Pitch, bbls	10	Cheese, lb	29,460
Refined pet, gals	1,007,153		

COUNTRY PRODUCE MARKETS.

For week ending Tuesday, October 5, 1897.

BEANS AND PEAS—Receipts for week: Beans, 3,203 bbls; peas, 2,838 bbls. Exports for week: Beans, 5,094 bbls; peas, 407 bbls. With very light export demands and home trade unimproved, the market has weakened still further for nearly all varieties of domestic beans. Marrow have sold at $1 85, at which there has been a little business at the close. The choicest lots of medium are generally held at $1 20, but that figure could be shaded on some lots. Pea have dragged along at $1 15 until just at the close, when there were offers to sell 2½c less. Old red kidney have declined 10@15c, shippers paying $1 75 for choicest lots at the close; possibly 150 bbls of new red kidney have been taken by shippers. The quantity of new stock that has arrived has not been large, but the orders were light, exporters evidently anticipating a further decline in the near future. Shippers have wanted most all of the white kidney that they could find and prices held firm. Yellow eye slow and easier. A few jobbing sales of California lima are still reported at $1 55. For buyers for good-sized lots would have no difficulty in securing them at $1 50. Green peas have dragged heavily all the week, and though prices have not changed materially some weakness has been shown. We quote: Beans, marrow, choice, per bush, $1 35; do fair to good, $1 10@$1 30; do medium, choice, $1 17½@1 20; do good choice, $1 12½; do medium, fair to good, $1 10; do fair to good, $1 05; do red kidney, 1896, choice, $1 75; do fair to good, $1 50@$1 70; do yellow eye, $1 50@$1 55; do lima, California, $1 50@$1 55; do Lady Washington, $1 12½@$1 15; green peas, bbls, 80c; do bags, 72½@75c; do Scotch, bbls, 90c; do bags, 85c.

BUTTER—Receipts for the week, 32,951 pkgs; exports, 5,532 pkgs. Trade throughout the week has been quiet, so far as the fresh goods are concerned, receipts have run along on a very moderate scale, but so many buyers have been using storage goods that sellers have had all the fresh goods that they could find custom for. Prices have been well sustained, however, on fancy creamery, and there has not been much surplus of such. Extra lines are commanding 22c in a wholesale way, and from the tenor of advices from other points it does not seem as if that figure should be disturbed for some time to come. Breaking away from extras, there is an uncertain market; these goods come in competition with the storage stock, and the latter is given the preference by important operators; the result is that nearly all receivers have an accumulation of seconds and firsts, and while they are asking much the same prices as last week for current for the last week or two, they are more anxious to sell and would show some favors were buyers disposed to talk business on good-sized lots. Storage creamery has been drawn on freely—probably 13,000 or 14,000 pkgs have been withdrawn from the public warehouses. These goods show excellent quality, and the advance in prices has aided attraction to many; there are some fine seconds available, but there is not much doing in other grades. Arrivals of State dairy continue light, and while demand is not urgent stock cleaned up fairly well, though there is quite a wide range in values. A few fickin dairies are here, but they do not sell; holders ask 10@17c for the best. Western imitation creamery has not been in demand and is steady at 16@16c, but lower grades are dull and sorts of fresh factory are very slow. Exporters have been unsuccessful in drawing orders, and the home trade is light. We quote: Creamery, Western extras, per lb, 22c; do firsts, 19@21c; do thirds to seconds, 14@18c; do State extras, 21@22c; do thirds to firsts, 14@21c; do June make, extras, 19@20c; do seconds to firsts, 16@18c; State dairy, half-firkin, tubs, extras, 18@19c; do Welsh, tubs, fancy, 18@19c; dairy, tubs, firsts, 16@17c; do thirds to seconds, 12@15c; State dairy, tubs, etc, 12@17c; imitation creamery, fine, 15@16c; do seconds to firsts, 12@14c; factory, June, extras, 13c; do seconds to firsts, 11½@12½c; do fresh firsts, 12@12½c; do seconds, 11@11½c; do low grades, 9@10½c.

