Boiled Milk.

Some very interesting experiments have lately been made in France by Dr. Chamouin in the line of boiling milk to free it from being a means of infection and contagion. There has been a great prejudice in this country against boiled milk for infant feeding, but the idea that the boiling process does away with the nourishing properties and digestibility is done away with by Dr. Chamouin's experiments. He fed a number of kittens on boiled milk and a number on fresh milk. Those fed on the boiled milk were twice as fat and healthy as those fed on fresh milk.

He further carried on experiments in Paris which assured him that the infant death rate could be made much less, were the thousands of infants hand fed, given boiled milk instead of fresh milk.

This series of experiments has been very interesting from the reason that boiled milk has been used, with unqualified success, in rearing my own babies, as fat and healthy a set as one could desire. The amount of milk used in a day was placed in a fire crock and boiled. The thick top or scum lifted off and the crock covered and put away safely, was all there was as to trouble. A tiny granite saucepan held just enough for a meal and that meal was slightly warmed, not heated hot, before putting it into the bottle.

Boiling milk is, indeed, a simple precaution against the bowel ailments of infants, so simple every mother should try it.—*Womankind.*

Fast Living.

The most remarkable instance of rapid growth is said to be recorded by the French academy in 1729. It was a boy six years of age, 5 feet 6 inches in height. At the age of five his voice changed, at six his beard had grown, and he appeared a man of thirty. He possessed great physical strength, and could easily lift to his shoulders and carry bags of grain weighing two hundred pounds. His decline was as rapid as his growth. At eight his hair and beard were gray; at ten he tottered in his walk, his teeth fell out, and his hands became palsied; at twelve he died with every outward sign of extreme old age.—*Times and Register.*

The Wastes of Siberia

Are not more barren of comfort than the waists of those who suffer from dyspepsia, from liver complaint or from kidney trouble. But in Hostetter's Stomach Bitters they can find relief. So can the malarious, the rheumatic, the neuralgic, the feeble and the old. Use with persistence this remedy with a career of over a third of a century. A wineglassful three times a day.

Let every man bring what he can and add it to the heap for the general good.

Dr. Kilmer's SWAMP-ROOT cures all Kidney and Bladder troubles. Pamphlet and Consultation free. Laboratory Binghamton, N. Y.

A virtuous effort is sometimes frozen with cold admiration and sullen neglect.

The management of the A. & W. P. R. R., always alive to the comfort and convenience of its patrons, will put on an extra sleeping car between Atlanta and New Orleans during the period of the Mardi-Gras festivities at the latter point. Diagrams are now ready at the office of Mr. Geo. W. Allen, T. P. A., No. 12 Kimball House, and those desiring to make this trip will do well to call on him some days in advance to secure sleeping car accommodations.

Hattie Well and Happy

Used to Suffer From Impure Blood and Eruptions

Hattie Dancer
Lawrence Station, N. J.

"Hood's Sarsaparilla cured my child of impure blood and eruptions on the head. She would scratch her head so that it would bleed. The sores spread behind her ears, and the poor child suffered terribly. I doctored her the best I knew how but the sores did not get any better. But thanks to Hood's Sarsaparilla and Hood's Olive Ointment, she is now well as any of the children. She is as large and healthy as any child five years old. This is all the medicine we take, for I do not think there is any better." GEORGE DANCER, Lawrence Station, N. J.

Hood's Sarsaparilla Cures

Hood's Pills Easy to buy, easy to take, easy in effect. 25c.

"SUPERIOR NUTRITION—THE LIFE!"

IMPERIAL GRANUM

THE GREAT MEDICINAL FOOD

Has justly acquired the reputation of being The Salvator for INVALIDS and The-Aged.

AN INCOMPARABLE ALIMENT for the GROWTH and PROTECTION of INFANTS and CHILDREN

A superior nutritive in continued Fevers And a reliable remedial agent in all gastric and enteric diseases; also in instances of consultation over patients whose digestive organs were reduced to such a low and sensitive condition that the IMPERIAL GRANUM was the only nourishment the stomach would tolerate when LIFE seemed depending on its retention;—and as a FOOD it would be difficult to conceive of anything more palatable.

