he Most Wonderful Med cal Di-
covery of the Ag—Every Man
his own Phys'cian.

Frazier's Great Remedy

The people of the United States have been humbugged with all kinds of Patent Medicines, quacks and impostors, for the past few years, in a most shameful manner. The writer of the following is one of the victims, and wishes to present a very plain case.

Believing that by cleansing the blood was the only true way of banishing disease, and being a great sufferer from weak lungs and a scrofulous affection, and after trying many kinds of Patent Medicines and the most eminent Physicians, I commenced doctoring my self, and at last discovered a Blood Searcher, or Root Bitters, which not only gave me immediate relief, but after a few weeks effected a radical cure. The cough left me, my lungs became strong and sound, my appetite good, and the scrofulous disease had disappeared. Feeling confident that my Discovery possessed wonderful healing virtues, I gave it to others afflicted, and found it effected the most miraculous cures in thousands of cases, not alone curing Cough, Consumption, Asthma, Catarrh, Scrofula and Weak Lungs, but all diseases caused from humors in the blood. The demand from my friends and others bearing about these Bitters becoming very great, I commenced putting them up for sale, calling them FRAZIER'S ROOT BITTERS, and was astonished to find, in presenting either myself or medicine to the public—not being a Patent Medicine Man, but I am getting bravely over that, I have sold thousands of bottles of my Root Bitters, and it is my desire and determination to place the same within the reach of every suffering man, woman and child on the face of the civilized globe.

The grand principle that operates in these Root Bitters is the power they possess in cleansing the turgid blood and banishing the vile humors from the system. Root Bitters are strictly a Medicinal Preparation, compounded from roots combined with herbs and plants, many of which were used in the good old days of our forefathers, when people were cured by some simple root or herb, and when Calomel and other pois ns of the mineral kingdom were unknown.

They open all the natural passages of the body, cast out disease, take away all sickness and build up the system with pure blood, hence they must reach all diseases by purification and nourishment.

No person can take Root Bitters and remain long unwell. Victory upon victory they have gained over disease and death in all stations and conditions in life. They are constantly effecting cures of the utmost importance. For Consumption, Asthma, Scrofula, Scrofulous Eruptions, Catarrh, Weak Lungs, Lost Vitality and Broken-down Constitutions, these Root Bitters are universally admitted to be the most wonderful Medical Discovery known to the world. Their pectoral healing properties penetrate every portion of the human frame, soothing the Lungs, strengthening the Stomach, Kidneys and Liver, cleansing the blood from every kind of humor. No other medicine will cure Chronic Rheumatism, Neuralgia, Heart Disease, Fits, Dizziness, Headache, Dyspepsia, Fever and Ague, Costiveness, Piles, Urinary Diseases, Kidney Disease, and Liver Complaint, so quickly as this Root Bitters. All such diseases are caused from a bad stomach and a poisonous condition of the blood. For weakly, nervous young men, suffering from loss of memory, loss of energy, etc., caused from abuses in early life, and to delicate females, these strengthening Root Bitters are especially recommended. One bottle will do more toward eradicating Syphilis, Scurvy, Tetter, Fever Sores, Sore Eyes, Tumors, Cancerous formations, Dropsy, Erysipelas, Salt Rheum, Ulcers, Boils, Flesh Worms, Blotches, Pustules, Eruptions, pimples on the face, and Corruptions from the Blood than all other remedies in existence.

G. W. FRAZIER,
CLEVELAND, OHIO.

Frazier's Root Bitters are sold by all the leading Druggists, Storekeepers and Chemists. Sold Wholesale by Strong & Cobb, 193 Superior street, and Benton Myers & Cantield, 127 Water street, Cleveland, O.; B. S. Fahnestock & Co., Pittsburg; George C. Goodwin & Co., Boston; John F. Henry Curran & Co., United States Medicine House, 8 and 9 College Place, New York; Wyth Brothers, Philadelphia; Fuller & Fuller, Chicago; John L. Park, Cincinnati, and other first-class Drug Houses.

Show this notice to your druggist or storekeeper. Ask for FRAZIER'S ROOT BITTERS, and accept no substitute whatever. Price within the reach of all—$1 per bottle; six bottles, $5. jy13d&w1y

IMPORTANT
TO
Commercial Travelers.

