the water. With hemp rope a sinker of 300 weight is sometimes twenty minutes in reaching the bottom in 1,500 fathoms of water, so great is the friction of the line.

THE oldest monument in the world is in the Ashmolean Museum at Oxford. This is the lintel stone of a tomb which formed the last resting-place of an officer who lived in the time of King Sent, of the second dynasty, whose fate is fixed by M. Mariette more than 6,000 years ago. The stone is covered with that delicate and finished sculpture which distinguished the early periods of Egiptian history, and was immeasurably superior to the stiff and conventional art of the latter ages of Egypt, which we are accustomed to see in European museums.

THE Japanese are remarkably exempt from deformed feet. The reason of this is to be found in the shoes they wear. The wooden sandals worn in Japan have a separate compartment for the great toe, and make a clanking noise on the streets. Straw slippers are also worn, and a traveler setting out on a journey will strap a supply of them on his back, that he may put on a new pair when the old is worn out. They cost but a cent and a half a pair. They are rights and lefts, and leave the foot free to the air. They are never worn in the house, being left outside the door; passing down a Japanese street long rows of them are seen at the doors, old and new, large and small. It is surprising to see how rapidly the Japs step out of them, and pick them up again with their feet without stopping when leaving the house.

AS THE most valuable wealth a country can possess is its healthy population, the tables of mortality are worth study; and from these we find that on the first day of life seventy-eight boys die, to sixty-three girls. In the first week of life 168 boys die, to 153 girls. In Prussia the mortality among females is the greatest from 10 to 13 years of age; and from the 25th to the 40th it is greater than at other periods of life, and yet at all periods of life the census of females compares favorably with that of males. In England, taking a period of seven years, there were eight men to fifteen women who were alive at 101 years; three men to five women at 102 years; two men to three women at 103 years of age, and no man to one woman who lived to 104. It is observed that only one person in 1,000 born lives beyond 94 years.

FROM a comparison of the results of recent deep-sea soundings, it appears that the following are just generalizations: 1. The water of the South Pacific is in its whole mass cooler than that of the Atlantic. 2. The water of the South Pacific is, down to 4,225 feet, somewhat warmer than that of the Atlantic, but below that depth cooler. 3. The bottom temperatures are generally lower in the Pacific than in the Atlantic at the same depths and in the same degree of latitude; but nowhere in the Pacific are found such low bottom temperatures as in the Antarctic portion of the South Atlantic, where temperatures of —0.3 centigrade to —0.6 degrees have been measured. 4. In the western parts of the Pacific and the adjoining parts of the East India archipelago, the temperature of the water reaches its maximum at depths between 1,787 and 8,937 feet, remaining the same from this depth to the bottom. In the whole of the Atlantic the temperature from 8,937 feet to the bottom gradually though slowly increases.

### Couldn't Trust It a Second Time.

He attended a meeting where an attempt was being made to lift the debt of the church. After a great deal of earnest exhortation to give he began to get mildly excited over the matter, and when the minister declared that every one who gave would find that the Lord would pay him back a hundred fold he concluded to close with the bargain, and at once subscribed a handsome sum. "And," said he some weeks afterward, "the scripture promise is financially a good one, for since I gave that money to the church a man came into my office and paid a large debt which I had long since given up as lost. Yes, the promise is a good one, but"—and here he hesitated for a few moments—"but I tell you what it is, I don't think I dare trust it a second time."

### Spiders on Telegraph Wires.

One of the chief hindrances to telegraphing in Japan is the grounding of the current by spider lines. The trees bordering the highways swarm with spiders, which spin their webs everywhere between the earth, wires, posts, insulators and trees. When the spider-webs are covered with heavy dews they become good conductors, and run the messages to the earth. The only way to remove the difficulty is by employing men to sweep the wires with brushes of bamboo; but, as the spiders are more numerous and persistent than the brush-users, the difficulty always remains a serious one.—*Scientific American.*

IT is related of Dr. Holmes that at a country charitable fair one day he was entreated to furnish a letter for the post-office. He seized a sheet of paper, and between its folds placed a $1 bank note. Turning to the first page he wrote the following:

Dear lady, whoever thou art,
Turn this poor page with trembling care;
It holds, oh hush thy beating heart,
The one thou lovest best is there.