Sold by DRUGGISTS. Shipping Depot, JOHN CARLE & SONS, New York.

FLORIDA BRIEFS.

ITEMS OF INTEREST GATHERED AT RANDOM.

News from All Parts of the State Summarized.

In a case of the state vs. the roadmaster of the J., T. & K. W. railroad, the judge of the criminal court at DeLand decided that the act of 1893, providing for putting up blackboards at depots on which to write the marks and brands of stock killed is unconstitutional.

The question of bonding Orange county is being agitated, and a pronounced opposition is being developed among the tax-payers, who say that the county is not able to afford bonds, and that the taxes which bonds would necessitate would bankrupt the people in the hard times coming.

Hotel Parker at Haines City, has been burned to the ground. All the inmates escaped uninjured. All the furniture was lost. There was no insurance. The general merchandise store of H. A. Parker & Co., was also destroyed, about half the goods were saved, however. There was no insurance.

Clermont is still honored with two claimants to the mayoralty, Mr. L. H. Todd being nominal, and Mr. C. H. Goodenough the acting mayor. Mr. Todd has not taken his case into court because it could not be settled in the courts before the term of mayoralty would have come to an end. He does not intend to prosecute his claims any further.

At the meeting of the State Bankers' association, held in Jacksonville, the following officers were elected: President, B. H. Barnett, of Jacksonville; first vice-president, F. C. Brent, of Pensacola; second vice-president, E. S. Crill, of Palatka; third vice-president, L. J. J. Nieuwenkamp, of Lakeland; secretary and treasurer, Thomas W. Conrad, of Jacksonville; executive committee, R. C. Cooley, T. P. Denham and Arthur F. Perry, of Jacksonville.

A few nights ago at Arcadia the three Low boys, who were in jail for cow stealing, escaped, and have not since been heard from. Officers have been searching the woods for them, but there is no trace as yet. This makes the second time the jail has been broken. The first was about eighteen months ago, when James North and Quinn Bass escaped. North was under sentence to be hanged for the murder of one S. A. Sauls, and Bass to life imprisonment for the murder of Hardy Johnson. Bass was killed while resisting arrest, and North is still at large and is said to have been seen several times by various persons in the county, but he still evades the officers in some way.

A Starke correspondent writes that the late blizzard has greatly depressed the spirits of farmers, especially the strawberry growers. The strawberry interest being so immense, the growers were calculating to begin shipping in earnest about the 15th of this month. The plants, with few exceptions, are looking exceedingly fine. The blizzard has killed all the bloom and berries that were not protected. Nearly every grower had from a quarter to an acre covered and these were protected from the fre e. The plants will soon bloom again and in the next thirty days it is hoped to ship from Starke 500 to 1,000 bushels per day, provided, however, another blizzard does not occur.

When the bank of Leesburg failed a few days ago it carried with it two of Leesburg's important business houses, the proprietors of which were stockholders in the bank. These houses were Dr. P. W. Butler's Diamond drug store and the Crescent drug store, owned by Messrs. Geo. E. & C. J. Lovell. These failures are directly traceable to the gold brick episode. It will be remembered that some time ago Ernest Yearger paid $6,000 for a brick which was represented to him to be gold, but when assayed proved to be of brass, and cheap brass at that. Yearger was largely interested in the the bank of Leesburg, and the loss of this $6,000 crippled the bank, and, in the end, brought about its suspension.

A big deal has been made with eastern and western capitalists to put Softene on the market throughout the country, and Ocala has been selected as a site for a plant to furnish the material for Florida, says the Ocala *News*. As a laundry preparation Softene is excellent; not injuring the most delicate fabric, and takes out all grease spots and ink stains with no injury to the clothing. For bathing and toilet purposes it has no equal, softening the hardest water and making it a luxury to bathe. J. H. Curry, whose reputation as a promoter is not confined to Florida, and Captain McDavid, assisted with the wherewith to place the article in the Ocala market. A company of large capital is soon to be incorporated to make Softene and put it on the market throughout the United States.