COMMERCIAL TRAVELERS who solicit orders by OATH, CATALOGUE, TRADE-LIST, SAMPLE, OR OTHER SPECIMEN, also those who visit their customers and solicit trade by purchases made DIRECT FROM STOCK, and those who travel in any section, by Rail or Boat, selling any class of goods, are requested to send their BUSINESS and PRIVATE ADDRESS, as below, stating class of goods they sell, and by whom employed, also those who are at present under no engagement. This matter is of GREAT IMPORTANCE INDIVIDUALLY to ALL members of this class, or men soliciting trade in the summer. It is therefore ESPECIALLY desired that this notice may meet the eye of ALL Commercial Travelers and Salesmen in this country and that they will AT ONCE give it their attention. Those who comply with above request will be CONFIDENTIALLY treated and duly advised of object in view. Please address, (by letter only),

APPLETON'S
American CYCLOPAÆDIA
New Revised Edition.

Entirely rewritten by the ablest writers on every subject. Printed from new type, and illustrated with Several Thousand Engravings and Maps.

THE work originally published under the title of THE NEW AMERICAN CYCLOPÆDIA was completed in 1863, since which time the wide circulation which it has attained in all parts of the United States, and the signal developments which have taken place in every branch of science, literature, and art, have induced the editors and publishers to submit to an exact and thorough revision, and to issue a new edition entitled, THE AMERICAN CYCLOPÆDIA.

Within the last ten years the progress of discovery in every department of knowledge has made a new work of reference an imperative want.

The movement of political affairs has kept pace with the discoveries of science, and their fruitful application to the industrial and useful arts and the convenience and refinement of social life. Great wars and consequent revolutions have occurred, involving national changes of peculiar moment. The civil war of our own country, which was at its height when the last volume of the old work appeared, has happily been ended, and a new course of commercial and industrial activity has been commenced.

Large accessions to our geographical knowledge have been made by the indefatigable explorers of Africa.

The great political revolutions of the last decade, with the natural result of the lapse of time, have brought into public view a multitude of new men, whose names are in every one's mouth, and of whose lives every one is curious to know the particulars. Great battles have been fought and important sieges maintained, of which the details are as yet preserved only in the newspapers or in the transient publications of the day, but which ought now to take their place in permanent and authentic history.

In preparing the present edition for the press, it has accordingly been the aim of the editors to bring down the information to the latest possible date, and to furnish an accurate account of the most recent discoveries in science, of every fresh production in literature, and of the newest invention in the practical arts, as well as to give a succinct and original record of the progress of political and historical events.

The work has been begun after long and careful preliminary labor, and with the most ample resources for carrying it on to a successful termination.

None of the original stereotype plates have been used, but every page has been printed on new type, forming in fact a new Cyclopædia, with the same plan and compass as its predecessor, but with a far greater pecuniary expenditure, and with such improvements in its composition as have been suggested by longer experience and enlarged knowledge.

The illustrations which are introduced for the first time into the present edition have been added not for the sake of pictorial effect, but to give greater lucidity and force to the explanations in the text. They embrace all branches of science and natural history, and depict the most famous and remarkable features of scenery, architecture, and art, as well as the various processes of mechanics and manufactures. Although intended for instruction rather than embellishment, no pains have been spared to insure the artistic excellence: the cost of their execution is enormous, and it is believed they will find a welcome reception as an admirable feature of the Cyclopædia, and worthy its high character.

The work is sold to Subscribers only, payable on delivery of each volume. It will be completed in sixteen large octavo volumes, each containing about 800 pages, fully illustrated, with several thousand Wood Engravings and with numerous colored Lithographic Maps.

PRICE AND STYLE OF BINDING.

In extra Cloth, per vol.	$5.00
In Library Leather, per vol.	6.00
In Half Turkey Morocco, per vol.	7.00
In Half Russia, extra gilt, per vol.	8.00
In full Morocco, antique, gilt edges, per vol.	10.00
In full russia, per vol.	10.00

Three volumes now ready. Succeeding volumes, until completion, will be issued once in two months.

*** Specimen pages of the AMERICAN CYCLOPÆDIA, showing type, illustrations, etc., will be sent gratis, on application.

BRASHEAR'S BROKEN LEG.

Full and Exact Particulars of that Remarkable Accident.

[From the Courier-Journal.]

It was Asa Brashear himself who told the story. Asa as everybody in Louisville knows, is not unacquainted with cards. It is possible that he is better acquainted with the Queen of Clubs than he is with the Queen of Sheba. It is probable that the blue and gold of the King of Diamonds is a more familiar custom to him than the picture of Solomon arrayed in all his glory. In point of fact, it is highly probable that Asa is much better up in the history of Pharaoh than of all the Kings of Israel put together. It is also highly probable that Asa is fond of a social glass or two; at least we have his own words to that effect, and nobody dare to dispute what Asa Brashear says, and expect to come out of the fight with a sound head. But this is how he happened to tell the story: Asa is lame of one leg, and we asked him one day what was the matter with the defective limb.