In obedience to the poet's injunction, the page turned disclosed the attractive greenback of the value of one dollar, and, to prove the truth of this assertion, he made the following appeal on the opposite page from the bank deposit:

Kindly, lift thine eyes and tell
If this is not a truthful letter;
This is one thou lovest well,
And maybe (?) still a little better thee love it better.

TO GIVE an idea of the immensity of the spirit trade in the country it may be stated that the amount appropriated by Government for the maintaining of storekeepers and gangers alone is above $1,5 0,000, and the number of distilleries registered and operated above 3,000.

### Love-Making in a Beer Garden.

Making love in a beer garden is liable to be carried on under disadvantages and subject to interruptions more or less disagreeable. The other night a young man sitting with his sweetheart in a garden over the Rhine was endeavoring to pour a tale of love into her listening ear, which the shrill cries incident to the locality were continually interrupting. The courtship ran something after this fashion:

"Dearest Eliza, you know that your image alone holds a place within my heart. I thrill only to the soft tone of your sweet voice; I am happy in no company but yours. In short, better than life do I love—"

"Zwi beer!"

"As I was saying, before yon caitiff beer-jerker passed this way with his discordant ejaculation, I am indissolubly yours. The stars are never bright unless you are by my side, yet your eyes do ever shame their brightness. I see no beauty in the flowers until your presence blesses me, and then your beauty make them hide their heads with envy. For one kiss from those sweet lips I would—"

"Ein cigar! ein mineral!"

"(Confound that boy!) Dost love me, dearest, as I love you? Wouldst join your fate to mine? Could you consent to go hand in hand with me through life, banqueting on love and feasting on—"

"Pretzels for two!"

"(Oh, hang your pretzels!) What would life be without thee? It would be as a barren desert without one oasis—a long dismal night uncheered by one single star; cast adrift upon the wide and lonely ocean, with no friendly sail in view from day to day, and all the while the fierce hunger in my heart crying—"

"Boleena woost!"

"Fire and blazes! Lize, let's get out o' this."

They got.—*Cincinnati Saturday Night.*

### Prohibition in Kansas.

"All aboard!" yelled the conductor, but his seven passengers who had alighted to stretch their legs on the platform did not stir. Some depot hanger-on had told them that this station was the last before crossing the Kansas border, and it seemed as if some common impulse or affection held them all spell-bound. "All aboard!" the conductor cried again and the train started. The seven passengers made a spasmodic attempt to reach it, but the attempt was too spiritless. Only two of them found footing on the hind steps of the sleeper. These were Kansas City drummers, and they came on into the day car looking very dejected.

"It is a dry time," said the fat passenger.

"I pause to ruminate," said the man in the linen coat, pensively chewing a bit of licorice root.

"The drama is decaying," said the sad passenger.

"Don't w(h)ine," said the woman who talks bass.

"I'll sit beside her," volunteered the boy who sells peanuts.

"We have crossed over into the land of milk and honey," said one of the drummers, feebly endeavoring to keep up with the procession.

"Now you're screamin'," remarked his companion.

"Loggerheads," observed the man on the wood-box, as the train halted at a tank, "the engine is going to be gin-and-water."—*Burdette.*

### What Causes the Blood to Circulate.

To what degree the heart is aided by other forces is yet a matter of investigation. Probably there are several forces assisting. The elasticity of the arteries increases their carrying capacity. They are firm, elastic tubes, which expand under the pressure from each heart-contraction, and then by their own elasticity contract and help the onward flow of the blood. In the smaller arteries the flow loses the intermittent character it possesses in the larger arteries, and becomes a steady stream. The elasticity of the arteries serves precisely the same purpose as the air chamber of any force-pump, that of equalizing the flow, and so increasing the amount delivered. The whole force is derived from the heart; the arteries cause the force to act continuously.