Senator Cameron, a few days ago, presented a communication in the United States Senate in regard to the bill repealing the law which requires the district judge to preside at Key West. It was in the form of a letter from a Philadelphia insurance company, stating that the removal of the judge from Key West would be of great disadvantage to shipping interests, as in admiralty cases it is extremely important to have prompt action. The cause of the desire for a repeal of this law, said the letter, lies in the fact that the district now includes Jacksonville, and that a repeal would lead to a transfer of the judgship to that city. To this the underwriters and shipping interest decidedly object for the reasons already named. The letter, of course, arrived too late to affect the situation in the senate. But it is quite probable that the same influences will be brought to bear in the house, and may defeat the bill there, unless some action is taken to controvert the statements made.

A Land-Mark Sold.

Tourists visiting St. Augustine during the past decade have often inquired why the "Old Waltham House" had gone out of existence as a winter resort, for it was a favorite with many old-timers, who were possibly ignorant of the fact that the old coquina building had sheltered wayfarers during the eighteenth, and, it is said, also the seventeenth century. It is claimed that this property was at one time the "St. Johns Inn," wherein many Spanish dons and senoritas reveled during the regime of Spain in the Ancient City. Mr. C. F. Sulzner secured the property recently and it has again been sold to C. T. Anderson, of Reading, Pa., who buys it as an investment at a cash consideration of $4,000. The purchaser is a manufacturer of jewelry, and it is hoped that he may reset this old land-mark and bring it out again in its old-time glory.

Christian Endeavors.

The seventh annual convention of the Florida Christian Endeavor Union met at Sanford and a large number of delegates and visitors were present from Florida and from many states of the Union. The executive committee of the Sanford local union met the delegates at the station and conducted them to their places of entertainment. Provision was made for the entertainment, free, of nearly 200 delegates. A number of services were held and much interesting business transacted. At the close of the convention two overflow meetings were held and large collections were taken for local expenses and missionary purposes. It did not look as if Florida had passed through a severe freeze to see plates full of silver and greenbacks. All present voted it the best Christian Endeavor convention ever held in Florida. The next annual convention will be held in DeLand, a year from now.

What is the Damage?

As time passes the damage from the last freeze becomes more evident. The peach crop is gone, and it was a considerable item. All the young and tender vegetables are killed, and it seems rather late to plant again. As to the damage to orange trees, the consensus of opinion appears to be that the trees are killed back to the ground or to the trunk at any rate. The trees were full of sap and all the leaf buds had shot out into little twigs. The trees had grown green, bloom buds had appeared, and in some cases the beautiful waxy blooms were throwing their fragrance out on the air. The freeze came down on the trees thus filled with sap and found them without any protection of leaves, as they had in the December freeze, which was like catching a man out in white duck trousers, summer shirt and straw hat in the same weather. It was more than the trees could stand. One man says he found ice between the bark and the wood of a ten-inch tree, and that tree must be dead to the stump.

Fruit Men All at Sea

There is a decided difference of opinion among the experts as to how much damage the last freeze did in Florida. One of them, inclined to take a rosy view, said:

"We will have green early vegetables from Florida land inside of a few weeks."

"You don't mean it?"

"I do, indeed. There was any quantity of seed in the ground when winter blew his breath across the state that is not hurt a particle."

"How about next year's crop of oranges?"

"No man in this or any other state can venture to say what that will be. We may have plenty of oranges and we may have none. The trees may be killed and they may not be killed. None can say."

A railroad man, who has just returned from a trip through South Florida, declares that, in his opinion, the trees are all killed.

"I may be mistaken," said the traveling man, "but I will tell you one thing—and it is something I never saw before. You know I have got an orange grove myself, and a good one, if I do say so; and the last time I was in it I saw the sap oozing from the smaller limbs and twigs. That is something unprecedented, you know. In 1886 it was the trunks of the trees that split and bled, and I believe that the splitting of the smaller limbs and terminal twigs is the worst sigd possible." And with that the railroad man pulled his big hat down over his eyes and melted away.

