Alcohol, gals	22,500	Grease, lb	444,000
Oilmeal, lb	207,325	Butter, lb	60,600
Oil cake, lb	203,800	Cheese, lb	400,900
Rosin, bbls	380		

COUNTRY PRODUCE MARKETS.

For week ending Tuesday, September 22, 1896.

BEANS AND PEAS—Receipts for the week, 4,339 bbls., pkgs., 1,842 bbls. Exports: Beans, 1,705 bbls., peas, 2,004 bbls. Trade throughout the week has been generally quiet, but supplies have not come forward excessively, and a fairly steady range of values has been maintained. Jobbing trade does not show much signs of improvement as yet, and the export trade, especially with Havana, has been interfered with to some extent by the unsettled financial conditions which prevail in that part of Cuba. The general trade quotation for choice marks of domestic marrow has been $1 90, and that figure will still buy choice qualities. Medium and pea have held at $1 10, though there has at times been some effort to get a little more money, especially for medium, which seem to hold rather the strongest position at the moment. A few lots of new pea are here, but the quality is not especially attractive, and it is doubtful if buyers will bring any more than the old goods. Red kidney beans have had a little call from shippers, but there is practically no stock available. Turtle soup rather dull. Yellow are firm, but in small supply. Exporters are doing some business and the kidney at the close on the basis of $1 25 for choice. The feeling is steady. California limas have further declined. It looks as if $3 55 would be accepted for some rounds lots of that stock. Nothing in the new beans have arrived. Most of the old foreign beans have been cleaned up; European exporters have paid as high as 90c. for stock in bond. Green peas have improved a little and close firm. We quote: Beans, domestic marrow, per bush, $1 90@2 00; medium and pea, $1 10; do white kidney, $1 90; do red kidney, $1 25; do turtle soup, $1 45@$1 50; do yellow eye, $1 25; do lima, California, $3 55@$3 60; green peas, 1896, $1 20; do lima, California, $3 55@$3 60; green peas, 1896, bags, per bush, 72½@75c.; do Scotch, 90c.

BUTTER—Receipts for the week, 45,227 pkgs. Exports, about 8000 pkgs. The market changed heavily for several days following our last weekly report, and under accumulating stocks and quite strong pressure to sell prices declined fully ½c per lb. By Saturday the lowest marks of fresh creamery were offered freely at 17c. and still there were very few buyers who could be interested at that price. Other grades suffered equally as much, but a change came in the position here on Monday. Buyers became convinced that the market was on bottom, and they began to show that the market was on bottom, and they began to show that the market was on bottom, and they began to show that the market was followed by quite active trading to-day, and the feeling changed from weakness to one of firmness. Not that a higher price was entertained, but there was more willingness to operate and the activity promises to materially reduce the accumulations before the close of this week. Extra marks of creamery are still selling at 18c. but it is a very easy to sell at that. Demand still runs almost entirely on the finest grade, and there is a burdensome accumulation of average firsts downward, and quotations for these are largely nominal. State dairy butter has very moderate demand from all source, and the limited supply, which remains at all, has to be forced out at almost any figures buyers choose to give. Some inquiries are here regarding firkins, but buyers do not seem to want them, and it would be difficult to say at what figure they could be moved. Imitation creamery has fallen in sympathy with the general decline, and there is a lower market for all grades of factory, fresh fine and summer made. Exporters are buying a little more attention at the close, with fair sales of held and fresh creameries at 14@15c. and factory at 8@10c. not much, however, above 9c. We quote: Creamery, extras, per lb, 15c.; do firsts, 13@14c.; do thirds to seconds, 10@12½c.; State dairy, half-firkin tubs, extras, 14c.; do firsts, 12@13c.; do seconds, 9@11c.; imitation creamery, 9@14c.; do thirds to firsts, 9@12c.; Western dairy, 7½@11c.; firsts, 11c.; do seconds, 9@10c.; do summer make, creamery, June extras, 10@10½c.; do current make, firsts, 9@9½c.; do thirds to seconds, 7@8½c.

CHEESE—Receipts for the week, 31,497 boxes; exports, 12,864 boxes. The general movement in large full cream cheese has been somewhat disappointing the last week. Conditions have continued favorable for a good trade in the country, and few buyers have shown any disposition to give away the prices, but demand has been hardly sufficient to clean up all the arrivals, and some lots have accumulated. During the latter half of last week the quality of the cheese in many lots showed effects of the warm weather of the week previous while the cheese were being boxed. The market opened this week with a quiet feeling, but holders generally steady in their views on the basis of 9½c. for fancy, and while stock was freely offered at that it attracted very little attention. Today, Tuesday, there was scarcely any movement and hardly enough business done to fairly test the situation. Fancy colored are held with apparent confidence and no disposition shown to shade 9½c., though none are asked any more. Fancy white cheese is in moderate proportion and is generally held at same price as colored, but the tone is not quite so firm as on the latter, and occasional lots slight inducements have been offered in the hope of attracting attention. Small size full cream only moderately active, but the feeling firm, in view of prospective tighter supply, though there has at times been some effort to get a little more money, especially for medium, which seem to hold rather the strongest position at the moment. A few lots of new pea are here, but the quality is not especially attractive, and it is doubtful if buyers will bring any more than the old goods. Skims have shown little change, but there is practically no stock available. Turtle soup rather dull. Yellow are firm, but in small supply. Exporters are doing some business and the kidney at the close on the basis of $1 25@$1 30. The general feeling is steady. California limas have further declined. It looks as if $3 55 would be accepted for some rounds lots of that stock. Nothing in the new beans have arrived. Most of the old foreign beans have been cleaned up; European exporters have paid as high as 90c. for stock in bond. Green peas have improved a little and close firm.