The veins are lax tubes somewhat larger than the arteries, and capable of holding all the blood of the body. They convey the same amount of blood as the latter, but more slowly. In the large veins, however, near the auricles, the velocity may be 200 millimetres per second. They are provided with valves which effectually prevent the blood from flowing backward toward the heart. Any compression, produced by muscular contraction or otherwise, will therefore assist the forward flow of venous blood. This is one explanation why exercise hastens the circulation. The movement of the chest in breathing probably aids the pulmonary circulation, the blood, as well as the atmosphere, tending to fill the vacuum during inspiration.

Physical capillary force is not generally regarded as an active force in the circulation. But there is an admitted force in the capillaries, resulting from the attraction of the tissues for the arterial blood, containing the required oxygen and nutriment. "The vital condition of the tissue becomes a factor in the maintenance of the circulation." It is this force, primarily, which adapts the amount of blood to the varying needs of any organ; the nervous system regulates the supply by varying the caliber of the vessels.

The force in the capillaries, or some other force, carries the blood after death, from the arteries, where the heart leaves it, into the veins. Finding the arteries empty after death gave rise to the idea that they conveyed air; whence the name. It was this belief which Harvey overthrew in 1620.—*Popular Science Monthly.*

### That Little Hatchet.

"Come heah, George Washington, on black ape," exclaimed Rev. Aminilab Bledsoe, of the Austin Blue Light Colored Tabernacle, to a Sunday-school scholar who had just removed a big wad of something or other from his mouth. The boy's trembling limbs carried him into the immediate presence of the irate shepherd.

"Yer was chewin' terbacker in de house ob de Lawd."

"I owns right up, parson. I was chawin' terbacker, but I won't do so no moah."

"George Washington, chawin' terbacker am bad enough, Lawd knows; but when yer has got so shameless yer won't eben try ter lie out ob it, hit am time ter take yer in hand, so you won't grow up and disgrace de fodder of his country. Lean ober dat knee, George." And for about ten minutes people living several blocks off imagined their neighbors were preparing tough beefsteak for dinner with an ax.

QUARRELS would be short-lived if the wrong were only on one side.

WATER JACKET SMELTING FURNACES

—FOR—

Galena-Silver and Copper Ores

THE PACIFIC WATER JACKET SMELTERS embrace many features that are entirely new and of great practical utility, which are covered by letters patent.

No other furnaces can compare with these for durability, and in capacity for uninterrupted work.

MORE THAN SIXTY

Of them are now running on the Pacific Coast, giving results never before obtained as regards continuous running, economy of fuel, grade and quality of bullion produced. We are prepared to demonstrate by facts the claims here made. These Smelters are shipped in a complete state, requiring no brick or stone work, except that for the crucible, thus saving great expense and loss of time in construction.

Complete smelting plants made to order of any capacity, and with all the improvements that experience has suggested as valuable in this class of machinery. Skilled and experienced smelter-men furnished when desired to examine mines and to superintend construction and running of furnaces. Estimates given on application.

### Application No. 200, for a Patent to the Baxter Mining Claim.

UNITED STATES LAND OFFICE, TUCSON, Arizona, May 5, 1882. Notice is hereby given that Philip Corbin, by his agent, Samuel A. Moore, whose post-office address is Tombstone, Cochise county, Arizona, has this day filed his application for a patent for eleven hundred and twenty-five linear feet of the Baxter mine or vein, bearing silver, gold and other minerals, with surface ground about four hundred feet average width, situated in the Warren Mining District, County of Cochise and Territory of Arizona and designated by the field notes and official plat on file in this office as lot No. 52, said lot No. 52 being as follows to wit:

Beginning at a post 5 feet long, 4 inches square, in a monument of stones, marked G. M. Baxter, M. C. No. 1, from which United States mineral monument No. 1 bears north 27° 23' east 614.6 feet distant; thence run north 80° 39', east parallel with the south end of claim, 45 feet, intersect the east end line of the Atlanta mining claim, lot No. 49, at a point nor h 8° 36'; west 2.5 feet from a 4x4 inch post, marked A. M. C. No. 4, at 158 feet intersect northeast side line of claim at a point south 32° 0', east 325 feet from the north corner of claim, to a post 4 inches square, 5 feet long, in a monument of stone, marked Baxter M. C. No. 2, thence run south 32° 0', east along the northeast side line of claim eleven hundred and seventy-four feet to a stone, the southeast corner, to a 4x4 inch post, 4 feet long, in a monument of stones, marked Baxter M. C. No. 3; run thence south 80° 39', west along south line of claim 299 feet, to a south end center of the Baxter claim and north end center of Hayes claim, to a post 4x4 inches, 4 feet long, in monument of stones, marked Baxter M. C. No. 4, from which a shaft 4x6 feet, 10 feet deep bears north 25° 37' west 249 feet distant, a shaft 4x6 feet 10 feet deep, on the same line 10 feet distant, at 572 feet to the southwest corner, a post 4 inches square, 4 feet long, in monument of stones, marked Baxter M. C. No. 5; thence north 14° 31', west along southwest side line of said claim 785 feet, intersect south side line of Atlanta mining claim, lot No. 49, at a point south 81° 58', west and 73 feet distant from a post marked A. M. C. No. 5, at 788 feet to a post 4 inches square, 4 feet long, in a monument of stone 3 feet high, marked Baxter M. C. No. 6; thence run north 3° 03', west 300 feet to place of beginning, post S. M. Baxter M. C. No. 1. Containing 9.60 acres, less the conflict with the Atlanta M. C. of 1.40 acres, amount claimed 9.20 acres.

Magnetic variation 11° 21' east.

The location of this mine is recorded in the Recorder's office of Cochise County, A. T., in book 6, page 657 of mines. Transcribed records of Cochise County. Any and all persons claiming adversely any portion of said Baxter mining claim or surface ground, are required to file their adverse claim with the Register of the United States Land Office at Tucson, A. T., during the sixty days period of publication hereof, or they will be barred by virtue of the provisions of the statute in such case made and provided.

HENRY COUSINS, Register.

J. H. LUCAS, Tombstone, A. T., attorney for applicant.

It is hereby ordered that the foregoing notice of application for patent be published for the period of sixty days (ten consecutive weeks), in the Epitaph, a weekly newspaper printed in Tombstone, A. T., which paper is hereby designated by me as published nearest such claim.

HENRY COUSINS, Register.

### An Extraordinary Offer.

There are a number of persons out of employment in every county, yet energetic men willing to work do not need to be. Those willing to work can make from $10 to $60 a month clear, working for us in a pleasant and permanent business. The amount our agents make varies—some making as high as $300 a month while others as low as $100, all depending on the energy of the agent. We have an article of great merit. It should be sold to every house owner, and pays over 100 per cent profit. Each sale is from $2.50 to $10. One agent in Pennsylvania sold 32 in two days, and cleared $64. An agent in New York made $45 in one day. Any man with energy enough to work a full day, and will do this during the year, can make from $2,000 to $6,000 a year. We only want one man in each county, and to him we will give the exclusive sale as long as he continues to work faithfully for us. There is no competition, and nothing like our invention made. Parties having from $240 to $1,000 to invest can obtain a general agency for ten counties in a State. Any one can make an investment of from $25 to $1,00 with no the least risk of loss, as our circulars will show that those investing $25 can after a 30 days' trial return the goods unsold to us and get the money back, if they do not clear at least $100. They show that a general agent who will take ten counties and invest $216 can after a trial of 30 days turn all goods on hand out, and have money returned to them if they fail to clear at least $750 in that time. We are not paying salaries, but want men willing to work and obtain as their pay the profits of their energy. Men not willing to work on our terms will not work on any. Those meaning business will receive our large descriptive circular and extraordinary offer by enclosing a three-cent stamp with their address. The first to comply with our terms will secure the county or counties they may wish to work.

DR. SPINNEY,

NO. 11 KEARNY STREET,

Treats all Chronic and Special Diseases

YOUNG MEN

WHO MEN WHO MAY BE SUFFERING from the effects of youthful follies or indiscretion would do well to avail themselves of the greatest boon ever laid on the altar of suffering humanity. Dr SPINNEY will guarantee to forfeit $500 for every case of Seminal Weakness or private disease of any kind or character which he undertakes and fails to cure.