B. L. McLaurin, just arrived from a commercial trip through South Florida, reports that orange growers are not taking such a pessimistic view of affairs as is now generally supposed. After the last freeze "Mac" made it his especial business to talk personally with some of the largest orange growers and ascertain their views regarding the future prospects.

Mr. Littlefield, who owns a large grove near Sanford, was one of the first to express his opinion, and he says now that after the freeze of December, he would not have taken an offer within $3,000 for the price he had placed upon his grove in the early fall, and that since the freeze of last week he has increased his price. Mr. Littlefield claims that even one-fifth of a crop next year, under the present circumstances, will be more profitable to the grower producing this proportion than a full crop would have been had there been no freeze.

There seems to be a great deal stronger disposition since the last cold snap to look matters squarely in the face and grin and bear the result than was displayed in December. The general feeling throughout the state is that it takes a far greater calamity than both of these put together to discourage the Florida farmer.—*Times-Union.*

Cholera in Constantinople.

The health authorities of Constantinople report that between February 5th and 12th sixty-one cases of cholera occurred in that city and during the same period there were twenty-nine deaths from the disease, which is still spreading.

AN ALPENA MIRACLE.

MRS. JAS. M. TODD, OF LONG RAPIDS, DISCARDS HER CRUTCHES.

In an Interview with a Reporter She Reviews Her Experience and Tells the Real Cause of the Miracle.

(*From the Argus, Alpena, Mich.*)

We have long known Mrs. Jas. M. Todd, of Long Rapids, Alpena Co., Mich. She has been a sad cripple. Many of her friends know the story of her recovery; for the benefit of those who do not we publish it to-day.

Eight years ago she was taken with nervous prostration, and in a few months with muscular and inflammatory rheumatism. It affected her heart, then her head. Her feet became so swollen she could wear nothing on them; her hands were drawn all out of shape. Her eyes were swollen shut more than half the time, her knee joints terribly swollen and for eighteen months she had to be held up to be dressed. One limb became entirely helpless, and the skin was so dry and cracked that it would bleed. During these eight years she had been treated by a score of physicians, and has also spent much time at Ann Arbor under best medical advice. All said her trouble was brought on by hard work and that medicine would not cure, and that rest was the only thing which would ease her. After going to live with her daughter she became entirely helpless and could not even raise her arms to cover herself at night. The interesting part of the story follows in her own words:

"I was urged to try Dr. Williams' Pink Pills for Pale People and at last did so. In three days after I commenced taking Pink Pills I could sit up and dress myself, and after using them six weeks I went home and commenced working. I continued taking the pills, until now I begin to forget my crutches, and can go up and down steps without aid. I am truly a living wonder, walking out of doors without assistance.

"Now, if I can say anything to induce those who have suffered as I have, to try Pink Pills, I shall gladly do so. If other like sufferers will try Pink Pills according to directions, they will have reason to thank God for creating men who are able to conquer that terrible disease, rheumatism. I have in my own neighborhood recommended Pink Pills for the after effects of la grippe, and weak women with impure blood, and with good results."

Mrs. Todd is very strong in her faith in the curative powers of Pink Pills, and says they have brought a poor, helpless cripple back to do her own milking, churning, washing, sewing, knitting and in fact about all of her household duties, thanks to Dr. Williams' Pink Pills.

Dr. Williams' Pink Pills contain all the elements necessary to give new life and richness to the blood and restore shattered nerves. They are for sale by all druggists, or may be had by mail from Dr. Williams' Medicine Company, Schenectady, N. Y., for 50c. per box, or six boxes for $2.50.

Value of Our Cereal Crops.