"How did I happen to break my leg, did you say? Well, it was a curious thing. I'll tell you about it. You see I had been drinking pretty hard for a week or so, and thought I'd lay off and get over it. I live up in the third story, thirty feet or so from the ground, and my window comes almost down to the floor. It's mighty easy to fall out of that window, and there is a brick pavement down below which ain't as soft as a feather bed. So you see a fellow that'd fall down there would be mighty apt to hurt himself. I fell down there once; and I know how it is myself.

"It was nearly dark when I went to my room that evenin' and I thought I'd sleep awhile and see if the trouble in my head wouldn't stop. It was a whizzing sort of a feeling, and I didn't feel exactly right about what I saw. In fact the last drink I took that day there was a fly in it. At least I thought so, but Jimmy, who was behind the bar, looked sort of funny when I asked him to take it out. Howsoever, I soon fell asleep, and slept I don't know how long; but I woke up rather suddenly and heard a strange kind of noise outside the door. It was awful dark, and the noise on the steps sounded like a thousand men with felt slippers on, striking a thousand rattan canes on the steps, and all in military line. All at once music struck up, but it was faint-like, as if the band was ever so far away. I told you it was dark as pitch, but the door suddenly opened, and a blaze of light came in that blinded me so that I could'nt see any more than when the door was shut. When I got over the daze I looked down on the floor, and there was a long file of little soldiers, not one of 'em higher'n my finger, all a-marchin' into the room, headed by a band of music, and with the kurnel, who wasn't bigger'n any o' the rest of 'em, mounted on a horse correspondin'.

"Well, they marched into the room and formed in files in front of my bed, and I was looking at 'em all the time. When they had all got fixed in proper ranks, the chap on the horse got down, and then the band stopped playin'. After he touched the floor the kurnel commenced to grow, and before he ever stopped growin' he was eight feet tall. I kept a lookin' at him all the time, and he then got up on the bed and took a screw from his pocket and screwed it into the ceilin'. He then stepped down again, and caught one o' them little soldiers by the nape of the neck, and tied a big string around his neck, and stepped up on the bed; and I was lookin' at him all the time. Then he tied the other end of the string short up on the screw and let go of the little soldier. The poor little feller kicked around for a while and grew black in the face and then died, I s'pose; at least he didn't make any more fuss *that* night. When the Kurnel saw he was dead he got down again, and as soon as he touched the floor he began to grow smaller and smaller, until he was no bigger'n he was at first. Then he got on his horse and the band commenced to play, and he shouted 'Forward, march,' and the little soldiers commenced marchin' out of the room.

"Now there was one little soldier that seemed to be watchin' me all the time, and when the rest of 'em commenced marchin' out, he slipped back from one file to another and so on till he had got to the rear rank. When the last of the little soldiers but him had got out the door, this little chap he came runnin' back to the bed and says:

"'Asa, put down your leg.'

"Well, I put down my leg and the little cuss climbed straddle of my foot.

"'Now, Asa,' says he, 'pull your leg up in the bed.'

"I put my leg up on the bed again, and the little soldier ran up to the side of my pillow.

"'Asa,' says he, 'did you see the kurnel hang that little soldier?'

"'Yes,' says I, 'I wat a lookin' at him all the time.'

"'Well, Asa,' says he, 'he's a-comin' back to do the same thing to you in a minute.'

"'Good God,' says I, 'what must I do?'

"'Asa,' says he very solemnly, 'the only thing you can do is just to jump out o' that winder.'

"And I jumped. And that's how I happened to break my leg."

The writer then inquired of Asa what he supposed was the explanation of what he saw in the room.

"Well," said Asa, "after I was taken back to my room, and the doctor had set my leg, I told him all about it, and he laughed and said he supposed it was the jim-jams. And I 'spose it was the jim-jams."

Origin of the Fan.

Since the fan has come to be regarded as an almost indispensable adjunct to the feminine toilet, a history of its origin may not prove uninteresting to the sex who handle it so adroitly. The Chinese say that Kan-si, the beautiful daughter of one of the Mandarins, found the mask which Celestial etiquette requires to be worn in public by ladies very oppressive, as the evening was warm, but her ingenuity was equal to the occasion. She united her mask and moved it so rapidly back and forth before her face that it was impossible to distinguish her features, while her beauty was enhanced in the eyes of all the beholders by a tantalizing glimpses afforded by the coquettish maneuver. In a moment a thousand fair Celestials, appreciating her courage and coquetry, imitated her example, and a thousand masks were put in motion before a thousand pretty faces by a thousand pretty hands. The ingenious Chinese caught the idea, and by the next Feast of Lanterns fans were substituted for masks.

Tilton wants the public to believe there was something in Becher's nest-hiding.

A Singular Lake.