MIDDLE-AGED MEN.

There are many at the age of thirty to sixty who are troubled with too frequent evacuations of the bladder, often accompanied by a slight smarting or burning sensation and a weakening of the system in a manner the patient cannot account for. On examining the urinary deposits a ropy sediment will often be found, and sometimes small particles of albumen will appear, or the color will be of a thin milkish hue—again changing to dark and turbid appearances. These are many men who die of this difficulty, ignorant of the cause, which is the second stage of seminal weakness. Dr. S. will guarantee a perfect cure in all such cases, and a healthy restoration of the genito urinary organs.

Office Hours—10 to 4 and 6 to 8. Sundays from 10 to 11 a. m. Consultation free. Thorough examination and advice, $5.

### Application. No. 214 for a Patent to the Holbrook Mining Claim

U. S. LAND OFFICE,
TUCSON, Arizona, June 1, 1882.

NOTICE IS HEREBY GIVEN THAT Alphonse Lazard and Horace Jones, by Messrs. Morgan & Stephens, attorneys, whose post-office address is Tucson, Arizona, have this day filed their application for a patent for 1498 linear feet of the Holbrook mine or vein, bearing copper and other minerals, together with surface ground, about 549 feet in width, situated in Warren Mining District, County of Cochise, Arizona, and designated by the field notes and official plat on file in this office as Lot No. 53; said Lot No. 53 being as follows, to wit: Beginning on the center monument of the western end of the claim at a pine post 4x4 inches square, 4 feet long, painted white, in a monument of rocks, marked H. W. C., U. S. S., from which discovery shaft 4x6 feet, 11 feet deep, bears S 75° E 315 feet distant; second, a black oak 16 inches in diameter bears N 77° W 8 (74-10 feet distant, marked B. T. H. W. C.; from post H. W. C. run S 25° 35' W 163 5-10 feet to intersect the eastern side line of the Baxter mining claim, Lot No. 52 running N 31° 50' W, and joining two posts, one marked B. M. C. No. 5, and NE corner of Hayes M. C., and is distant from point of intersection (at 163 5-10) S 31° 50' E 588 feet; thence on same course 25° 35' at 255 5-10 feet to post 4x4 inches square, 4 feet long, marked H. S. W. U. S. S.; thence S 77° 20' E 196 7-10 feet; again intersect the above described boundary line of the Baxter M. C. at 1498 feet to SE corner post of claim 4x4 inches square, 4 feet long painted white and marked H. S. E. U. S. S.; thence N 25° 35' E 224 4-10 feet to each end center monument of Holbrook claim, a pine post 4x4 inches square, 4 feet long, painted white, marked H. E. C.; thence continue on same course at 224 4-10 feet from E end center to NE corner of claim, to a pine post 4x4 inches square, 4 feet long, marked H. N. E. U. S. S.; thence N 75° 10' W 1,496 feet to NW corner post 4x4 inches square 4 feet long, painted white, marked H. N. W. U. S. S. from which U. S. mineral monument No. 1 bears N 32° 25' W. 700 2-10 feet distant; thence S 25° 35' W, 296 3-10 feet to the point of beginning. Variation, 12° 35' East, containing 17.83 acres. The triangle cut off by the Baxter claim is 10 100, which is not claimed, leaving 17 74 100 acres. This mine is situated about half a mile east of the Bisbee Smelting works. The location notice is recorded in the Recorder's office for Cochise county, A. T., Book of Mines, page 59 of mines, Transcribed Records, Cochise county, A. T. Any and all persons claiming adversely any portion of said mine, or the surface ground, are required to file their adverse claim with the Register of the U. S. Land Office, at Tucson, A. T., during the sixty days period of publication, or they will be barred by virtue of the provisions of the statute.

HENRY COUSINS, Register.

SELNT, MORGAN & STEVENS, Attorneys for Applicant.