The report of the statistician of the agricultural department concerning the area, product and value of the cereal crops for 1894, which has recently been published, contains some very significant figures. The report states that the corn crop of the year is one of the lowest on record, the yield per acre being but 19.4 bushels. The area harvested in the corn-producing states has been reduced by severe drought and dry winds to 62,582,000 acres from the 76,000,000 acres planted. The crop has been about 1,212,770,000 bushels, and the estimated value is fixed at $354,719,000. The wheat crop is slightly above the average. The entire product of the country is 460,267,416 bushels, which is valued at $225,902,025. This represents the entire product of [illegible] 34,882,436 acres. The rate of yield has been [illegible] 13.2 bushels per acre, and the average value per bushel 49.1 cents. The estimates of the area, product and value of the other crops are as follows:

The estimates for oats are: Area, 27,023,553 acres; product, 662,086,928 bushels; value, $214,816,920; yield per acre, 24.5 bushels.

Rye—Area, 1,944,780 acres; product, 26,727,615 bushels; value, $13,394,476.

Barley—Area, 3,170,602 acres; product, 61,400,463 bushels; value, $27,134,127.

Buckwheat—Area, 789,232 acres; product, 12,668,200 bushels; value, $7,040,230.

Potatoes—Area, 2,737,973 acres; product, 170,787,338 bushels; value, $91,526,787.

Hay—Area, 48,321,272 acres; product, 54,874,408 tons; value, $468,578,321.

Tobacco—Area, 523,103 acres; product, 406,678,385 pounds; value, $27,760,739.—*Scientific American.*

Stuffed Beefsteak.

Vary the old methods of cooking steak by trying this. Make a nice dressing as for turkey or chicken; lay it in steak, roll and tie at both ends. Put in pan as a roast in a little cold water. Add a lump of butter, put inside the stove and baste frequently. Thicken gravy with bread crumbs and season.

Disinterested Kindness.

"Won't you have another piece of pie, Mr. Claverly?" asked Tommie.

"Thank you, Tommie," replied Mr. Claverly, "it's very kind of you."

"Oh, that's all right," returned Tommie, with energy. "I'm a-lookin' out for myself, too. Ma said if it was necessary to cut another pie, I could have two pieces."—*Harlem Life.*

An Important Difference.

To make it apparent to thousands, who think themselves ill, that they are not affected with any disease, but that the system simply needs cleansing, is to bring comfort home to their hearts, as a costive condition is easily cured by using Syrup of Figs. Manufactured by the California Fig Syrup Co.

Good address and pleasing manner always express a truth to best advantage.

The Standard

remedy for all stomach and liver complaints is Ripans Tabules. One tabule gives relief, but in severe cases one should be taken after each meal until the trouble has disappeared.

Beware of Ointments for Catarrh That Contain Mercury,

as mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure to get the genuine. It is taken internally, and is made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free.

☞ Sold by Druggists, price 75c. per bottle.

For Whooping Cough, Piso's Cure is a successful remedy.—M. P. DIETER, 67 Throop Ave., Brooklyn, N. Y., Nov. 14, '94.

Mrs. Winslow's Soothing Syrup for children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c. a bottle

Karl's Clover Root, the great blood purifier, gives freshness and clearness to the complexion and cures constipation. 25 cts., 50 cts., $1.

If afflicted with sore eyes use Dr. Isaac Thompson's Eye-water. Druggists sell at 25c per bottle.

Metallic Carpets.

Lowell parties are reported to be experimenting with a process for making metallic yarns for use in carpets. The process consists of a foundation of a metal coating on an inferior surface, and weaving the strands in certain proportions. The object is to secure greater durability and strength than it is possible to obtain from the use of yarns made from our animal or vegetable fibers. A non-oxidizable metal is employed and this is dissolved and applied to the surfaces of threads, rendering them like metal in appearance and general characteristics. The metallic composition is composed of aluminium, borax, alum, litharge and wax. These compounded with white lead and one or two other substances produce a metallic coating that it is as flexible and soft as common paint would be, yet to all appearances the covering is as metal, very much resembling aluminum. Various substances can be used for the core or body of the thread, among others wood pulp, jute, cotton, flax, etc. The metallic coating is applied to the yarns automatically in a device consisting of a chamber in which the ingredients are put, and through which the yarns are drawn, the coating adhering to the surface of the threads.—*Industrial World.*

Columbus and the Historic Egg.