CHEESE—Receipts for the week, 43,588 boxes; exports, 14,584 boxes. The receipts of large full cream cheese have not been specially heavy the last week, but demand has continued very slow and supplies have been more than ample for all requirements, and there is still a fair accumulation on the platforms unsold at the close. Export demand has been limited to the operations of only two or three buyers, and while some business has been done during the week with home-trade buyers, that outlet has not been as important a factor as it was last week. Write occasional sales of exceptionally fancy quality have been made during the week at 9½c, that figure has not been on hand for such a quotation at any time, and built of the business has been done on the basis of 9c for average finest factories of both white and colored, and most holders have been only too willing to accept that figure. Small-size full cream have been in fair, though not active, demand from the home trade, but export demand not equal to supply and many receivers have quite an accumulation on hand. Holders generally, however, are firm and confident in their views on the basis of 9½c for strictly fancy quality, but that figure is all that can be depended upon, though we have heard of occasional sales a fraction higher. Part skims have been in somewhat sales a fraction higher. Part skims have been in somewhat larger supply, this week, more especially small sizes; demand has been slow and prices, while held about the same, have shown a weaker feeling. Export demand for large sizes has been quite moderate, while the prevalence of yellow fever in many Southern sections has materially curtailed the Southern demand for small sizes. Liverpool cable, 45s. We quote: Full cream, fancy, colored or white, fancy, 9c; do large, choice, 8⅝@8¾c; do fair to good, 7½@8½c; do common, 7½@8c; do colored, small, fancy, 9½; do white, small, fancy, 9½@9½c; do small, choice, 8⅝@9c; do common to good, 7½@8½c; State, light skims, small, choice, 7½@7¾c; do large, 6⅝@7c; State, part skims, small, choice, 5c; do common do large, 6½@6½c; do good to prime, 5@5½c; do common to fair, 4@4½c; State, full skims, 3@3½c.

EGGS—Receipts for the week, 60,791 cases. Receipts of Western eggs continue very liberal, but a large part of the best goods is being withdrawn from sale under shippers' orders, and the offerings are chiefly of medium and undergrades. The general trade is quiet. Average prime Western are offered at 16½c, but some fastidious dealers have bid 17c in order to secure some of the better goods and a moderate movement is reported at that price, although the quality demanded is generally held for more money. Lower grades are dragging heavily. Refrigerator eggs are moving slowly at unchanged prices. We quote: State and Pennsylvania, per dozen, 20@21c; State and Western, 18@18½c; Western, best, 16½@17c; do good to fair, case count, 9@12½c; do seconds, 6@10c; refrigerator, early packed, average off, 13½@14½c.

FRUITS—FRESH—Receipts of apples are moderate, but the demand is quiet, and the general tone of the market is slightly in buyers' favor; on strictly fancy grades of early table fruit prices are fairly well maintained, but undergrades of these and all hard late winter sorts are dragging and weak. Peaches are in lighter supply; medium and lower grades are dull and irregular; fancy fruit scarce and firm. Pears quiet and unchanged. Upriver Delaware and Niagara grapes are of irregular quality; fancy lots bring pretty good prices, but most of the offerings are of inferior quality and hard to sell; upriver black grapes about steady. Western New-York stock plenty, quiet and barely steady, with some decline in black varieties; a little more call for wine grapes and prices steady. Prunes in light supply and a shade firmer. Plums very dull and weak. Cranberries are meeting a fair demand, and prices rule firm on desirable grades; a few fancy dark Cape Cod cranberries are reaching $5 75 per bbl, but most sales are still at $5 50 and less. We quote: Apples, soft red or russet sorts, per bbl, $3@$4; do hard red varieties, $1 50@$2 25; soft green varieties, $2@$2 50; hard green varieties, $1 50@$2 25; poor to fair grades, $1@$1 50; peaches, Maryland, per carrier, 75c@$1 50; do Jersey, per basket, 20c@$1; upriver, per two-basket carrier, 40c@$1; pears, Bartlett, upriver, per bbl, $1 50@$3 50; do poor to fair, 50c@$2; Seckel, $2 50@$5; Bourre Bosc, $1 50@$2 50; Sheldon, $1 50@$3; other late varieties, $1@$1 75; quinces, per bbl, $1 50@$3; grapes, Delaware, per case, 50c@$1; per small basket, 6@9c; Niagara, per case, 50@65c; per small basket, 6@9c; Concord, per case, 35@50c; per small basket, 5@6c; wine grapes, in bulk, white varieties, per lb, 1½@1¾c; Delaware, 2@2½c; Concord, 1@1½c; prunes, per basket, 2@4½c; plums, 12@20c; cranberries, Cape Cod, per bbl, $4@$5 50; per crate, $1 50@$1 75.

FRUITS—DRIED—Evaporated apples have continued in light supply and very firm; new fruit is steadily in demand, and sales range low; a car of very nice Western gradings and sales range low; a car of very nice Western gradings and sales range low; a car of very nice Western gradings