It is hereby ordered that the foregoing notice be published sixty days (ten consecutive weeks) in the Epitaph, a weekly newspaper published at Tombstone, A. T., which paper is by me hereby designated as published nearest such claim.

### Application No. 199, for a Patent to the Wade Hampton Mining Claim.

UNITED STATES LAND OFFICE, TUCSON, Arizona, May 3rd, 1882. Notice is hereby given that Philip Corbin, by Samuel A. Moore, agent, has made application for patent to 1374 linear feet of the Wade Hampton lode or deposit, bearing precious metals, together with surface ground 600 feet in width, situated in the Warren Mining District, Cochise County, Arizona, more particularly described in the field notes and plat of the official survey, on file in this office, designated as lot No. 50, as follows, to wit:

Beginning at the initial monument near the center of claim, on the east side of discovery shaft, at a post 4 inches square, 4 feet long, 2x4 inches square, in mound of stones marked "I. M. W. H. M. C. No. 1," from which United States mineral monument No. 5 bears north 72° 35' east 47 feet distant; thence north 22° 52', west 51 feet, to shaft 4x6 feet 3 feet deep, and 674 feet to a 4x4 inch post near the center of north end line, marked "(S. C.) W. H. M. C. No. 2;" thence north 66° 29' east 300 feet to northeast corner post, 4x6 inches square, in mound of stones marked "(N. E.) W. H. M. C. No. 3; thence south 22° 52', east 1,374 feet, to southeast corner post 4x4 inches square, in mound of stones, marked "(S. E.) W. H. M. C. No. 4; thence south 66° 29', west 300 feet to south end center post, marked "(S. C.) W. H. M. C. No. 5," and 600 feet to southwest corner post, 4x4 inches square, in mound of stones marked "(S. W.) W. H. M. C. No. 6;" thence north 22° 52' west 1374 feet, to northwest corner post 4x4 inches square in mound of stones, marked "(N. W.) W. H. M. C. No. 7;" thence north 66° 29' 300 feet to post No. 1 and place of beginning the survey of the exterior boundary of the claim. Variation 11° 22' east; containing 18.91 acres.

Said claim is duly recorded in the office of the Recorder of Cochise county, Arizona.

Any and all persons claiming adversely the whole or any portion of the Wade Hampton mining claim are required to file their adverse claims in the United States Land Office at Tucson, during the sixty days period of publication hereof, or they will be barred by the provisions of the statute.

SAMPLE BOTTLE FREE

Will be sent to any one applying by letter, stating symptoms, sex and age. Strict secrecy in regard to all business transactions. m13

### Notice.

TO J. D. KINNEAR—YOU ARE HEREBY notified that we have expended one hundred dollars in labor and improvements upon the Mozart mine, of gold bearing ore, situate in the Dos Cabezas Mining District, about two miles north east of Ewell Springs, in order to hold said premises under the provisions of sections 2324 and 2325 of the Revised statutes of the United States, and the act of Congress, approved January 22d, 1880, mendatory thereof; said sum being the amount required to hold the said mine for the year ending 1880. Now, if within ninety days from the publication of this notice, you fail or refuse to contribute your proportion of such expenditure as a co-owner, your interest in said claim will become the property of the subscribers under the sections of the revised statutes aforementioned.

JOHN McGREGOR,
WILLIAM FOWLER.

Dos Cabezas, Cochise County, A. T.

### Assessment Notice.

TO JAMES LOWRIE, W. P. CONLIN AND E. S. ROSS, their heirs or assigns. You are hereby notified that the undersigned has expended the full sum of one hundred dollars ($100) upon the Chamberlin mine, being the assessment work required by law, for the purpose of holding said premises for the year ending December 31, 1881. Now, unless you or each of you come forward and pay to me the sum of twenty-five dollars, being the proportion of each as equal co-owners, within ninety days from the first publication of this notice, your interest or the interest of the one refusing will be forfeited to me according to law. Said mine is situated in the Tevis Mining district, on the North slope of the Dos Cabezas range of mountains.

WM. L. MARTIN.

Dated July 9th, 1882. jy15 3m