At last science has demonstrated how our discoverer made his egg stand on end and secured the means by which to make his expedition a success.

The egg was first laid down on its side on a plate and the dish moved about with the hand in a circle till the egg catches onto the movement and begins to rotate on a sidewise axis; as the speed is made to increase it is gradually brought upon its tip end, spinning like a top, when the plate can be placed on the table with the egg on end in a condition that would well illustrate the earth on its polar axis.

The Greatest Medical Discovery of the Age.

KENNEDY'S Medical Discovery.

DONALD KENNEDY, OF ROXBURY, MASS.,

Has discovered in one of our common pasture weeds a remedy that cures every kind of Humor, from the worst Scrofula down to a common pimple.

He has tried it in over eleven hundred cases, and never failed except in two cases (both thunder humor). He has now in his possession over two hundred certificates of its value, all within twenty miles of Boston. Send postal card for book.

A benefit is always experienced from the first bottle, and a perfect cure is warranted when the right quantity is taken.

When the lungs are affected it causes shooting pains, like needles passing through them; the same with the Liver or Bowels. This is caused by the dirt being stopped, and always disappears in a week after taking it. Read the label.

If the stomach is foul or bilious it will cause squeamish feelings at first.

No change of diet ever necessary. Eat the best you can get, and enough of it. Dose, one tablespoonful in water at bedtime. Sold by all Druggists.

WALTER BAKER & CO.

Largest Manufacturers of HIGH GRADE PURE, HIGH GRADE COCOAS AND CHOCOLATES On this Continent, have received HIGHEST AWARDS from the great Industrial and Food EXPOSITIONS In Europe and America.

Unlike the Dutch Process, no Alkalies or other Chemicals or Dyes are used in any of their preparations. Their delicious BREAKFAST COCOA is absolutely pure and soluble, and *costs less than one cent a cup.*

SOLD BY GROCERS EVERYWHERE.

Hypnotization.

This growing force; at first a vague, laughed at fad; in the hands of the charlatan, a humbug and a nuisance; yet has more potency than we probably ever dream of. "Hypnotization," says Binet, "can be produced by strong and sudden excitement of the senses. The patient becomes hypnotized, and hence obedient to the hypnotizer." Bovis Sidas in The Atlantic Monthly for February, attributes mob cruelty and disturbance to hypnotism. "The mob is hypnotized by a strong, sudden action, and becomes for a time obedient to him who hypnotized it; that is, to the ring leader, to the hero." Again Krafft-Ebing tells of a peculiar state, namely, fascination. "In this state the patient feels herself to be a pure automaton, and knows herself as absent from the body, existing only as an image in the experimenter's eye. This disappearance of the consciousness of personality is of great interest." A similar state but of less intensity, we find in the mob when fascinated by its hero; something approaching the hypnotic state of fascination. Again we find in our courts that the person who actually put to death another was acquitted of the crime while the hypnotizer under whose spell the act was done was convicted and punished as the real criminal. We sincerely hope, however, hypnotic influence will not be added to that other and threadbare legal fraud, insanity, to further "cheat the gallows of its dues."

Another prominent investigator on hypnotism is Professor Alfred S. Warthen, demonstrator of medicine in the University of Michigan. According to that eminent authority, The Medical News, some remarkable results proceeded from Professor Warthen's experiments with music on the [illegible]. The patient was first mesmerism. [illegible]mer's "Ride of the [illegible]" hypnotized and Wag[illegible] at him or the Walkure" was played [illegible] the piano. Immediately the subject showed intense excitement; appeared to be in great agony and he broke out in profuse perspiration. On awakening from his trance, the patient declared that he had not perceived the music as sound, but as feeling; as if he were riding furiously through the air.