The *Scientific American* says: "Lake Titicaca is the most singular and interesting lake in the world. Situated on the crest of the Andes, it is the highest large body of fresh water, and as concurrent traditions point to it as the spot where Manco Capac, the first Inca, appeared and woke the aboriginal tribes from their long sleep of barbarism and ignorance, it is the historic centre of South America, and Humboldt calls it the earliest theater of American civilization. On an island within it are the imposing ruins of the temple of the sun, and around it are monuments which attest the skill and magnificence of the Incas. There are also as at Tiahuanaco and Silustani, the remains of burial towers and palaces, which antedate the crusades, and are therefore pre-incarial. Lake Titicaca is about the size of our Ontario, shallow on the west and north, deep toward the east and south. The eastern or Bolivian shore, being backed by the lofty range of Sorata, is very high and precipitous. The lake never freezes over, although the temperature of Puno is often eighteen degrees at sunrise. Two little steamers of 100 tons each do a trifling business. Steam is generated by llama dung, the only fuel of the country—for there are no trees within one hundred and fifty miles. The steamers actually cost their weight in silver, for their transportation (in pieces) from the coast costs as much as the original price. A steamboat company has just asked from Bolivia the exclusive privilege of navigating Titiaca and the Rio Desaguadero to Lago Pampa, with a guarantee of six per cent. cost on the capital, and a share of all new mines discovered. Professor Orton, the latest traveler in that region, calls attention to the fact that Lake Titicaca is not so high as is given in geographical works by about three hundred feet. Its true altitude is 12,493 feet, and in the dry season it is four feat less. This fact has been revealed by the consecutive levelings made in building the Arequipa railway just finished, which reaches from the Pacific to Lake Titicaca."

Rather Overpowering.

She got into the street car just before reaching the switch. She only weighed about two hundred and ten pounds, including a market basket. She hauled herself toward the front of the car and was moving rapidly when it switched off. It was a snap-the-whip movement. A frail looking lady sat just where this mass of avoirdupois was compelled to light. It didn't come down like a robin for crumbs. It was like a pile-driver looking for a job. The frail woman disappeared. She went out of sight forthwith. She was painfully submerged. She might have made a remark, but the general impression was that the noise issued from the cracking of the market basket, beneath the ponderous weight of the struggling woman. The two-hundred-and-ten pounder was hastily snatched away from the corner, and a search was immediately made for the frail little lady. She was there, but she resembled a summer pan-cake on its last legs.

THE COMING STRUGGLE.

The voters of our nation,
s ne'er was known before,
Are rising from Pacific's strand
To Atlantic's rocky shore.
Why is th s mighty change?
What can the meaning be?
The rising of the masses
From northern lake to southern sea.

The spirit of old seventy-six
From out our heroes' graves
Forbids a nation drenched in patriots' blood,
Should sink to thral of slaves.
The motto which our coins once bore,
Though obsolete long since,
Remains as ever true: not one cent for tribute,
But millions for defense.

Party ties and party laws
Are but as ropes of sand.
The right of man to be a man
Should govern Freedom's land,
Then shall our Flag nurse proudly float
O'er land as well as sea,
And nations yet unborn shall gladly greet
The emblem of the free.

In trade we'll try to deal,
As man should deal with man,
And while we seek to live ourselves,
We'll sell as cheap as any body can,
And if a hat you need,
Or friend you chance to meet,
Remember Bunce, the Hatter,
On Upper Douglas Street.

Money and Commerce.

Daily Review.

OFFICE OMAHA DAILY BEE, July 25, 1874.

Monetary affairs to-day are quite lively; deposits fair. The country banks and business men are drawing for funds to meet demand to move crops and help the farmer to pay extra kind of help at extra good prices for this, the busy season. Discounts are fair, good paper readily accommodated on short time at 12 per cent. Exchange in good supply and demand, ruling steady at old rates.

THE FIRST NATIONAL BANK quotes:

Land Grants (selling)	$815.00
Land Warrants, (160 acres buying)	176.00
Land Warrants (160 acres selling)	185.00
Agricultural College Scrip, (100 acres buying)	176.00
Do.—Selling	185.00

Exchange on New York, 1-5 of one per ct.

Groceries.—Notwithstanding the extremely warm weather trade is quite good. Sugars are quiet; coffee dull; prices nominal.

Dry Goods—Quiet and dull, but with fair prospect for a good trade in a few days.

Produce—Supply good. Trade fair. Prices lower and in favor of buyers.

Wines and Liquors—Trade good. We notice several heavy shipments for the west, and other points today.

Provisions—Trade in this line better to-day. Market steady, and prices somewhat firmer.

Hides and Leather—Market quiet and dull; figures remain steady at last quotations.

In conversation with merchants to-day, representing various lines, we are informed that the prospect for fall trade is very fair, and they are quite sanguine in regard to it.