Another extraordinary effect was produced on a hypnotized patient by suddenly changing from the music of Wagner to other and inferior strains. "The subject's face became ashy pale, the pulse dropped from 120 to forty beats per minute and became irregular, soft and small; the respirations were decreased in number and became sighing in character. On being awakened the subject said he had been oppressed by a horrible fear because everything had suddenly seemed to come to an end." The inference is perfectly plain. Professor Warthen has established the fact that devotees of music drama are mesmerized and incapable of independent thought or emotion while the drama is being enacted.

The memory of Wagner just as fully hypnotizes the German as the photograph of the diabolical Svengali influenced Trilby long after his death.

Do You Wish the Finest Bread and Cake?

It is conceded that the Royal Baking Powder is the purest and strongest of all the baking powders.

The purest baking powder makes the finest, sweetest, most delicious food. The strongest baking powder makes the lightest food.

That baking powder which is both purest and strongest makes the most digestible and wholesome food.

Why should not every housekeeper avail herself of the baking powder which will give her the best food with the least trouble?

Avoid all baking powders sold with a gift or prize, or at a lower price than the Royal, as they invariably contain alum, lime or sulphuric acid, and render the food unwholesome.

Certain protection from alum baking powders can be had by declining to accept any substitute for the Royal, which is absolutely pure.

Smoking and Sense.

Edison says that when he is busy and deeply absorbed in his work he consumes about twenty cigars a day; when he is less active mentally, about ten. They are always strong cigars. The inventor says that this excessive smoking has never, so far as he can discover, done him any harm, and if it did he would be certain to stop the habit. His family has been one of smokers, his grandfather, who lived to be 108, having been an inveterate smoker and a chewer of tobacco as well.—*Public Opinion.*

Mrs. Strongmind—What would the men say if 1,000,000 women should rise in their righteous wrath and demand the ballot at the point of the bayonet?

Mr. Strongmind (abstractedly)—Oh, rats, I suppose.—*Truth.*

THE ONWARD MARCH

of Consumption is stopped short by Dr. Pierce's Golden Medical Discovery. If you haven't waited beyond reason, there's complete recovery and cure.

Although by many believed to be incurable, there is the evidence of hundreds of living witnesses to the fact that, in all its earlier stages, consumption is a curable disease. Not every case, but *a large percentage of cases,* as we believe, fully [illegible] per cent. are cured by Dr. Pierce's Golden Medical Discovery, even after the disease has progressed far as to induce repeated bleeding from the lungs, severe lingering cough, copious expectoration (containing the crude matter), great loss of flesh (including wasting emaciation and weakness of flesh and [illegible]). Do you doubt [illegible] weakness, reported [illegible] that hundreds of such cases [illegible] to us as cured by "Golden Medical Discovery" were genuine cases of that dread and fatal disease? You need not take our word for it. They have, in nearly every instance, been so pronounced by the best and most experienced home physicians, who have no interest whatever in misrepresenting them, and who were often strongly prejudiced and advised against a trial of "Golden Medical Discovery," but who have been forced to confess that it surpasses, in curative power over this fatal malady, all other medicines with which they are acquainted. Nasty cod-liver oil and its filthy "emulsions" and mixtures, had been tried in nearly all these cases and had either utterly failed to benefit, or had only seemed to benefit a little for a short time. Extract of malt, whiskey, and various preparations of the hypophosphites had also been faithfully tried in vain.

The photographs of a large number of those cured of consumption, bronchitis, lingering coughs, asthma, chronic nasal catarrh and kindred maladies, have been skillfully reproduced in a book of 160 pages which will be mailed to you, on receipt of address and six cents in stamps. You can then write those cured and learn their experience. Address WORLD'S DISPENSARY MEDICAL ASSOCIATION, Buffalo, N. Y.

SHE WAS BLIND.

A blindness comes to me now and then. I have it now. It is queer, I can see your eyes but not your nose. I can't read because some of the letters are blurred; dark spots cover them; it is mighty uncomfortable.

I know all about it; it's DYSPEPSIA. Take one of these; it will cure you in ten minutes.

What is it?

A • Ripans • Tabule.
